Hancock County is entitled to seven (7) delegates to the State Convention.

The several precints of Hancock County are entitled to the following delegates in the County Convention to be held in Garner on the 17th of April 1920, to-wit: One delegate for each pre- cindt and in addition one delegate for 20 or major fraction thereof of the vote cast for W. L. Harding for Governor at the general election held in November 1918.

	Votes Cast	Delegates
Amsterdam	85	5
Avery	71	5
Boone	48	3
Britt	236	13
Bingham	39	3
Concord	164	9
Corwith Pct	18	2
Crystal	47	3
Ell	53	4
Eilington	41	3
Erin	47	3
Garfield	27	2
Liberty	15	2
Magor	89	5
Madison	44	3
Orthel	55	4
Twin Lake	34	3

Township Committee men will pleare see that caucuses are held on the above named date.

Ladies are permitted to attend this convention for the purpose of selecting delegates, the same as the men can do.

[illegible] believe that unless a more general return to clover ductivity will certainly decline.

Be Sure Seed is Right.

Here are some of the things they say about sowing clover this spring.

Clover seed is high—probably 60 cents a pound at retail. Do not plant it unless you plant it right.

Have the seed tested. The state seed laboratory or the seed laboratory of the United States department of agriculture will do it. You can't af- ford to take a chance by not testing it.

Clover seed is most commonly sown on winter wheat in the early spring. This is ordinarily good practice, but if the wheat field was left rough in the fall the seed bed may not be fa- vorable and much seed may be wasted. Clover needs a seed bed that is firm below but fine and loose on top. Use a drill when possible. On loamy soil harrow the seed in on the wheat, but do not attempt it when the land is wet.

If farmers would take as much pains seeding clover as they do seed- ing alfalfa, there would be fewer clover failures.

Best Soil for Clover.

As a rule red clover will not do well on land that is "sour" either natural- ly or because it has been so long cropped that the lime in the soil has been used up. There are occasional exceptions. Clover has been known to do well on land that had a lime re- quirement of 1,400 pounds an acre but this land had been heavily ma- nured and fertilized. Usually clover wants soil that is neutral or nearly so. It is a safe statement that in most cases where clover goes out or fails to make a fair crop two tons of ground limestone an acre would help a great deal. In many cases this would make the difference between success and failure. In other cases lime may have to be supplemented with phosphoric acid or potash. The use of potash will not be warranted when the price is as high as it is, ex- cept in the rare case when this ele- ment is decidedly the limiting fac- tor. Lime, however, is fundamental. There is generally no use seeding red clover on "sour" soil.

Use for Alsike Clover.

If the farmer cannot lime and the land is worn or "sour," or if the land is poorly drained, low, and damp, alsike clover should be seeded. It is common practice now to mix the red clover with alsike for worn or part run-down land. Alsike likes lime, too, but it will make a crop on land that will not bring red clover. This is especially true if the soil is both "sour" and damp. Of course, so

Improvements

REUBER & ZINN REMODEL OFFICE

There is much activity in the vi- cinity of the Times office these days as Doctors Reuber & Zinn are re- modeling their office building. They are raising the old part up about two feet and are having a basement exca- vated and concrete foundation put in But this is not all; a brick wing will be built to the north of the main office room and will be used by Doctor Zinn in his work. Dr. Reuber will occupy the remaining part of the building and will have a modern X-Ray room fitted up as well as for his other chem- ical and mechanical machines. Work on the building is being upshed rap- idly and it will be no time at all be- fore the doctors are conveniently lo- cated in the remodeled office. How- ever, they are still occupying the office but are "up in the air" consid- erable. They will also have a place for their cars in the basement and will have an entrance from the rear.

HENRY LAU & SONS IN NEW BUILDING

Saturday Hery Lau & Sons re- moved the last boards from the front of their new brick implement building and the public saw for the first time the finished building. The building is sure a peach, has a fine large office room in the front, all plate glass and copper front, big display and store room back of the office and connected with it and a full basement under- neath, all cemented. The basement will be used for repairing cars and for a storage battery station and other kinds of work. The new build- ing is a great improvement over the old one and will also make business easier to handle.

KLEMME GROWS ACCORDING TO CENSUS

Carl Suckow has completed the job of taking the census and as a result finds that Klemme has a population of 468. The last census taken in 1915 shows that there were 404 natives here then so we have made some gains but not as much as was figurd. How- ever, when the census was taken in 1915 there were a lot of floaters in town but this time it seems as if about half the population were away on a vacation somewhere—anyway we will add a few more to it and call it an even six hundred; they all do it.

HATTIE M. ALDRIDGE ANNOUNCES FOR RE-ELECTION

In the political announcement col- umn of the Times you will find the announcement of Mrs. Hattie M. Ald- ridge for re-election to the office of Recorder. Mrs. Aldridge has given satisfactory srvice while she has been in the office for a little over a year now and so far she has no opposition in the field against her re-election. She should have the office again for another term as a reward for her faithful service to the county and we believe the voters will give her their loyal support in her campaign for a second term.

A LETTER FROM FORMER KLEMMEITE

We are publishing a letter from a former Klemme young man, Fred Reffenstein, who lived with his folks on the Dr. Zinn farme ast of town. It follows:

Standard, Alta.
March 31, 1920.

Mr. Ray Jorgenson,

Dear Friend Ray:

How are you? I am not as bad now, although I am not well yet. I just happened to think I would like to have the Klemme Times sent to me so I am enclosing a $2.00 bill for which I would like the paper sent to me at Standard, Alberta, Canada, as long as the two dollars will buy it.

We have a blizzard here today and is about twenty below. Half of the snow is gone so it may soon be spring. I suppose that the farmers are in the field by this time.

I had the flu this winter and all the folks had it too. The folks are all well.

Well Ray, as I am in a hurry, I'll close for this time. Best regards to all I know in Klemme.

Yours,
Fred Reiffenstein,
Standard, Alta., Canada

Why Stars Twinkle.

The so-called twinkling of the stars is chiefly an effect produced in our atmosphere upon the waves of light.

More Local

The Ladies' Aid of the Refo church was entertained at the ho of Mrs. H. Schuldt last Thursday a ternoon. Mrs. Dick Bamman of G ner came Wednesday evening to h her mother with the entertaime and returned to Garner Friday aft noon.

M. O. Hocum left laist Wednesd noon for Des Moines where he a tended a convention of grain deale from Iowa, the Dakotas, Minneso Nebraska and Illinois. $Many pron nent grain men and merchants w there who gave lectures and point to the ensembled grain men. He turned to Klemme Saturday.

As we are writing news copy w comes to us that Sylvan Johnson quite seriously ill with blood pois ing which he received a week or ago when he stepped on a rusty n We also hear that Ernest Schwicht berg is suffering from blood poison but we did not learn in what man he received it. We hope for the ra recovery of bto hgentlemen.

Mrs. Mille Smith received word Wednesday that her mother-in-law Des Moines had fallen down broke her shoulder blade, disloca her hip and other injuries wh caused her death. The lady was years old and the fall was more th she could recover from. Interm was made at Amsterdam Cemet east of Goodell last Friday.

Hugo Neff came over from Ma City Saturday for an over Sun visit with Klemme and Goodell r tives and friends. Some of the r who are working at the same plant where Hugo is employed w on a strike for higher wages and a result the plant was closed down a few days. Hugo's bunch, ab forty-five men, did not strike and their loyalty the superintendent g them a few days off and told them come back Monday with an incre in salary. Hugo says it don't pay strike and he was glad he did not on a strike with the other men.

Elmer Schmidt spent a few da the past week visiting at Garner.

Herman Coobs left last Wedn day for a few days visit with mother at McGregor, Iowa.

Heny Johnson, who was forme known here as Henry Linne, return to Klemme last week from fo moths' visit with his folks in Swede His change of name came abo w hen he joined the 88th Division a with which outfit he spent nine months in France. "Linnie" was h soldier name from the old country b when he was sworn in at Camp Dod he took over his real name of "John- son" and it was also recorded that way on his citizen papers which he re- ceived shortly after his discharge. Henry says he had a good time visi- ing in Sweden but that the United States was the best country in th world and he was anxious to get bac He says conditions are far bett there now than they were ten yea ago when he left and came here. A good laboring man receives abou fifteen marks ad ay in Sweden bu has to pay fifty marks for a pair o shoes and about three hundred mark for an ordinary suit of clothes and o top of all that he has to pay an in- come tax for every piece of money h earns.

HANCOCK COUNTY TO HEAD THE LIST

One of the state checkers who is going over the books at the court house at Garner says that Hancock county will be near the head of the list of the counties of the state in the number of automobiles per capita. This is a fair indication that Hancock county is one of the richest counties in Iowa.

When Living Was Cheap.

An investigator into the socia toms of Cleopatra's times gives c ter and verse in support of his con tention that living was exceptiona cheap in those supposedly luxuri days. Cleopatra could entertain Mark Antony during the time of his al courtship for a whole lot less than a working man can entertain his wife at a picnic party. Cleopatra could provide a sumptuous repast for two for about a dollar.

Taking It Out of Picturesque.

Curse of Modern Life.

To eat what you like, and all you like, may be a merry life, but it will be a short one. The curse of modern life is overfeeding.—Dr. Frank Crane.

Ups and Downs.

"The problem which confronts the modern housewife," said the would-be philosopher, "is how to raise children and keep down the cost of doing so."

Polite.

"Sir," said the considerate stick-up man, as he reached for his victim's watch, "I sincerely trust you will pardon me for taking your time."

Operatic Opulence.

"You must love art to pay such enormous salaries to grand opera singers." "I'm not sure," replied Miss Cayenne, "whether it indicates a love for art or an indifference to money."

The Stars and Stripes.

When the American flag is draped on a flat surface the stars should appear in the upper left hand corner if the stripes are horizontal; in the upper right hand corner if the stripes are vertical.

Mother Knew 'Em.

Applicant—"You see, mum, bein's as 'ow Hi 'ave been a-takin' keer of children all me life, Hi knows just 'ow to handle 'em." Mrs. Of de House (with a smile)—"I anticipate then, that you will have a howling success with mine, Mary."

300 Hide In One Tree.

At Ellerslie, where William Wallace was born, there is an oak which is 21 feet in circumference. One summer, when the tree was in full leaf, Wallace and 300 of his soldiers are said to have hidden away in its upper branches, so escaping capture by the English.

She Knew.

She had gone to the doctor for some medicine for her husband. "What is the nature of your husband's ailment?" asked doc. "To tell you the truth, doctor, I think it is a plain case of ill nature."

Temperament.

Technically, temperament means "the special type of mental constitution due to natural characteristics of the bodily organism. Broadly speaking, temperament is character—the mental make-up of a person, the way he is inclined to think and feel about things in general.

MAKING WAR ON INSIDIOUS FOES

Cabbage Grower Likely to Be Discouraged at Prospect of Fight.

CUTWORMS MOST INJURIOUS

Larvae of Number of Kinds of Medium-Sized Grayish or Brownish Moths Are Found in Garden Allowed to Grow Up in Weeds.

When the grower enters his well-kept garden, in which a day or two before he has set out a fine lot of cabbage or tomato plants, and finds that a goodly part of them have been cut off near the roots by some invisible and insidious foe, he is likely to become discouraged at the effort to fight the stealthy attacks of these nocturnal marauders, and to wonder whether the game is worth the candle, especially after the plants which he resets are attacked in the same manner.

If he is familiar with the habits of cutworms, however, he will, before replanting, make a search of the soil within a few inches of the base of the damaged plant, and will probably be rewarded by uncovering a smooth, greasy-looking, gray or brownish caterpillar from an inch to an inch and a half in length, the foe for which he is seeking.

Found in Weedy Garden.

Cutworms are the young or larvae of a number of kinds of medium-sized grayish or brownish moths, and are likely to be found wherever a garden has been allowed to grow up in weeds the previous season. They pass the winter as half-grown caterpillars buried in the earth, and in spring come forth with a several-months' appetite which they satisfy with the first edible vegetation that comes to hand, this often being the gardener's choicest transplanted vegetables. As the season goes on, they become mature and enter the ground, there undergoing the transformations which are completed by the issuance of the moth in midsummer.

As Preventive Measure Scatter Poison Bait Over Garden Before Setting Out Plants.

If the garden is known to have been weedy last season, the proverbial ounce of prevention may be exercised by scattering thinly over it, just before setting out the plants, a poisoned bait. This is prepared by mixing thoroughly a quart of dry bran with four or five tablespoonfuls of white arsenic or Paris green. It is then made into a wet mash by the addition of a quart or more of water, into which has been stirred a half cupful of cheap sirup or molasses. It may be scattered thinly over the field a day or two before planting, or will serve as a protection to the newly set plants if a little is sprinkled around the roots after wetting them down. Better results are secured by putting out poison after sunset, since cutworms begin to feed about dusk.

Poison Is Dangerous.

Care should be taken that this bait is scattered thinly, as it might be dangerous to children or domestic animals.

In small gardens, transplanted vegetables may be protected by surrounding their stems when setting them out with a somewhat stiff paper band extending from about an inch below the surface to two or three inches above. Tin cans with ends removed afford similar protection.

TREATMENT FOR SICK FOWLS

Weak or Ailing Hens Should Be disposed of at Once, or Separated and Treated.

Any weak or sick hens should be disposed of as soon as discovered, or separated from the flock and treated because they are not only likely to die but they are likely to infect other members of the flock with disease germs.

TWO STEMS OF CLOVER

Lime the land for clover.

A ton of lime on wheat in the fall will make two stems of clover grow where one grew before.

MOTOR TRUCKS VERY USEFUL

Bought by Farmer Not as Single-Purpose Machine, But for Variety of Uses on Farm.

It is only in the past two or three years that tractors have been used extensively as general-purpose machines. They were bought for and used principally for plowing, and, to quite an extent, for threshing and filling silos. Now they are used for harvesting, preparing the seedbed, drilling, hauling manure spreaders, and so on. The tractor, to be a paying investment on most farms, must be profitable for a variety of work.

So it is with the motor truck. The truck salesman lays special stress on the hauling of crops to market or shipping point. This is a very important use, but it is a long way from covering all the farm needs for a truck. The truck salesman's hauling-to-market argument is comparable to the earlier days of the tractor when it was sold around the plowing idea principally. Both the truck and tractor will be bought by the farmer not as single-purpose machines, but for their application to a variety of uses.

Truck Gathering Potatoes in Field.

The farmer's hauling requirements may be divided into two general classes: (1) Hauling on the road and (2) hauling on the farm. On most farms where trucks are used the hauling on the farm will constitute by far the greatest number of uses for a truck.—Power Farming.

STRAW ROUGHAGE FOR STOCK

That Obtained in Threshing Soy Beans Has Been Found to Be Satisfactory for Cows.

Soy bean straw which is obtained from threshing out soy beans for seed makes a very good roughage for all kinds of stock. It will not dry up cows, but on the contrary it has been found that it will increase milk production. It is a common practice in sections where the crop is grown extensively for seed to bale the straw after threshing and sell it to dairymen and stock feeders.

ESSENTIAL PIG POINTS

The essential points in the care and feeding of the brood sow and litter are—

1. The provision of comfortable farrowing pens.
2. Individual attention to each sow and litter at the time of harrowing.
3. Plenty of exercise and sunshine for young pigs.
4. Liberal feeding of the pigs on grain in addition to milk of the dam.

GENERAL FARM NOTES

The legumes are our most important crops.

* * *

Farming is a profession as much as a business.

* * *

Garden, chickens, bees, fruits and other sidelines are worthy of attention.

* * *

Some seed and manure might cover up that bare spot in the meadow or pasture field.

* * *

Hogs should never have damp sleeping quarters and their bedding should be changed often.

* * *

Examine clover and grass seed with a magnifying glass to see whether there are any noxious weed seeds in the lot.

* * *

Do not neglect the fences till planting time when it will be a difficult matter to spare the time required to repair them.

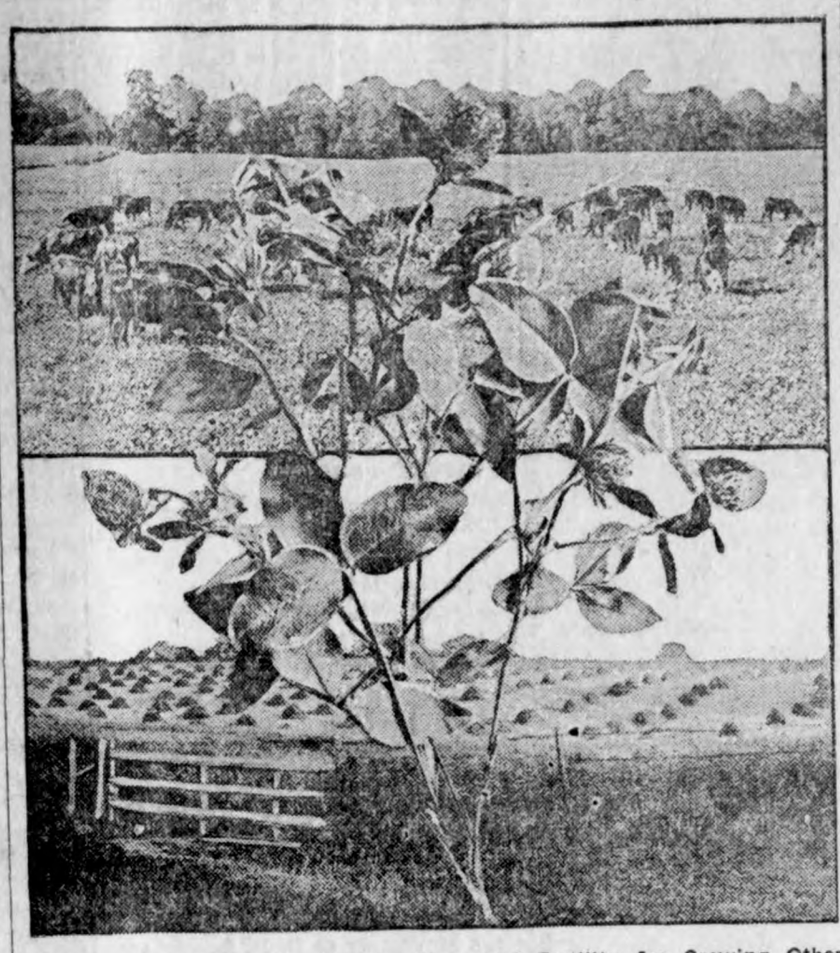
* * *

A good cellar under the house where it is cool in summer and warm in winter is one of the best places to operate an incubator that can be found.

* * *

The farm library goes with the farm office. The bulletins from your experiment stations and state college ought to be handy to the desk where you keep your papers and accounts.

CLOVER IS MOST ESSENTIAL CROP FOR BEST MAINTENANCE OF SOIL FERTILITY



This Pretty Plant Provides Pasture, Hay and Fertility for Growing Other Valuable Crops on Farm.

(Prepared by the United States Department of Agriculture.)

Clover is the most important crop on the farm for keeping up the land. Old? Yes. But perhaps you remember that once when the queen of France demanded something absolutely new in a frock the dressmaker replied, "There is nothing new—except what has been forgotten." Maybe the forage crops specialist of the United States department of agriculture had just that thought in mind when he made the statement just quoted. Farmers have been drifting away from clover. Apparently, some of them have forgotten the old truth that clover is the most important crop for keeping the land productive, and the clover story needs to be told again.

Crops demand a soil containing four things—organic matter, nitrogen, potash, phosphoric acid.

Of these four essential things, clover supplies two, organic matter and nitrogen. It cannot add phosphorus or potash, but it can return what it takes out. The most important point is that clover in the crop rotation will supply the nitrogen or most of it. Numerous demonstrations of that fact have been made by the state experiment stations. Land on which clover is grown in rotation with other crops makes better yields than land on which no clover is grown. The specialists believe that unless there is a more general return to clover productivity will certainly decline.

Be Sure Seed Is Right.

Here are some of the things they say about sowing clover this spring.

Clover seed is high—probably 60 cents a pound at retail. Do not plant it unless you plant it right.

Have the seed tested. The state seed laboratory or the seed laboratory of the United States department of agriculture will do it. You can't afford to take a chance by not testing it.

Clover seed is most commonly sown on winter wheat in the early spring. This is ordinarily good practice, but if the wheat field was left rough in the fall the seed bed may not be favorable and much seed may be wasted. Clover needs a seed bed that is firm below but fine and loose on top. Use a drill when possible. On loamy soil harrow the seed in on the wheat, but do not attempt it when the land is wet.

If farmers would take as much pains seeding clover as they do seeding alfalfa, there would be fewer clover failures.

Best Soil for Clover.

As a rule red clover will not do well on land that is "sour" either naturally or because it has been so long cropped that the lime in the soil has been used up. There are occasional exceptions. Clover has been known to do well on land that had a lime requirement of 1,400 pounds an acre, but this land had been heavily manured and fertilized. Usually clover wants soil that is neutral or nearly so. It is a safe statement that in most cases where clover goes out or fails to make a fair crop two tons of ground limestone an acre would help a great deal. In many cases this would make the difference between success and failure. In other cases lime may have to be supplemented with phosphoric acid or potash. The use of potash will not be warranted when the price is as high as it is, except in the rare case when this element is decidedly the limiting factor. Lime, however, is fundamental. There is generally no use seeding red clover on "sour" soil.

Use for Alsike Clover.

If the farmer cannot lime and the land is worn or "sour," or if the land is poorly drained, low, and damp, alsike clover should be seeded. It is a common practice now to mix the red clover with alsike for worn or partly run-down land. Alsike likes lime, too, but it will make a crop on land that will not bring red clover. This is especially true if the soil is both "sour" and damp. Of course, soil can be so "sour" that even alsike will not grow. In such a case there is nothing for it but to lime or to quit clover.

On land that has lime but is otherwise poor and lacks organic matter, try sweet clover. It is no use sowing this on "sour" soil. It won't thrive. But with lime it is about the best clover for poor land. It will add organic matter and nitrogen and leave such a soil in better shape for the following crops. Sweet clover seed is cheaper than red and in many cases a farmer could profitably substitute sweet clover for red in the rotation.

The questions involved in the importance of clover and methods of getting a stand, use of lime, and sweet clover are only touched on here. Any state experiment station or the United States department of agriculture will send bulletins or additional information on request.

IS FARM PRODUCING FOODS FOR FAMILY?

One of Important Factors Determining Amount of Income.

Garden and Live Stock Are Usually Cared for at Times That Do Not Materially Interfere With Regular Farm Work.

Is the farm producing such of the family foods as are adapted to local conditions in ample quantities for the welfare of the family?

The value of the family living furnished directly from the farm is one of the important factors determining the amount of the income of the farm and the degree to which the farm business is safe and profitable, says the United State department of agriculture. This is especially true of the smaller farms.

The garden and live stock which supply the larger part of the family food are usually cared for at times that interfere comparatively little with the regular farm commercial enterprises, and by labor which otherwise would not be utilized. Further, it has been found that, up to a considerable size of farm business, when the family food is produced on the farm, this item, plus the fuel and shelter furnished by the farm, amount to an equivalent of the rent for the entire farm or interest on the whole farm investment.

DRAINAGE FOR GARDEN LAND

It Is Advisable to Thoroughly Drain All Soil Inclined to Contain Too Much Moisture.

Garden land inclined to be wet should be thoroughly drained before crops are planted upon it. If tile drains or open ditches cannot be provided, the next best thing is to plant the crops on slight ridges, so as to get their roots above the water table in the soil.

GENERAL FARM NOTES

Where there's the will there's a garden.

* * *

More farmers should understand accounting.

* * *

Oil the tractor magneto parts sparingly and use a light oil.

* * *

It has been definitely proved that potato blight can be prevented by spraying.

* * *

Every garden should have a hotbed in a sunny corner for raising early vegetables.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callous. Instantly it stops hurting, then shortly you lift that bothersome corn or callous right off, root and all, without one bit of pain or soreness. Truly! No humbug!—Adv.

Gossip is the mother-in-law of slander.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisitely scented face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Adv.

He is truly a shiftless man who is too lazy to shift for himself.

BILIOUS!

Quick! Get Liver and Bowels Right with "Cascarets"

Furred Tongue, Bad Taste, Indigestion, Sallow Skin, and Miserable Headaches come from a torpid liver and sluggish bowels, which cause the stomach to become filled with undigested food, which sours and ferments, forming acids, gases, and poisons. Cascarets tonight will give your bilious liver and constipated bowels a thorough cleansing and straighten you out by morning. Cascarets never sicken or inconvenience you like nasty Calomel, Salts, Oil, or griping Pills. They work while you sleep.—Adv.

Lots of people who are inclined to do good keep putting it off until tomorrow.

LOOK AT ASPIRIN

If the name "Bayer" is on tablets, you can get relief without fear.

When the Bayer Company introduced Aspirin over eighteen years ago, physicians soon proved it a marvelous help in relieving Rheumatism, Colds, Headache, Neuralgia, Earache, Toothache, Lumbago, Neuritis, Aching Joints, and Pain in general.

To get this same genuine, world-famous Aspirin, you must ask for "Bayer Tablets of Aspirin," marked with the "Bayer Cross." You will find safe and proper directions in every unbroken package.

Handy tin boxes of 12 tablets cost only a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Cold facts often cause hot arguments.

There is a joy in not knowing everything.

Nerves All Unstrung

"But Doan's Made Life Again Worth Living," Says Mrs. Harris

"I was in excellent health until my kidneys weakened," says Mrs. N. A. Harris, 1009 Indiana St., Neodesha, Kansas. "The kidney secretions burned like fire and passed so often I couldn't get a moment's rest. My back ached and for days at a time I was confined to bed, fairly tortured with the sharp pains. I couldn't stoop without fairly screaming with misery.

Mrs. Harris

I lost strength and weight and was so weak I became a nervous wreck. Headaches and dizziness added to my distress. My sight blurred; limbs, hands and face were swollen and puffy sacs came under my eyes. I lost hope of being well again.

Finally a neighbor brought me a box of *Doan's Kidney Pills*, and later I got several boxes. My troubles began to lessen and soon I could sleep all night and wake up refreshed and happy and life was again worth living. I am now a strong, healthy woman and owe my health and happiness to *Doan's*.

Sworn to before me.

J. A. DEARDORFF, Notary Public.

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

Under the Spreading Chestnut Tree--

Honest now—can't you look back a few years and re-how sincerely you longed to be a blacksmith—whereas Mother had it all planned that you were going to make sparks fly from the pulpit.

American boys have always been strong for strength—and you being a native son, were no different then the boys of today.

Perhaps one reason for our marked success in Boys Clothes is that we know the ways and wishes of a boy from personal expeaience, a good memory plus a de luxe edition of Mark Twain.

Your son deserves this kind of clothing consideration in his next suit.

We're ready anytime.

STATE NEWS

Gleaned from many fields and summered for busy readers

Iowa has 12,000 tractors or one for every 16 farmers.

The 1920 automobile tax in the state of Iowa will amount to approximately $8,000,000.

William Dunkel, the first white male child born in Iowa City, is dead at his home, aged 79.

Cedar Falls has a population of 6,316 acording to the 1920 census. This is an increase of 1,304 or 26 per cent since 1910.

Mrs. Mary Norris, aged 91, died at the home of her daughter in Des Moines. Mrs. Norris was a pioneer resident of Iowa having lived here over 65 years.

A flock of Buff Rock hens, numbering 190 and owned by Mrs. Henry Parsons of Fairfield, and kept under ordinary farm conditions, brought their owner returns to the amount of $590.18 in one year.

The Iowa State Conservation Society has acquired a 2000-acre park in the Blue Lake district of Monona county. Another site in Tama county was given by Mrs. F. A. McCornack of Traer.

Counties of Iowa situated along the route of the North Iowa Pike continue to lead all the rest of the state in the matter of permanent road improvements and it seems certain now that these counties will be the first to have their paving completed.

To help keep fertility and to get the land in good condition for the following crops Iowa farmers should put in many acres of red, sweet or alsike clover this spring with an early oats as a nurse crop and on soil in good condition for the growth of crops.

Plans are under way at Indianola for the construction of a new Methodist church to cost $100,000. One part of the Methodist centenary program provides for a gift of $20,000 for the erection of modern churches in Iowa towns in which colleges are located, providing $80,000 is raised by the church itself. This amount has been raised by the church in Indianola.

Twenty-three members constitute the boys' and girls' pig club in Floyd county this year. The animals were purchased recently at from $100 to $170 each. It is planned to hold a sale next fall when the animals will go to the highest bidder. Practically all of the sows were bought at public sales. They were distributed by lot to the members. Most of the sows were young ones.

One thousand feet of 5-inch tile on January 1 of this year could be purchased for 35.9 bushels of corn In 1911, 55.5 bushels of corn were necessary to buy the same amount while in 1913, 61.1 bushels were required. The greatest trouble Iowa farmers experience at present is the inability of the factories to fill the orders on hand, and altho the prices are high they are not out of reason with other commodities.

For a number of years the farmers have been building silos in Iowa so that the use of them has become very well established. They have found that the use of silage is a big factor in the feeding of their live stock and it is a common thing now to see a silo on a majority of farms. Wherever a farmer has found his first efforts at storing ensilage a success, he has also found in many cases that one silo does not meet his needs and he has erected a second one.

The Poland China breeders of Jefferson county held their first consignment sale recently, and while no record breaking prices were received, one man's average was $94 and another breeder averaged $88 for his stock. The Duroc Jersey breeders held a later bred sow sale and the average at this sale was also very satisfactory. The average in both of these sales ran about $70. Recently 44 head of bred gilts were shipped from the county to parties in Wisconsin.

Bee men of Iowa should standardize their apiaries to such an extent that when a specialist comes to their county less time will have to be spent in talking and making the necessary change to increase production and better bees. They should standardize first by discarding box hives, hollow trees or logs, etc., for such things do not pay. Here is where the cheapest is not the best. Use a well made, preferably a 10-frame hive. The frames should be wired and fitted with full sheets of comb foundation for the brood chamber and the last, but not least, Italian bees. Come on, bee men, let's go!"

Chickasaw county is growing rapidly. Six hundred and eighty-two babies have gladdened homes in the last two years. That is a growth greater than the census gives to some larger towns.

Because of its central location and because it is regarded as showing conditions typical thruout the state, Marshall county has been chosen as the first in the state for the activities of the Iowa Farm Bureau Federation in conducting a campaign to determine the cost of production on the farm.

A few farmers have begun operations in the fields, discing, plowing, working down corn stalks and spreading fertilizer. There is still a small amount of standing corn to be gathered. A few of the farm women report little chicks and it is safe to say no less than a hundred incubators are going business at the various stands thru the State. Seed corn testing is going on and the germinating qualities of the corn seems to be exceptionally good.

If farmers of Story county will grow 100 acres of cane this year, the Ames Canning Company will put in a complete, modern sorghum plant.

The demand for farm hands in Iowa is increasing steadily despite the fact that the men are asking from $5 to $15 a month more than last year. The state employment bureau has sent 110 farm hands throughout the state during the last few days. Since January 1a total of 618 farm hands have been placed.

Goose lake, the mecca of hunters from central Iowa, eight miles north of Jefferson, will soon be a matter of history. The drainage project has been completed up to the lake, and the water now slowly vanishing thru the 30-inch tile. This lake covers about 800 acres and is from six to ten feet deep. About two years ago potash was found in the water of the lake, and estimates placed the value of the potash at close to $1,000,000 but the expense of obtaining a commercial product therefrom was prohibitive. Attempts to stop the drainage by injunction, have been made at different times without success.

At the time of the 1910 census, Iowa had 216,807 farms, averaging 156 acres. In total value of crops in 1918 Iowa with a product worth $821,920,000 was excelled only by Illinois. The cereals generally, dairy and market garden products, hay, wool, linseed, sorghum, and live stock of all kinds are very largely produced. Iowa is first in oats and corn. The 1918 crops included 375,624,000 bushels of corn; 229,572,000 bushels of oats; 4,286,000 tons of hay; 9,648,000 bushels of potatoes; 11,340,000 bushels of barley; and 19,650,000 bushels of wheat. Other grains are also largely grown. Grapes grow well in the southern part of the state, and fruit culture is increasing in all sections of Iowa each year.

The state park board has formally accepted a tract of some twenty or twenty-five acres lying four and a half miles northeast of Traer for a state park. The tract has been presented to the state by Mrs. F. A. McCornack of Sioux City, who inherited it from her parents, Mr. and Mrs. T. F. Clark. The Clarks were pioneers in Tama county and their old home farm has long been used as a public gathering place because of its natural beauty and the generous donation of the grounds to the public for picnics and similar events. It is probable the state will improve the grounds with a baseball diamond and will provide water and convenience for camping. Mr. McCornack of Sioux City visited the town of Traer recently and perfected the transfer of the land to the state.

Iowa, located as it is in the corn belt, and because of the favored position it holds, stands at the top of the corn producing states. Not only have her farmers found that the crop of field corn can be most advantageously grown, but in recent years certain farmers have been reaping a big profit from pop corn, which produces most satisfactorily in most sections of the state. Then, too, about 20 per cent of all the canned sweet corn in the United States is packed in Iowa. Pop corn, however, has become an attractive crop to many farmers who have raised it most profitably in recent years and are planning on increased acreage the coming year. There is danger, though, of overstocking the market, because of the limited uses to which pop corn may be put. While field corn always has a cash value and can be fed profitably to stock in case the market does not suit the producer, pop corn has its limitations.

Clinton county may well be termed the birth place of the Iowa Farm Bureau movement, as the first county agent to be employed in Iowa was M. L. Mosher and he began his duties there Sept. 1, 1912. About this time Congress made an appropriation for co-operative demonstration and farm management work in counties thruout the country and Clinton county, through the assistance of the late Hon. I. N. Pepper, then in Congress, and the Clinton Commercial Club, together with a number of progressive farmers, among them J. W. Coverdale of Elwood, now secretary of the State Federation, formed a Farm Improvement Association with headquarters in that county. For five years after Clinton county formed their Farm Bureau this movement had a slow but steady growth in Iowa and in not one single instance did any county after once taking up the work drop it. Instead each year has seen its growth gradually increasing.

Four calves in one year is the record of a cow owned by L. H. Johnson of Belmond. The cow had twin calves April 1, 1919, and another set was born March 23. It is thought this is the world record for one year's breeding.

Lack of Iowa farm labor is already coming to a critical stage. It is estimated that the shortage now numbers 1,000, and Iowa labor has failed to come up to the scratch in making application, though the wages offered are said to be the highest paid anywhere in the United States.

We have just received a

MOLINE UNIVERSAL Tractor

It solves the farm help problem!

One man controls both tractor and implement from seat of implement, and is so easy to handle a woman or boy can operate it. This tractor can be used for plowing, discing, planting, cultivating, etc. or can be used for belt work as filling silos etc.

We have also just received three carloads of Moline Rock Island and Hayes farm machinery of all kinds.

See the 9-16 Tractor on our floor which is fully equiped with self starter and electric lights.

Henry Lau & Son
Farm Implements ***Klemme, Iowa***

Fix 'em up!

Right now Mr. Farmer is the time for you to look over your machinery and see if it needs any repairs or new parts. We always have on hand a full supply of new repair for John Deere, International, Emerson, and Janesville farm implements. Fix 'em up now and don't wait until you need the machine.

Have you been in to see our line of

Endgate Seeders
Broadcast Seeders

Now is the time to buy a seeded, don't take chances on an old seeder which gives poor service.

The House of Whispers

By WILLIAM JOHNSTON

Copyright by Little, Brown & Co.

"LEFTY MOORE'S WIFE."

Synopsis.—Spalding Nelson receives an invitation to dinner from his great-uncle, Rufus Gaston. On the way he meets Barbara Bradford and renders her a service. She lives in the same apartment building as the Gastons. They go there together. Gaston and his wife are going to Maine for a trip and ask Nelson to live in their apartments. He accepts. The Gastons tell him of mysterious noises about the apartment—"whispers" and noises that have scared them. Going to the apartment a few days later Nelson again meets Barbara, his accidental acquaintance. Nelson meets the building superintendent, Wick, and instinctively dislikes him. In a wall safe he finds a necklace of magnificent pearls. Next day Nelson finds the pearls have disappeared from the wall safe. His first idea of informing the police is not acted upon because of peculiar circumstances. He has been discharged from his position without adequate explanation or reason, and feels himself involved in something of a mystery. He decides to conduct an investigation himself. That night Barbara signals from the window of her apartment, which is opposite his, and they arrange a meeting for next day. In the morning he finds a note in his room, asking him why he had not informed the police of the loss of the jewels. Barbara tells Nelson her sister Claire had some years before made a run-away marriage with an adventurer, from whom she was soon parted, and the marriage had been annulled. Claire is engaged to be married and someone, knowing of her escapade, has stolen documents concerning the affair from the Bradford apartment and is attempting to blackmail the Bradfords. Nelson and Barbara exchange confidences about the "whispers," mysterious notes and other queer doings, which are much alike in both apartments. Nelson encounters more mysteries. He takes Miss Kelly, the telephone girl, to dinner with the idea of pumping her.

CHAPTER VI.

—7—

Left alone for a moment by my companion, I sat there at the table in the crowded restaurant, idly watching the beautifully costumed women all about me, listening dreamily to the music of the orchestra, observing with interest the graceful gyrations of the occasional couple who sought the dancing floor in the center, when suddenly I was brought to myself by hearing a gruff voice saying:

"What'd you bring that crook in here for?"

"What do you mean?" I gasped in astonishment, looking up at a square-shouldered man with a neatly trimmed black mustache who was standing beside my table.

"It's you I mean," he announced. "Don't you know you can't bring that kind of people in here?"

As explanation for my presence there in the White room of the famous Hundredth hotel, let me say that my investigations into the perplexing chain of mysterious circumstances in which Barbara Bradford and I seemed to be each day becoming more firmly involved, had finally led me to deduce three different theories, each more or less plausible, and each involving an entirely different set of persons.

There were certain happenings and circumstances that made me sometimes wonder if the whole thing were not a base plot on the part of my great-uncle Rufus, perhaps influenced by a desire for revenge or perhaps led on by an insane greed for still greater wealth.

Yet, on the other hand, there were those entries in his diary about the mysterious voices. Apparently, too, his wife and Mrs. Burke had heard them.

Did it not seem more likely that the arch plotter was Claire Bradford's ex-husband?

This theory seemed far more tenable. While the Bradfords had heard nothing from him for several years, the publication of Claire Bradford's engagement might have attracted his notice and inspired him to an attempt at blackmail. Yet how could he gain access to the wall safe where the divorce papers were kept, or how could he be dropping notes on the floor of Barbara Bradford's bedroom? How could he have stolen the Gaston pearls? It seemed incredible but still my thoughts kept returning to the possibility of his directing Claire Bradford's actions through hypnotic control. Once he had had influence over her sufficient to make her give up family, friends, home, everything, to marry him. Had he, in some way unknown to Barbara Bradford, regained his control over her sister and was he using her as the unconscious tool for his villainies? She could have gained access to my room by walking along the ledge when all the house was still. Yet this theory explained neither the theft of the pearls, my great-uncle's peculiar actions, my own discharge, nor the mysterious noises in the apartment. I had still a third theory.

Suppose a band of criminals was located in the apartment house on the floor above the Bradfords and me?

Access to either apartment would not be difficult. By short rope ladders they could easily reach either set of rooms. They would be so located that there would be little difficulty for them to devise mysterious sounds for terrifying the people in the apartments below. I recalled that in every case the voices and the footsteps seemed to come from somewhere up near the ceiling. Of course it seemed preposterous that a criminal band would find lodging in a luxurious apartment house like this, yet, why not? Tenants in these buildings knew little about each other and cared less. There was no exchange of neighborly visits. Once having gained access to such a building by forged references, so long as they paid their rent promptly, no one in the building would bother his head about the character of any of the other tenants.

This last theory seemed the most plausible. Besides it was the easiest to work on. It ought not to be difficult to ascertain who lived in the two apartments above. Undoubtedly my best source of information would be Nellie Kelly, the telephone operator. Perhaps, too, she might be able to inform me of my great-uncle's whereabouts. More than likely he had left a forwarding address for his mail with her.

With a letter I had written to my mother, I descended to the main floor and began a conversation with Miss Kelly by asking where was the nearest place that I could buy stamps. As we chatted I began complaining how lonely it was in the apartment and wound up by inviting her to dine with me that evening.

I had anticipated a ready acceptance of my invitation and was amazed to find it firmly refused. In a much confused manner she advanced a dozen reasons, or rather pretexts. She did not go out with the people of the house. Her mother would not like it. She did not know me well enough. Mr. Wick would discharge her if he heard about it.

From an unexpected source, though none the less unwelcome, I found an ally. Mr. Wick himself bobbed up from somewhere, apparently having overheard enough of our conversation to know what it was abut.

"Why, of course, Mr. Nelson," he began in an ingratiating manner that was most repellent to me, "Miss Kelly'll be glad to go to dinner with you. It's part of her business to make things pleasant for the tenants."

It seemed to me that the girl's eyes flashed defiance at him and that she was still inclined to refuse, and I was about to explain resentfully that my invitation was not issued on a business basis, when into Wick's face came an ugly look, something almost threatening.

"Of course Miss Kelly will be glad to go with you," he repeated sharply.

"Certainly," said the girl quickly, before I had a chance to speak, "if Mr. Wick thinks it is all right, I will be glad to go."

Her acceptance did not ring true. I was convinced that it was unwillingly given under some sort of compulsion from the odious Wick.

I met her, at her suggestion, in the parlor of one of the less pretentious hotels. In the hour that had elapsed since she left the apartment, she had exchanged her neat black working suit for more modish clothes. After one quick glance at her transformed appearance my mind was quickly made up as to what sort of a restaurant to take her. It was manifest that she was of the type that would enjoy to the utmost the costly whirl of the fashionable cafe of the moment. It was my purpose to give her such a delightful evening that she would be wishing to spend others in the same way, for I felt certain that she, perhaps better than anyone else, could supply me the information I wanted about the tenants in the building. I was sure it would be well worth my while to win her good graces, cost what it may. Calling a taxi, I bade the chauffeur take us to the "White Room," the very latest fashion in restaurants, where hordes of hectic pursuers of pleasure were wont to assemble to dine and dance. I observed the gleam of satisfaction that came into her eyes as she heard me mention our destination.

At first we talked, in Broadway fashion, of the theaters and restaurants, of the place we were in, of the people at the tables about us, but gradually I led the conversation to Miss Kelly herself and to her work in the apartment.

"It was funny, wasn't it," I said, "about Mr. Wick insisting on your coming with me? I had a notion he didn't like me."

Hitherto my companion had been most vivacious, chatting merrily, flashing back at my sallies with clever bits of that slangy repartee of which most of the metropolitan business girls are such clever mistresses. At my last remark a quick change came over her face. It was as if a mask had been set up between us behind which she was hiding from me.

"I guess he likes you," she answered guardedly. "I never heard him say one way or the other."

"While we're talking about the apartment," I went on, "did my great uncle happen to leave a forwarding address with you? There are some things I want to send him—some pearls they left behind—and he has not written me yet where his address will be."

I had not intended to mention the Gaston pearls. I had slipped that phrase in on the spur of the moment, but little was I prepared for the astounding effect my words had upon her.

"The pearls!" she gasped, turning white. "You're going to send him the Gaston pearls!"

There was a note of amazement, of incredulity in her tone.

"Excuse me," she said, rising unexpectedly, "I gotta telephone."

Before I could gather my wits together she had vanished, leaving me sitting there, staring after her in dismay. What did she—the telephone girl—know about the Gaston pearls? How could she possibly know that they were missing? I had told no one—no one except Barbara Bradford—about the rifled wall safe. How could her excitement and perturbation be accounted for except by the fact that she knew of their loss? I was sitting there, puzzling over her mysterious conduct, when I became aware that a man was standing beside my table, glaring down at me. I looked up, expecting to see the waiter, or head

"You've Got Your Nerve," He Sneered at Me.

waiter. Instead it was a man in a dinner jacket, a stocky, broad-shouldered chap with a close-cropped gray mustache.

"You're got your nerve." he sneered at me. "Bringing a woman of that sort here."

"A woman of what sort?" I asked eagerly, surprised to find someone in a place of this sort who knew the Granddeck's telephone girl.

"Why, Lefty Moore's wife, of course."

"I don't understand," I replied, "I'm here with Miss Kelly."

"Oh, she told you that was her name, did she?"

"I know it's her name. She's the telephone girl in the apartment where I live—the Granddeck."

I could see his manner toward me change at the mention of my abode, but he was still insistent about the identity of my companion.

"How well do you know her?" he asked.

"Well"—I am afraid I colored, as I realized that my acquaintance with the girl was limited—"I've been living there for a week or so, and I've talked with her two or three times and—"

"I thought so," said my inquisitor. "There's nothing to it. She's Lefty Moore's woman all right. If I'd seen you come in with her, you'd never have got a table in this place."

"What is the matter with her? Who is Lefty Moore?"

An expression of amazement came into the man's face.

"Did you never hear tell of Lefty Moore, the cleverest three-time burglar there is in or out of Sing Sing? Fourteen years he got the last time, and it was quite a write-up the papers gave me for catching him."

It began to dawn on me then who the man was. He must be an ex-policeman employed as the restaurant bouncer or house detective.

"You're sure Miss Kelly and Lefty Moore's wife are the same person?"

"I've reasons for not forgetting her. She was with him that time when I took him. I've got the marks of her nails in my face yet. It's her all right, even if she has gone to work as Miss Kelly while Lefty's doing his stretch. She's a bad one, she is."

"Is she a crook, too?" I asked excitedly. I was trying to measure up the importance of this astounding bit of information. Already my deductions had convinced me that some band of criminals was in collusion with someone in the apartment who was carrying out their plots against the Bradfords and me. I had been thinking of an apartment surreptitiously tenanted by a criminal gang. How much more likely that an employee of the place was in the pay of the plotters! And now to learn that the telephone girl was, if not a criminal herself, at least the associate of criminals.

"She's got no record that I know of," the detective admitted, "but she couldn't be Lefty Moore's wife without being a crook herself."

"That helps explain things," I said more to myself than to him.

"Explains what?" he asked suspiciously.

"Look here," I said with a new determination. "There have been some mysterious happenings in the Granddeck, and I brought this girl here to try to pump her. I asked her a question or two, and she became much embarrassed and confused. She jumped up and said she was going to the telephone. Do you suppose that she saw you and recognized you?"

"Not a chance," said the detective.

"Well, I'd like to find out to whom she telephoned. Can you find out for me?"

"Sure I can, but you got to get her out of here."

"All right," I replied. "As soon as she returns to my table, I'll pay my check and we'll leave. I'll be back by and by and see if you've learned anything."

"Here she comes now," said the detective, hastily taking his departure, but I noticed that he had stationed himself behind some palms where he could watch the girl without being seen.

"Who was the fellow talking to you as I came up?" asked Miss Kelly curiously.

She was cool and collected now. Her telephone message—if she had been really phoning—seemed in some way to have fortified her.

"Oh, that fellow," I replied with assumed carelessness, "that was the manager of the place."

"What'd he want?"

"Nothing in particular. He just asked if everything was all right. Why?"

"He looked to me like a bull—like a detective I used to know," she hastily corrected herself.

Her slip in using the thieves' slang phrase served to aid in convincing me that my informant had been correct in his identification. I was as anxious now as the house detective to get her out of the restaurant, and summoning the waiter I hastened to pay my check.

"Let's stay for a couple of dances," she suggested.

"Sorry," I said, "but I can't dance"—mentally adding the words, "with you.'

"Let's go then," she said disappointedly, and to my surprise on the way out she renewed the subject of Mr. Gaston.

"You were asking if the old gentleman left a forwarding address. He didn't leave any with me. If you find out where he is, will you let me or Mr. Wick know? Mr. Wick wants to get in touch with him."

Something told me then it must have been Mr. Wick she had telephoned to. Probably she had informed him I had been asking about the Gastons' address and had consulted him as to what answer to give. Putting the girl into a taxi I paid her driver to take her home and hurried back into the hotel. I found the house detective—James Gorman, I learned his name was—waiting for me in the lobby.

"Was it to the Granddeck she telephoned?" I asked eagerly.

"It was 0909 Plaza. That's a private number. I called up information, and she wouldn't tell me where it was. I'll find out tomorrow, though. There's other ways besides through 'information.'"

"If you find out you'll phone me right away, won't you?" I asked him, giving him my card.

"And have Lefty Moore's wife listening in," he suggested. "Nothing doing, son. You'd better call me from a public pay station."

A night visit from a beautiful ghost.

(TO BE CONTINUED.)

Word to the Women.

It may not beget undue attention, but 240,162,943 needles were made in the United States last year. It would be pleasant mental recreation for a long evening to figure how many hours of labor, based on the proverb that a stitch in time saves nine, would have been saved the women of the nation if all these needles had been applied at the psychological moment.

First Gun of the Civil War.

On the 9th of January, in 1861, the steamship Star of the West was sent by the federal government from New York with supplies and re-enforcements for Fort Sumter, in Charleston harbor. When the Star of the West reached Charleston she was fired upon by Confederate batteries from the town and was obliged to turn back. This was the first actual gunfire of the Civil war

LAUGHS AT GREENLAND COLD

In His Primitive Abode, Eskimo Dwells in Comfort Through the Monotonous Arctic Winter.

The Eskimo of Greenland, no matter what his station in life may be, always has both a summer and winter home. The winter house is described by Roger Pocock in the Wide World Magazine as being a dugout with an upper structure built of turf and beams of driftwood. It has but one window, as winter in Greenland occurs during the four-month-long arctic night. Entrance to the one large room of which the house consists is gained through a long tunnel about five feet in height, in which the dogs live. In the rear of the living room is a raised dais on which the entire family sleep, and in the front part stands the stove. This stove consists of a hollow stone filled with seal oil in which burns a rag wick, which lights and heats the house and cooks the meals.

While You Wait.

A fur shop in one of the Japanese cities has the sign: "Ladies' and gentlemen's skins repaired while they wait."

A woman forgets all her troubles when she is wearing her new spring hat for the first time.

NOT MUCH STUDY INVOLVED

Grandma Evidently Didn't Think Highly of the Doings at Women's Debating Club.

Tiny Timothy had to be very quiet on certain days in the week. Sunday mornings were bad because then father had to study his lesson for the afternoon Sunday school. Tuesday evenings he had to tiptoe around while brother John studied his lodge ritual. Friday evenings sister Nellie went to a debating club and it was often preceded by the last look at her part in the debates.

Then one day mother announced that she had been invited to join a bridge club. Every one was anxious for her to join but little Timothy, who sighed: "Oh, mother, now will you have to study, too, before you go there? What do they recite at your club?"

Everybody smiled but dear old grandmother, who did not approve of bridge clubs. "Oh, she won't have to study much," she retorted tartly. "She can just listen at the first few meetings until she learns how to gossip like the rest of them."

A woman is really in a hurry if she says good-by that way.

The closer a man is the harder it is to touch him.

IS 700 Bushels of Corn Worth Saving?

Wouldn't you like to save 700 bushels of corn each time you fill your silo? In filling a 100-ton silo you put in about 700 bushels of corn when the ears are run in with the stalks.

With a JENNEY SILO-FILLER-HUSKER you can take the ears off, put them in the crib and still have silage with just as much food value and give you just as good feeding results.

Figure out how much 700 bushels of ear corn is worth at present market price—that's your saving.

Let us tell you all about this money-saving, money-making way of making silage. It is opening the eyes of farmers, Experiment Stations and stockmen everywhere.

You don't have to fill your silo at just a certain time—you can fill it and re-fill it from fall to spring. The saving pays for the JENNEY SILO-FILLER-HUSKER in a shortime. (4-D)

Now is the time to look into this money-saving, corn-saving plan. Come in and see us a bout it.

WOMAN WORKER HAS MADE GOOD

Wonderful Record in War Service Is Shown in Statistics Just Compiled.

MANY TAKE UP MEN'S WORK

Nearly 15,000,000 Women Drew Pay for Labor Never Before Performed by Them—700,000 Acted as Volunteers in Liberty Loan Campaign.

Washington.—Statistics have proved that during the world war nearly 15,000,000 women actually were drawing pay for their services. More than 1,000,000 of them never had done a day's work in their lives. The number of volunteers would add another 1,000,000 to that total.

In the Liberty loan campaign alone 700,000 women acted as volunteers. There was a similar number in the united war drive. For the Red Cross the total must have been millions, for in this organization women who worked all day or who kept house all day, and who had an hour to spare, would devote that hour to surgical dressings, classes, refugee work or ministering to the wants of those whose homes had been hit by the influenza epidemic. Then, too, stenographers, clerks and girls in office buildings would, at the close of the business day, offer their services gratis, to the draft boards or any of the other countless bureaus organized for the speedy termination of the war.

In actual figures the women whose services brought monetary remuneration were listed as follows: Mechanical and manufacturing, 2,000,000; agricultural, 2,000,000; transportation, 200,000; merchandise, 600,000; public service, 50,000; professional, 70,000; clerical, 700,000; domestic and personal service, 2,500,000; unclassified, 6,750,000—total, 14,870,000.

Help Win War.

Those employed in the actual winning of the war or in positions listed as necessary for the winning of the war included munitions, 100,000; canneries, 80,000; food, spice, drug, tobacco and similar factories, 125,000; textiles, 275,000; clothing factories, 212,000; hosiery and knit goods, 130,000; making shoes, 95,000; general equipment, 600,000; shipyard and foundry employees (the latter made bolts and rivets, ran drill presses and worked in machine shops), 100,000—total, 1,717,000.

This figure represents only the women who already were mill-trained and does not include those who left occupations to assist in war work, nor does it include those who had had no previous experience in work of any kind.

In 1910, one-fourth of all the women in industry were married, and more than 15 per cent were either widowed or divorced. In 1918 the number of married workers had practically doubled and, with comparatively few exceptions, all had one or more dependent upon them for support.

Of the number who actually have replaced men no figures are obtainable. The Bush Terminal company of New York was one of the first to realize the possibilities of women in men's jobs, and within a week after the selective service act had been passed called for woman volunteers to replace the men. Instead of confining the replacement to the families of its employees, it sent out an appeal to all stenographers, telephone operators and clerks, with the result that the clerical force of their own establishment, which was essentially a war-producing machine, was not in any way depleted, and within a few months women were operating electric and steam locomotives, running motor-trucks, operating steam winches and cranes, inspecting and maintaining lighting and telephone and other community service utilities, loading cars and ships, packing in warehouse and cold storage rooms and handling details of transportation.

Took Jobs of Men.

In the operating department of one of the Eastern railroads 2,360 women and girls took positions formerly held by men. In one of the large Western cities more than 20,000 women replaced men who had been called into service. Another American establishment employed 5,000 girls in nearly all the mechanical departments in the operation of making fuses. In another plant where uniforms were manufactured nearly 3,000 women were employed. Still another plant, a Massachusetts concern manufacturing munitions, employed 10,000 workers, nearly all of whom were women.

That the women have made good has been definitely established. In one of the munitions plants where 2,000 girls were at work the greatest output made by two sets of engineers were 15,000 complete sets of fuses daily in two shifts. The girls turned out 38,000 complete sets in the same period of time. In another instance where the work dealt directly with a drill press the greatest production where men were working in teams was 8,200 pieces each in nine hours' time, while that of girls doing the same work was 4,400 pieces each.

Policewoman Arrests Husband.

Atlanta, Ga.—Mrs. B. B. Cook, acting as policewoman, made her first arrest in her home, her husband being her victim on a charge of drunkenness.

POLITICAL ADVERTISEMENTS

FOR REPRESENTATIVE

I am a candidate for state representative for Hancock County subject to the decision of the republican voters at the June Primary.

THOS. H. THOMPSON.

I hereby announce myself a candidate for the office of County Treasurer, subject to the decision of the Republican Primaries to be held June 7th, 1920. Yours very truly,

I hereby announce myself a candidate for the republican nomination for the office of recorder of Hancock county, at the June 1920 primaries.

HATTIE M. ALDRIDGE

Knew His Age.

Allan, on his second birthday, was told by his mother that he was two years old. That same day his mother weighed him, and as she lifted him off the scale she said: "You weigh just thirty pounds." That evening, when the little boy's father came home he said: "Well, Allan, how old are you?" Allan hesitated a few seconds and then replied, "Two years and thirty pounds."

A WORLD REBUILT

By the Golden Rule not by the rule of Gold

THIRTY denominations of the Church are uniting in a simultaneous campaign in the week of April 25th-May 2nd.

They are uniting because the task before the Church is too great for any one denomination; because there must be no duplication of effort; no waste.

These churches know that the world needs many things; but it needs Faith most of all.

They know that there can be no final solution of our economic problems that is not a spiritual solution, based on the teachings of Jesus Christ and His Golden Rule.

They have had the courage to survey the whole task, and to ask for a budget large enough to sustain (1) the work abroad, (2) the work at home including the church's part in the huge task of Americanization, (3) the colleges and (4) hospitals supported by the Churches, (5) the religious training of the young, and to provide (6) a living wage for the Church's ministers.

The budget is large in the aggregate; yet if each person who loves America would increase his contribution by only a few dollars the whole amount would be easily subscribed.

We face the task of rebuilding the world. Let the cornerstone be a strong and vital church in every American community; and the measuring rod by which the builders build must be the Golden Rule.

THE KLEMME TIMES

Twenty-fourth Year | Number 32 | Klemme, Iowa, Thurssday, April 15, 1920 | $2.00 In Advance. $2.50 Outside of County

Obituary of Mrs Mary Arnold

Mary Arnold was born Dec. 23rd, 1850, at Portsmouth, Ohio, and died at the home of her daughter, Mrs. Dr. Tice in Mason City, Iowa, on Tuesday morning, April 6th, 1920, at the age of sixty years, three months and twelve days.

Mrs. Arnold had been failing in health more or less the past few years and last fall she thought it best to leave her home here in Klemme for the winter and go to live with her daughter, Mrs. Dr. Tice. When she left us no one thought that she would not return to us in spring. But God who knows best had planned it different. In the past few weeks she was a constant sufferer, and all that skilled physicians and kind and loving hands of the part of loved oes could do was done to save her life, but all efforts proved of no avail. On Tuesday morning the Angel of Death came and took her home.

Mrs. Arnold was united in marriage to Frederick Arnold in the year 1872 in Allamakee County, Iowa. To this happy union six childen were born, three boys and three girls. Mrs. Arnold came with her family to Hancock county, Iowa, April 5th, 1895, and located on a farm east of Klemme, where they lived until the death of her husband, who died the 14th of December, 1907. She remained on the farm 5 years after her husband's death, after which she moved to Klemme.

Mr. and Mrs. Arnold were some of the early pioneers of this community, and well known by everyone. Mrs. Arnold has been a member of the First Methodist Episcopal Church for many years. She was a devout Christian, and endeavored to teach her household, and raise her children in the fear of the Lord. Through her death the church loses one of its faithful members; the Women's Foreign Missionary Society one of its ardent workers; the community one of its most beloved citizens; the chlidren a kind and loving mother. Our loss is Heaven's gain.

She leaves to mourn her death three sons, three daughters, four sisters, two brothers, seven nephews, six nieces, nine grandchildren, besides many other relatives and friends.—A. H. Meyer.

CARD OF THANKS

We rae very grateful to all those who so kindly expresed their sympathy in acts of kindness in our recent bereavement in the loss of our Mother and take this means of showing our appreciation and thankfulness to every one.

Mrs. H. E. Holmes

Klemme In Line For Sewerage

SEWERAGE IN SIGHT

The sewerage question is being agitated to quite an extent in Klemme and the agitation has gone so far as to get the council busy. Monday night in their regular session the question was brought up and the mayor appointed A. L. Koerner and Tom Blank to look up the cost, and other matters pertaining to having sewerage put across in Klemme. Klemme certainly needs sewerage and the quicker the city officials can get the proposition started the better for the town. We are glad they are up and coming and hope they will keep the good work going for with a live mayor and council the town will be lively and likewise if they are dead from the ears up the town will follow suit, but we are glad to see that they are not classed with the latter group and we are here to help boost the officials and their good cause along. Let's all boost and put over a bunch of improvements—they will come sometime, and why not now?

It's a Long, Long Way But Beats Freighting!

TO DRIVE CARS FROM TOLEDO

Saturday night C. W. Wiles, local Overland dealer, accompanied by J. N. Day, W. F. Pavey and Howard Doyle, left for Fort Dodge where they were to accompany about one hundred other men on a special trip to Toledo, Ohio, to drive thru a train of Overland Cars. It is so hard to get cars thru by feight that the dealers are taking this means of getting the cars for their customers. It will be quite a trip for the men as nothing is nicer than to see the country traveling in a car. They will have paving all the way from Toledo to Chicago and no doubt this bunch of Iowa men will "eat it up." Can you imagine a string of over one hundred cars all traveling toward Iowa? Perhaps at times the rear car will be over fifty miles from the leading car. We also bet the cloud of dust they raise when they hit Iowa will be seen for many miles. Wiles and his bunch of drivers expect to reach Klemme in a day or two.

IOWA LEADS ALL STATES

You may not know it—but Iowa leads all the other states in the union when it comes to the value of cattle, horses, hogs, sheep and mules produced on the farms, according to the Jan. 1, 1920 estimate of the U. S. Department of Agriculture which places the value at $640,000,000.00. Texas comes in for second place and Illinois comes in for third count. Iowa's not such a poor place to live in after all.

Like Human Engine.

A locomotive may be all right in the long run, but at that it frequently has to take water.

OHIO FARMER TELLS ABOUT LOAN SHARKS

A. H. Judy Shows How Mortgage Brokers Put the Screws on Borrowers.

WANTS TWO KINDS OF BANKS

Says Joint Stock Land Banks Are for Farmers Who Want to "Go it Alone"—Federal Banks for Those With Co-Operative Idea.

"There should be two kinds of land banks," said A. H. Judy, an Ohio farmer, speaking before the United States senate committee on banking and currency in January.

"The reason for this is that one set of farmers do not want to take stock in any institution, but want to use whatever money they can get in their farming operations, while other farmers will join co-operative societies and take stock in the co-operative land banks. The joint stock land bank answers the need of those farmers who do not care to join a co-operative society and take stock in a bank. The federal land bank, with its co-operative plan, answers the need of those farmers who have the co-operative idea.

Some Farmers Need Big Loans.

"When it can be shown that a loan is to be used by a farmer residing on the land and to be used in improving the land and in increasing production of staples, the limit as to the amount of the loans should not be fixed too low. (The limit on joint stock land

A. H. Judy.

banks is now placed at $50,000). Here is the point: You cannot say you will only lend $2,500 and that you will make that loan to a class of farmers who only want $2,500, while at the same time here is a man who wants $20,000 or $30,000, who is just as capable of using that amount efficiently in the production of food as is the other fellow of using the $2,500.

"Since this bill (senate bill 3109) has been pending, the statement has gone out from the joint stock land banks that all applications for loans are held up until it is known whether this bill is to pass. My neighbor, Mr. J. H. Upps, was approached by a loan shark and offered a loan of $10,000 to take the place of a loan that was to have been made to him by a joint stock land bank. The joint stock land bank would have made the loan for 33 years, but the loan shark only offered to make his loan for five years. The loan shark did, however, offer to make the loan of $10,000 at 6 per cent interest with only an additional charge of $500 for commission.

What Will Happen In Five Years?

"But the question is: What will happen at the end of the five years? When the influence of the joint stock land banks or the federal land banks has disappeared because they have been killed by this bill, then what will the loan shark ask my neighbor Upps when his debt falls due? A million farmers in the United States can make a mighty good guess as to what will happen. A million farmers in the United States can foresee how the loan shark will put the screws upon Mr. Upps when the time for renewal comes around.

"The farmer is willing and anxious to increase production. He knows that the nation needs food. He knows that the world needs food. He knows that the nation is depending on him. He knows that the world is depending upon the American farmer. But he knows also that he cannot 'make bricks without straw.' If you want the farmer to increase production you have got to furnish him the tools. You have got to furnish him the opportunity. You have got to furnish him the capital on convenient terms and at reasonable rates. You cannot hamstring the financing of the farmer and get your needed increased production."

Repair Gravel Roads.

Gravel roads will wear in places but they are easily repaired by dumping a load of sand and gravel on the worn spots once or twice a year.

More Local

Mr. and Mrs. Ralph Blank who have been visiting in Klemme for the past few days, went to Estherville Tuesday morning to see if they could locate a house there. Ralph goes back to his old job at Estherville as Yard Master for the Rock Island.

Fred Blank is now located at Ward, South Dakota, where he is holding down the position of station agent for the Rock Island railroad. Fred is making good and we wish him lots of good luck with his new job. Fred started out railroading in Klemme as agent's assistant.

Mr. and Mrs. Johnson, of Kanawha, were Klemme visitors Saturday.

The men who kick the hardest about th church and the school have forgotten the Lord's prayer and the multiplication table.—W. L. Brownell

As we are about to go to press we hear that Bill Howard is having a very "swell time"—with the mumps! Eat a sour pickle Bill and tell us if it makes you cuss the editor for trying it.

Maybe you also cussed Monday forenoon when the electric "juice" was off and you were trying to make that electric washer wash the clothes and you wanted to run the motor to do some work or wanted to turn on a light, but there was no light. We cussed also and if we had of known then what we do know now we would have jumped all over a Klemme man who got his screw driver mixed up with the "juice" and which kicked out the switch at the transformer, and after several hours deliberation he finally reasoned out why the juice was off and the switch was kicked back and there was again light. We suggest that someone tie the transformer switch down so it can't "kick" out every time a wire is accidently shorted.

GOODELL NEWS

Goodell U. B. Church Notes

There was a fine attendance from the country at the Women's Missionary Society Annual tea and Rally.

Rev. Donnie Minton, U. B. Pastor at Ventura, addressed the Goodell people Sunday evening on the Interchurch Movement.

Som of the Goodell people who attended the Interchurch meeting at Garner April 7th, cam to the depot on high in order to catch the passenger.

Harold Savogue is able to walk down town now.

Last Saturday Mrs. Dennie Conlan took Mrs. Harvey Christensen to the hospital at Hampto. Mrs. Christensen is rported getting along nicely.

Henry Nolte is till at the Hampton hospital. This enforced rest is hard luck when one needs to be in the field

Mr. O. Sandberg is getting a fine start on his new hardware building.

Mr. Frank McNutt took charge of the hotel on April 12th.

John Raph has moved his poultry and cream station down by the livery barn.

Mr. Vance is doing some repairing on the J. C. Reed cream and poultry building before moving his harness and repair shop into the place, which place will be much more convenient for his customers.

Miss Faye Letch and Mr. T. Hamilton are shut in with mumps.

I AM OFFERING TO THE PUBLIC the Breeding Services of CRITIC SENSATION 284071. Pigs sired by him at less than ten months old weighed 400 lbs. Ten sows and gilts bred to and sired by CRITIC SENSATION sold for $3,070.00, or an average of $307.00. If you have a pure bred sow and want to raise a $2,000 litter, it will be to your interest to write or come and see me for terms and breeding date.

F. H. SCHULDT, Breeder of Big Type Durocs, Godell, Iowa

3-w

Something New!

BIG EXPRESS SHIPMENT OF BUTTER

No chance to ship butter to New York by freight on account of the strike, so Buttermaker Gimer of the Klemme Creamery Company scratched his wisdom dome for information. He figured out that express was the thing to do and the butter could be shipped thru fine, so they rolled sixty-six tubs of butter to the depot, weighed them up and when they figured it over they found it weighed four thousand, seven hundred and fifty-two pounds. Agent Barr then scratched his wisdom dome and after figuring up a whole tablet of Rock Island stationery found that it would cost the creamery $135.43, cash by hek. Gimer paid the bill and then figured some more and his figures showed that even shipping by express to New York they would make more than if they had shipped to Chicago as the N. Y. market was ten cents per pound higher than the Chicago market. He also found that express is not much higher than freight on hauling butter that far and then the market is reached P. D. Q. It sure was some stunt to pull.

KLEMME MAY BE REPRESENTED

FIELD MEET TO BE HELD

May the seventh will be field meet day at the Garner school grounds and will be a sort of county event and all schools are supposed to send their men to compete in the events. Supt. Rankin has invited the following schools to be there: Britt, Corwith, Kanawha, Klemme, Goodell, Hayfield, Crystal Lake, Woden and Miller. In the forenoon will be a tennis meet for the girls; in the afternoon a track meet for the boys and in the evening a regular county contest.

We would like to see some of our Klemme boys get into the game. We have some mighty good sprinters here and they should get into training at once and get some of the honors at the meet. Get busy boys and show them that Klemme is on the map of athletics.

KLEMME MAN HONORED

Last week P. M. Greisemer received a telegram from New York headquarters of the Interchurch World Movement appointing him as chairman of Hancock county. It will be the duty of the county chairman to direct the meetings and program as they receive the orders from the state chairman.

GARNER READY TO BEGIN PAVING

Everything is all set for the paving program at Garner. Machines and material are on the grounds and the work will begin at once. The first stretch of paving will begin at the east road leading into Garner and then south. North and south streets on each side of Main street will be paved first, then these will be connected and the main thoroughfare will be kept open until the very last to allow the free passage of traffic. About ninety blocks will be paved.

CLEAN UP NOTICE

You are requested to clean up and beautify around your place before April 25th, 1920.

Lloyd Lau, Sam Harvey and H. Maitland have keys for the dumping ground and will do your hauling.

1-w F. GRUETZMACHER, Mayor

CARD OF THANKS

We wish to thank all those who were so kind to us in our recent bereavement, also we wish to thank those who contributed floral offerings.

Mr. and Mrs. J. B. Spitler and family
Vivian Kerschner

An Introduction Needed.

God once gave a reception to the Graces, all of whom seemed to be acquainted with one another, with the exception of two. Observing which circumstance, their host brought them together and said: "Benevolence, allow me to introduce Gratitude."—Leo Tolstoy.

SPLINTERS

Air castles of a bachelor are usually constructed of smoke.

Many a charitable woman allows her husband to have her own way.

"Labor," says Thomas Carlyle, "rids us of three ills—tediousness, vice and poverty."

Some men waste power trying to get wealth, then waste wealth trying to get power.

Women are always in quest of something—but a conquest seems to suit them best.

When a man begins to be his own worst enemy he can get a lot of free assistance.

Only a wise girl selects for a husband a man whose mother didn't know how to cook.

Nothing is made in vain except the extremely fashionable girl—she is a maiden vain.

Mirth is a paying investment—because its stock is never watered with tears of regret.

The only effective way to convince a contrary man that he is wrong is to agree with him.

Occasionally a man spends a lot of time at his club because there is no place like home.

If Adam had eaten the apple first he probably would have decided that Eve dared him to do it.

After a girl gets to be about so old she tries to forget that she once wanted to marry a poet.

After pocketing his fee the congratulations of the minister officiating at a wedding are genuine.

Wonder why a spinster can never remember anything that happened a good many years ago.

Even the lines of a poor poet are apt to be cast in pleasant places—when he goes fishing.

If we always prepare ourselves for the worst that may happen, we will never be disappointed.

What has become of the old-fashioned girl who, when a love affair went wrong, pined away and died?

About the only time a woman sees anything adorable in any one of her sex is when she looks in a mirror.

A woman can do a thing she doesn't want to do without making unprintable remarks, but few men can.

Satisfactory Test.

"So you want to marry my daughter, eh?" said the old man. "Do you think you have the patience and forbearance to make her a kind and indulgent husband?"

"Surest thing you know," replied the applicant for the son-in-law job. "I can button a collar on a shirt that is half a size larger, without getting angry, and—"

"Say, no more," interrupted the old man, "she's yours. Take her, my son, and my blessing goes with her."

Phew!

One cold, windy morning, after a sudden change in the thermometer, a man in the 3600 block in East Tenth street, came rushing downstairs in the morning in his nightshirt to change the drafts on his furnace. He decided to put the thermometer outside to see how cold it was. The wind blew the door shut. He stood out in the cold with only his night apparel on for 15 minutes before he could awaken any members of the family.—Indianapolis News.

Accounting for the Weight.

"So you are playing with your soldiers, Willie?" said the caller.

"Yes, ma'am."

"You handle them as if they were quite heavy."

"They are heavy just now, ma'am."

"What makes them so heavy just now?"

"Why, they're on their way back from the war, and they've got a lot of lead in 'em, ma'am."

The Precious Apple.

"Every day my favorite pupil used to bring me a beautiful red apple," remarked the woman who used to teach school.

"Splendid custom!" commented the student of educational systems. "If it were still in existence, the perquisites of a teacher might make increase of salary appear less urgent."

Pinholes in Negatives.

Small, irregular shaped transparent spots in negatives are known as pinholes. These are usually caused by particles of dust resting on the film during development.

Different Colors of Paper

Many business men have a system of using different colors of paper for different printed forms, thus distinguishing each form by its color.

We can work this system out for you, using

HAMMERMILL BOND

the Utility Business Paper, and you will find that it saves you time and money.

Let us show you the advantage of standardizing your paper and your printing.

Willows Mentioned in Bible.

Willows are mentioned in the Biblical books of Leviticus 27, Job 11, Isaiah 14, Psalms 137. The tree upon which the captive Israelites hung their harps was the Salix Babylonica. This tree is abundant on the banks of the Euphrates.

How to Lower Your Meat Bills

Hints From the Department of Justice

SPECIALIZE IN BUYING MEAT AND SAVE MONEY.

The housewife of the present generation and particularly of the past year or so, during which money has been rather plentiful, has been demanding meats from one or two cuts of beef; that is, cuts from the loin for steak and cuts from the ribs for roasts. This has created a tremendous demand for the loins and ribs, leaving an oversupply of the major portion of the carcass, which the retailer must dispose of at a disadvantage, owing to the lack of demand.

If Mrs. Housewife would take more interest and specialize in her buying, and would read carefully the articles that have been and are being published, calling her attention to the cheaper meats, she would realize a substantial saving. She would soon become convinced that there is exceptionally good meat in the round, rump, plates, chuck, etc.

In the olden days Mrs. Housewife would call for a chuck steak, round steak, as well as an occasional porterhouse. Mrs. Housewife now knows only one steak, and that is the porterhouse, which is naturally the most expensive, as it is the most called for, and it logically must stand the extra expense. It is the world old law of supply and demand.

How many housewives know that from the chuck they can get steaks, boiling beef, pot roasts and stew meats? The carcass (excepting the loins and ribs) contains meats that are just as appetizing, delicious and nutritious as the more expensive cuts, which are the ribs and loins. Unfortunately, however, custom recently has dictated that the ribs and loins be considered the more popular, hence the cheaper cuts have really gone out of their own.

A few years ago the average housewife usually called for a chuck steak or round steak as a matter of course. In fact, it was the daily diet and one seldom thought of ordering sirloin or porterhouse steak, except on special occasions. A good comparison would be that of ordering chicken or turkey for every day of the week just because it happens to be a "treat" or a special delicacy, and if chicken or turkey were thus ordered the outcome would simply be higher prices, due to the demand being larger than the supply.

The round makes wonderful steaks, pot roast or corned beef. It represents approximately 23 per cent of the entire beef carcass, and the chuck represents approximately 34 per cent. The loins represent 17 per cent and the ribs 9 per cent, and of the entire carcass there is actually less than 5 per cent porterhouse steak, 3 per cent of club steak and about 9 per cent of sirloin steak.

Among the many appetizing uses of the chuck are roasts, steaks, pot roasts, stews, boiling beef, pot pie meat and hamburger, with the fore shank for soup meat and soup bones.

There has lately arisen such a remarkable demand for one or two expensive kinds of meats that people who formerly were entirely satisfied with what represents the less expensive portions never even think of calling for them. At the same time they continually complain of their meat bills without stopping to analyze the reason.

"Is that the best you have?" seems to be the by-word. The more it costs the more people want it. The less expensive (although often very good articles), go begging. If a dealer has to buy a certain portion of the cheaper articles along with his good articles and he cannot sell the cheaper ones, YOU pay the price for what he is obliged to lose. The same applies to meats. The butcher pays a certain price for the cattle and he must get that price out of them. If the demand, as stated above, all runs to one or two different cuts, those cuts that are in demand must make up the loss on so-called cheaper meats, while if there was an equal selling distribution on the entire carcass, there would not be so much complaint of the high cost of meat.

Every housewife personally should make inquiries of her butcher as to the different cuts of meat.

Chopped Beef Au Casserole.

1½ lbs. clod of beef, ground,
½ c. tomato relish,
Tabasco sauce,
1 can beets.

Mix chopped beef with tomato relish. Add ¼ teaspoonful tabasco sauce (more if desired). Season well with salt. Put in glass casserole and bake two hours, basting frequently with a high quality of table sauce. A few strips of bacon across the top of any meat loaf adds to its richness and improves flavor. Serve garnished with beets, quartered. Serves 5 people.

How to Lower Your Meat Bills

Hints From the Department of Justice

HIGH LIVING ON LOW-PRICED MEAT.

"I don't see how you feed a family of five and pay so little for meat," said Mrs. Smith to Mrs. Jones who stood just over the back fence. For Mrs. Jones always served appetizing dishes of fresh meat, apparently in endless variety, and she never had big meat bills.

"I'll show you how I do it," said Mrs. Jones to Mrs. Smith. "If you come out here every day this week we'll compare notes and find out the way to reduce meat bills and yet live as well if not better than ever."

Monday's morning conference at the back fence discussed Sunday dinner which Mrs. Jones had made from 3½ pounds of chuck beef, a little oleomargarine, seasoning, and trimmings prepared as pot roast. The leftovers went into beef croquettes and were enough for Monday's dinner.

"It cost me, at 20 cents a pound, just 70 cents for good meat for two meals for five people," said Mrs. Jones.

Tuesday's report showed a bill of 75 cents for three pounds of spareribs, out of which Mrs. Jones had prepared a full meal of sauerkraut and spareribs in this manner:

She put spareribs in boiling water salted with one-half tablespoonful of salt and cooked until meat began to separate from the bones. She removed and arranged on a platter, surrounded with border of sauerkraut, one cupful of which had been previously heated.

On Wednesday Mrs. Jones described how she had fried a pound and a half of calf's liver, costing 60 cents with onions and celery:

1½ pounds calf's liver,
4 tablespoonfuls oleomargarine,
4 tablespoonfuls diced celery,
4 tablespoonfuls onions cut up fine.
Seasoning.

She said: "I put four tablespoonfuls of oleomargarine, four of diced celery, four of onions cut up fine and seasoning into a pan; the liver sauted in this sauce and served piping hot. I saved the leftovers for creamed meat."

On Thursday she had cooked chopped beef in a baking dish, two pounds of hamburger costing 32 cents. The leftover went into creamed meat enough for Friday.

"It can't be done," exclaimed Mrs. Smith, but Mrs. Jones furnished proof in the form of these recipes:

Chopped Beef.

2 pounds hamburger ground,
½ cupful tomato relish,
½ teaspoonful tabasco sauce,
1 can beets.

Mix chopped beef with tomato relish. Add tabasco sauce. Season well with salt and pepper. Put into baking dish and bake two hours, basting frequently with high quality of table sauce. Serve garnished with beets cut into quarters.

Creamed Meat.

Add all leftovers together. Add one-half can pimentoes chopped, one green pepper and two and one-half cupfuls of white sauce made from flour, evaporated milk, water, oleomargarine and seasoning. Serve on rounds of toast.

Saturday's meal was prepared by Mrs. Jones out of two and one-half pounds of flank steak for which she paid 65 cents, and which came on the table stuffed with bread crumbs, vegetables and seasoning.

"Now," said Mrs. Jones, "let's add up and see what the week's meat supply has cost." This was what she figured:

3½ lbs. beef chuck at	$.20	$ .70
3 lbs. spareribs at	.25	.75
1½ lbs. calf's liver at	.40	.60
2 lbs. hamburger steak at	.16	.32
2½ lbs. flank steak at	.26	.65
		$3.02

"Some saving!" said Mrs. Smith. "Do you know what I have been paying for the same amount of food value, and not as much variety at that?" She jotted down her own expenditures for a week which were these:

Monday—1¾ lbs. rib lamb chops at	$.50	$ .87
Tuesday—2 lbs. sirloin at	.42	.84
Wednesday—2½ lbs. beef roast (prime ribs) at	.40	1.00
Thursday—1½ lbs. veal off leg at	.45	.67
Friday—1½ lbs. pork tenderloin at	.55	.82
Saturday—1½ lbs. calf sweetbreads at	.55	.80
Sunday—3½ lbs. chicken at	.45	1.57
		$6.57

(These prices were accurate at the time this article was prepared. The market may have varied a few cents up or down since that time.)

CITY MAN HAS BIG ADVANTAGE OVER FARMER

New York Has Billion and Half Tax-Exempt Securities Now Outstanding.

THEN WHY TAX FARM BONDS?

Guy Huston Shows That Proposal to Tax Joint Stock Land Bank Bonds Would Injure Farmer and Raise Interest Rates on Farm Mortgages.

New York city alone has outstanding $1,450,000,000 of tax-exempt bonds, and there is a total of $8,000,000,000 of tax-exempt municipal bonds outstanding at the present time. Hundreds of million of this amount are invested in electric light plants, water works, municipal docks, subways and other large income-producing properties. Then why deny to the farmers of America the right to borrow a few hundred million dollars on tax-exempt bonds?

This was the question raised by Guy Huston, president of the American Association of Joint Stock Land Banks, in January at a hearing before the senate committee on banking and currency. A bill, known as senate bill 3109, which would repeal the tax-exemption feature of the farm loan act as applied to the bonds of joint stock land banks, was before the committee and the argument urged by the supporters of the bill was that the government needed the revenue. Mr. Huston showed that these farm loan bonds constituted less than one-third of one per cent of the

Guy Huston.

amount of tax-free securities and that the income the government would derive by taxing these farm bonds would amount to nothing as compared to the income that might be derived by taxing city bonds.

Mr. Huston said:

"There are four billions of dollars of farm mortgages in the United States, which, according to the best authorities, are held as follows:

Insurance companies	$1,100,000,000
Savings banks, state banks, trust companies and commercial banks	1,000,000,000
Eleemosynary institutions	400,000,000
Local loans	1,250,000,000
All other	250,000,000
	$4,000,000,000

Farm Mortgages Not Generally Taxed.

He explained that the $2,100,000,000 of farm mortgages carried by the insurance companies, savings banks, state banks, trust companies and commercial banks escaped the income tax, and that the income tax paid by these institutions is a tax only on the profit on the stock of these corporations. He said that the joint stock land banks now pay an income upon the profit on their stock the same as these other institutions.

Mr. Huston also explained that eleemosynary institutions which carry $400,000,000 of farm mortgages pay no income tax.

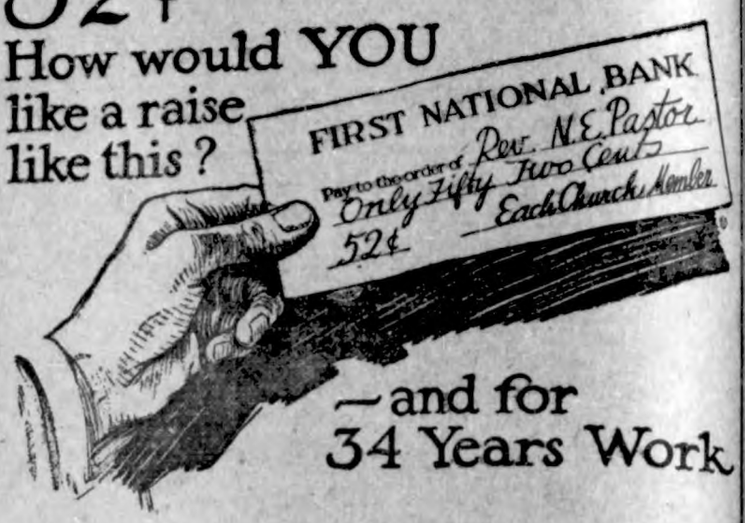
He said further that $1,250,000,000 which he classified as local loans are carried in small units by local investors who pay only a local income tax, if they happen to pay any at all. These cannot be rewritten under the provisions of the federal farm loan act because they have been made on terms and conditions which could not be accepted under the federal law.

Food More Important Than Revenue.

Mr. Huston then showed that in reality there was left only $250,000,000 (out of the original $4,000,000,000 of loans on farm mortgages) which are now paying an income tax but which in the future might escape taxation under the farm loan act as it now stands.

Mr. Huston said that the need of the nation for increased production in agriculture was so great that the government, acting for the common welfare of the entire nation, should permit the issuance of farm mortgage bonds without their being subject to the income tax.

52¢
How would YOU like a raise like this?



—and for 34 Years Work

THAT is the kind of increase in salary the minister has received. His living expenses have risen just as fast and as far as yours.

But he is paid on the average just 52 cents more *per church member* than he was paid 34 years ago.

The Minister Never Fails You

Every officer of the Government with a war message to deliver appealed to the ministers first of all.

But 80% of the ministers receive less income than government economists figure as a minimum for the support of an average family.

When hospitals need money they enlist the support of the ministers—and receive it.

But when sickness visits the minister or the members of his family they must be treated in a charity ward. His pay is less than a day laborer's.

8 out of every 10 ministers receive less than $20 a week—about half the pay of a mechanic.

We Pay Him Half the Wages of a Mechanic

And of these pitifully inadequate salaries, how much do *you* contribute? Nothing if you are outside the church; an average of less than 3c a day if you are a church member.

All of us share in the benefits of Christian ministers to the community. They marry us; bury us; baptize our children; visit us when we are sick. In their hands is the spiritual training of the youth.

We Are All Profiteers at Their Expense

Part of the Interchurch World program is this—a living wage for every minister of Jesus Christ; an efficient plant, and a chance to do a big man's job.

If you want better preachers, help to pay the preachers better. It's the best investment for your community—and for your children—that you can ever make.

Jacobs & Son

SUFFERED THREE YEARS

Finally was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Lowell, Mass.—"I was all run down and had an awful pain in my right side, was persistently constipated and had very dizzy spells. I suffered for three years and was perfectly miserable until a friend was telling me to try Lydia E. Pinkham's Vegetable Compound and I found it a wonderful medicine. I can now do twice as much work and I recommend the Vegetable Compound to other women. You can use these facts as a testimonial."—Mrs. M. THEALL BESSEY, 186 Appleton Street, Lowell, Mass.

Why women will continue to suffer so long is more than we can understand, when they can find health in Lydia E. Pinkham's Vegetable Compound!

For forty years it has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

FRECKLES POSITIVELY REMOVED by Dr. Berry's Freckle Ointment—Your druggist or by mail, 60c. Free book. Dr. C. H. Berry Co., 2975 Michigan Avenue, Chicago.

Dubious Indorsement.

"People like optimistic doctors." "Yet a doctor is naturally a man of ill omen."

STOMACH TROUBLE AND CONSTIPATION ENDED

Suffered So He Couldn't Work for a Year, but Mr. McCormick Was Cured Promptly.

"I had stomach trouble and constipation for five years. One year of this time I was unable to work, suffering untold agony. I doctored with some of the best physicians, also took many proprietary medicines, but could not find permanent relief. Finally a friend recommended Milks Emulsion. The first few doses relieved me greatly, and three bottles of it effected a permanent cure."—C. A. McCormick, Anderson, Ind.

Mr. McCormick is only one of many hundreds who have endured torture for years and then found that Milks Emulsion gives blessed relief and real, lasting benefit. It costs nothing to try.

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy and natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. As a builder of flesh and strength Milks Emulsion is strongly recommended to those whom sickness has weakened, and is a powerful aid in resisting and repairing the effects of wasting diseases. Chronic stomach trouble and constipation are promptly relieved—usually in one day.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream. Truly wonderful for weak, sickly children.

No matter how severe your case, you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 50c and $1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

He's a mean father who has his whiskers amputated just because the baby likes to pull them.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

FEDERAL GRADES AID TO FARMERS

Miller Willing to Pay More for Wheat if It Meets All Requirements.

PREMIUM ON POOR PRODUCT

Demonstrations at State Fairs, Local Schools and Other Places Given for Purpose of Acquainting Farmer With Grades.

(Prepared by the United States Department of Agriculture.)

The miller buying wheat from a farmer is willing to pay more for it if, among other things, it has a heavy bushel weight, is dry and sound and is free from weed seeds—in other words, if it meets the federal requirements for No. 1 grade, of the proper subclass. The miller knows he can get from such grain more and better flour, with less labor and expense on his part. This is illustrated by results of several hundred tests made by the bureau of markets, United States department of agriculture, in which No. 1 spring wheat (according to federal standards) weighing 58 pounds per bushel, yielded 71.3 per cent of straight flour and 28.7 per cent of bran and middlings. On the other hand, spring wheat grading No. 5, weighing 50 pounds per bushel, yielded 63.8 per cent straight flour and 36.2 per cent bran and middlings.

Penalizing Grower of Good Wheat.

When the country dealer under normal marketing conditions buys the wheat of his section at a flat rate he has in mind the approximate federal grade the average run of local wheat will receive at the market where he sells, and he pays accordingly. But under such circumstances the farmer who raises choice wheat receives the same price as the one who raises poor wheat. The farmer who raises the poorest wheat in the section, therefore, receives more than he should, while the one who raises the best receives less. This putting of a premium on poor wheat tends to discourage the growing of a better grade product.

Grades have long been used in the larger markets. Prior to the fixing of federal grades, however, these local grades often differed in the various markets and their application frequently was based largely on the judgment of the individual inspector at each market. Consequently, it was very difficult for the country dealer to apply grades accurately. He was not sure that the grain he had bought at one grade would be received at that grade by the one to whom he delivered it. In contrast to this, the grades established by the federal government are uniform throughout the country. Furthermore, standardized equipment has been perfected for making many of the tests to determine the grade, so that with the aid of uniform rules for grading, the federal standards can be applied uniformly in all parts of the country.

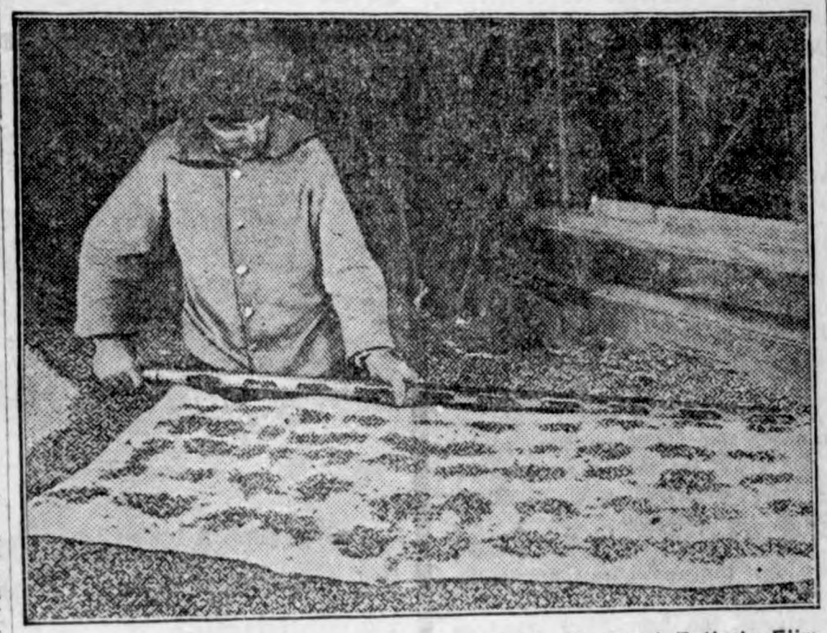
Acquainting Farmers With Grades.

While the government has no authority under the United States grain standards act to supervise grain grading under federal grades, except in the work of licensed inspectors and in interstate shipments, the government does want to acquaint farmers and dealers generally with the application of the federal standards so that they may benefit more generally thereby. This is one reason why federal grain supervision officials give demonstrations of federal grades at state fairs, local grain-grading schools, and other places, and colleges give grain-grading courses. By these means the farmer learns how to apply the grades to his own wheat. He may not care to supply himself with a set of the equipment to grade his own grain but by learning the essential features of the standards and the grading rules he will be able to know whether the country buyer is correctly grading his grain when he markets it.

Appealing to Inspector.

In addition, if a country dealer buys by grade and his farmer customer thinks he doesn't grade right, they can mail a sample, upon which they both agree as being representative of the lot of grain, to a licensed grain inspector for grading. The sample required should be at least two quarts in quantity. About one and one-eighth pints of it is put in a clean, air-tight can which is placed with the rest of the sample in a clean cloth sack. A reasonable fee—usually not over $1—is charged by inspectors for each certificate issued.

Bulletins which explain in detail the methods of taking samples, how to mail them to an inspector for grading, and the grading rules, have been prepared by the bureau of markets, United States department of agriculture. They will be sent free to anyone requesting them.



Sampling Grain for Federal Grading; the Methods Employed Entirely Eliminate Guesswork.

PARCEL POST USEFUL FOR SHIPPING SIRUP

Two Types of One-Gallon Containers Satisfactory.

Packages Properly Wrapped and Marked, as Required by Postal Regulations, Will Carry Without Danger of Leakage.

Maple, cane and sorghum sirups may be readily shipped by parcel post if properly prepared for shipment, according to investigators in the bureau of markets, United States department of agriculture, who have made experimental shipments from many parts of the country, over many different mail routes. Of 394 shipments only three showed any material loss because of leakage and this was due to unusually rough handling. The average distance covered by these shipments was greater than sirups are likely to be sent by mail under ordinary conditions.

Two types of one-gallon tin containers were found satisfactory for parcel post shipments. Both types have screw caps and are provided with outer cartons of corrugated paperboard. Snugly fitting pieces of cork in the caps cover the opening in the cans when screwed down tightly. Such packages properly wrapped and securely tied, marked "Fragile," as required by the postal regulations for packages containing liquids, will carry without danger of leakage in the mails. While the one-gallon can is most commonly used, any size up to five gallons may be shipped under the present parcel post weight limit of 70 pounds. Light but substantial wooden crates should be supplied for the larger containers.

Suggestions on obtaining customers and dealing with them by parcel post may be found in Farmers' Bulletin 922, "Parcel Post Business Methods," which also suggests how consumers may get in touch with producers. A copy of this bulletin will be sent free on receipt of a request addressed to the United States Department of Agriculture, Washington.

CHEESE PRODUCED ON FARMS

Practically Ceased in United States, Factory-Made Article Taking Its Place.

In the last half century the production of farm-made cheese in the United States has practically ceased. Factory cheese, which has taken its place, now exceeds 300,000,000 pounds annually, about three times the highest figure ever reached by cheese made on farms.

GENERAL FARM NOTES

Taking advantage of the market is more profitable than dumping onto it.

* * *

Let us put agriculture on a solid basis by breeding only the very best.

* * *

Keep all poultry manure dry until spring and then apply it to the garden and special plants.

* * *

The great value of rape lies in the fact that its rapid growth makes it a good emergency crop.

* * *

Stables should have water-tight floors. Fully one-half the value of manure is in the liquid.

* * *

The farmer's money profit is not the only dividend that he draws from his life in the country.

GARDEN WORK IS MOST IMPORTANT

Mistake to Think That Cultivation Is Done for Sole Purpose of Killing Noxious Plants.

ROOTS NEED SUPPLY OF AIR

Soil Particles Are Broken Up and Plant Food Made Available for Rootlets—Dust Mulch Will Retain Moisture.

(Prepared by the United States Department of Agriculture.)

Most people have an idea that gardens are cultivated solely for the purpose of killing weeds. As a matter of fact, the killing of weeds is just one object of garden cultivation, say the specialists of the United States department of agriculture. The roots of plants require air just the same as do the tops, and if the ground is packed or hard or is sunbaked over the surface after a beating rain, the roots of the plants will turn yellow, and if not cared for will die. The same thing is true where the land is poorly drained and waterlogged. The water keeps out the air and the roots cannot feed the plants.

Cultivation has another object, in that it breaks up the soil particles and makes plant food available for the feeding rootlets of the plants.

In Some Gardens a Wheel Hoe Can Be Used to Good Advantage.

Many persons, however, make the mistake of cultivating too deeply, and by so doing cut off or injure the feeding rootlets and deprive the plant of its source of nourishment and support. Frequent shallow cultivation during dry weather results in the formation of a layer of fine dust which serves as a mulch or blanket to retain moisture.

Cultivating After Rains.

The soil should always be cultivated just as soon as it is sufficiently dry to be safely worked after heavy rains. If it is not cultivated, a crust forms, the surface bakes and the crops are injured. The same will apply where irrigation is used, and it has been found best to give the soil a thorough soaking, then cultivate as soon as it is dry enough, and apply no more water until absolutely necessary.

The hoe and the steel rake are the most important tools for cultivating the small garden. On a larger scale a wheel hoe and a horse cultivator may be used to advantage. Even where horse-drawn tools are occasionally used, the greater part of the work, especially during dry weather, may be performed by means of a common steel rake. It is not necessary to go very deeply into the soil, but merely to stir the surface.

A Tool That Helps.

A handy little tool for loosening the soil can be made from a piece of thin board two inches wide and fourteen inches long, with one end whittled down to form a handle and the opposite end provided with three No. 6 or No. 3 box nails or wire brads. This little home-made implement can be used very soon after a rain to loosen the surface, so that any small seeds can break through. The wheel-hoe outfits are provided with a number of different shovels and scratchers adapted for the different types of work to be performed. These implements have the advantage that one can go over the garden very rapidly and break up the surface of the soil in a comparatively short time. It is generally necessary, however, to follow with the hoe to remove any weeds that have been destroyed by the wheel cultivator.

Kill Weeds Young.

It should be borne in mind that the time to kill weeds is when they are just coming through the ground. If allowed to become established, it is much more difficult to get rid of them than if they are taken in time. If the top two inches of soil is kept continuously and thoroughly loosened, no serious difficulty in keeping out weeds is probable.

SOILS OF MUCH IMPORTANCE

Where Heavy or of Gumbo Type Hardiest of Varieties of Fruit Should Be Planted.

Soils have much to do with the fruit growing. If your soil is very heavy or of gumbo type, choose the hardiest varieties. Also plant a few of the native fruits that may be growing in your vicinity

BATTLE ON BARBERRY IS BEING CONTINUED

Approximately 2,000,000 Plants Destroyed in 1919.

Federal and State Authorities Combine to Protect Wheat Against Black Stem Rust—Other Crops Are Attacked.

(Prepared by the United States Department of Agriculture.)

Approximately 2,000,000 common barberry bushes were dug up and destroyed during 1919 in connection with the combined efforts of federal and state authorities to protect wheat against black stem rust which cannot survive unless it is able to spend one period in its life cycle on the leaves of the common barberry. For this work the past year the federal government appropriated $150,000. The territory in which the fight was carried on comprises Colorado, Indiana, Illinois, Iowa, Ohio, Michigan, Minnesota, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming, which states supplemented the federal funds to a considerable degree. The combined expenditures were small in comparison with the size of the menace to wheat production by this disease. Cereal disease experts in the United States department of agriculture estimate that the wheat crop of 1919 in the United States was reduced 53,000,000 bushels by black stem rust alone in addition to damage by scab and other diseases. This damage by black stem rust has only been exceeded in one previous season, namely in 1916, when the total reduction of the wheat crop by this disease was 200,000,000 bushels. In addition to the 1919 loss of 53,000,000 bushels of wheat due to ravages of black stem rust, there was a loss of 17,400,000 bushels of oats and 4,700,000 bushels of barley due to the same cause.

DON'T FORGET CLOVER

Corn, wheat, and clover.

That is the most important rotation in America.

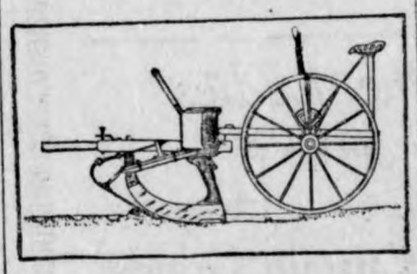
Where clover is no longer grown, yields are beginning to decline.

SMOOTHS SURFACE OF FIELD

Planter Attachment Permits Depositing Seed at Uniform Depth—Device Is Simple.

The Scientific American, in illustrating and describing a planter attachment, the invention of F. I. Classon of Ottawa, Ill., says:

The invention relates to planter attachments and one of the principal objects is to provide a means for evening and smoothing irregularities in the surface of the ground due to the tracks made by the horses or to uneven harrowing and thereby allowing the drill to deposit the seed at a uniform depth beneath the surface. The device is characterized by its simplicity, durability and economy in manufacture and maintenance.



A Side Elevation of a Corn-Planter Equipped With the Device.

SORE SHOULDERS IN SPRING

One-Half Ounce of Sweet Niter, 25 Drops of Iodine, Mixed With Oil, Is Favored.

When horses begin to get sore shoulders in the spring, try one-half ounce of sweet nitre, 25 drops of tincture of iodine, mixed with three ounces of lard or olive oil. Clean the sore spots thoroughly with water and apply this mixture at night after collar has been removed. It is very cooling and healing.

WINDBREAK FOR AN ORCHARD

Windstorms Break Limbs of Trees When Loaded With Fruits—Evergreens Give Protection.

An orchard often needs the protection of an evergreen windbreak. Windstorms break the limbs when loaded with fruit or scatter unripened fruit on the ground. By lessening the force of the wind against the orchard it is sometimes possible to reduce the injury during storms.

FALLEN LEAVES AID GARDEN

They Should Be Dug Into Soil to Rot and Assist in Growing Better Crops in Later Years.

Many people burn fallen leaves, which is a very wasteful practice, as these leaves, besides containing a considerable amount of plant food, are of the greatest value in loosening heavy soils. They should be dug into the garden to rot and help to grow better crops in later years.

When Blood Is Bad

Granite Falls, Minn.—"During one expectant period I had varicose veins, which were extremely painful. A couple of bottles of Dr. Pierce's Favorite Prescription completely cured me of this condition, and my system was toned up and I had comparatively no suffering. An old lady recommended Dr. Pierce's remedies to me a couple of years before when one of my children had a solid crust of sores on his head. She told me that it was because my blood was in poor condition, so I took Dr. Pierce's Golden Medical Discovery to purify my blood, and at the same time gave the baby a few drops several times a day. The effect was wonderful and in a very short time he was a healthy looking baby and had a fine head of hair."—Mrs. John M. Thompson.

FROM GIRLHOOD UP

Centerville, Iowa.—"I have suffered terribly at times since girlhood; I was all run-down and weak. Was advised to try Dr. Pierce's Favorite Prescription, and when I took the first dose I began to improve. I took only three bottles of it and was cured. Have had five children and have been in good health since. I have frequently recommended the 'Prescription' to others. My sister has also had good results from it."—Mrs. Frank Burns, 727 E. Grant St.

WOMEN EVERYWHERE

St. Paul, Minn.—"For several years I suffered with woman's trouble. I read an advertisement in the newspapers about Dr. Pierce's Favorite Prescription and decided to try a bottle. In all I took about six bottles and it helped me right from the start; it actually cured me of the inflammation and pain in a very short time, and I think it a very wonderful medicine for women."—Mrs. Harry Frederickson, 268 Fuller St.

BAD BREATH

Often Caused by

Acid-Stomach

How can anyone with a sour, gassy stomach, who is constantly belching, has heartburn and suffers from indigestion have anything but a bad breath? All of these stomach disorders mean just one thing—**Acid-Stomach.**

EATONIC, the wonderful new stomach remedy in pleasant tasting tablet form that you eat like a bit of candy, brings quick relief from these stomach miseries. EATONIC sweetens the breath because it makes the stomach sweet, cool and comfortable. Try it for that nasty taste, congested throat and "heady feeling" after too much smoking.

If neglected, **Acid-Stomach** may cause you a lot of serious trouble. It leads to nervousness, headaches, insomnia, melancholia, rheumatism, sciatica, heart trouble, ulcer and cancer of the stomach. It makes its millions of victims weak and miserable, listless, lacking in energy, all tired out. It often brings about chronic invalidism, premature old age, a shortening of one's days.

You need the help that EATONIC can give you if you are not feeling as strong and well as you should. You will be surprised to see how much better you will feel just as soon as you begin taking this wonderful stomach remedy. Get a big 50 cent box from your druggist today. He will return your money if you are not satisfied.

EATONIC

FOR YOUR ACID-STOMACH

Willing to Try.

"The Wombats have rented a haunted castle."

"Well, my dear?"

"Our castle is not haunted. We must have a ghost."

"Well, if they will loan me their ghost I'll see if I can match the shade."—Louisville Courier-Journal.

Children Who Are Sickly

When your child cries at night, tosses restlessly in its sleep, is constipated, feverish or has symptoms of worms, you feel worried. Mothers who value their own comfort and the welfare of their children should never be without a box of

Mother Gray's Sweet Powders for Children

for use throughout the season. They tend to Break up Colds, relieve Feverishness, Constipation, Teething Disorders, move and regulate the Bowels and destroy Worms. IS 700 Bushels of Corn Worth Saving?

Wouldn't you like to save 700 bushels of corn each time you fill your silo? In filling a 100-ton silo you put in about 700 bushels of corn when the ears are run in with the stalks.

With a JENNEY SILO-FILLER-HUSKER you can take the ears off, put them in the crib and still have silage with just as much food value and give you just as good feeding results.

Figure out how much 700 bushels of ear corn is worth at present market price—that's your saving.

Let us tell you all about this money-saving, money-making way of making silage. It is opening the eyes of farmers, Experiment Stations and stockmen everywhere.

You don't have to fill your silo at just a certain time—you can fill it and re-fill it from fall to spring. The saving pays for the JENNEY SILO-FILLER-HUSKER in a shortime. (4-D)

Now is the time to look into this money-saving, corn-saving plan. Come in and see us about it.

I hereby announce myself a candidate for re-election for Supervisor, subject to the will of the Republican voters at June Primary.

G. B. LAWHORN

I am a candidate for re-election, subject to the will of Republican voters at Primary Election next.

Very truly yours,
Chris Jacobs, Auditor

I hereby announce myself a candidate for the office of State Representative from Hancock County, subject to the decision of the Republican Voters of said County, at the June 1920, Primaries.

Dated at Britt, Iowa, this 26th day of January, 1920.

E. P. Healy

I hereby announce myself a candiate for re-election for Supervison, subject to the will of the republican voters at the June primaries. H. C. MEYER.

I hereby announce myself a candidate for the republican nomination for the office of recorder of Hancock county, at the June 1920 primaries.

HATTIE M. ALDRIDGE

LEGAL NOTICES

IN THE DISTRICT COURT OF IOWA:—

In Re-Estate of Mary Arnold, Deceased, in and for Hancock County, ss:

Now, on this 14th day of April, 1920, an instrument in writing bearing date the 2nd day of April, 1920, purporting to be the last will and testament of Mary Arnold, having been produced and filed in my office, and by me opened and read, the 10th day of May, 1920, at 11 o'clock A. M., is, by me, fixed as the time for proving the same, and, having prepared and signed a notice of the time so fixed, I now direct that said notice be published, for the period and in the manner provided by law in the Klemme Times, a weekly newspaper published in said county.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the District Court, at my office in Garner, Iowa, this 14th day of April, 1920.

(Seal) A. E. BAUMGARTNER,
Clerk of the District Court

STATE NEWS

Gleaned from many fields and summered for busy readers

A fine brick high school, to cost $80,000, will be erected at Sperry, Iowa, during the coming summer.

Queen of Pathfinders, a Duroc Jersey sow raised by Blackmore brothers, living west of Mt. Pleasant was recently sold for $10,700.

Preparations are being made in Dysart for the construction of the new sewer system, which is one of the town's big improvements for the year.

The 1920 population of Marshalltown, is 15,731 according to figures announced by the Census Bureau. This is an increase of 2357, or 17.6 per cent.

Fifty Thousand persons in Iowa filed income tax returns during the last three days of the filing period. 175,000 persons in all have made reports.

Iowa ranked fourth place in the number of high school students interested in the campaign against venereal diseases during the month of March, according to federal figures just issued.

The members of the selective draft board in Sac City occupy a unique position among the boards of the state and of the country, in that no bills for pay for their services were filed by any of the members and that expenses were held to the minimum.

Fourteen spray rings, covering 270 orchards in Benton county and representing 11,000 trees, have been formed in the county. The machines used in this work are power sprayers costing from $240 to $385. Machines and material are being ordered thru the Iowa Fruit Growers Association.

The 2 cent fare will not come back on the Iowa roads at once. Not now. Perhaps later. The 3 cent fare would undoubtedly produce greater revenue than the 2 cent fare, if there were no other ways of traveling. But if travel by auto costs less many will travel in that fashion rather than to pay 3 cents per mile on the railroad.

In speaking of the old hen we usually think of nickles and dimes, but the egg production for last year in Boone county was $700,000. Iowa's egg production in 1919 was $70,000,000. Poultry as a sideline in the farm game is worthy of attention. About the only way one can tell the average hen house today is to have it labelled. They are mostly alike.

The United States government will rent what was once the state home for inebriates at Knoxville, and turn the institution into an army recuperation hospital. The government would not obtain, either by rental or by sale, the institution dairy herd, or the 350 acres of land constituting the institution farm. The land and dairy herd would probably be retained, and put to other use for the state.

Officers of the Iowa Fleece Wool Growers Association for 1920 are as follows: President, W. W. Latta, Logan; vice president, Will Weible, Brighton; secretary treasurer, V. G. Warner, Bloomfield; sheep specialist, Tom C. Stone, Ames. Directors: R. R. Slattery, Farmington; H. H. Reed, Marengo; John Graham, Eldora; E. L. Bitterman, Mason City; Henry W. Miller, Newhall; V. G. Warner, Bloomfield; Jesse Bane, Bondurant; Arthur Leonard, Corning; Frank Ranier, Logan; H. K. Hutchinson, Ledyard.

The work in Iowa for the coming year along farm bureau lines was taken up at a recent meeting of the organization. It was left with each member of the board to make local arrangements for a farm bureau home demonstration and farm crops work in their respective vicinities. The principal work in such communities along farm crops lines will be with oats. County Agent A. G. Thurman has raised a fund from among the banks of the county to provide $7 in prizes on oats for each township in Mahaska county.

Field crop demonstrations are to be arranged for in Ringgold, Adams and Decatur counties. In Decatur county the present plans are to conduct a corn variety test. In this test 10 local strains of corn will be tried out to determine the highest yielding strain for Decatur county. Two soy bean variety tests are also to be located. In one test the following varieties of beans will be used in corn for hogging down purposes: Ito San, Manchu, Black Eyebrow, Medium Yellow and Wilson. In the other tests the same varieties will be tried out for hay and seed purposes. In Adams county the work will include a corn variety test while in Ringgold county both the corn and the soy bean work will be taken up.

Marion county farmers will plant five times the amount of soy beans in 1920 that they did in 1919. The chief difficulty has been heretofore in getting suitable seed. The seed for this years crops has been ordered thru the Farm Bureau office.

Over 90 per cent of the farmers of Prairie City vicinity have joined the new farmers' co-operative shipping and elevator company recently organized there. A new elevator will be built. Engineers were there recently locating a switch for the new enterprise.

Twenty or 25 workmen are employed at the Waverly sugar factory, fixing up and repairing the plant for work this fall. The old beet sheds have been torn away and in their place will be a huge pit into which the beets will be dumped, an electric dump doing the work. Seed to the amount of three carloads is now stored in the plant and will soon be sent out to the farmers for planting. The company now has more than 4,000 acres pledged and more is being added right along.

Nearly a quarter of a million dollars has been paid out by the officers of Black Hawk county for the care of those afflicted in mind or body, who have been sent to state institutions—the insane, the weak-minded, the blind, the deaf ,the orphaned, those upon whom the dreaded white plague has settled and those whose love for the cup grew into such a strong habit that a cure in a hospital for inebriates was deemed advisable by the court. To be exact, the officers have paid out $214,492.26 of the tax-payer's contributions, with no reimbursement by the relatives such as the law contemplates.

Iowa produced 2,647,685 less tons of coal in 1919 than it did in 1918. This because of the coal strike and a less number of men employed in coal production for 1919. The total production for 1918 was 8,219,315 tons of coal. There were 14,563 men employed in producing coal in 1918. For 1919 the coal production is listed at 5,571,630 tons with 12,886 men employed in production of that amount. There were 225 coal mines operated during 1919 in the state, while in 1918 there were 239 coal mines operated. Labor for the mines in 1918 was divided as follows: Miners and loaders, 9, 217; other underground employes, 3,790; surface employes, 1,556, making a total of 14,563. For 1919 the figures show: Miners and loaders, 8, 237; other underground employes, 3,319; surface employes 1,3330, making a total of 12,886 employes.

The idea of making Chicago a sea port is rather a stretch for the ordinary imagination. But the fight which the lake city is making to have the government provide a waterway from its wharves to tide water so that the largest ships may dock at the lower end of Lake Michigan is a business proposition in which the entire west is interested. If Chicago can win it will benefit every community which must use Chicago railroad terminals now as the outgoing agency of its commerce. Iowa is especially interested in the success of Chicago because Iowa's commercial wealth must pass thru Chicago to its ultimate destination. If the corn and wheat and other products of Iowa could be loaded into the holds of seagoing ships at Chicago docks it would relieve her the tyrrany and inefficiency of railroads between Chicago and New York.

Iowa is the headquarters of the hog, the porcine population in 1919, according to the Government statistics, numbering 19, 125,000, nearly double the number of the second state, Illinois. Iowa had also 1,322,000 sheep, 1,381,000 dairy cows, 2,861,000 other cattle that stood first in the number of horses 1, 567,000; third in the number of beef cattle and third in the number of dairy cattle. This state is also first in poultry and eggs, having, according to the 1910 census over 29,000,000 head of poultry, an average of over a dozen head for every man, woman and child in Iowa. The Dairies supply about 600,000,000 gallons of milk yearly for all purposes. Iowa occupies third place among all the states in the value of its dairy products. Prepared cereal products are also of great value. The total value of Iowa's farm property in 1910 was $3,745,861,000, the land being worth $2,801,947,000 buildings $445,460,000 implements and machinery $95,478,000; live stock $456,453,000.

The old books of the county assessor of Hazleton township, Buchanan county, tell a most interesting story of Iowa land values, and the time dates back to 1867. The footings show that in 1867 the total value of real estate in Hazleton township was $158,480.01, while today there is twice that amount in sight deposits in the two Hazleton banks and the town and township together this year pay the sum of $39,905.44 in county, school and municipal taxes alone. In 1867 about three-fourths of the land was in the possession of non-residents, while the government owned much of the remaining fourth. It was the custom in those days to give resident land owners considerably the best of it when it came to valuations and so while most of the land owned by Hazleton township farmers was listed at $4 an acre ,the bulk owned by outsiders was appraised at $6. This result gradually forced the non-resident to dispose of their land holdings and naturally hastened the development of the state. The highest valuation ever placed on any Hazleton township land at that time was $12 per acre and there was less than 80 acres so valued.

Marion county will have a sales pavilion to cost about $7500 before fair time this year, if the arrangements of the Breeders Association and the Fair Association are carried out as planned at a recent meeting of the two organizations.

Stock companies promoting the sale of stock in Iowa cannot legally issue stock for less than par value, the Iowa supreme court held in an opinion handed down in a case from Audubon county. The opinion was rendered in the case of L. E. Tramp vs. Evans Marquesson.

We have just received a

MOLINE UNIVERSAL Tractor

It solves the farm help problem!

One man controls both tractor and implement from seat of implement, and is so easy to handle a woman or boy can operate it. This tractor can be used for plowing, discing, planting, cultivating, etc. or can be used for belt work as filling silos etc.

We have also just received three carloads of Moline Rock Island and Hayes farm machinery of all kinds.

See the 9-16 Tractor on our floor which is fully equiped with self starter and electric lights.

A BEAUTIFUL GHOST.

Synopsis.—Spalding Nelson is occupying the apartments of his great-uncle, Rufus Gaston. The Gastons, leaving on a trip, tell him about mysterious noises and "whispers" that have scared them. He becomes acquainted with Barbara Bradford, who lives in the same big building. He instinctively dislikes and distrusts the superintendent, Wick. The mysteries in his apartments begin with the disappearance of the Gaston pearls from the wall safe. He decides not to call in the police, but to do his own investigating. It is soon evident that someone has access to his rooms. Becoming friendly with Barbara, he learns that her apartments are equally mysterious. She tells him that several years before her sister Claire, who lives with her, had made a run-away marriage with an adventurer, from whom she was soon parted, and the marriage had been annulled. Claire is engaged to be married and someone has stolen documents concerning the affair from the Bradford apartment and is attempting to blackmail the Bradfords. Nelson takes Miss Kelly, the telephone girl, to dinner with the idea of pumping her. Gorman, a hotel detective, recognizes her as the wife of Lefty Moore, a noted burglar. Nelson partly confides in the detective and arranges to meet him.

CHAPTER VI—Continued.

—8—

"You're right about that," I replied, "and say, look here. Why can't you meet me somewhere tomorrow afternoon. There are a lot of mysterious things happening in the Granddeck. Maybe you can help me in trying to clear them up."

"It's a date. I'll be in the back room of Jim Connor's place over on Third avenue at three o'clock waiting for you."

"I'll be there," I said, as I bade him good night.

"Hold on a minute," he said. "Do you know where Lefty Moore's wife lives now?"

I recalled the number she had told me to give the taxi man and repeated it to him, an address way over on East Sixty-second street near the river.

"I like to know them sort of things," he explained. "In our business you never know when you'll be needing them."

On my way home, after I left him, I congratulated myself on having made James Gorman's acquaintance. In him I had found a man with police and detective experience. The fact that he held a responsible position with a big hotel ought to be sufficient voucher for his honesty. Of course Miss Bradford must be consulted before I met Gorman the next afternoon. I could hardly tell him my own almost unbelievable experiences without bringing in the attempts to blackmail her sister. Surely Miss Bradford would not object to my plan. We were making such poor headway in solving the mystery ourselves that I was certain she would welcome Gorman's advice.

And would it not be a surprise to Barbara Bradford to learn that a criminal—or at least the wife of a criminal—was employed as a telephone girl in the apartment house? I was hoping that she would be at home and in her room when I arrived at the house so that I might signal her and tell her my great news at once.

I let myself into the apartment and without bothering to turn on the lights made my way back toward my own

As the Light Flooded the Room There Was a Suppressed Scream Followed by a Frightened Gasp.

room. As I reached the end of the hall my ears detected a scuffling noise that seemed to come from my quarters. I stopped stock-still and listened breathlessly. Unquestionably there was someone in my room.

I tiptoed softly forward. As I crept along in the darkness, making no sound, I found myself devoutly wishing for some weapon. Of course it might be Barbara, who had entered by means of the ledge to leave some message for me, but if it were not she, I felt certain that I would discover who was at the bottom of the plots against us.

I gained the door without my presence having been discovered. In the dim half-light that came from the open window I could detect a figure standing on a chair apparently feeling along the wall near the ceiling. I recalled with curiosity that it was from that spot that the whispers I had heard had seemed to come.

Inch by inch I edged noiselessly forward, my eyes on the intruder until at last my fingers found the electric light button. As the light flooded the room there was a suppressed scream, followed by a frightened gasp. The figure on the chair turned quickly and faced me. I saw that it was a woman, a badly frightened woman, with her hands clutching at her heart. Almost instantly I recognized her. It was not Barbara Bradford, but her sister, Claire. She was clad in some sort of a dark house gown thrown over her nightgown. Her slippered feet were bare of stockings, and her hair hung in a great braid down her back.

As I stared at her she sprang from the chair and made a rush for the open window. I grabbed for her and though she fought desperately I managed to hold her fast and to drag her away from the window. After a moment's futile resistance she suddenly collapsed in my arms, moaning in a tense whisper:

"Let me go, please let me go."

I placed her in a chair, and still keeping a tight hold on one of her arms, studied her, debating what to do. What desperate motive could have driven this girl to the daring journey across the narrow ledge by which she had gained access to my quarters? Was she, I wondered, once more in the power of that evil ex-husband of hers, driven by fear of him to such desperate deeds.

"Let me go," she moaned again.

"Not until you tell me what you were doing in my rooms," I answered firmly.

"I did not know there was any one here. I thought the apartment was vacant. I thought the Gastons were away"

"But why did you come?"

"I can't tell that," she moaned. "I can't! I can't!"

"You must," I repeated. "I am going to keep you here until you do tell me."

"You must not keep me here," she said. "I don't want my people to know about my having been here. You look like a gentleman. Please let me go."

"Doesn't Barbara—doesn't your sister know you are here?"

At my mention of her sister's name an expression of amazement escaped her.

"Who are you?" she asked excitedly. "How did you know who I was?"

"I am a friend of your sister," I answered. "She will tell you who I am. You must trust me. I feel I have a right to know what you are doing here. Won't you tell me?"

A strange look came into her eyes and she shook her head.

"You wouldn't understand. I was trying to trace the whispers."

"The whispers!" I cried excitedly. "You have heard them, too?"

"Often," she said. "I heard them tonight. Mother and Barbara were out to the theater. They seemed to come from near the ceiling in my sister's room. They seemed to vanish in the direction of this room. I thought there was no one here. I decided to creep along the ledge and see if I could trace them."

"And did you succeed?"

She shook her head.

"When I first came in this room I could still hear them. They seemed to be coming from up near the ceiling. I got up on a chair and put my ear to the wall to listen. Then they stopped altogether and then—you came in. May I go now—before my mother comes home?"

"On one condition," I answered, "that you tell your sister about your having been here."

"I'll tell her if you wish me to," she replied, "and now, please may I go? Could you let me out of your door? See, I brought a key to our apartment with me. I don't think I dare make that trip across the ledge tonight."

As I escorted her to the door, my mind in a whirl over the events of the evening, I suddenly remembered how important it was that I should see her sister for a long talk before I kept my appointment with Gorman.

"Tell your sister," I said to Claire Bradford as she departed, "that it is imperative that she meet me at luncheon tomorrow. I have news of the utmost importance—news that concerns all of us. Tell her to meet me at the Astor at one. She must come."

"I'll tell her," she replied.

CHAPTER VII.

It was the next evening that I made my astounding discovery, when pure chance led me plump into what both Barbara Bradford and I recognized at once as our first real clue to the mysteries surrounding us.

My find came unexpectedly at the end of an exciting day. As may be imagined I slept little in the hours following my unexpected meeting with Claire Bradford in my rooms, coming as it did right on top of Detective Gorman's revelations as to the identity of the telephone girl. Coupled with these circumstances was the fact that if my hopes were realized, Barbara would be within a very few hours lunching with me for the first time.

I just had to see her before I met Gorman. The tale I was to unfold to him was so improbable, so almost unbelievable, that I wanted to go over it with her step by step, in order to be able to convince the detective that it was the absolute truth.

I could not help but realize how preposterous it would sound in the telling. Mr. Gorman could hardly be blamed for believing that my mind had been inflamed by witnessing too many movie thrillers. Yet I had proof. There were the entries in my great-uncle's diary that I could show. I had the anonymous notes. My story of the strange whispers, if need be, could be confirmed by the old laundress, by Barbara Bradford, yes, and by Claire, too. That is, if the reason Claire had given to account for her presence in my room was the true one. It sounded logical, and yet I did not place the confidence in her that I did in Barbara.

But what I relied on most of all to convince Gorman of the truth of my preposterous tale was his own knowl-

"She Shouldn't Have Gone to Your Room. That's Just Like Her, Though."

edge of who the telephone girl was. Just when I had reached the deduction that the band plotting against us must have a coadjutor in the building, he had come forward with the knowledge that pointed toward the person most apt to be involved.

I was pondering it all over in my mind as I left the house to meet Barbara. I was out on the street and just turning the corner when I remembered that I had spent most of the money in my pocket the night before. Retracing my steps, I returned to my apartment and took some bills from their hiding-place in the bookcase. As I emerged into the street again, I became aware that across the street was a man whose appearance seemed vaguely familiar. As I once more turned the corner, walking briskly, I glanced back for a second look at him and was surpised to see him coming in my direction.

Then all at once my subconscious mind came to my rescue. I realized when it was that I had seen him before and what made his appearance so familiar. As I left the house not ten minutes ago that very same man had been standing across the street. As I had turned back at the corner he had been coming in my direction just as he was now.

He must be following me, trailing me, shadowing me. I determined to test out my theory. At the next corner I turned sharply, glancing quickly back as I did so. He was still following me, though on the other side of the street and perhaps half a block away. I went a few steps out of sight and then stopped as if to look in a shop window. He came hurrying around the corner an instant later, slowing down as soon as he spotted me again and walked on slowly past me as if not noticing me. I waited until he was some distance beyond and retracing my steps quickly to the avenue again stopped in the shelter of a building to light a cigar, purposely wasting a number of matches. In hardly ten seconds he was back, covertly watching me from the other side of the street.

There was no question about it. He was trailing me. But who could be having me shadowed? Certainly he was not in the employ of the Bradfords or of Detective Gorman. Either he must be one of the band of plotters, or—I hated to voice my suspicion, but somehow the thought of my great-uncle Rufus kept obtruding itself. It would be just like the suspicious old miser, if it was he who had planned all this deviment, to put me in a position of trust and then to have me watched night and day.

Whoever it was that inspired this pursuit, I determined to lead my shadow a merry chase. Jumping into a taxi I bade the driver take me to a department store. Looking back I saw the shadow hastily entering another cab. Arrived at my destination I thrust fare and tip into the driver's hand and hurrying inside managed to catch an elevator just ascending. One flight up I got out and redescended to the main floor by a staircase at the rear, emerging thence on to a side street. A second taxi took me to the Twenty-eighth street subway station, and there, with no sign of my pursuer, I took a train to Times square and went to the Astor to meet Barbara Bradford, arriving on the dot of one. She was there awaiting me and we quickly found a secluded table in one of the less conspicuous rooms.

"I've told Claire everything," she said as soon as we were seated. "I hope you're not angry with me."

"Of course not. You had to tell her. I am sorry to have frightened her."

"She shouldn't have gone to your room. That's just like her, though. She always acts on the spur of the moment. She's awfully worried, too, poor girl."

"We can save her," I said.

"Why," she asked quickly, "what have you learned?"

"I was convinced that they must have someone in the house aiding them. I've found out who it is. It's the telephone girl—Nellie Kelly is the name she goes by."

"I can't believe it," cried the girl, shocked at my statement. "She's only a girl like myself. I have talked to her lots of times. I'm certain there's nothing wicked or wrong about her."

"I'm afraid there is," I explained. "I took her out to dinner last night, to the White Room. The house detective, while she was off telephoning, practically ordered me out of the place because I was with her. She's notorious. Her husband is Lefty Moore, a well-known burglar. He's in Sing Sing now. Detective Gorman arrested him. He ought to know."

"Oh, the poor girl," exclaimed Miss Bradford, tears welling up in her eyes. "I'm so sorry for her."

"But think of your sister. Think what they are trying to do with Miss Kelly's aid."

"But how do you know she's aiding them?"

"I don't know it. But I do know that nobody could pull off all the things that have been happening in the Granddeck without some one there helping them. We've found someone used to helping criminals—a criminal's wife. Isn't that enough? All we need to do now is to watch her closely and fasten the thing on her."

"How are you going to do that?"

"That's why I insisted on your coming here today. I am to meet Detective Gorman at three. I feel that he could aid us, and I think we ought to tell him everything."

"Tell the police!" Her face grew white at the thought. "Wouldn't that mean a scandal—the newspapers and all that sort of thing?"

I shook my head decisively.

"Gorman's not with the police now. He is employed as a hotel detective. But he is just the man we need to help us. He knows all about criminals and how to track them. With his aid we can quickly clear the whole thing up."

"Will you have to tell him everything—about Claire's marriage?"

"We've either got to tell him everything or nothing."

"Oh, how I wish we did not have to. The more people there are who know about things the more likely they are to become public."

"Yet you trusted me with your sister's secret."

She gave me a quick glance of confidence.

"You're different."

"I'm afraid most people would not agree with you. They would regard me as a worthless, discredited young fellow out of a job."

"But it's not your fault."

"The point is," I went on, "that we have reached a place where we need expert advice. Gorman has fortuitously turned up to give it. The only way is to tell him everything."

For a moment she debated the matter silently, her pretty forehead puckered in thought.

"Yes," she said at last, "I suppose it is the only way. But won't he want a lot of money for his services?"

"I'll attend to that," I answered. "I'll make my great-uncle reward him handsomely for recovering the Gaston jewels."

"If he does."

"He must. We've got to get them back."

From her hand-bag she produced the anonymous letters she had received and handed them to me.

"Will you want to show the detective these?"

"Yes, I think I had better. The whole tale sounds so preposterous that I need every bit of corroborative evidence we can muster."

For half an hour we lingered over the table, discussing all the aspects of the case. Eventually I think I persuaded Miss Bradford that the evidence pointed most damningly to the telephone girl as one of the conspirators or at least one of their aides. She was eager to know what plan of action Gorman would advise and as we parted we arranged to be at our adjoining windows at ten that evening in order that we might have another chat.

I found Gorman waiting for me at the place he had mentioned.

"I told you that girl was a bad one," was his greeting.

"What do you mean?" I cried. "What have you learned about her?"

"Nothing except that the address she gave you last night was phony. The number she gave is the hospital grounds"—he pronounced it "horspital."

"Where does she live, then?"

"She's keeping that under cover. She shook the taxi at Fifty-ninth and Third."

Detective Gorman to the rescue.

FRICK'S SECRET OF SUCCESS

Entire Devotion to Business, Coupled With Tireless Search for Offered Opportunities.

Shortly before Mr. Frick's death he was asked what was his secret for success.

"The secret of my success?" he repeated. "There is no secret about success. Success simply calls for hard work, devotion to your business at all times, day and night. I was very poor and my education was limited, but I worked very hard and always sought opportunities. To win in the battle of life a man needs, in addition to whatever ability he possesses, courage, tenacity and deliberation. He must learn never to lose his head. But, above all, hard work is the thing. For six years —from 1889 to 1895—when I first took hold of the Carnegie steel business, I did not have a day's vacation. I reached the office every morning between seven and eight and did not leave until six. My example had an influence upon the others. Carnegie often remarked to me: 'You do get work out of those fellows.' They worked because they saw that I, then the chairman of the company, worked."—Forbes Magazine.

ONLY ONE HOPE REMAINED

Under the Circumstances, Little Fellow's Suggestion Called for Immediate Adoption.

Members of a boy scout troop were having a knot-tying contest. The boys in each team had a short piece of rope and when the signal was given they had to tie these together, pass on to the leader, who then threw the finished rope out to a boy at a distance, who was to represent a drowning boy.

The signal was given, the boys on both sides hurriedly tied their knots and passed the finished rope to their leaders. Leader of Team 1 had thrown his rope and helped haul in his suffering brother, but leader of Team 2 was not so fortunate. He threw his rope time and again and each time missed his goal.

Then a little fellow far down toward the other end of the team heaved a prodigious sigh.

"No use to throw that rope again," he called out. "He's gone down now for the third time. Better get the pulmotor."

Rash Statement.

At the workingmen's institute there rose a fierce discussion as to whether women should be given a chance of filling the high appointments.

"'Twouldn't do!" said a youthful and newly married firebrand. "Just think of a woman as a secretary of the treasury. What do they know about finance, anyway?"

His effective pause was spoiled by an older man, who said, solemnly:

"You just go home to the missus next Friday night $5 short in your pay, and you'll soon find out!"—Pittsburgh Chronicle-Telegraph.

Social Duties Neglected.

A little girl had been taken to church for the first time, and she was somewhat surprised by the general style of the building, which was quite unlike anything she had previously seen.

"Whose house is this?" she asked.

"It is God's house," her mother answered. The child took another critical view of the building.

"It is a very nice house," she finally soliloquized. "We have never called here before."—Boston Transcript.

He Wasn't So Much.

Giles' grandmother, with whom he lived, was ill and the little fellow was left uncared for except for his own childish efforts. One day he came home very dirty and shabby in appearance and with his stockings down.

His grandmother bewailed the fact that she was unable to take proper care of him.

"Gee, grandmother," said Giles, "you don't know the world. You ought to see the other guys."

Distinguished Family.

The Rodriguez family from Porto Rico, according to the files of the bureau of war risk insurance, sent 894 men into the American forces and among this number, which was almost large enough for a battalion, there were but seven first named as follows: Domingo, Francisco, Jose, Juan, Romos, Tomas and Antonio. The serial number of each man was in the 600,000 class.

GIVE THE FARM LOAN SYSTEM FAIR CHANCE

Dean Coulter of West Virginia Agricultural College Opposes Changes in Farm Loan Act.

FARM MORTGAGE BONDS SAFE

Experience of Germany With Joint Stock Land Banks Bonds Is Reassuring to American Investing Public.

"Give the farm loan system, in its present form, a chance. I worked for it for years before it was enacted. It has not had a chance to fully develop on account of the short time it has been in operation and on account of war conditions. Leave the system alone long enough for it to prove its worth."

This was the appeal made by John L. Coulter, dean of the West Virginia Agricultural college, to the United States senate committee on banking and currency.

There was pending a bill, commonly known as the Smoot bill, which, if passed, would make farm mortgage bonds subject to the income tax. This tax on the bonds would result in an increase in the interest rate on farm loans and also would drive the joint stock land banks out of business.

Wants Both Types of Banks.

Dean Coulter believes there is a distinct service for the joint stock land banks to perform and a distinct service for the federal land banks to perform. He believes that the bonds of both banks should be exempt from

John Lee Coulter.

taxation. In a letter to the senate committee he said:

"It will be a grievous blunder to repeal the tax-exemption clause as applied to either the joint stock or the federal land banks and it would be a serious blow to the system to drive either type of these land banks out of business. The two types of banks are demanded by the investing public and are demanded also by the borrowing public.

"When the original act was passing through its various stages in congress, we fully investigated the viewpoint of the investors. We found that many who are interested in farm mortgages or loans on farm lands said: 'We would prefer the bonds of the federal land banks because they would represent the joint or co-operative liabilities of scores of small farmers, and they are, after all, the backbone of the nation. When they fail we are all lost.' We found about an equal number who insisted: 'We want bonds issued by joint stock banks with double liabilities, with limited right to issue bonds (only 15 times their stock compared with 20 times for the other) and with bonds based upon farms of individual, large-scale farmers where brain supervises brawn.'

Farm Bonds Safe Investment.

"It was clear to us that there were two classes of farmers to serve, those who wanted to form associations, and those who wanted to 'go it alone.'

"The two classes of farmers and the two classes of investors and, therefore, two sources of funds for the development of agriculture, all looked toward more food for our great urban centers, which, if it would not mean lower prices, would at least mean that prices would not go so high as otherwise would be the case.

"You may be interested as to the situation in foreign countries during the war. Even in Germany during the war, the two types of banks (the joint stock and the co-operative banks) continued to thrive side by side. I am told that the bonds of the stock banks sold better than government bonds, while the co-operative land banks (landschaften) bought large blocks of government bonds. In other words, governments may come and go, may rise and fall and change form, and government securities may be accepted by the new government or may be disclaimed, but bonds based upon farm mortgages are as good as the land itself, which is as enduring as the world and more permanent than life itself."

HAD ALMOST HUMAN SENSE

Cat Whose Decease Is Mourned Said to Have Been Marvel of Feline Intelligence.

Ginger is dead.

Ginger was only a cat—a fine, big Persian cat—but it was worth one's while to have known him. He did some things that even human beings too often neglect to do—he said his prayers every night and he never stayed out late nor disturbed the neighborhood by singing "We won't go home till morning!" He was a respectable cat, and if there is a cat heaven Ginger went straight to it.

Ginger made his home for nine years with Dr. John A. and Josephine Carten Price in Denver, Colo., and when he died a few days ago he was buried with all the rites and ceremonies usually given a human being—coffin, shroud, tears, tombstone and all.

Ginger could sing, talk, wink, say his prayers and hold a conversation over the telephone. His wonderful intellect was almost human and he was known to scientists and students in psychology all over the country. His articulation on human words was marvelous.

Such words as "daddy," "mamma," "cowboy ranger," "I love you," and many others were pie for Ginger. One of the most wonderful traits of Ginger was his delight in "talking over the telephone" to his human friends, and he would listen to the mysterious voice that came back to him with marked attention. If the telephone bell would ring he would run to his masters and call out "r-i-n-g, r-i-n-g-g!"

With his paws upon his little bed Ginger would kneel every night and literally "say his prayers." A wonderful cat was Ginger, and when he died it was almost like taking a baby from the Price home. I knew Ginger for six years, and that this article may not be taken for a joke, I vouch for its truthfulness.—A. U. Mayfield, in National Humane Review.

Ha-Ha-Ha!

At the foot of a steep hill stood a signboard on which the following notice was painted:

"Danger—Bicyclists and autoists are hereby notified that this hill is dangerous and they are cautioned to come down slowly."

Appended to this were the equally funny lines.

"Any person not able to read the above will have it read for them if they call on the blacksmith who lives around the corner."

A Scotsman saw this notice and explained to his friends that the point of the joke was that the blacksmith might not be at home.—Boys' Life.

Query From Sir James.

Here is a story with a moral for telephone users. Hon. James Duff of Canada was in the habit of shouting into the receiver, and one day Sir James Whitney, who was in his office nearby, asked what all the racket was about.

"It is Mr. Duff, sir," replied the clerk. "He is talking with his wife up in Simcoe county."

"He is, eh?" said Sir James. "Well, why on earth doesn't he telephone her, instead of yelling across the province like that?"—Boston Transcript.

Names Almost Identical.

Attention has been called to the fact that in Tamil, the language of Ceylon, the names for apes, ivory and peacocks are almost identical with the Hebrew.

Worth While.

Try to live up to the best thoughts that come to you in your best moods. —James B. Angell.

Garner, Iowa

Cravenettes and Raincoats

THE SPRING SEASON calls for something just a little different in an outer garment. You want protection against rain as well as cold during this uncertain period. We suggest a good Raincoat or Cravenette which answers a double purpose—that of keeping you warm as well as dry.

You do not have to necessarily buy the staple regular garment that is shown, as this part of the clothing business calls for stylish, snappy up-to-date models and good models.

We carry the conservative to the extreme models and invite your attention to this department in our store.

Prices $5.00 to $27.50

We have a display of the above in our window.

Facts About Sewerage

SOME REASONS WHY KLEMME NEEDS A SEWER SYSTEM

The biggest question in the history of Klemme is now being discussed by the people in Klemme and as the council is now looking up the cost of installing a sewerage system the Times believes the following will prove of interest to all—

By proceedng with the plan now this council can get the work done before their term of office expires thus avoiding the possibility of a change in administration during the construction.

There seem to be no good reasons to xpect that either engineering or construction costs will decrease within the near future, but there are good reasons to anticipate future advance. No town in the past has profited by waiting, but in each case has lost money and the use of the improvement.

Public improvements, such as sewers and pavements increase the property values and make the properties more saleable. This may actually have the effect of reducing the rate of taxation.

Public improvements advertise a town throughout the state.

Sewers make a community more healthy and sightly by abating the fly and rat nuisance, by doing away with slops and garbage on the back yards and in the streets and alley gutters, stopping the polution of the ground about private wells.

Health statistics where kept usually show a large decrease in the number of cases of dysentery after the installation of sewers and waterworks due to the lessening of the above conditions.

Sewers make your town more desirable to live in and thereby hold citizens within your city, that otherwise would move to places that are modern.

Sewers add permanently to the work available to the laboring class and make and draw other forms of business.

It is more economical and sanitary and convenient for new buildings to connect to sewers than it is to construct cess pools. Therefore the sooner the sewers are constructed the less money wasted in the construction of the cess pools.

Sewers should be constructed before the streets are paved, otherwise when the sewers are ultimately constructed, the pavement must be seriously damaged.

Have you ever known any Iowa city or town with a sewer system, where the citizens as a class were willing to take back the money the system cost and abandon it?

BAND BOYS HAVE NEW DRUM

The big bass drum for the Klemme band has come at last after a couple of months of patient waiting. This completes the necessary equipment for the band and they can now go ahead full steam and be ready for the first concert which will be on Decoration Day. As the band is one of the largest in the state it was necessary to have a large drum and the one the band now has is in a class by itself—it would look big beside an elephant and sure is a peach. We believe Bobby Carr would make a good drummer for this instrument as he could carry it around on top of that bay front he sports.

Clarence Arnold is listed among those on the sick list this week.

Dr. Tice and family and Miss Geraldine Smid autoed over from Mason City Tuesday. They found the roads to be in a bad condition and were on the way several hours, getting stuck in the mud several times.

Bert Mathews and John Opsal sallid forth in Bert's flivver for Garner and Mason City Sunday. We notice that these young men make this journey quite frequently and we ask our readers, what attracts these young men away from Klemme?

OVERLAND DRIVERS RETURN FROM TOLEDO

About five o'clock Supnday afternoon, C. W. Wiles, John Day, Howard Doyle and W. F. Pavey pulled into Klemme after their eight hundred mile drive from Toledo with four new Ovrland cars for Mr. Wiles.

The men eport a very interesting trip. They spent several days at Toledo, where they went thru the Overland factory and saw how the cars were made and assembled. They reported that traffic in the eastern cities was very congested and that it took them several hours to go thru a large city. They also saw several accidents in the cities as there were thousands of cars of all makes being driven to different states, all makes of cars were being delivered in this way. They also experienced all kinds of roads. Th roads in the east were in bad shape due to the heavy traffic over them continuously and even the hard pave roads were rough and chucky due to the heavy travel. They found the best roads in Iowa and were glad when they hit them, as it was quite a relief. In some places they drove over planked roads, the idea being to prevent the cars from sinking into the mud. Another compliment for Iowa is that they found the Iowa highways to be well and plainly marked and were easy to follow. Considering the distance and the bad roads they went over the men made very good time as they left Toledo Wednesday and reached here Sunday afternoon. The four men and Dick Baman of Garner who also was with them all had a splendid time, from the time they left Fort Dodge on the special train with over a hundred Overland drivers until the time they were home again.

MARRIED

Wedding bells have not been ringing very loudly of late and we thought perhaps that many couples were awaiting the arrival of June, as that is the month of weddings, but not so with Harry Ruka and Miss Ruby Okrueg of Goodell, as they were married at the U. B. church at that place yesterday by Rev. Miller. These young people are well known in Klemme and their many friends extend congratulations. We understand they will go to housekeeping on a farm near Goodell.

IDLE HOUR THEATRE

For Saturday, April the 24th, a very good six reel feature is offered on the program:—

Piscilla Dean in
SILK LINED BURGLAR
Six Reels

In addition to the above one reel of good comic will be shown Saturday night, April 24th.

"BOBBIE" GETS THE PRIZE

The man who was here last week showing local pictures at the Idle Hour conducted a contest along with the show to stir up a little interest and exciement. The most popular gentleman, lady and baby were to receive a prize. When the smoke of battle had cleared away and the votes counted, "Bobbie Carr," who is sometimes known as John Henschen, was awarded a fine jack-knife for being the most handsome looker in town or whatever it was he was supposed to be, anyway it cost "Bob" a box of cigars to settle the dispute with the fellows. Mrs. Kate Nissen received a fine aluminum percolator as her prize and little Novella Bredbenner was proclaimed the most popular baby in the city and as a token of the honor she held was presented a gold ring.

THIS IS CLEAN-UP WEEK

This is Clean-Up Week for Klemme and all property owners are requested to co-operate in the movement by cleaning up thir yards and having rubbish and ashes hauled to the dump. Everybody likes to have Klemme look spick and span but it cannot look that way unless every individual will do his part in cleaning up his own premises. Get out the old rake and go to it.

LOST, PLEASE RETURN

A very valuable chunk of coal, weighing several ounces, disappeared from our office the other day. Finder please return and receive reward. J. Jones, Jr.

Like Human Engine.

A locomotive may be all right in the long run, but at that it frequently has to take water.

INTER-CHURCH MOVEMENT IS RAY OF HOPE IN THE FAR EAST

Protestant Men Outside of the Church are Showing Much Enthusiasm

"If the churches in every county in Iowa will team together, and make a thorough county canvass," says E. C. Wolcott, regional director of the Interchurch World Movement, "there will be more enthusiasm among the men who do not attend church, than there has been in the past.

"The Protestant men outside the church are showing tremendous enthusiasm.

"A Billy Sunday gospel team organization in cooperation with overseas members of the American legion are planning to cover every schoolhouse in one of the Iowa counties, and will challenge every service man in that county as the last battle and the great victory fight.

"The churches in the county are going to miss their one great opportunity, if they do not enlist members of the American legion.

"Bishop Morrison of the Episcopal diocese of Iowa gave a great address at the county conferences and will join in a speaking tour in favor of the movement.

"Sherwood Eddy, International Y. M. C. A. secretary, just home from the Far East, spoke to 300 men at Davenport, Iowa, and said that 'the Interchurch World Movement was the only optimistic note of hope in the Far East, and that it is up to the churches to prove our war ideals were real."

NOTES

"China has only one large university and students must come from the distant eastern provinces and from western provinces to attend this one large center of learning.

The name White Cross Service was agreed upon at a meeting this week of the National Board of Review, composed of official representatives of the thirty denominational boards cooperating in the Interchurch World Movement.

Welfare work among the million and a half migrant workers in the United States, men and women whose livelihood is won by temporary work at seasonal jobs, has been given a distinctive name by the Interchurch World Movement, now making surveys of this migratory army, in the designation "White Cross Service."

In the harvest fields of the middle west, the Interchurch welfare work will be known as the White Cross Harvest Service and in the cannery sections the work will be known as the White Cross Cannery Service. Similarly, as further ramifications of the work are agreed upon, the White Cross Service will be carried to other parts of the country where the migrant worker passes and repasses year by year.

In the last analysis the Interchurch World Movement is a great spirit, who is eager to be clothed in flesh and blood and walk among men, turning their faces to the future, instilling right, breathing hope and lending courage. No nation in history ever had such an opportunity as is presented to this country at this time, and the fight is on to see whether Christ or Mammon shall win.

This welfare service is based upon actual needs, discovered through the surveys of the Interchurch World Movement, the basis for the forthcoming drive for $336,777,572, April 25 to May 2, when thirty of the strongest denominations in the United States will join forces in an endeavor to raise this vast sum for meeting the situation at home and abroad. The expenses of the White Cross Service will be met out of this great general 1920 fund.

All thinking people realize that the program of Jesus Christ, if pressed to its fulfillment, comprehends a much wider basis of life than yet put into operation by the churches. It is in precisely this forward march that the churches must lead us in the present universal quest which is to bring on the Kingdom of God among men. As Jesus gave His life for others, the church is being called to reproduce this law of life today. The issue is so tremendous that under it the churches of America will make or break in a comparatively short time.

The Interchurch Movement is making intensive studies of the army of a quarter of a million harvest hands who work their way annually from Texas to the Canadian border; the army of lumberjacks and loggers in this country; the sheep shearers of the Rocky Mountains; the 20,000 men, women and children who work each spring and summer in the fruit and vegetable cannery industries in Delaware, Maryland, New Jersey and New York, and the homeless, voteless men engaged in railroad construction and similar occupations beyond the pale of civilization.

CHURCHES

FIRST METHODIST EPISCOPAL

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service.

Epworth League Sunday night at 7:30. Preaching service at 8 o'clock.

Midweek prayer services on each Thursday evening at 7:30.

A hearty welcome to all who come to worship with us.

A. H. Meyer, Pastor

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 a. m. and 7:30 p. m.

Sunday School at 11:00 a. m.

Morning sermon subject, "The Worthy Christ."

In the evening Klemme Lodge No. 445, I. O. O. F., will attend in a body in recognition of the anniversary of the founding of Odd Fellowship and the pastor will speak of Friendship, Love and Truth.

A cordial welcome to all at these services.

A. E. Buriff, Minister

ODD FELLOWS ANNIVERSARY

Monday, April 26th, is the one hundred and first anniversary of the founding of the Independent Order of Odd Fellows, which in the century has grown to be one of the strongest numerically of all the fraternities now working in the United States. It is a purely American institution, founded in Baltimore, Maryland, for though there is a degree of resemblance between it and the Manchester Union, a British organization, there is no organic connection. However, in this century of growth it has penetrated into other lands and lodges, and even grand jurisdictions of Odd Fellows are to be found in many parts of the world outside the limits of continental United States.

The local lodge of Odd Fellows will celebrate this anniversary this year by attending in a body the service at the Methodist Episcopal church next Sunday evening, meeting in their lodge room at 7:00 p. m. and going from thence to the church for the service at 7:30. Klemme Lodge has invited the lodge at Garner to meet with them on this occasion and it is expceed that a considerable number of the Garner people will be present.

TO PAVE 106 MILES OF ROAD

Contracts Have Been Let for This Amount of Hard Road and More is Being Planned Upon

So far Iowa has let contracts for 106 miles of brick and concrete for country highways and 150 miles will be completed this summer according to figures furnished by the Iowa Highway Commission. Cerro Gordo leads with 28.1 miles of concrete, Scott is second with 21.7 miles of brcik and O'Brien third with 21.5 miles of concrete.

Prices range all the way from $3.59 to $4.37 per square yard for concrete and $5.43 to $5.93 for brick. These contracts were approved by the county supervisors and while they have not been approved by the highway commission, it is expected they will be.

State road officials had approximately 350 miles of paving in shape for letting in 1920, but due to the lack of contractors and materials it was thought that 50 miles would be the limit. However, Minnesota, Illinois, and Wisconsin contractors came to the rescue and have taken 40 miles of the work.

THE EDITOR

Breathes there a man with soul so dead, who never to himself has said: "That editor has quite a head, I'm glad to take his paper. He's got a raft of grit and sand, he prints the news of all the land, he boosts the town to beat the band, and that's the proper caper. He soaks the grafter in the neck, he saves the Ship of State from wreck. He's Johnnie on the spot, by heck, when things are in a jumble. He writes the ads that bring the dough; he chases all our gloom and woe; he tells us all we want to know—and yet he is quite humble.—Walt Mason.

YET FIGURES DON'T LIE

A nIrish laborer struck his boss for an increase in pay. The boss replied: "If you are worth it I will be pleased to give it to you. Now let us see what you do in a year, Pat. We have 365 days in a year: you sleep 8 hours very ady, which makes 122 days you sleep ,taken from 365 leaves 243. Now you have 8 hours recreation every day, which makes 122 days, taken from 243 days, leaves 121 days. We have 52 Sundays in a year which you have off leaving you 69 days. You have 14 days in a year. Take this off and you have 29 days left. Now Pat if you will allow 1½ hours for meals which total in a year 28 days. Take this off and you have 1 day left; I always give you St. Patrick's day oc, so I ask you Pat if you are entitled to a raise?"

Pat then answered. "Well what the devil have I been doing then?"—Luverne News.

PIDGEON GERMAN

An American soldier brought in a Hun prisoner and found the fellow had a pocketful of French money. The doughboy looked at the money, the picture of fine restaurants in Paris loomed before him, and then, tapping the Hun on the shoulder, he said:

"Kamerad, kanst du craps schutzen?"—The Trouble Buster.

W. F. Pavey has a rather attractive looking ad in this issue pertaining to the Case tractor which he sells. It might be well for any farmer interested in "horseless" power to look over what Pavey has to say in this issue.

Quite Catty.

"Why don't Mrs. Glipping and Mrs. Twobble speak any more?"

"Oh, they had a little spat and Mrs. Twobble insinuated that Mr. Glipping was squirrel food—you know that slang word, 'nut.'"

"Well! Well! She surely didn't come right out and say that?"

"No, but she advised Mrs. Glipping to keep a close watch on Mr. Glipping when she took him for a stroll through the park.—Birmingham Age-Herald.

Settled at Last.

Flatbush—So their child is christened at last?

Bensonhurst—Oh, yes; last night.

"Were you there?"

"Sure, I was."

"Some occasion, I'll bet."

"You said it."

"And what was the dear child christened?"

"A boy!"

Not a Political Reason.

Mrs. Hoyle—I understand that you are trying to get votes for your husband for alderman.

Mrs. Doyle—Yes, the board meets once a month and I would like to have twelve times in the year when he did not have to tell me a fish story regarding where he had spent the evening.

Knotty Problem.

First-Class Scout—This rope is too short on one end.

Brilliant Tenderfoot—Well, why not cut a piece off the other end and tie it on?—Boys' Life.

The Reason.

"They say England is crazy over spirits."

"No wonder with a lot of our stock probably going over there."

Unanswerable.

"I hope you didn't take a second piece of cake, Ethel?" said the mother to the young daughter, who had been visiting a friend for tea.

"Yes, I did, mother," replied the child. "You told me never to contradict, and the lady said: 'I know you'll have another piece of cake;' so what could I say?"

Still Frivolous.

"The war sobered some people."

"Yes?"

"But not Mrs. Gadder."

"No?"

"She's going to Europe soon and she is asking everybody what would be the proper costume to wear when viewing a battlefield."—Birmingham Age-Herald.

Rather Tactless.

As they sat holding hands in the moonlight, she said: "Are you lucky at poker?"

"No," he replied; "it is always my luck to hold bum hands—at poker and everything."—Houston Post.

Tunny Japanese Fish.

Tunny are caught along the Pacific coast of Japan from Formosa as far north as the Hokkaido. The total annual catch varies greatly, but the average for recent years has been 25,000,000 pounds, valued at $1,000,000.

50 YEAR OLD CACHE FOUND

Stefansson Discovers Supplies Left in 1850 to Aid Ill-Fated Franklin.

RECALLS TRAGEDY OF ARCTIC

Food and Clothing Found to Be Almost in as Good Condition as When Placed There by McClintock in 1853.

New York.—Of interest to all who have heard the call of the North and the lure of exploration is the announcement that Vilhjalmur Stefansson found the abandoned cache of Sir Leopold McClintock, commander of the Intrepid, in the Arctic after a lapse of more than half a century. It was Sir Leopold McClintock, in command of the ship Intrepid, who found traces of the voyage of that unfortunate explorer Sir John Franklin. He built a cache on Melville island, presumably between 1850 and 1854, when in quest of tidings of Sir John Franklin and the members of his ill-fated expedition in the Arctic.

Located by Stefansson.

The McClintock cache was located by Stefansson, who reports that he found everything in almost as good condition as when placed there in 1853. Articles of clothing he found particularly well preserved and much better in quality than the clothing of today, and the food and supplies left in the Arctic cache by Commander McClintock and his men also were well preserved, despite the severe weather known to prevail in the Arctic regions.

Documents and a list of the contents of a cache built in the far North by Commander McClintock and other data also were found by Capt. Joseph E. Bernier, in command of the "Arctic" expedition of 1908-1909. A tablet erected on Dealy island by Captain Kellett and Commander McClintock in 1852-1853, whose vessels were lost, also was found by Captain Bernier and re-erected, with his own tablet, on Parry's Rock, commemorating the annexing of the Arctic archipelago in 1909. On the tablet found by Captain Bernier were the names of the ships navigated by the explorers—"H. M. S. Resolute, Henry Kellett, Esq., C. B., H. M. S. V. Intrepid, F. L. McClintock, Esq., Comm. Wintered 1852-1853, S. 82 E. (true). Door of Depot House (with direction given). Record will be found in house."

"Lieutenant McClintock," says Captain Bernier, who was commander of the Intrepid and second in command to Captain Kellett, early showed his great activity by making sledge journeys of a hazardous nature across Melville island from the locality in which the Resolute and Intrepid were frozen in near Dealy island. The tracings made by McClintock around the shores of Melville island and Prince Patrick island, on foot, added many hundreds of miles to the coast surveyed under Belcher and Kellett. The cairns established by him between 1852 and 1854 are mentioned in his reports with the papers found at Dealy island.

Built Half Century Ago.

It is probably one of these cairns that was discovered by Stefansson and built by McClintock more than half a century ago.

Continuing, Captain Bernier says of McClintock: "His subsequent career in navigating the waters in Lady Franklin's yacht Fox of Peel sound, Regent inlet, Bellot strait, King William island and around Montreal island and Boothia peninsula are well known. His brilliant achievements and discovery of definite information regarding the fate of Franklin point to him as the most fortunate of all voyagers who pursued the most remarkable search known in the history of navigation."

One of the documents left by McClintock in a copper tube and under a pile of rocks was found by Captain Bernier. Another was found outside of Kellett's depot, probably disturbed from its resting place by a polar bear, for it bore the marks of the paw of an animal of considerable size. Much of the information found in these documents was utilized by Captain Bernier while cruising through northern seas in the Arctic.

King Solomon's Song.

King Solomon in his song says: "The winter is over and done; the flowers appear on the earth; the time of the singing of birds is come and the voice of the turtle is heard in the land."

New York Shilling.

New York shilling, or York shilling, is the old Spanish "real," or one-eighth of a dollar. It is about equivalent in value to sixpence, English. In the Southern states it is called a bit.

The House of Whispers

By WILLIAM JOHNSTON

Copyright by Little, Brown & Co.

A SECRET PASSAGE.

Synopsis.—Spalding Nelson is occupying the apartments of his great-uncle, Rufus Gaston. The Gastons, leaving on a trip, tell him about mysterious noises and "whispers" that have scared them. He becomes acquainted with Barbara Bradford, who lives in the same big building. He instinctively dislikes and distrusts the superintendent, Wick. The mysteries in his apartments begin with the disappearance of the Gaston pearls from the wall safe. He decides not to call in the police, but to do his own investigating. It is soon evident that someone has access to his rooms. Becoming friendly with Barbara, he learns that her apartments are equally mysterious. She tells him that several years before her sister Claire, who lives with her, had made a run-away marriage with an adventurer, from whom she was soon parted, and the marriage had been annulled. Claire is engaged to be married and someone has stolen documents concerning the affair from the Bradford apartment and is attempting to blackmail the Bradfords. Nelson takes Miss Kelly, the telephone girl, to dinner with the idea of pumping her. Gorman, a hotel detective, recognizes her as the wife of Lefty Moore, a noted burglar. Nelson tells his story to Gorman.

CHAPTER VII—Continued.

—9—

"And the number she called up—the private number—did you find out about that?"

"Sure, that was easy. It's one of the apartments in the Granddeck—Henry Kent's. Who's he?'

"I never heard of him. I'll try to find out, though."

"I would, but be careful how you go asking questions around the place. The Moore woman may have a pal. They generally work in pairs."

The ease and celerity with which Gorman had learned all these things about the girl impressed me greatly, and I said as much. He received my compliments with a deprecating wave of the hand.

"Nothing to it, boy, when you know the ropes. But last night you told me you had taken the girl out to try to pump something out of her. What was it? What's doing?"

From beginning to end I told him the whole story in all of its perplexing details, starting with the day that I had received my great-uncle Rufus' note that had led to the chance meeting with Miss Bradford, bringing in my discharge and the disappearance of the Gaston pearls, and explaining what made me think these facts were in some way involved with the attempt to blackmail the Bradfords.

"What do you make of it?" I asked as I ended my narrative. "Who do you think is at he bottom of it?"

"I don't think," he retorted. "In our business it does not pay to think too quick. You're apt to convict the wrong party."

"But you must think something," I protested.

"I think," he said slowly and meditatively, "that there's a lot of crooked work going on—I'll say that much. And you and Miss Bradford's pretty close to being the center of it."

"What can we do about it?"

"There's a way I learned from a lawyer that ain't bad. He'd take his client and put him in the center of a big circle with lines running in all directions — alibi, insanity, mistaken identity, no proof of guilt, lack of jurisdiction, escape on legal technicality—he'd mark out every possible defense. Then he'd follow each line out and see where it led and what plan the opposing lawyers would be likely to spring on him. Generally he got his man off."

"I don't quite see how that applies."

"You don't, eh?"

He traced an imaginary circle with his forefinger on the table in the little back room where we were sitting.

"Here's you and Miss Bradford in the center, surrounded by a lot of mysterious deviltry. We'll make two circles. This inside one is the things that have happened to both of you—the wall safes opened, the papers stolen, the pearls gone, the anonymous notes, the blackmail threats, the loss of your job, the voices you've heard. Now on this outer circle we'll mark down all the people who might be mixed up in these things—mind ye, I say only might be. First, there's Lefty Moore's woman—we know she's a crook. Then who do we know that knows her? There's at least two—Mr. Wick, the superintendent that hired her, and this Mr. Henry Kent, whose apartment she telephoned to. Then there's all the rest of the help in the house. Any one of them might be her pal. Then there's the flighty Bradford girl——"

"You don't suspect her, do you?" I cried, horrified at the prospect of his investigation taking this turn.

"Be easy," he retorted. "I'm not suspecting anyone. I'm only putting them down. There's the Bradford girl and her ex-husband. He's a bigamist and that makes him a crook. Those two men you saw in the park, one of them with a scar on his face—we'll run them down. You know a cafe the scar-faced man goes to. so that's a start. There's the man who shadowed you—would you know him again if you saw him?"

I shook my head doubtfully.

"I'm afraid not," I admitted, "you see—"

"Don't bother to explain. You either would or wouldn't, and that's all we need to know now. There's old Mr. Gaston and his wife. It's queer about their ducking out so suddenly and leaving no address, but maybe they're only scared. Let's see who else is there—the Bradford servants and the old man's, the old washerwoman—and the families who live in the house. We've got the circle pretty well covered, haven't we?"

More and more I had begun to appreciate how valuable the services of an experienced detective would be likely to be in helping to solve the mystery.

"Look here, Gorman," I said, "why can't you take charge of this case for us?"

"What's in it?" he asked.

My face fell, and my enthusiasm died a sudden death. Once more I was confronted by the specter of my poverty. Of what use my talking to a high-priced investigator like Gorman when all the money I had in the world was less than two hundred dollars, out of which I had to live until I found employment. Yet I must serve Barbara Bradford.

"If you clear up this case," I announced, "I'll give you every cent I've got in the world."

He shook his head.

"It ain't enough. If I take this case, it won't be for the money that's in it. For that matter I can get all I want from old Gaston for getting his pearls back. That'll be enough."

"Then you will take the case," I cried jubilantly.

"On one condition. That you'll promise to keep everything away from the police."

"I'll promise that for myself and Miss Bradford, too. That was the one reason she advanced against my telling you about things. She was afraid you'd call in the police."

"Never fear about that. There's nothing I'd like better than to put it over that bunch of young reformers they've got down in Center street. This hotel work don't suit me, anyhow. I've been thinking of opening up an office of my own. The recovery of the Gaston pearls would be a nice feather in my cap to start with."

"I see," I replied, "but you'll need money for expenses and that sort of thing, won't you? I have—"

"Leave that part of it to me," he retorted with a quizzical smile. "After all the years I was on the police force I ain't exactly broke by a long shot. All you've got to do is to keep your eyes open and let me know all that goes on in the apartment house. I'll attend to the rest. Don't do anything, though, without consulting me first."

"I'll gladly promise that."

"Good enough. We'd better arrange then to meet here every day at three sharp. It's as good a place as any."

"I'll be here."

"And look out you're not trailed. They may try shadowing you again."

"Who do you mean by they?" I asked eagerly.

"Them that trailed you yesterday," replied Gorman with a grin. "If you don't know, I don't know either—yet."

From his manner I was confident that he already had a shrewd suspicion as to the identity of some of the miscreants. The maze in the center of which he had placed Miss Bradford and myself meant far more to him, undoubtedly, than it did to me. More than likely his vast knowledge of the methods of criminals and his acquaintanceship with others like Lefty Moore had given him clues enough as to where to look for the plotters. I realized that it would be useless to question him further. He would admit suspecting no one until he was sure of their guilt, a quality I admired greatly.

"You can count on me," I repeated. "I'll be here at three tomorrow."

Yet how foolish it was for any of us to predict what we will be doing or where we will be twenty-four hours from now. Seldom do things happen in the routine of our lives as we had anticipated. I was not there the next day at the time appointed. By no possibility could I have been there, however much I might have wished to. Many things had happened in quick succession.

How it came about that my promise to meet Gorman went unfulfilled can best be explained by narrating the events of the evening after I returned to the Granddeck. It was nearly five when I left the detective. I strolled leisurely down town and had dinner in the cafe where on one occasion I had seen the scar-faced man. I lingered there for a long time over my coffee hoping in vain that he might appear. I even ventured to cautiously question the waiter and head waiter, describing the man as best I could, but both of them insisted that they never had seen any such person. As I walked home I kept a wary eye out to make sure I was not being followed, but apparently no one was now shadowing me.

It was nine-thirty when I reached home. It had been arranged that Barbara about ten would signal me that we might have a chat from our respective windows. As I sat in my room waiting for the time to come, I was reviewing the case in all its aspects. Indeed there was hardly a waking moment that I was not thinking of the many mysteries about us. I was wondering if, when the case was cleared up the mysterious whispers that we all had heard would also be explained. I recalled Claire Bradford's unexpected visit to my apartment the evening before and her confusion when I had captured her. I wondered if the explanations she had offered had been the truth. Was she really trying to locate the source of the whispers? I looked interestedly up at the section of the wall that I had found her inspecting. What had she hoped to discover there?

I decided to make a close inspection of both sides of the wall. As I lighted up the sitting room and hall for this purpose, something unusual came to my notice that had hitherto escaped me enturely.

THE INNER WALL OF MY ROOM—the one running along the hall of the apartment—HAD THE APPEARANCE OF BEING AT LEAST FOUR FEET THICK.

It seemed so absurd that I refused to believe the evidence my eyes had given me. In these modern days of steel construction there was no reason for a wall being of medieval proportions. I sprang to my great-aunt's work basket and began rummaging to see if I could find a tape measure, and luckily my search was quickly rewarded.

I sketched a rough diagram of the rear rooms, and began measuring them off, carefully checking my figures as I went along. I found myself growing wildly excited as the tape measure confirmed what my eyes already had told me. The inner wall was at least four feet thick.

With thrills at the thought of the possibility of a secret passage there, I climbed up on a chair just as Claire Bradford had done, and began inspecting the wall inch by inch. Even

As I, Trembling All Over at the Thought of the Peril She Had Been In, Put My Arms About Her and Helped Her In.

as I did so I could not help laughing at myself. The idea that a modern apartment building might contain a secret passage was utterly ridiculous, yet as I pounded lightly on the wall it gave forth a hollow sound, vastly different from any other part of the room. I was convinced that between my room and the hall there was space enough at least for a passageway in which a man might walk.

I surveyed with growing interest the wooden paneling that in my room ran clear up to the ceiling. In the other rooms there was no paneling. Mounting the chair again I pressed sharply against the wood at the point from which the sound had seemed to come. It seemed to me it gave a little to my touch. I struck one of the sections a sharp blow. It dropped back a full half-inch, leaving what looked like a doorway—a space three feet wide by five feet high. The bottom of the opening was hardly two feet from the floor. If there was a passageway here, this panel certainly would explain how my rooms had been surreptitiously visited.

Feverishly I worked at the panel trying to push it further back. If there was a passageway there in the wall I was determined to see whither it led. My efforts to move the panel further seemed hopeless. As I worked at it I heard a tapping on my window sill.

It must be Barbara. In my excitement over the find I had forgotten all about the time. I sprang from the chair and rushed to the window. I found her peering out, trying to ascertain why I had not answered her signal.

"Oh," she breathed with relief, as my head appeared, "you were there. Did you see the detective?"

"Yes," I replied, speaking as low as my excited state would permit me, "but just now I discovered something vastly more important."

"What is it?"

"A secret passageway leading into my room. It seems to run along the hall. The wall there is at least four feet thick—room for a man to walk. There is a panel in the wall in my room leading into it. I was just prying it open when you signaled."

"Oh, how I wish I could see it!"

"Why can't you? Slip out of your front door, and I'll be at my door to admit you."

"I can't do that. Mother and Claire are in the front part of the house playing bridge with some guests. They will be sure to hear me going out."

"Come in tomorrow morning, then," I suggested.

She did not answer, and before I realized what she was doing, Barbara was out on the ledge making her perilous way across to my window.

"If Claire can do this, I can," she announced triumphantly, as I, trembling all over at the thought of the peril she had been in, put my arms about her and helped her in.

"Darling," I cried, still holding her in my arms, "don't ever do that again. It's too dangerous. Promise me, Barbara, dear, you'll never again try that."

With her pretty face flushed at the terms of endearment that had unwittingly escaped me, she laughingly released herself from my arms.

"That was nothing," she said in a tense whisper. "Where's the panel?"

Relieved to find that she was not angered by my presumption, I hastened to turn up the light and pointed at the hole in the wall. As I had done, she sprang up on the chair and endeavored to push the panel further back, but was unable to budge it. Quicker witted than I, she then tried sliding it along. At the slightest touch it slid back in a groove, revealing the opening—leading into what?

Striking a match, we both of us peered in. The space between the walls was certainly high enough and side enough for a man to walk there in comfort. So far as the flickering light of the match enabled us to judge, it ran the length of the hall, and near its further end there appeared to be some steps.

"Come," cried the intrepid Barbara, "let's explore it."

"No," I said firmly. "We must do nothing until I have seen the detective. We have put the case in his hands."

"But we must find out about it," protested the girl.

"Tomorrow," I said. "We know where it is. We know where the voices and whispers come from now."

"I wonder," she said thoughtfully, "if there is the same sort of a passageway in our apartment?"

"Promise me that if you find there is one, you will not attempt to explore it alone."

As we argued about it we both stopped short and with blanching faces listened. From somewhere—it sounded as if it was right below us—we heard sounds as if two people were struggling. Then came a woman's shriek, a wild scream with the death terror in it. The sound seemed close at hand. It seemed to come right up from the opening in the panel by which we were standing.

Once more there came an awful scream—a scream stopped off short as if some brutal hand had throttled the woman's throat.

"What is it?" cried Barbara.

"Listen," I commanded. "It seems to come from the floor below."

Holding our breaths we strained our ears for further sounds. Suddenly a shot rang out, and there was a thud as if a body had fallen to the floor. Then all was silence.

With terror in our faces we turned to each other, seeking an explanation which neither could give.

"Mother—Claire!" cried Barbara. "They'll be alarmed. I must go back to them at once."

"She's been murdered. Get the police quick."

(TO BE CONTINUED.)

Taught Chinese Lacemaking.

The art of lacemaking was first taught to the Chinese of the Chefoo district by foreign missionaries about twenty-five years ago. They believed that by teaching lacemaking the women and girls would find profitable employment within their own homes, and the subsequent spread of the industry has fully justified their efforts. Although first taught in Chefoo, Chi Hsia Hsien was the first district in which lace was extensively made.

Time Measured by Candles.

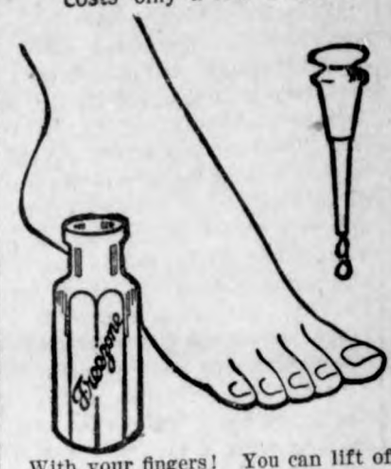
The Chinese, besides using water clocks, also invented joss-sticks, which burned uniformly. The joss-stick is somewhat similar to what good old King Alfred of England is said to have used way back in the eight hundreds. He was a great educator, and discovered that tallow candles could be used for dividing the time which he allowed his nobles in which to make complaints against each other.

Penguin Cult in Paris.

The cult of the penguin has come to Paris, writes a correspondent. In many houses and in more shop windows you will now find quaint, contemplative penguins as ornaments, or in pottery and china. The penguin porcelain coffee set is the latest design. Father Pengiun in delicate, deftly-shaped white china makes the coffee pot, and the coffee, nicely hot in his plump body, pours out through his long, sturdy beak. Penguin junior, a little slimmer, is the milk jug, and the coffee cup, in the shape of a penguin's egg, is little penguin "thought of" but not yet born.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.



With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callous. Instantly it stops hurting, then shortly you lift that bothersome corn or callous right off, root and all, without one bit of pain or soreness. Truly! No humbug!—Adv.

Guarding His Own.

The Patient—Ten dollars for extracting that tooth? Lucky I didn't take gas.

The Dentist—Why?

The Patient—'Cause I have another $10 bill in my vest that you might have found.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

No Smoking Allowed.

"Did you tell her that smoking isn't allowed?"

"Yes."

"Did you point out the notice?"

"Yes."

"Well, what did she do?"

"Lit her cigarette with it."—Tit-Bits.

"CARRY ON"!

If Constipated, Bilious or Headachy, take "Cascarets"

Feel grand! Be efficient! Don't stay sick, bilious, headachy, constipated. Remove the liver and bowel poison which is keeping your head dizzy, your tongue coated, your breath bad and your stomach sour. Why not get a small box of Cascarets and enjoy the nicest, gentlest laxative-cathartic you ever experienced? Cascarets never gripe, sicken or inconvenience one like Salts, Oil, Calomel or harsh pills. Cascarets bring sunshine to cloudy minds and half-sick bodies. They work while you sleep. Adv.

Off the List.

"Don't you subscribe to Blank's magazine any more?"

"No; when I was in France I received a notice from it asking me to notify it one month in advance if I changed my address."—Home Sector.

Easy.

"I wish I knew how to make a barrel of money?" sighed the little man.

"That's easy," replied the big man. "Spend a half barrel of money in advertising and you'll soon have a barrel of money."—Cincinnati Enquirer.

During Motherhood Later In Middle Life

Searles, Minn.—"Over twenty years ago I first started to take Dr. Pierce's Favorite Prescription. It kept me in splendid condition during expectancy and I had comparatively no suffering and was in unusual health afterward. Also during middle life it has helped me. I do not suffer with heat flashes or dizziness at all or any other ailment which I have known other women to have at this time of life. I am glad to recommend Dr. Pierce's Favorite Prescription. I also have Dr. Pierce's Medical Book, the 'People's Common Sense Medical Adviser,' which I appreciate very much."—Mrs. Gertrude Bushard.

Wonderful Results

Oelwein, Iowa.—"I first took Dr. Pierce's Favorite Prescription about thirty years ago and have often taken it since that time with wonderful results. I have often recommended it to others who have been satisfied with it."—Mrs. E. L. Erwin, 410 Fourth Ave., South.

Dr. PIERCE'S FAVORITE PRESCRIPTION FOR WEAK WOMEN.

STATE NEWS

Gleaned from many fields and summered for busy readers

It is estimated that there are at least 5000 new silos in Iowa, erected in the last 2½ years.

Fifty-four head of Shorthorns sold at Wapello recently for $108,225, or an average of $2004 per head.

Dr. Peter Malcom, of New Hampton, will become state veterinarian July 1, succeeding Dr. Robert A. Wall.

One of the largest land deals ever consumated in Jasper county was that which involved the Geo. Eggert place, consisting of 430 acres for $155,800.

Farmers in Ringgold county will this season try out acid phosphate fertilizer for demonstrational purposes. A number of plots will be tried to determine the effect on the soil in increased crop production.

Red Oak is talking a municipal electric light plant. Estimates on the cost of construction were presented by engineers at a meeting of the city council; it was estimated that a building and equipment sufficient for the city's needs would require $149,000.

Ministers and laymen of thirty denominations of the Interchurch movement from seven states will meet at Iowa State College, June 14, for a three weeks summer school in rural sociology. The states that will send delegates are: Iowa, Illinois, Wisconsin, Minnesota, Kansas, Nebraska and Missouri.

One of the landmarks of northern Iowa passes when Marquette is substituted as the designation of the place heretofore known as North McGregor. At a recent election it was voted to make a change. Marquette is the division terminal for the C. M. & St. P. and feels that its own importance has been overshadowed by the fact that it bore the same name as its more pretentious neighbor on the south.

More than 900 stock buyers from all parts of the United States and Canada attended the first annual sale of pure bred Shorthorns held in Ollie recently. 90 head of stock went under the hammer, bringing more than $90,000, or an average of better than $1000 a head. The first 40 head sold went at an average of better than $2000 a head. The top price was slightly over $4000 and a number of animals sold for $3200 and better.

The little college town of Mount Vernon, believes in education. The people of this Iowa village claim the record for the United States for the percentage of young folks who continue in school beyond the grammar school age. A recent investigation made in connection with the father and son banquet shows that there are only five young men in this town of 1,700 population, 21 years old or younger who are not in school or college somewhere. Cornell college is located in the town and claims the bulk of those who continue in higher education, but the town sends also its contingent of students to the state agricultural college, state university, state normal school, etc.

In the half year since the federal government relinquished control of the state-federal employment agency, a total of 21,678 men and women have been directed to positions and 88 per cent of 19,117 of them placed. In the same period, from Oct. 10, 1919, to April 10, 1920, 13,871 were directed to positions from the Des Moines office alone, of which 11,551 or 83.3 per cent were placed. Nothwithstanding the 1,033 farm hands that were sent out (92 per cent of whom were placed) there still continues a serious shortage of farm hands all over the state. Branches of the service are located at Sioux City, Clinton, Creston, and there is an employment agency for teachers only located at Iowa City.

If the crop report of the town of Hudson is any indication, the village has made a colossal and evidently successful attempt to combat the high cost of living. The population of the place is 411. Hudson comprises 166 acres of taxable land of a total farm acreage of 180, of which 116 acres was planted in corn and three and one-half acres in potatoes last year. Pasturage took up 58 acres of Hudson's allotment. The hamlet had 312 head of swine on July 1, 1919, and 172 on Jan. 1, 1920. There were nine head of cattle of all ages, grazing along the village streets last year, of which five produced milk. Six hundred seventy-one chickens laid 2,358 eggs during 1919. Sixteen horses bore the burden of transportation and farm work.

There are approximately 100 different kinds of trees in Iowa, 17 varieties of oak, 14 willows, five maples, five ash, six hickories, 10 to 12 hawthornes and many other varieties.

The treasury department is expected soon to send an architect to Des Moines to look over the site for the new federal court house, to consider the style of building location to conform to other public structures on the river front and like matters. The question of whether additional ground shall be purchased will also be taken up.

We Have Always Wanted To Handle the BEST Manure Spreader—And We've Got It.

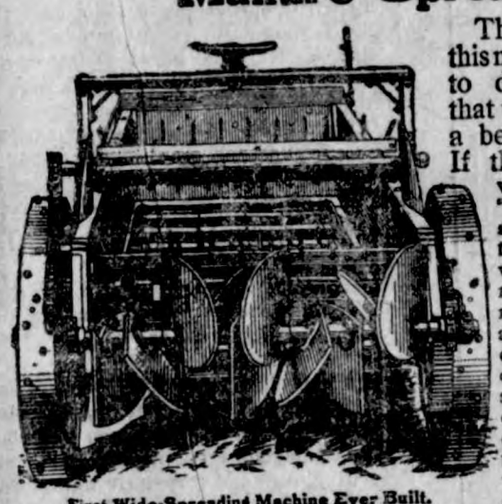
As all our friends know, we have been engaged the farm implement business right here for a long time. We've made it a rule to handle only thoroughly reliable goods. No matter how tempting a maker's proposition is, we leave it alone, unless we are convinced that the article will be of real value to our customers.

Now please keep this rule of ours in mind and then come in and see the

NISCO

Reg. U.S. Pat. Off.

The "New Idea" Manure Spreader



First Wide-Spreading Machine Ever Built.

The fact that we have this machine set up, ready to demonstrate, shows that we believe there isn't a better spreader made. If there had been we would have found it. **"Nisco" is the original wide-spreading spreader.** Built to spread outside its own wheel track when other machines merely dumped manure behind. Low down and light draft, easy to load, easy on a team. Its chain conveyor brings every scrap of manure to the two cylinders where it is thoroughly pulverized and thrown onto swiftly revolving steel paddles that distribute it in even width and depth across three corn rows. This makes driving over spread manure unnecessary.

The Nisco Spreader can't clog and spreads at will, 3, 6, 9, 12, 15, 18 loads per acre. It has a chain drive—no gears to break or strip from cold or under sudden strain. Wide tires fit the "Nisco" for use on soft soil. The Nisco Spreader is thoroughly well built of exceptionally stiff and sturdy materials, and the makers cheerfully guarantee it for a year against breakage from any cause. With proper care it will last a lifetime.

Now here is a machine that will give you dollar for dollar on a moderate investment in one year's time; because if used regularly it will absolutely save the full fertility value of manure and put it on the soil in such condition that growing plants can get it all.

The Nisco Spreader will save you money. Come in and see it next time you're in town. You'll be interested.

DON'T FORGET TO ASK US FOR THIS FREE BOOK We've a book here we would like you to read—"Helping Mother Nature." Tells more about the care and use of manure than you ever thought of. Written by an expert and full of right-up-to-the minute scientific data. Don't forget this—it's important.

Yours for better farming.

W. M. BAACK

Farm Implements ***Klemme, Iowa***

Hermoline

A BETTER LUBRICANT

—FROM THE FORMULA OF A MOTOR COMPANY

Don't Ask Merely For "Oil"

When you drive up to a garage for lubricating oil, don't ask just for "oil."

Know good oil from the other kind—know just why one oil is better than another and then buy the oil about which there is no question as to quality.

The best oil is the only kind you want to put into your car, truck or tractor—know it by name and ask for it by name.

Ask for an oil made from pure, Pennsylvania crude—which anyone who knows will tell you is the very best lubricant you can buy.

Ask for HERMOLINE—and you are sure of getting a lubricant made from Pennsylvania crude—a better lubricant made especially for motor cars, trucks and tractors from the formula of a motor company, not an oil company.

In asking for HERMOLINE you are sure of getting an oil that stands up under the intense internal heat of the automobile engine and the even greater heat of truck and tractor motors—far better than any other lubricant not made from Pennsylvania crude. You are sure of getting an oil whose clear color is the result of thorough filterization, not the result of the counterfeiting use of acids. You get an oil free of sediment.

When you buy HERMOLINE, you buy not merely "oil,"—you buy motor safety and protection. You buy added years of satisfactory and profitable motor performance.

Don't get just "oil" for your car, truck or tractor—ask us for HERMOLINE.

Put it to any test you like, HERMOLINE is the lubricant you should insist on.

E. G. ELL
Klemme, Ia.

The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane.

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.
The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove oil value.

And She Didn't Know.

Little Girl (looking over newspaper advertisement)—Mamma, why do all these boarding houses object to children?

Fond Mother—I'm sure I don't know. Go and see what the baby is howling about, and tell Johnny to stop throwing things at people in the street, and make George and Kate stop fighting and tell Dick if he doesn't stop beating that drum so hard I'll take it away from him.

What She Desired.

"Why, Norah," said her mistress, "how nice you look in your new dress and hat. I hope you will meet all your friends this afternoon so that they may see you in your fine clothes."

"Me friends, mum?" returned Norah. "What'll I be waitin' to see them for? Sure, I don't care to make me friends jealous. It's me enemies I want to meet when I'm dressed up."—Boston Transcript.

His Opportunity Gone.

A little friend of mine had been to see "Uncle Tom's Cabin" with her mother. At the dinner table that evening her father remarked that he believed he would go see the play that evening when little Fay said, "Well, there's no use in you're going, for Little Eva died this afternoon."—Exchange.

Men Attract Lightning.

Mrs. Flatbush—A curious fact revealed by statisticians is that the number of men struck by lightning is nearly four times that of women.

Mrs. Bensonhurst—That does seem strange when we remember that women are so much more attractive than men.

The Frenchman's Hands.

Patience—What nationality is he?

Patrice—He's French.

"Has he any accomplishments?"

"Sure thing; he's ambidextrous."

"Really?"

"Sure; he can swear with both hands!"

A Number of Them.

Horace—Did any man ever kiss you before I did?

Helen—Yes, dear.

Horace—Tell me his name so I can beat him up!

Helen—I'm afraid that he might be too many for you.

Treaty of Ghent.

The treaty of Ghent was one tween the United States and G Britain which ended the war of 1 It was concluded December 24, 1 and ratified early in 1815. It pr ed for the restoration of captured ritory, property and records; for release of prisoners of war, for the tablishment of a boundary line tween the United States and Can and other matters.

Carrier Pigeons Still Used.

Even to day, when airplanes and wireless play a conspicuous role, carrier pigeons play their part as well. Fliers can be shot down, and wireless messages might be taken up by enemy operators. The pigeon, in many cases, is the safest carrier, for seldom the bird is shot down. As a rule four or five pigeons are sent off with the same message, to make sure that at least one will reach its destination.

Where Onion Gets Its Odor.

The strong flavor and odor of all the members of the onion family are due to the presence of allyl sulphid, an oil-like organic compound of sulphur. The flavor-yielding material is very volatile and is broken down by heat to some extent. Consequently, the cooked vegetable has a milder flavor than the raw.

Flowers of Sanctity.

Long ago certain fragrant flowers bloomed. They were of eight kinds, and belonged to the species called "flowers of sanctity." Their names, as rendered from the Sanskrit were: Clemency, Self-Restraint, Affection, Patience, Resignation (repression of any mental perturbation), Devotion, Meditation, Veracity. It is thought that the correct modern botanical titles remain unassigned.—From a note-book.

Soap Used as Pills.

Soap has played a large part in medicine. Medicinal soap when pure is said to be made of caustic soda, and either olive or almond oil. It was much employed in the form of pills intended to have a gently aperient, anti-acid action.

BORE IN TELEPHONE CABLES

Beetle Causes No End of Trouble to Telephone Companies in California.

Washington.—When telephone girls in California find their wires are "shorted," a bug may be on or in the wire, for California has a wood-boring beetle that goes through wood and also through alloyed substances considerably harder than lead. The beetle has put hundreds of telephones out of commission by boring

This Beetle Bores Through Lead Sheathing of Aerial Cables—Magnified Ten Times.

holes in the cables that carry the wires. Water enters the cables, making wire connections useless until the bored places are found and repaired. The problem of control of this metal-boring beetle is still unsolved, according to the bureau of entomology of the United States department of agriculture, and it will be difficult to find a practical way.

HIGH HEELS CAUSE DEATH

Pittsburgh Woman Mangled by Elevator After Her Shoe Catches In Door.

Pittsburgh, Pa.—High heeled shoes dragged Mrs. C. Steffler, aged forty-two, to a slow death when she was crushed beyond recognition between an elevator cage and the shaft wall in the North Park apartments, No. 204 East North avenue, where she resided.

Mrs. Steffler was hurrying through the hall going to the elevator when John Gibson, the elevator operator, informed her that he would carry her up after he had answered a telephone call. As Mrs. Steffler stepped into the waiting car her high heeled shoes caught between the elevator and the floor. In an effort to extricate herself she fell forward, grasping the cable of the cage which started slowly to descend to the basement, pinning her between the steel cage and the wall.

GETS HISTORIC TOM-TOM

Oklahoma Society Presented With Property of Geronimo, Famous Apache Chief.

Lawton, Okla.—A tom-tom known to have been constructed and used by the famous Apache chieftain, Geronimo, recently was presented by Frank Harrah to the Oklahoma Historical society.

The tom-tom was given to Harrah by Geronimo in 1909, while the chief was a military prisoner at Fort Sill.

The tom-tom, a circle of rawhide about the size of a dinner plate, is decorated in bright red and green paints in a design symbolic of the compass and is fringed with feathers attached by rawhide throngs.

DOCTOR FLIES TO ICE-BOUND

Airplane Carries Medical Aid to Sick Children on Island in Susquehanna.

Harrisburg, Pa.—An aviator from the Middletown (Pa.) aviation reserve depot took a doctor by airplane to give medical aid to the family of John Pfaunmiller, a farmer on Duffy's island, in the Susquehanna, cut off by ice from the shores.

Word reached the depot that three children in the family were ill with pneumonia, and when the machine, piloted by Lieutenant Ray Brown, reached the farm on the island, it was found an infant had died Monday and two others were seriously ill.

"Immortals" Tackle Job They Will End in 2020

The holiday season set the French academy back two weeks in the work of revising the French dictionary which, according to the best estimates, will be completed in the year 2020 or 2025.

The two holidays this year happened to fall on Thursday, the only day of the week on which the Forty Immortals assemble.

Academy members began the present revision in 1878, 41 years ago.

Tobacco Use Increasing.

Ottawa, Canada.—Revenue receipts from tobacco transactions throughout the Dominion indicate that the weed is being burned up in increasing quantities since Canada's fighting men returned from overseas. Inland revenue returns for October show an increase of nearly $500,000 over October of 1918. Total receipts for this October were reported as $2,767,685. Tobacco revenue constitutes the largest source of revenue for this department. The income from liquors brought in only $800,000. Dispatches from London, however, have declared that much more whisky is being shipped to the Dominion than was exported to Canada before the Dominion went dry.

Just Where and How Is the Money to be Spent?

A businesslike Answer to a businesslike Question

THIRTY denominations cooperating in the Interchurch World Movement have budgeted their needs. No business could have done it more scientifically.

They have united to prevent the possibility of duplication or waste. At least a million dollars will be saved by the fact that thirty individual campaigns are joined in one united effort.

Each denomination has arranged its budget under six main heads:

1 FOR THE CHURCH'S WORK AT HOME. A score of items come under this head. Consider only one. Five and a half million people in the United States can not even read and write the English language. Who is to carry forward this vast work of Americanization if the church does not?

2 FOR HOSPITALS AND HOMES. Every year thousands of men and women seriously ill are turned away from Church hospitals because of lack of room. The children's homes are compelled to turn away more children than they can receive.

3 FOR HIGHER EDUCATION. Of the 450,000 American students in institutions of higher grade, one-half are in institutions founded and supported by the Churches. Many of these institutions have had no great endowment campaigns, but their needs are just as pressing as the needs of larger schools; and you have only to read their list of alumni and alumnae to measure the value of their contribution to America.

4 FOR RELIGIOUS TRAINING. At least 12,000,000 children and young people under 25 years of age are entering American life without any religious training at all. Remembering the faith of Washington and Lincoln, do you think that America will continue to produce Washingtons and Lincolns if faith dies out of the hearts of its youth?

5 FOR THE CHURCH'S WORK ABROAD. Influenza came first from the Orient thirty years ago; nearly all plagues are Oriental plagues. So long as China has only one physician to every 400,000 people the Orient will continue to be a menace. So long as one-third of the babies of India die before their second year our own babies are not safe. A Christian doctor or teacher sent abroad is working for America as truly as though he worked at home.

6 PREACHERS' SALARIES. The preacher is called the "forgotten man," and well he may be. Eight out of ten preachers are paid less than $20 a week!

Each denomination has its own detailed budget, and will administer its own funds. Your pastor has copies of the budget: examine them for yourself. In the week of April 25th-May 2nd you will be given your opportunity to help. You can do it with the full satisfaction of knowing that every dollar of your gift has its post assigned to it in advance.

Every dollar for better America and a better world. When your church calls on you give—and give with your heart as well as your pocket-book.

United Financial Campaign — April 25th to May 2nd

The INTERCHURCH World Movement of North America

The publication of this advertisement is made possible through the cooperation of thirty denominations.

The MOLINE Tractor is Universal

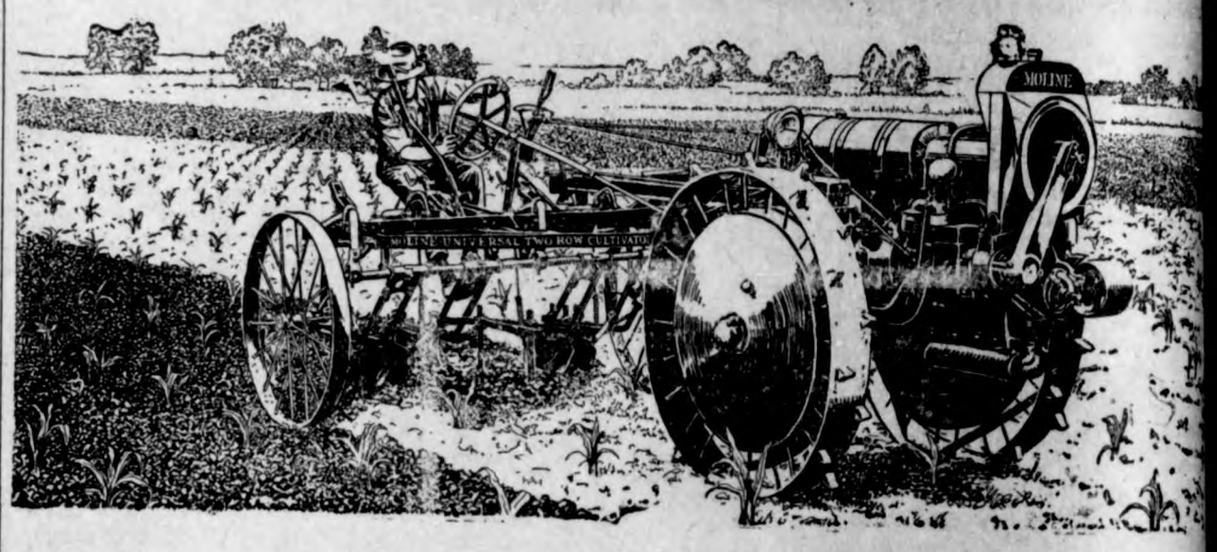
6 Indispensable Results

No duplication by horses	*Because*	Does all field work, including cultivating, harvesting and belt work
A large saving in labor	*Because*	One man completely operates both tractor and all implements
Great ease of operation	*Because*	A single seat in the center of controls of tractor and implements
Can back and turn short	*Because*	Single unit of operation—tractor and implements form but one unit
Better and faster work	*Because*	Operator sees all his work—"Fore sight is better than hind sight"
Power used as horses are used	*Because*	Tractor power in front of the work with operator behind the work

The principle of doing all field operations with one man sitting where he can watch his work is correct, or farming has always been done backward, and the operator would always have ridden or led his horses instead of driving them.

The Moline Universal Tractor places the power of nine big horses where the horses stood—is driven just like horses are driven, from the seat of the implement, and hitched up to the implements just as horses are hitched.

Utility Is Not Sacrificed for Price



If desired you can use the "drag behind" or horse drawn implements you now have with Moline Universal Tractor, the same as with other types of tractors.

See this tractor on our floor at **HENRY LAU & SONS** KLEMME, IOWA

Cravenettes and Raincoats

THE SPRING SEASON calls for something just a little different in an outer garment. You want protection against rain as well as cold this uncertain period. We suggest a good Raincoat or Cravenette which answers a double purpose—that of keeping you warm as well as dry.

You do not necessarily have to buy the staple regular garment that is show, as this part of the clothing business calls for stylish snappy up-to-date models anb good models.

We carry the conservative to the extreme models and invite you attention this department in our store.

Prices $5.00 to $27.50

We have a display of the above in our window.

We have the largest line of men's Work Shoes ever shown in Garner, $2.60 to $5.50.

In one of the greatest purebred stock sales held in Marion county, Ray H. Cline sold fifty-two head of Aberdeen-Angus cattle for $44,910, at the Marion county fair grounds. The top price of the sale came when a cow with calf at foot sold for $4,700. This sale was closely followed by another cow with calf at foot which brought $4500. Forty-one head of the animals sold brought an average of $1027 each. Six head sold for over $2000 each.

Iowa live stock will be prominent in the exhibits at the Iowa state fair and exposition this year to be held Aug. 25 to Sept. 3. Iowa carried off 72 per cent of the winnings in the live stock department at last year's fair and the success of the Iowa exhibitors is prompting them to plan for big showings this year. Of 666 horses exhibited at the 1919 exposition, 588 were from Iowa and Iowans won 55 per cent of all the premiums. In the cattle department there were 1,298 entries of which 921 were from Iowa and from which 65 per cent of all awards were won by Iowans. In the swine department o total of 3,774 entries were enrolled, 3,481 being from this state. Hawkeye farmers won 89 per cent of all the money in the sheep department where Iowa was represented by 555 of the total 784 entries made.

Four new shipping associations have been organized in Mahaska county recently. Taintor, Fremont, Oskaloosa and Leighton. Agitation for these associations has been going on for some time. The success of the association at Fosterdale had much to do with the rapid conclusion of the work in these four places. All four places are ready for business. Taintor voted to capitalize at $30,000 and expect to run their shipping association and elevator together. Fremont capitalized at $75,000, with a minimum of $40,000 to take over a lumber yard and an elevator. Oskaloosa voted to capitalize at $10,000, with a minimum of $1000, this before doing business. Leighton capitalized at $25,000, with a minimum of $3500. At the latter place sufficient shares were sold at the meeting to start business at once.

Iowa farmers are starting the new farm year with 35,000,000 more bushels of corn in the crib than they had on March 1 of last year, a total of 166,500,000 bushels of corn being on hand, according to figures issued recently by the Iowa co-operative crop reporting service. While 40 per cent of the total crop for 1919 is still on the farms, only 28 of the remaining 60 per cent has been shipped from the state. About 39 per cent of the oats crop last year, or nearly 26,800,000 bushels less than last year, are now in the bins. Of the remaining 61 per cent, about two-thirds will be shipped out of the state. Wheat and barley are not kept over the winter in large amounts for only 17 per cent of the wheat and 27 per cent of the barley is still in the possession of the farmer. About 67 per cent of the wheat and 45 per cent of the barley will be sold outside of the state.

The scarcity of farm labor which still seems to be quite general over the state is perhaps not due so much to a scarcity of men looking for work as it is to the fact that they are speculating in most cases as to the most they can get for work from now until next fall. The farmers have been somewhat reluctant to hire men for the season, owing to the fact that the season this spring will be very late, and the men who are looking for work have been continually holding off in hopes that wages will reach an even higher mark than they are at present. The average seems to be around $65.00 to $75.00 per month, and considering that the man is getting his living in addition to this wage, it certainly seems ample pay. There are no doubt plenty of men who are looking for work, as there are also plenty of farmers still looking for help, but one scarcity itself seems to be merely a matter of reaching an agreement.

Agriculture and coal mining are the principal primary industries of Iowa, the ones upon which the economic life of the state depends. In the year 1919 Iowa mines produced 7,000,000 tons of coal worth $21,000,000 at the mine. During the same period the farm value of field crops produced in Iowa was $950,000,000. Add to this the value of dairy products, poultry, eggs and wool and the total is raised to $1,150,500,000. This figure does not include the value of hogs, cattle, horses and sheep which on January 1, 1920, was given a farm value of $650,787,000, making a grand total of farm products produced in one year plus live stock on farms January 1, 1920, of $1,791,281,000. The total output of the mines of the state represents less than 2 per cent of the total output of the farms, not including horses, cattle, hogs and sheep. Attention is called to this in order to point out the fact that agriculture is almost the sole basis of Iowa's economic life.

Morningside college of Sioux City for five years winner of the two-mile event in the annual Drake relay carnival, is preparing to send one of the fastest teams in its history to Des Moines to strive to maintain supremacy in that event.

Meetings of the Boone county farm bureau and the livestock breeders were held at Boone recently. Sixty-five breeders of the county attended. Officers were elected as follows: President, E. S. Thorngren, vice president J. A. Judge; secretary, O. W. Beeler; treasurer, T. H. Weeks.

Hornet an Ancient Insect.

The hornet is a well-known insect even now in Palestine. Many of the Canaanites, as described in the Bible in Exodus 23:28; Deuteronomy 7-20; Joshua 24-12, were driven out before Israel by means of this insect.

Tree Sheds Water.

A tree which is said to shed water in abundance from its leaves and branches grows in the Philippines, where it is known as "acacia;" in Hawaii it is called "monkey pod."

Is 700 Bushels of Corn Worth Saving?

Wouldn't you like to save 700 bushels of corn each time you fill your silo? In filling a 100-ton silo you put in about 700 bushels of corn when the ears are run in with the stalks.

With a JENNEY SILO-FILLER-HUSKER you can take the ears off, put them in the crib and still have silage with just as much food value and give you just as good feeding results.

Figure out how much 700 bushels of ear corn is worth at present market price—that's your saving.

Let us tell you all about this money-saving, money-making way of making silage. It is opening the eyes of farmers, Experiment Stations and stockmen everywhere.

You don't have to fill your silo at just a certain time—you can fill it and re-fill it from fall to spring. The saving pays for the JENNEY SILO-FILLER-HUSKER in a shortime. (4-D)

Now is the time to look into this money-saving, corn-saving plan. Come in and see us about it.

Say fellows we want you to come in and see our dandy new Rods, Reels, Hooks and Baits, Silk and Linen Lines--everything for the fisher.

Jacobs & Son

We Sell Genuine

International Repairs

Made For

The IHC Line

By the

INTERNATIONAL HARVESTER COMPANY

REPAIRS made for International implements and other farm equipment by the Harvester Company are the only repairs made from the original patterns. All others are copied from copies, and in this roundabout reproduction they may lose in correctness of shape, sharpness of detail, closeness in fitting, and quality of material. These repairs are made for Deering, McCormick, Milwaukee, Titan and other International-made machines.

Genuine IHC Repairs

Are Better in Quality
Fit Better and Wear Longer

The Harvester Company stands back of its machines. Be fair in the matter. Do not substitute imitation repairs for the genuine and expect best service. Repairs made by other concerns and marked "Made for" or "Will fit", are *not* genuine IHC repairs. They often lack weight, are not always correct in shape, are imperfectly finished, do not fit properly, or are made of inferior material. Buy Genuine International Repairs for your International Farm Equipment.

Beware of Any Other Kind!

ONE HUNDRED EIGHTY-TWO CHURCH BOARDS ARE CO-OPERATING

In Every Community in Iowa a Citizen's Committee Has Been Organized

Sixty-five per cent of the Protestant church membership of the United States are behind the movement. One hundred and eighty-two church boards are cooperating.

In every community in Iowa and the United States a citizens committee has been organized to carry on the campaign. This is also true of every county and every state.

The distribution of the fund follows: Foreign Missioners, $107,661,-453; Home field, $109,949,037; American Education, $78,837,431; Religious Education, $5,931,925; Hospitals and homes, $5,116,466; Ministerial Relief and Retirement funds, $20,510,200.

Interchurch quotas by counties, exclusive of the denominational quotas are:

DISTRICT NO. ONE.

Buena Vista, $24,141; Calhoun, $21,-199; Cherokee, $13,752; Clay, $11,589; Dickinson, $10,184; Emmet, $13,326; Humboldt, $15,593; Ida, $13,048; Kossuth, $18,458; Lyon, $18,134; O'Brien, $23,720; Osceola, $9,980; Palo Alto, $9,659; Plymouth, $20,451; Pocahontas, $12,096; Sac, $18,602; Sioux, $24,-333; Webster, $29,085; Woodbury, $56,441.

DISTRICT NO. TWO

Allamakee, $10,003; Black Hawk, $42,018; Bremer, $19,527; Buchanan, $14,034; Butler, $22,279; Cerro Gordo, $26,540; Chickasaw, $9,067; Clayton, $16,924; Delaware, $12,229; Dubuque, $10,952; Fayette, $21,233; Floyd, $20,-361; Franklin, $22,723; Grundy, $21,-057; Hamilton, $23,468; Hancock $14,-120; Hardin, $25,620; Howard, $6,485; Mitchell, $13,889; Winnebago, $23,722; Winneshiek, $13,699; Worth, $12,645; Wright, $21,323.

DISTRICT NO. THREE

Benton, $33,789; Cedar, $24,603; Clinton, $26,471; Davis, $13,102; Des Moines, $29,330; Henry, $21,011; Iowa, $19,154; Jackson, $9,896; Jefferson, $16,616; Johnson, $17,601; Jones, $17,-268; Keokuk, $20,879; Lee, $20,612; Linn, $60,296; Louisa, $16,641; Mahaska, $28,678; Muscatine, $24,889; Poweshiek, $25,779; Scott, $42,752; Tama, $22,908; Van Buren, $14,909; Wapello, $27274; Washington, $22,426;

DISTRICT NO. FOUR

Appanoose, $15,628; Boone, $27,809; Clarke, $11,943; Dallas, $26,307; Decatur, $16,275; Jasper, $22,351; Lucas, $13,919; Madison, $19,004; Marion, $21,586; Marshall, $29,916; Monroe, $9,997; Polk, $116,000; Story, $29,856; Warren, $18,790; Wayne, $18,434.

DISTRICT NO. FIVE

Adair, $15,371; Adams, $13,239; Audubon, $16,096; Carroll, $8,360; Cass, $22,977; Crawford, $23,783; Fremont, $16,715; Greene, $18,449; Guthrie, $18,-779; Harrison, $22,082; Mills, $17,441; Monona, $18,397; Montgomery, $21,-051; Page, 29,449; Pottawattamie, $44,-240; Ringgold, $14,124; Shelby, $15,-053; Taylor, $18,752; Union, $15,365.

BENEFIT TO HOSPITALS

Iowa homes and hospitals will be benefitted by the Interchurch World Movement financial campaign, April 25 to May 2, to the extent of $826,500, it was announced today from New York by the officials of the movement.

The hospitals and homes to be taken care of by the Interchurch budget follows:

St. John's Methodist hospital, Sioux City, $100,000.

Lutheran Old People's Home, Madrid, $15,750.

St. Monica's Home for Wayward Girls, Des Moines, $52,500.

Iowa Lutheran Hospital, Des Moines, $165,000.

St. Luke's Hospital, Davenport, $100,000.

White's Mutual Training School, Oskaloosa, $26,250.

W. C. Graham Protestant Hospital, Keokuk, $210,000.

Evangelical Deaconess Home and Hospital, Marshalltown, $157,000.

DR. BEST OPENS OFFICE

Dr. H. R. Best, divisional secretary for the Interchurch World Movement in Iowa and Nebraska, has opened an office in Des Moines at Sixth avenue and High streets.

The secretary will be in charge of Iowa indefinitely and it will be his duty to see that the movement is continued after the financial department concludes its work.

WOLCOTT AIDS DRIVE

E. C. Wolcott, general secretary of the Y. M. C. A. at Sioux City, Iowa, has opened offices in Des Moines, to conduct his work as regional financial campaign director of the Interchurch World Movement.

Mr. Wolcott is a native Iowan. He was born in Muscatine, Ia., and has been in Y. M. C. A. work the last fourteen years.

POLITICAL ADVERTISEMENTS

FOR REPRESENTATIVE

I am a candidate for state representative for Hancock County subject to the decision of the republican voters at the June Primary.

THOS. H. THOMPSON.

I hereby announce myself a candidate for the office of County Treasurer, subject to the decision of the Republican Primaries to be held June 7th, 1920. Yours very truly,

1-1-20 JOHN SUURBALLE

I hereby announce myself a candidate for the office of State Senator from the district composed of Hancock, Cerro Gordo and Franklin counties, subject to the decision of the Republican voters of said counties at the June, 1920, Primaries.

Dated at Garner, Iowa, this 12th day of January, 1920.

1-22-tf. J. E. WICHMAN

I hereby announce myself a candidate for the office of Sheriff for Hancock County, subject to the decision of the voters at the June, 1920, primaries.

1-29-p. E. PECK HANSON

I hereby announce myself a candidate for the office of sheriff of Hancock county, subject to the decision of the Republican voters of said county, at the Primary election to be held in June.

W. C. ZIESEMER,

1-22-tf Garner, Iowa

I hereby announce myself a candidate for re-election for Supervisor, subject to the will of the Republican voters at June Primary.

G. B. LAWHORN

I am a candidate for re-election, subject to the will of Republican voters at Primary Election next.

Very truly yours,
Chris Jacobs, Auditor

I hereby announce myself a candidate for the office of State Representative from Hancock County, subject to the decision of the Republican Voters of said County, at the June 1920, Primaries.

Dated at Britt, Iowa, this 26th day of January, 1920.

E. P. Healy

I hereby announce myself a candiate for re-election for Supervison, subject to the will of the republican voters at the June primaries. H. C. MEYER.

I hereby announce myself a candidate for the republican nomination for the office of recorder of Hancock county, at the June 1920 primaries.

HATTIE M. ALDRIDGE

LEGAL NOTICES

IN THE DISTRICT COURT OF IOWA:—

In Re-Estate of Mary Arnold, Deceased, in and for Hancock County, ss:

Now, on this 14th day of April, 1920, an instrument in writing bearing date the 2nd day of April, 1920, purporting to be the last will and testament of Mary Arnold, having been produced and filed in my office, and by me opened and read, the 10th day of May, 1920, at 11 o'clock A. M., is, by me, fixed as the time for proving the same, and, having prepared and signed a notice of the time so fixed, I now direct that said notice be published, for the period and in the manner provided by law in the Klemme Times, a weekly newspaper published in said county.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the District Court, at my office in Garner, Iowa, this 14th day of April, 1920.

(Seal) A. E. BAUMGARTNER,
Clerk of the District Court

Maxims of Agriculture.

"It is a maxim agreed upon in agriculture that nothing must be done too late; and, again, that everything must be done at its proper season; while there is a third precept which reminds us that opportunity lost can never be regained."—Pliny the Elder.

Prussic Acid.

Prussic acid is so deadly that even the smell of the acid produces pain in the throat, and in the region of the heart. There are few poisons for which there is such little opportunity for an antidote. If there is time—and there seldom is, for the poison is almost instantaneous—ammonia inhaled very freely may give relief and reduce the absolute certainty of death to a grave probability.

"Key" Not Spanish Word.

The word "Key" as used in Key West, the island and city of Florida, is not, as supposed, entirely a Spanish word. Key is a Spanish corruption of an American Indian word meaning an island, a sandbank or a rock in the sea.

Opportunity, prosperity, was never more rampant in this country, than it is today.

Unless you are producing--"getting ahead" to a greater degree then ever before you are falling behind the trend of the times.

If the services and assistancte of a willing and accomodating Bank will help you at this time we are at your command.

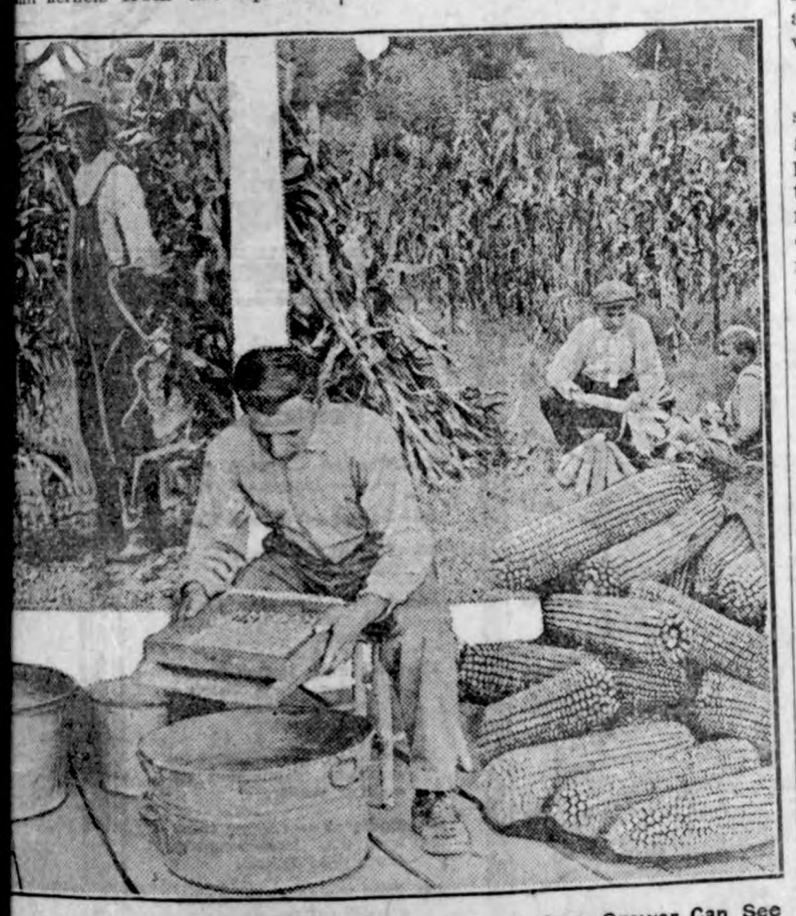
n Preparing for Planting Seed.

ears should first be nubbed, and nels from tip and butt should arded from the seed supply. all kernels from the tips are less productive than the other kernels on the ear; the thick rounded kernels from the butts are just as productive as any of the rest, but because of their shape and size they do not plant uniformly when used in a corn planter with other kernels.

Shelling by hand takes more time and labor, but is profitable. The mechanical corn sheller will injure some of the kernels, and thus destroy or reduce their power to grow and yield. No matter how large the required supply, says the department, it will still pay to shell it painstakingly by hand, because the greater the acreage to be planted the greater the ultimate profit.

Each ear should be shelled separately into a shallow pan or box, and any blemished, poorly developed, moldy or worm-eaten kernel should be rejected.

As the seed from each ear is found satisfactory and sound, and free from poor kernels, it is poured into the general supply and another ear is shelled in the same way. It is much easier to pick out defective kernels from a thin layer in a small sieve than from a large, mingled quantity in a bushel measure or a bag.



an With Imagination and Some Experience as a Corn Grower Can See These Things as He Selects, Grades and Tests His Seed.

RAG-DOLL TESTER IS SIMPLE AND EFFICIENT

The rag-doll method of testing individual ears of corn is one of the simplest and most economical, and is efficient, says the United States department of agriculture.

The tester consists of a strip of cloth, preferably bleached muslin, 16 inches wide and from three to five feet long. The cloth should be marked off into square sections and the squares all numbered. The ears to be tested should also be given corresponding numbers. Six or more kernels should be selected from different parts of each ear, and placed in the proper section.

When the tester is filled, fold over each side so that the edges meet in the center, roll up, and soak the tester for a few hours in lukewarm water. Drain off the excess water and place the dolls in a warm place for the seed to germinate. They should be covered with a wet cloth to keep them moist, and in about five days the seed should be sufficiently well germinated to show its fitness for planting.

Farmers' Bulletin 948, "The Rag-Doll Seed Tester," describes fully this method of testing seed corn. It may be obtained free from the department.

BEST CROPS FOR SPRING GREENS

Spinach Is Most Excellent and Should Be Found in Every Home Garden.

RICH LOAM MOST ESSENTIAL

One of Good Points About Swiss Chard Is That Leaves May Be Cut Without Injuring Plant—Dandelion and Kale Are Good.

(Prepared by the United States Department of Agriculture.)

Spinach is one of the best crops grown for greens and should be found in every home garden. In the North it may be planted in early spring, or it can be planted in the autumn and carried over winter by mulching with straw or leaves. Sow the seeds of spinach in drills 1 foot apart at the rate of 1 ounce to 100 feet of row or 10 to 12 pounds to the acre. To produce good spinach, a rich loam which will give the plants a quick growth is required. As ordinarily grown, spinach occupies the land during the autumn and winter only and does not interfere with summer cultivation.

Spinach is an easily grown garden crop, and there is, perhaps, no other of its kind that will give as good satisfaction. Three or four ounces of seed planted in the autumn after a summer crop has been harvested from the land, will produce an abundance of greens for the average family during the late autumn and early spring. In gathering spinach, the entire plant is removed and not the leaves. The larger plants are selected first, and the smaller or later ones are thus given room to develop. No thinning is required if this plan of harvesting is practiced.

The Savoy is the variety most commonly grown.

Chard.

Chard, or Swiss chard, is a beet which is grown for its foliage instead of its root. The leaves are cooked and used in very much the same way as asparagus. One of the good points about this vegetable is that crop after crop of leaves may be cut without injuring the plant.

Chard is planted about the same time and in the same manner as beets, but as the top grows larger it should be given more space than the garden beet. The edible part of this plant is the root, which somewhat resembles the carrot and is used in the same manner. The leaves are used the same as parsley for garnishing and in flavoring soups.

New Zealand Spinach.

The plant known as New Zealand spinach is not a true spinach but grows much larger and should be planted in rows 3 feet apart, with the plants 12 to 18 inches apart in the row. Some difficulty may be experienced in getting the seeds to germinate, and they should be soaked one or two hours in hot water before planting. New Zealand spinach is satisfactory for growing in warm climates, as it withstands heat better than the ordinary spinach. The fleshy leaves and tender stems are cooked the same as spinach.

Swiss Chard Has Been Bred for Foliage for Salads Instead of Root.

Dandelion.

Sow the seed of dandelion in spring in drills 18 inches apart, covering it one-half inch deep. Thin the plants to about 12 inches apart and give good clean cultivation throughout the summer. In the colder parts of the country it may be desirable to mulch slightly during the winter, to prevent the plants heaving out of the soil. Early the following spring the plants will be ready for use as greens, but they are greatly improved if blanched by setting two boards in the form of an inverted V over the row. The blanching not only makes the leaves tender but destroys a part of the bitter taste. Dandelion greens should be boiled in two waters to remove the bitterness.

There are a large number of forms of kale, and these are thought by some to be the original type of the cabbage. Kale does not form a head, and has convoluted leaves and thick stems. It may be set in rows and cultivated the same as cabbage or may be sown broadcast, but may be set somewhat closer. This crop is very hardy and will live through the winter in the open ground in localities where freezing is not too severe. The flavor of kale is improved by frost.

Kale is used for greens during the winter and as a substitute for cabbage.

CELERY SEED BED IS OF BIG IMPORTANCE

In North Seed Should Be Started in Hotbed.

Watering Should Be Attended to Very Carefully and Bed Not Allowed to Dry Out—Keep for Winter by Banking.

(Prepared by the United States Department of Agriculture.)

For celery in the North, sow the seed in a hotbed or coldframe and transplant to the open ground. Celery plants are generally improved by transplanting twice. Celery seeds are very small and are slow in germination, and the temperature of the seed bed should be kept low. The seed bed should be especially well prepared, and the seeds should not be covered to a greater depth than one-eight of an inch. Watering should be attended to very carefully and the bed should not dry out. After the plants are up, care should be taken that the bed does not become too wet and the plants damp-off. Five hundred plants will be sufficient for the ordinary family. They should be set 6 inches apart in rows 3 to 5 feet apart.

Celery May Be Planted After Some Early Crop.

Celery requires a deep, rich, moist soil, with plenty of well-rotted barnyard manure or fertilizer and frequent shallow cultivation. In the garden, celery may be planted after some early crop, such as lettuce, radishes, peas or beans. As soon as the plants attain considerable size the leaves should be drawn up and a little soil compacted about their bases to hold them upright. If the blanching is done with earth, care should be taken that the hearts of the plants do not become filled. Boards, paper, draintiles, or anything that will exclude the light may be used for blanching; but earthing up will produce the finest flavor.

Celery may be kept for winter use by banking with earth and covering the tops with leaves or straw to keep it from freezing, or it may be dug and removed to a cellar, coldframe, vacant hotbed, or pit, and reset close together, with the roots bedded in earth. While in storage celery should be kept as cool as possible without freezing.

The blanched stems of celery are eaten in the raw state, and both the stems and enlarged roots are stewed and creamed. Celery seed is used for flavoring soups and pickles.

Celeriac is a large-rooted form of celery used for cooking only. Cultivate the same as celery, but banking or blanching is not required. The roots may remain in the ground until wanted for use provided a light covering is applied to prevent freezing.

Your New Home

should be made artistic, sanitary and livable.

These walls should be Alabastined in the latest, up-to-the-minute nature color tints. Each room should reflect your own individuality and the treatment throughout be a complete perfect harmony in colors.

The walls of the old home, whether mansion or cottage, can be made just as attractive, just as sanitary, through the intelligent use of

Alabastine

Instead of kalsomine or wallpaper

How much better, when you have a new home, to *start right* than to have to correct errors afterward from former treatment with other materials, when you come to the use of Alabastine, as does nearly every one sooner or later.

Once your walls are Alabastined you can use any material over it should you desire, but having used Alabastine you will have no desire for any other treatment.

Alabastine is so easy to mix and apply — so lasting in its results — so absolutely sanitary — and so generally recognized as the proper decorative material in a class by itself that it is becoming difficult to manufacture fast enough to supply the demand.

Alabastine is a dry powder, put up in five-pound packages, white and beautiful tints, ready to mix and use by the addition of cold water, and with full directions on each package. *Every package of genuine Alabastine* has cross and circle printed in red.

Better write us for hand-made color designs and special suggestions. Give us your decorative problems and let us help you work them out.

ALABASTINE COMPANY
Grand Rapids - - Michigan

Harvest 20 to 45 Bushel to Acre Wheat in WESTERN CANADA

Think what that means to you in good hard dollars with the great demand for wheat at high prices. Many farmers in Western Canada have paid for their land from a single crop. The same success may still be yours, for you can buy on easy terms.

Farm Land at $15 to $30 an Acre

located near thriving towns, good markets, railways—land of a kind which grows **20 to 45 bushels of wheat to the acre.** Good grazing lands at low prices convenient to your grain farm enable you to reap the **profits from stock raising and dairying.**

Learn the Facts About Western Canada

—low taxation (none on improvements), healthful climate, good schools, churches, pleasant social relationships, a prosperous and industrious people.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan and Alberta, reduced railroad rates, etc., write Department of Immigration, Ottawa, Canada, or

"SLANG" ROOT OF LANGUAGE

Idiom of Today in Correct Usage Tomorrow, Declares University Professor of English.

That the slang and idioms of today will be correct English tomorrow is the opinion of Prof. H. Glicksman of the English department, University of Wisconsin.

"Our language is made up of what was once slang, idiom, colloquialism and jargon," he said lately, and warned that the most deplorable feature about slang was its tendency to produce mental slovenliness.

Professor Glicksman then referred to the word "mob" as slang of 200 years ago and as such denounced in the Spectator by Addison.

"It is an abbreviation of the word 'mobile.' Even so the word 'pep' is vital and virile and will survive with the word 'snappy.' But to gain recognition slang must be free from vulgarity and cheapness," said Professor Glicksman.

"The term 'How do you get that way?' is condemned because it is meaningless, but the term 'he has a pull' is approved as it is the opposite of 'push,' a word that has forged ahead through its own strength."—Outlook.

Insight.

"I am sure that man is a gunman."
"How can you tell?"
"I guess it by his bullet head."

CLOSE STUDENTS OF NATURE

Examination Papers Proved That Pupils Must Have Made Keen Observations of Their Subjects.

A nature study and biology teacher sent the Nature Study Review the following from her pupils' papers, regarding their observation and conclusions in the domain of nature:

"Organic matter is when you have something the matter with your organs."

"Five devices by which seeds are scattered are wind, water, explosion, torn up, taken out and thrown away."

"The peculiars of an insect are some of them bring diseases, others destroy food, suck the blood, spoil the flowers, lay eggs and kill babies."

"The grasshopper, when he walks, either jumps or hops."

"The jaws of a grasshopper move east and west."

"A larva is an unfinished animal."

His Winning Way.

"It's wonderful how much feeling can be expressed in the tones of the human voice," said the studious person.

"The same thought occurred to me only yesterday," said Mr. Gadspur, "while I was listening to a candidate harangue."

"What was he talking about?"

"He was pleading with the voters to call him 'Bill.'"—Birmingham Age-Herald.

ME FARMERS GRIND WN FLOUR AND MEAL

eral Practice of Farmers Is to Buy Breadstuffs.

sionally Man Is Found Who Has is Own Little Mill and Does His Own Grinding—Bakers Are Patronized in Some Cases.

ereals, such as corn, wheat and kwheat, are raised nearly everyre throughout the United States. se grains are staple breadstuffs, the general practice of farmers is buy flour and meal rather than nd or have their own grain ground home use, says the United States artment of agriculture. In certain tions where custom gristmills are nd, farmers still have some grain ound into flour and meal for home e. Occasionally a farmer is found o has his own little mill and who kes his own flour and meal.

The average farm family consumes out six barrels of flour in a year. the South the average annual conmption of cornmeal is about 500 unds per family and in the North out 50 pounds. The consumption buckwheat and rice is low, except areas where these crops are genally grown.

SUBSTITUTE FOR BEEF SCRAP

Green Cut Bone Is Excellent in Poultry Flock's Diet—Should Be Furnished Fresh.

Green cut bone, when fed fresh, makes an excellent substitute for beef scrap in the poultry flock's diet. It must be purchased in small quantities, as it cannot be kept fresh for any length of time, especially in warm weather, and when spoiled may cause severe bowel trouble.

GENERAL FARM NOTES

Bookkeeping pays on the farm.

* * *

Cheap vegetable seeds are often expensive at any price.

* * *

Poor farming now is not likely to lead to good farming later.

* * *

Pound for pound, emmer has a feeding value very similar to barley.

* * *

Sandy land generally needs limestone worse than it needs phosphate.

* * *

Hotbeds and coldframes give a chance to start vegetables earlier and gain on the weather and insects.

LIVE STOCK NOTES

Cows and mules have kicks in them.

* * *

Our domestic animals have acute hearing. Why yell!

* * *

Very often hogs get tired of the same feed and want a change.

* * *

Nowadays the hog is allowed to range from farrowing time to marketing day.

* * *

A lamb does not need to be very old to take care of itself with the rest of the sheep.

* * *

Both clover and alfalfa have given satisfactory results when fed with corn to brood sows.

* * *

On a good grain ration, it is customary for lambs to gain about one-fourth of a pound per head daily.

* * *

Corn and tankage alone is a splendid ration for fall pigs, and in experiments at the Iowa station has uniformly proved profitable.

* * *

At the Iowa station they have pastured as many as forty spring pigs per acre on rape. On ordinary soil, however, rape does not do nearly so well.

One Trial of Grape-Nuts

will do more than many words to convince you of the goodness of this wheat and barley food.

But it's worth saying that Grape-Nuts contains all the nutriment of the grains, is ready to eat, requires no sugar and there's no waste.

Grape-Nuts is a Builder

SILLY BELIEF STILL STRONG

French Courts Called On to Take Cognizance of "Witchcraft" Practiced in Community.

Even in these latter days a witchcraft case occasionally gets into one of our courts. When they do we are all sufficiently humiliated that Americans, or even residents in America, should be so benighted, but amusement mitigates our pain, and even when a woman tried to get a Massachusetts judge to protect her from sorcery by punishing the sorcerer, the promptness with which the court dismissed her charge as absurd saved American self-respect.

But in this country, of late years, witchcraft cases, when we have had any, have been of the very simplest sort—mere survivals of peasant superstition in ignorant minds. Over in France they do better—or worse—for in the large city of Bordeaux there are about to be tried four citizens of considerable eminence whose lawyer is not afraid to interpose against the charge of assault brought against them by an alleged priest the defense that the beating they inflicted on him was justified by the cruel enchantments he had worked on a woman whom they regarded with reverence as a miracle worker.

That the wizard is accused of resorting to the ancient device of torturing a waxen doll as a means of transmitting agony to his victim is only one element of the offended justification. The defendants or their counsel must be well read in the annals of necromancy, for the tale of persecution is a fairly complete compendium, not of barnyard superstitions, but of those once familiar in every royal circle and not despised by philosophers or ecclesiastics. What a French court does with such a case as this it will be interesting to see. Bordeaux is not Paris, and strange things may happen.—New York Times.

He Thought He Understood.

"I came in answer to your advertisement in the paper for a man," said the poor-looking chap at the door.

"Oh, yes," replied the lady. "Are you temperate?"

"Yes, ma'am."

"Industrious?"

"Yes, ma'am."

"No bad habits at all?"

"No, ma'am."

"How old are you?"

"Just thirty-two, ma'am."

"I guess you'll do. Come in."

"Oh, come to think of it, I guess I don't want the job, ma'am. I'm not a marrying man anyway, ma'am."

Looked Like ——!

"We have heard a lot about the boys of the A. E. F. whose pay was a long time coming, and of course no one blames them for kicking," said Senator Penrose, "but in justice to the military paymasters, it must be said that they too, had their troubles. Like the case in Company B.

"Beg pardon," said the sergeant, "but what is your name?"

"Name!" echoed the private, who had just scrawled his cognomen on line thirteen of the pay roll. "Don't you see my name on that blank?"

"Yes," said the sergeant. "That is what aroused my curiosity."

Back to the Old Home.

He had just vacated one house on the street for another farther down. A few days later he came hurrying home, and when he came to the old place went in as usual. Passing into the living room he sat down, but when he came to himself he was gazing at three total strangers. "Oh, I beg your pardon!" he exclaimed, to their amusement. He departed hastily, but the joke leaked out to his great embarrassment.

Times Have Changed.

"Times ain't as easy as they used to be," said Uncle Eben. "I kin remember when a gemman didn' have to go to war to get de title of 'major' or 'colonel.'"

Mrs. G. I. Schaper is reported to be on the sick list at the present writing.

G. B. Lawhorn of Garner, was a busniess caller in Klemme Monday.

Rev. A. H. Meyer was a business caller at Garner Monday afternoon.

J. N. Day went to Garner Tuesday morning between trains on business.

Prof. Collins spent Sunday with his family at Elkora.

Ed. Jacobs spent Sunday with his folks at Garner.

Mrs. T. O. Letch of Goodell was a Klemme visitor Tuesday afternoon.

Miss Lydia Bock was visiting at Garner last Thursday.

Mrs. Chris Gram spent last Thursday visiting at Belmond.

Mrs. J. N. Day was a Belmond caller last week Wednesday.

Mrs. John Bock and son Mitchell, were at Garner last Thursday.

Mrs. J. E. Baumgartner was a Garner visitor last Thursday.

Wm. Bachman was a business visitor at Belmond Monday between trains.

E. G. Ell and son, Milvern, went to Des Moines Friday night to drive a couple of Ford cars back to Klemme.

Ray Nlson, of Garner, was a Klemme visitor a short while Saturday evening.

Mrs. Chris Gram attended the Missionary Convention at Garner Tuesday and Wednesday.

Miss Ruby Okrueg of Goodell, was a Klemme visitor last Friday between trains.

Mr. and Mrs. Beard from Belmond were noted among the out-of-town shoppers here Friday.

Harry Ruka, of Goodell, was in Klemme last Friday on a business mission.

Walte Ross and family of Garner, were visiting friends and shopping here Saturday between trains.

Mrs. C. H. Tompkins of Garner, was in Klemme last Thursday calling on friends.

Mrs. Walters went to Mason City Saturday for a few days' visit with friends.

Hod Lawhorn and Henry Church autoed over from Garner last Friday to "chin" with old friends.

The Misses Warnock and Bryson went to Iowa Falls Friday evening for an over Sunday visit with home folks..

Mrs. A. L. Hubbard and four children left Monday evening for Minnesota. Mr. Hubbard is already there on the farm.

Mr. and Mrs. Elmer Haferman and Mr. and Mrs. Frank Haferman from Mesevey, were shopping with Klemme merchants last Wednesday.

Wm. F. Stille and family have moved from their country home to Klemme and for the present will live in the house north of Joe Johnson's. We welcome the Stille family to Klemme.

Al White has been on the sick list the past week. It's hard to keep a good man down so we presume Al is up by this time.

Mrs. John Gruetzmacher and Mr. and Mrs. P. M. Greisemer were Garner visitors Tuesday afternoon between trains.

Mrs. Clara Kirkwood went to Mason City last Thursday to have some dental work done. She returned to Klemme Friday evening.

Howard Wiles has been on the sick list the past week suffering from an attack of appendicitis. At this writing he is rapidly recovering.

Henry Schroeder returned to Chicago Saturday night after visiting with his mother here and other Klemme relatives for about a week.

Mrs. Mary Fouts came from Riceville, last week Tuesday to spend the summer with her daughter, Mrs. A. D. Gimer and family.

Miss Bernice Gimer returned Saturday afternoon from a week's visit with friends and relatives at Abbott, Iowa.

Mr. D. D. Ross from Garner came here last Wednesday for a few days' visit with relatives. He returned Saturday.

Mr. Cope, the harness maker who works at the Gruetzmacher establishment, spent Sunday visiting friends at Clear Lake.

F. A. Olney, landscape gardener from Charles City, was in Klemme a few days the past week drawing up lawn and flower garden maps for several of our citizens.

Second Garden of Eden.

It is said by scientists that Mesopotamia may, by the application of modern agriculture, be made into another Garden of Eden.

Rev. A. W. Gauge, pastor of the Grace Methodist church at Garner, and Rev. L. J. Brenner, District Superintendent, were in Klemme Saturday visiting friends. Mr. Brenner conducted services at Garner the following day.

Mrs. H. E. Holmes, son Elmer Larsen, and daughter Mable Larsen, returned tot heir home at Sioux Rapids, Iowa, after spending a week with Klemme relatives. They were called here by the death of Mrs. Holmes' mothr, Mrs. Mary Arnold.

Spring in this locality is at least two weeks, and possibly more, behind the regular schedule, but now the weather promises to be more favorable. And, oh boy!, won't it be a grand and glorious feelin' when we can go fishin' again?

Klemme has been suffering from a coal shortage the past week or two and as luck would have it the cold snap caught many without coal. Local dealers have coal on the way and the situation will undoubtedly be relieved in a few days.

A. L. Streiby and family have moved back to Garner after a couple of years' residence in and near Klemme. Mr. Streiby worked for the Klemme Meat Market and we understand will continue work with that firm at their Garner shop.

Ernest Schuldt met with an accident last Thursday while working at the Northern Lumber Company. He fell from the wagon on which he was working and was cut about the head and bruised bodily from the tumble. His condition was not serious and he was able to be up again in a few days but will be unable to work for a while.

Great Political Questions.

Great political questions stir the deepest nature of one-half the nation, but they pass far above and over the heads of the other half.—Wendell Phillips.

The views of Klemme and Klemme people which were shown at the Idle Hour last week were quite a success. Many pictures were comical and tickled the audience. We believe Joe Johnson would win the prize for the funniest picture shown. The photographer caught Joe sitting in front of Kluckhohn's store on a coaster wagon in a most humorous posture.

Bill Howard had a swell time last week entertaining the mumps but managed to get rid of them and was again on the streets Friday. Bill Claims it was mumps that caused his jaw to swell but we have seen fellows who got the worst of an argument with their wife and came out looking like a case similar to the ornament Bill was sporting.

Sometimes in our mad rush for news we do not "nail" all of them and thus we missed an item pertaining to Chas. Suckow. Mr. Suckow, who is a brother of Henry Suckow, Sr., and likewise has many other relatives here, came from Clarinda about two weeks ago for a visit with Klemme relatives and friends. He expects to return to his home about next week.

Mr. A. D. White who moved from Goodell to Klemme to live with his son Al, has changed his mind. A. D. was going to build a house on the farm with Al and had the cellar dug, the lumber hauled and all set to build when he must have got lonesome for old friends at Goodell for he quit oprations, hauled the lumber back to town and is going back to Goodell. We would like to see him stay in this locality but presume he is more contented with old friends at Goodell and so wish him happiness there.

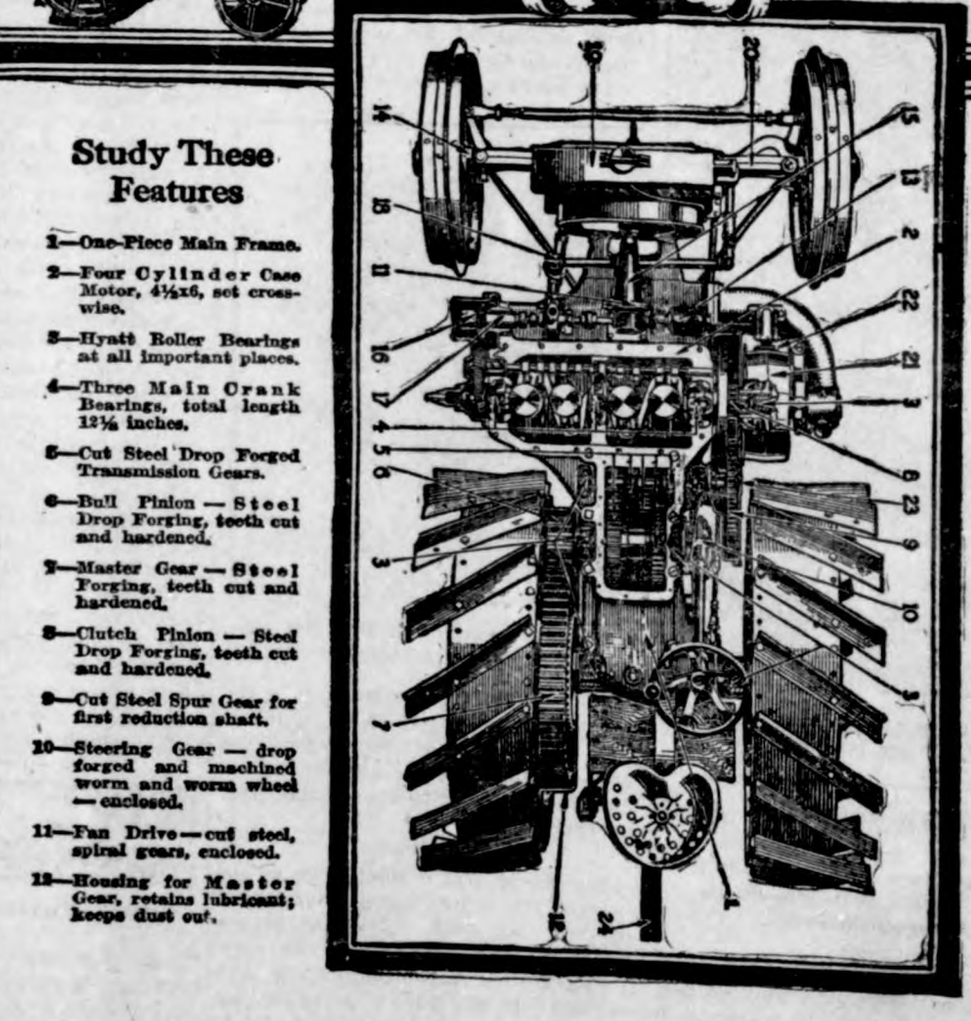
CASE

KEROSENE TRACTORS



Study These Features

1—One-Piece Main Frame.
2—Four Cylinder Case Motor, 4½x6, set crosswise.
3—Hyatt Roller Bearings at all important places.
4—Three Main Crank Bearings, total length 12½ inches.
5—Cut Steel Drop Forged Transmission Gears.
6—Bull Pinion — Steel Drop Forging, teeth cut and hardened.
7—Master Gear — Steel Forging, teeth cut and hardened.
8—Clutch Pinion — Steel Drop Forging, teeth cut and hardened.
9—Cut Steel Spur Gear for first reduction shaft.
10—Steering Gear — drop forged and machined worm and worm wheel — enclosed.
11—Fan Drive — cut steel, spiral gears, enclosed.
12—Housing for Master Gear, retains lubricant; keeps dust out.

Study These Features

13—Magneto — High Tension — dustproof type.
14—Dustproof Front Hubs.
15—Fan Shaft mounted on ball bearings.
16—Speed Governor — fly ball, throttling type, enclosed.
17—Ball and Roller Bearings for Shaft Driving Governor, Fan, Pump and Magneto.
18—Sylphon Thermostat — controls circulation of cooling water.
19—Radiator — copper tube and fin, non-clogging type; cast frame.
20—Steel Front Axle — automobile type.
21—Belt Pulley — mounted on crank shaft — the best place for it.
22—Brake for Clutch Pulley — convenient for quick stops.
23—Dustproof Housing for first reduction gears.
24—Adjustable Drawbar.

How to Judge Tractors Safely

We urge dealers and farmers alike to study the construction of Case Kerosene Tractors. And then make comparisons. This is the only way to get the utmost for one's money.

Above we picture and describe the chassis of the new Case 15-27. After studying the mechanical construction, then let this 15-27 demonstrate its performance. We will gladly send certified records.

This remarkable tractor has won rank as a leader. Before we announced it publicly, it was known to thousands who had seen it at demonstrations. Hundreds of dealers have ordered demonstrators. Any Case dealer or prospective dealer will be furnished with all information promptly upon request.

W. F. PAVEY, Dealer

All outstanding Road Building and Bridge Warrants.

Drainage District No. 7 or No 7 Sec 5
Warrant No. 87
Drainage District No. 8
Warrant No. 53 to 64 inclusive
Drainage District No. 9
Warrants No. 189 to 204 inclusive,
and Nos. 165-167-182-186
Drainage District No. 10
Warrants No. 181-356-364 to 383
inclusive
Drainage District No. 36
Warrants No. 55 to 71 inclusive
Drainage District No. 46-3
Warrants No. 77-80
Drainage District No. 56
Warrants No. 45 to 85 inclusive
Drainage District No. 70
Warrants No. 67 to 101 inclusive
Drainage District No. 71
Warrants No. 125 to 171 inclusive
Drainage District No. 75
Warrants Nos. 81-82-83
Drainage District No. 80
Warrants Nos. 153-154-155
Drainage District No. 83
Warrant No. 51
Drainage District No. 84
Warrants Nos. 80 to 88 inclusive
Drainage District No. 93
Warrants Nos. 9 to 16 inclusive
Dainage District No. 98
Warrants No. 17 to 20 inclusive

The holders of the above Warrants are notified that Interest ceases as ovided by law. Figure interest at 6 per cent on all Drainage Warrants d receipt for Interest on the back of each warrant. Figure Interest at 5 per nt on Road and Bridge Warrants.

Dated at Garner, Iowa, this 26th day of April, 1920.

THOMAS H. THOMPSON,
County Treasurer

Operatic Opulence.

"You must love art to pay such enormous salaries to grand opera singers." "I'm not sure," replied Miss Cayenne, "whether it indicates a love for art or an indifference to money."

Almost Good for Nothing.

"Judging from the paltry salaries some of our ministers are paid," observed the near cynic, "one might say with truth that they are good for almost nothing."

A PHILIPPINE TRAVELOGUE

THE ROMANTIC ISLANDS OF THE FAR EAST. PICTURES OF THEIR NATURAL BEAUTY AND HISTORIC SPOTS—BECOMING A MECCA FOR TOURISTS AND A POPULAR WINTER RESORT.

The Zigzag on the Way to Baguio, Summer Capital of the Philippines.

All aboard! Let's go! We're starting from Manila, the great picturesque, Americanized Oriental city, and will travel by automobile 200 miles to the north to Baguio, the summer capital of the Philippines The trip can also be made by train

We have ahead of us one of the most scenic, spectacular and thrilling automobile trips in the world. We will have excellent roads all the way. The Philippines are, in fact, a paradise for autoists, possessing 3,500 miles of fine macadamized roads.

The first part of the trip is through typical small towns and then across the central plain of Luzon and through several rich and fertile provinces, where tropical vegetation is seen at its best. Here one is impressed with the great agricultural wealth of the Philippines, which represents one of the East's greatest producing areas, with the advantage of immense natural resources for the development of further production. It is regrettably true that even in the United States there is far from any real understanding of the potentialities of the islands.

At some points rice fields, looking in the distance like the greenest of green lawns, stretch away as far as the eye can see. If you want color, if you want to feel the romance and mystery of an Oriental twilight, pass this way as the red eyed sun at the end of the dying day is slowly sinking behind the unending expanse of green fields. At first you cry out in ecstacy at the gorgeous scene. But as you ride along, your eyes fastened on the panorama of tints and colors, and with the impenetrably black Oriental night coming on fast, you become enthralled. You no longer try to express your feelings. You cannot. You realize that those now fast changing, colorful masterpieces in the heavens and on the landscape are pictures that no man can adequately describe nor human hands duplicate. So what's the use of trying!

True, these are but impressions, but the traveloguer considers himself justified in mentioning them, for they are a part of the trip to Baguio and return. Indeed, the gorgeous sunsets in all parts of the Philippines leave an impression on the mind of the tourist that is everlasting.

We leave the palms and tropical foliage and enter the zone of rugged pine. We pass from the soft, incense laden air of the warm lowlands to the crisp, invigorating ozone of the temperate zone, all within a few hours' time.

For mile after mile the road now follows the tortuous course of a river, the road lying in the bottom or on the rocky sides of a granite canyon.

The Philippines are rich in hydro-electric possibilities. This power is the cheapest power on earth. And it is everlasting. Your traveloguer is neither a prophet nor the son of a prophet, but he predicts that one day there will be innumerable Philippine government owned hydro-electric plants in this canyon we are now passing through. Think of the possibilities of such a project! Today the trip from Manila to Baguio is too expensive for the average Manila worker and his family, many of whom may live and die without beholding the wondrous beauties of their own island of Luzon. Think of what a blessing it would be to Filipino mothers and children to feel upon their fevered brows the cool, invigorating breezes of the mountain tops, now so near and yet so far! With the Philippine government owning its own electric railways and hydro-electric plants it would be possible to bring the trip to Baguio within the means of hundreds of thousands of Filipinos. Not only is there sufficient power in this river to electrify a line from Manila to Baguio, but to operate the street railways of Manila, light the city and furnish power for manufacturing concerns.

But we have now arrived at Camp One. From this point the scenery rapidly changes as the elevation increases. We are traveling over the famous Benguet road, the construction of which through the mountains is a most remarkable engineering triumph. At places the road is blasted out of the solid granite. Riding on the edge of a 100 foot precipice makes one feel like he is on the rim of the world. Some of the turns are so sharp it is impossible to see 20 feet ahead, and we seem to be perilously near the jumping off place. We wonder if it is safe to lean out and peer into the canyon far below, and when we do we are perfectly satisfied we are flirting with death. Yet the trip is a safe one, providing our driver has better nerves than our own.

All too soon we reach the outskirts of Baguio, a city among the clouds, and are rather surprised at the modern city we find it to be. In ten years Baguio has grown from a village of huts to the now justly famed mountain resort of the Philippines, sometimes called the Philippine Simla. It is undoubtedly destined some day to become a large city.

Baguio ranges in elevation from 4,500 to 5,500 feet and is surrounded practically on all sides by high mountain ridges and "hogsbacks" towering into the skies at a height of almost 8,000 feet.

Aside from the scenery, which is noteworthy, the great blessing of Baguio is its temperate climate, which is indeed a godsend to those impoverished by the tropical temperatures of the lowlands. Not only is the mountain air rich in ozone, but it has been demonstrated to be extraordinarily free from germs of all kinds.

Each year during the hot season the school teachers of the entire archipelago are enabled by the government to spend a month at the teachers' camp in Baguio for recreation and conference on school work. American army officers and their families also go to Baguio for the hot months.

And now that your traveloguer has you in Baguio, he believes he will leave you there, for there are many interesting side trips to take, and, besides, Baguio is the most delightful place for a vacation in the entire Orient.

C. H. T.

TO MAKE TILE NEEDLES

The ceramic department at the Iowa State College at Ames are working on a new kind of talking machine needle ad which they claim will play one hundred times. The needle is to be made of clay and baked like an ordinary tile. They also claim this needle will not wear the record which it is playing.

More Local

The J. N. Day family and Mr. and Mrs. Wm. Smith and Mable autoed to Garner Sunday to spend the day at the Walter Ross home.

Mr. ad Mrs. John McCorkle and Mr. and Mrs. Ed Gunderson of Kanawha were Klemme visitors Saturday.

Mesdames Buri,ff, Trafford, Elder and Gimér went to Garner last Wednesday to attend a Missionary Convention.

C. W. Wiles, M. O. Hocum, N. L. Palmer and Wm. Howard autoed to Algona Sunday where Mr. Wiles went to drive back a new Buick Six.

A number of the local Masons went to Garner last Thursday evening to see work in the third degree. Three took the work and a big supper was also served.

Bert Mathews made his usual Sunday auto trip to Garner, where he went to church and later—well, we are not telling the young lady's name whom he went to see.

LuVerne has a baseball team and the business men and citizens have also raised $1,000 to pay expenses of the team, for the grounds, and erection of bleechers. How about a ball team for Klemme this year?

Mr. Perkins, from Corwith is that new butcher you have seen back of the counter at Larsen's shop. Mr. Perkins knows how to "whittle" meat and thoroughly understands the business.

According to the Algona Advance Kossuth county will pave about twenty-two miles this year. The contract will be let as soon as they get the return approval of the state highway commission.

Our neighboring town of Corwith is also contemplating putting in a sewerage system this year. The Corwith coucil recently met with the Garner council to discuss plans and get pointers.

"Zip" McCullough sent out an S. O. S. last Wednesday and that evening his father, C. V., came from Garner to assist "Zip" in shaving the Klemme squirrels. "Mack" Senior returned to Garner Thursday.

Gerald McCullough autoed to Garner Sunday morning and there got his father and mother and they autoed to Northwood for diner, that day also being the birthday of Mrs. McCullough. They had dinner with Mrs. McCullough's brother.

The Commercial Club of Renwick have re-organized and will get busy on various things of public interest. It would be well that a Commercial Club be organized in Klemme and let it get busy and urge public improvements.

C. W. Wiles and Fred Wacker went to Sioux City last Thursday on the choo-choo cars, but returned in a handsome Buick Six car which Mr. Wiles sold to Fred. The auto dealers here are giving good service and if the railroads won't bring in the cars the dealers go get them anyway.

Garner will give their band concerts on Tuesday nights this year. Britt will give their concerts on Wednesday and Saturday nights and we believe Klemme concerts will be given on Thursday ights as that is the only night which Mr. Crotty, the leader of the band, can be here.

A. G. Lau went to Garner Sunday morig and from there took the Milwaukee for Mason City and Minneapolis, where he went to visit his son, Ben. From Minneapolis he will go to Fairfax, North Dakota, where he has interests in a coal mine and says that he may ship some of that coal to Klemme.

J. E. Baumgartner was operated on last Friday morning at the Park Hospital at Mason City for appendicitis. Mrs. Baumgartner who went over with him last Thursday returned to Klemme Friday afternoon and reported that he got over the operation in good shape and that at present time he is getting along well.

While on his way to Des Moines, J. E. Wichman of Garner, met with a rather peculiar and yet painful accident on the train. He had one of his hands resting on the window sill when the window dropped suddenly and caught three of his fingers on the right hand. One finger tip was nearly cut off by the window and he will lose the nail on another.

Art Wellemeyer was at Goodell Saturday to coduct the funeral of Frank Church who died of heart trouble at Mason City. Mr. Church was an optician at Mason City and has a brother at Goodell. Church was found dead in a bath tub at his rooming house at Mason City last Wednesday morning ad death was at first supposed to be caused by drowning, but examination revealed that heart trouble was the cause of his death.

About a dozen or more students fro mthe Klemme school took a day off and attended the school exhibit at Garner last Friday. Those who saw the exhibit said it was wonderful and that the time spent at Garner in going thru the school was time well spent. More of the Klemme students and also the teachers should have attended as it inspires them to do better work and try to compete with the larger schools.

Mr. Finis Lech, mother and sister, and Miss Kitts, of Goodell, autoed to Klemme last Sunday and while here Mr. Letch found a few spare moments to chat with the Times Editor. Mr. Letch formerly was publisher of the Goodell Globe until he lost his plant in the fire a few months ago. Finis is now with The Herald-Press at Belmond.

The first sermon in the new auditorium of the Liberty township church was given Sunday by Rev. A. H. Meyer. The church will soon be completed and when everything is all finished we will give a full description of the church and if possible will have some pictures of it also. To say that it is one of the best churches in the county is putting it mild. The church would be a credit to many cities as it is not only large and beautiful but has all modern conveniences such as the most up-to-date churches have.

Friday night of this week Britt will have a grand opening celebration. The program will be given at the Coliseum where the united Men's and Ladies' Band will give a concert under the direction of Mr. Crotty. The band will number about sixty musicians. After the concert a dance will be given. As Mr. Crotty is the director of the Klemme band and as they usually have their rehearsals here on Friday, he came here Wednesday and gave them their lessons and practice.

COUNTY AUDITOR CELEBRATES SILVER WEDDING ANNIVERSARY

Ed. Jacobs, our enterprising hardware dealer went to Garner Sunday to attend the Silver Wedding Anniversary which his father, Chris Jacobs and wife were to celebrate that day.

There were about thirty-five relatives and friends from far and near who were in attendance to help Mr. ad Mrs. Jacobs celebrate their twenty-fifth wedding anniversary. A big wedding dinner consistig of three courses was the center of attraction at the noon hour and was served by Mildred McCullough and Ethel Jacobs. The table scheme was carried out in pink and white and carnations were the principal flowers of decoration. Likewise another fine spread was given at the supper hour to the many guests. Mr. and Mrs. Jacobs were showered with many and useful gifts of silver in honor of the great event. It is hardly needless to say that all thoroughly enjoyed themselves at the great event which marked a great epoch in the lives of these people and they wished Mr. and Mrs. Jacobs many more years of joy and happiness and that they might again entertain guests to a Golden Wedding Anniversary.

GARNER PAVING PROGRESSING

Garner Signal: The paving company are making rapid preparation for doing their work in Garner. They bought the Garner House last week to furnish rooms for their men who will be here at work. They aree putting up buildings north of the Milwaukee tracks to store their material and are receiving more material every day. They already have a big gang of men on the job. The hotel they bought will accommodate all their better class of help. The foreign laborers they will bring here will be housed in temporary buildings at the outskirts of town. They are building a large building to store cement in. It will furnish room for 10 or 12 cars of cement. They are also putting in bins in which to unload their sand and gravel and have erected buildings to house their trucks and tractors. They are going at the job as though they intend to rush the contract to completion.

The W. F. M. S. of the 1st M. E. will meet with Mrs. Wm. Stille on Thursd'y May 6. Come and enjoy an interesting program.

PLANT A TREE

Gov. Harding has issued a proclamation proclaiming Friday, April 30, to be Arbor Day and urges that people set out a tree that day and that communities should plant a tree in honor of their soldier dead.

Prayed for Cure
Finds it After 10 Years
Food Would Sour and Boil
—Teeth Like Chalk

Mr. Herbert M. Gessner writes from his home in Berlin, N. H.:

I had stomach trouble over ten years; kept getting worse. I tried everything for relief but it came back worse than ever. Last fall I got awfully bad; could only eat light loaf bread and tea. In January I got so bad that what I would eat would sour and boil; my teeth would be like chalk. I suffered terribly. I prayed every day for something to cure me. One day I read about EATONIC and told my wife to get me a box at the drug store as I was going to work at 4 p. m. I took one-third of it and began to feel relief; when it was three-fourths gone, I felt fine and when it was used up I had no pains. Wife got me another box but I have felt the pain but twice. I used five tablets out of the new box and I have no more stomach trouble. Now I write to tell you how thankful I am that I heard of EATONIC. I feel like a new man; I eat what I like, drink plenty of water, and it never hurts me at all.

The Largest Animal.

Most boys have seen pictures of the huge lizard which roamed the earth millions of years ago, and is supposed to be the largest animal which ever lived. Searchers in Utah have discovered some bones of an animal which was twice the size of this great prehistoric animal. A hole 600 feet long and 80 feet deep had been dug when some one claimed the land. The government thereupon created a National Dinosaur Monument, comprising the locality, which will be protected until the investigations are finished. The work is being directed by the Carnegie institute, which discovered and assembled the skeleton of the familiar dinosaur.—Boys' Life for March.

PAIN IN BACK

Boy River, Minn.—"I have used Dr. Pierce's medicine with good results in my family for years. Last winter I was taken with La Grippe and it left me run-down, and with pains in my hips and back. I took different medicines without getting any benefit. At last I sent and got some of Dr. Pierce's Anuric and took it and am feeling well and doing a good day's work. When I commenced taking the Anuric Tablets I could hardly get out of the bed, felt as though a knife was sticking in my back."—A. C. Blodgett, Box 2.

KIDNEYS AND BLADDER

Inland, S. Dak.—"I can recommend Dr. Pierce's Pleasant Pellets and Anuric (anti-uric-acid) Tablets as grand medicines. I was troubled with my stomach, and also had weakness of the bladder and I started taking Dr. Pierce's Anuric Tablets and Pleasant Pellets and I believe they have cured me of my trouble. I think my stomach trouble was dyspepsia. The 'Pleasant Pellets' are the best regulator of the stomach and bowels I have ever used and I would recommend them highly. I have used four bottles of Anuric Tablets and four vials of Pleasant Pellets."—E. A. Eastman.

Rheumatism, Feet Swollen

Stillwater, Minn.—"I feel that it is my duty to write about the wonderful results I received from the use of 'Anuric.' I was suffering from kidney and bladder trouble, scalding, rheumatism, also my feet and ankles swelled so that at times I could not walk without assistance. Had taken several different kinds of kidney remedies and all failed. Finally I sent to Dr. Pierce for a package of his new discovery, 'Anuric' (anti-uric-acid), which I received by mail in tablet form. I soon got better and am convinced that this popular new medicine is good. I wish to recommend it to my neighbors and everybody suffering from kidney troubles."—Mrs. M. J. Sargent, 218 E. Elm St.

GARDENS LESSEN COST OF LIVING

They Will Return Abundantly in Proportion to Time and Effort Expended.

COMMERCIAL PLANTING CUT

Big Vegetable Gardeners See No Way of Obtaining Enough Labor to Conduct Usual Operations—Make All Plans Early.

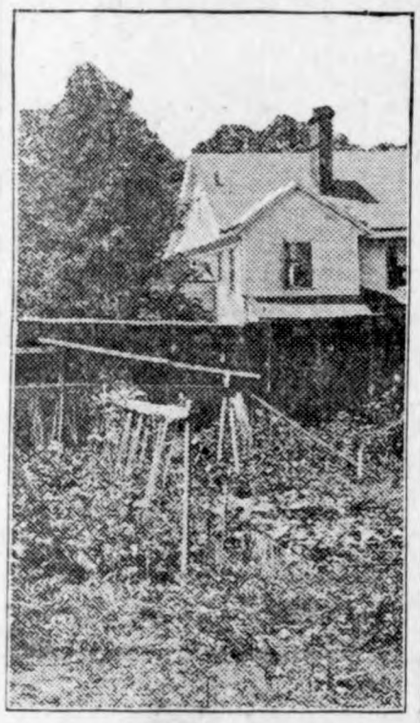
(Prepared by the United States Department of Agriculture.)

One way of reducing the cost of living is open to every man, woman and child who can get the use of an idle plot of ground. That way lies through the planting and cultivation of a home garden—a Thrift garden. War gardens played their part in the great mobilization of resources in wartime—Thrift gardens now have their own big job in helping households to feed themselves.

The reasons for Thrift gardens are many and various. The same reasons that existed last year and the year before still are present. Thrift gardens will produce food where nothing otherwise would be produced, they will reduce family food bills, they will return abundantly in proportion to the time and effort devoted to them. But added to these reasons is another one peculiar to this year.

Less Commercial Planting.

Reports to the United States department of agriculture indicate that the plantings by commercial vegetable gardeners will be materially reduced this year, because the commercial gardeners see no way of obtaining enough labor to conduct their usual operations. The commercial gardeners claim that they have paid high wages in endeavors to keep up production, but now have reached the point where the returns will not justify the continuance of this expense. At least, that is the report reaching the department of agriculture from seed merchants, whose operations at this season are regarded as a good indication of what conditions will be a month or two from now.



A Typical Home Garden—The Sort That Will Bring Health and Profit to the Tillers.

If the reduction of commercial gardening becomes a fact, the obvious result will be fewer vegetables and higher prices. The logical remedy lies partly in home gardens. This is a remedy, moreover, that will work no harm even if the commercial acreage should be up to normal, as any surplus of fresh vegetables may be saved by canning, drying, and other means of conservation and the surplus kept so that it will be useful next fall and winter.

Many More Gardens Needed.

Thousands of families learned the value of home gardens in wartime. United States department of agriculture specialists believe it essential that these families' interest be maintained and that other thousands be added to the home-food producers.

"Now is the time to begin making plans for your 1920 Thrift gardens," these specialists declare. "First, locate a piece of suitable land; second, make your plan; third, get your seeds; fourth, start work at the earliest possible moment."

A request to the United States department of agriculture, Washington, D. C., will bring a booklet that will tell how to plan your garden, how much seed to buy, how to get the land in shape for cultivation, how to take every other step in the process of making your back yard or some other vacant lot help feed you.

WEEDS ARE VALUABLE ASSET

Noxious Plants Cut Down and Turned Under Excellent Fertilizer for Garden.

Weeds in the back yard or on that vacant lot next door are an asset to the gardener, for he knows, or should know, that these weeds, cut down and turned under in the garden plot, mean fertilizer for his soil. Turn the rank grass under with the wheel hoe and cultivate it once to destroy the growth. When manure is not procurable this green material is invaluable.

EFFICIENT PLANNING OF GARDENS FAVORED

Important to Make Cultivation Easy and Simple.

Plant in Long, Straight Rows and Cultivate at Least Once Each Week—Hardest Part of Work Performed by Horse.

(Prepared by the United States Department of Agriculture.)

Of several thousand farm women who answered a series of questions sent out by the extension service of the United States department of agriculture, 92 per cent had gardens and 56 per cent of the gardens were tended mainly by the women themselves. If this be universally true, it is important that the farm garden be planned so that the work of cultivating it will be simple and easy. All of the heavier work, such as plowing and fitting the land, should be done by men with the aid of a team.

The garden should be planted in long, straight rows and cultivated once a week with a horse, according to specialists. If this much is done by the men the work of the women will be materially reduced. The care of a home garden is not hard work if the fitting of the land and the main part of the cultivation is done with horse-drawn tools. Plan the farm garden right, work it right, and it will prove the most profitable piece of land on the farm.

The Long Rows in This Farm Garden Are Great Time and Labor Savers, Making Possible the Use of a Horse in Cultivation.

TEST SEEDS BEFORE SOWING

Essential Preparation Consists of Providing Apparatus and Knowledge of Methods.

Practically the only element in crop production that the farmer has completely under his own control is the planting of good seed.

It is important that farm seeds be tested before they are sown. Otherwise, a full crop cannot be grown even under the most favorable weather conditions.

Seed testing for practical results, says the United States Department of Agriculture, can be done much more easily than is generally believed.

The essential preparation for making seed tests consists of providing the simple apparatus necessary and of becoming familiar with the general purposes and methods of testing and the features of importance peculiar to tests of particular kinds of seeds. Ask the county agent, or write the Department of Agriculture for a bulletin.

FEED LITTLE CALVES GRAIN

Young Animal Begins to Eat When About Two Weeks Old, Amount Gradually Increasing.

When the calf is about two weeks old it will begin to eat. If a small amount of grain is placed in a box and kept before the calf it will be only a short time before it begins to eat regularly. A quarter of a pound or less each day will be sufficient for ten days or more and this can be gradually increased, giving the calf all it will clean up.

POULTRY NOTES

Take care of your setting hens, feed and water them regularly.

* * *

Perhaps the greatest drawback to turkey farms is the lack of range.

* * *

When the chicks have learned to roost it is much easier to protect them from mites.

* * *

Although ducks and geese are water fowls, they must have a dry, well-bedded house or shed to rest in.

* * *

Mites, lice and fleas are the prolific and everlasting root of most of the troubles of the poultry raiser.

* * *

Only laying fowls are worth keeping in the spring; the first step toward beating last year's record is to cull the non-layers.

* * *

A good laying strain of hens will keep busy laying all during the breeding season if they are shut up and their broodiness broken each time.

Another Royal Suggestion

COOKIES and SMALL CAKES

From the NEW ROYAL COOK BOOK

WHEN the children romp in hungry as young bears, here are some wholesome, economical delights that will not only be received with glee, but will satisfy the most ravenous appetite in a most wholesome manner.

Cookies

¾ cup shortening
2 cups sugar
¼ cup milk
2 eggs
¼ teaspoon grated nutmeg
1 teaspoon vanilla extract or grated rind of 1 lemon
4 cups flour
3 teaspoons Royal Baking Powder

Cream shortening and sugar together; add milk to beaten eggs and beat again; add slowly to creamed shortening and sugar; add nutmeg and flavoring; add 2 cups flour sifted with baking powder; add enough more flour to make stiff dough. Roll out very thin on floured board; cut with cookie cutter, sprinkle with sugar, or put a raisin or a piece of English walnut in the center of each. Bake about 12 minutes in hot oven.

Cocoa Drop Cakes

4 tablespoons shortening
1 cup sugar
1 egg
½ cup milk
1¾ cups flour
3 teaspoons Royal Baking Powder
½ cup cocoa
¼ teaspoon salt
1 teaspoon vanilla extract

Cream shortening; add sugar and well-beaten egg; beat well and add milk slowly; sift flour, baking powder, salt and cocoa into mixture; stir until smooth, add vanilla. Put one tablespoon of batter into each greased muffin tin and bake in moderate oven about 20 minutes. Cover with boiled icing.

Orange Cakes

4 tablespoons shortening
1 cup sugar
⅔ cup milk
1 egg
2 cups flour
3 teaspoons Royal Baking Powder
⅛ teaspoon salt
1 teaspoon orange extract
grated rind of 1 orange

Cream shortening; add sugar slowly, beating well; add milk a little at a time; then add well-beaten egg; sift flour, baking powder and salt together and add to mixture; add flavoring and grated orange rind; mix well. Bake in greased shallow tin, or individual cake tins, in hot oven 15 to 20 minutes. When cool cover with orange icing.

TEACHER SHORT OF SUPPLIES

Tommy's Excuse Rather a Poor One, but He Was in a Mighty Tight Corner.

The village schoolmaster had done very well with his war saving association. The scholars brought in their pennies regularly every week; some even had as much as a shilling to subscribe.

One Monday morning Mrs. Oates gave her son Tommy the sum of threepence to pay in. On his return for dinner the good lady asked to see his card.

"Look here, Tommy," she said sternly, "there's only twopence entered here! How is that?"

Tommy grew pale as he saw that his sin had found him out. But the taffee in the village shop had been so tempting. However, he did his best.

"Yes, mother," he stammered, "that's all the ink the teacher had."—London Answers.

Extravagance of Japanese.

The extravagance of the newly rich of Japan finds vent mostly in endowing colleges, assembling treasures of literature and art and ministering to those senses and desires through which men nourish the soul.

Shape your way so the guardian angel may sound the call "Twelve o'Clock, and All Is Well."

MUSIC OF ANCIENT GREECE

Bands That Marched to War With the Soldiers Played on Flutes, Pipes and Harps.

Poetry in ancient Greece was accompanied by the cithara and the lyre, while the flute was played by both men and women in furnishing martial music to the soldiers in time of war. Musical bands marched to war with the soldiers and played on flutes, pipes and harps.

The lyre and the harp were preferred by the Greeks for private use, for it was thought they did not prevent one from remaining master of himself, while the flute, pipe or clarinet put the man beside himself and obscured reason. There were extensive choirs whose music was distinctly connected with the religious life of the people. These choirs were composed of both men and women and were employed for public and private religious festivals.

The choirs celebrated victories in war, deaths, holy days, births and marriages. Alkman, who lived as early as 650 B. C., wrote a choir song for girls which was a dramatic part song.

Made It Specific.

A little girl had been naughty, and her mother told her she must have no pudding for dinner. Later, the others ate a nice jam pudding, while the culprit received only bread and butter.

"Now, Jeanie," said her mother, at the end of the meal, "say grace."

Jeanie obeyed. Closing her eyes and her hands, she said, with emphasis:

"For what they have received may they be truly thankful."

Literary Objection.

Friend (doubtfully)—"I guess the old man will kick about your marrying his daughter." Lover (sadly)—"He did."

A vain woman may accuse a m of being a flatterer, but never of ing a liar.

Important to Mothers

Examine carefully every bottle CASTORIA, that famous old rem for infants and children, and see that

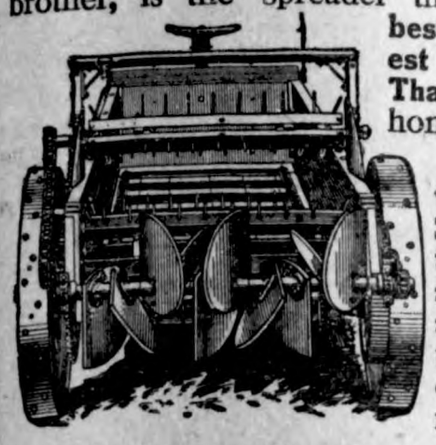
Nothing But the Nisco Spreader for Us.

Any old machine that would just carry manure to the field and dump it on the ground wasn't good enough for us. When one of our customers came in and said, I need a manure spreader, we wanted to point to a machine and say "There, brother, is the spreader that handles manure best, pays for itself soonest and lasts longest. That machine we can honestly recommend."



Naturally we investigated Manure Spreaders; and we've taken the agency for a machine that actually measures up to the ideal we had set in our own mind. This machine is called the

NISCO

Reg. U.S. Pat. Off.

The "New Idea"

Manure Spreader

And we want every farmer in our territory to come in and see it! The machine is a mechanical marvel. It pulverizes and spreads a full load over three corn rows in three minutes.

Here are some of the many good points of this wonderful spreader—see if they don't sound good to you. Low down and easily loaded. Wide-tired wheels—hence the machine is light draft. Chain conveyor carries all the load to the two cylinders, where it is thoroughly pulverized. Rapidly revolving steel paddles distribute this finely pulverized manure evenly. Can be set, by a convenient hand lever, to spread 3, 6, 9, 12, 15, 18 loads per acre. Positive chain drive—no possibility of clogging. Strongly built and able to stand steady usage year in and year out. This machine is

The Original Wide-Spreading Spreader

It was first of all spreaders to distribute wider than its own wheel track. Has been the leading spreader for 17 years and still leads.

Get This Book We Are Giving Away

Don't forget this when you come in, because it's important. This book is called, "Helping Mother Nature." It tells proved facts about the care and use of manure worth scores of dollars to any farmer. You can make money by heeding the suggestions in this book and using a Nisco Manure Spreader regularly.

Come in! We are waiting to show you this machine.

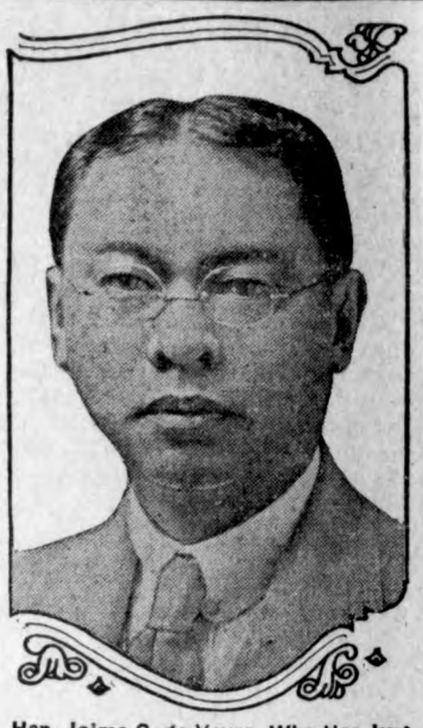
WESTERN GROCER COMPANY

MEET THE DE VEYRA FAMILY!

They Are Putting the Philippines on the Map in Washington



Hon. Jaime C. de Veyra, Who Has Just Been Re-elected as Philippine Commissioner to the U. S.

Mrs. Jaime C. de Veyra. She Is Doing Important Work for Her People in America.

THE CHILDREN OF THE PHILIPPINE COMMISSIONER.

The Baby of This Group Speaks Three Languages—Visayan, Spanish and English.

Permit us to present the De Veyra family.

The Hon. Jaime C. de Veyra is the Resident Commissioner from the Philippine Islands to the United States and has just been elected to a second term of three years. As Resident Commissioner he has a seat on the floor of the American Congress, the privilege of taking part in debates, although no vote.

Commissioner de Veyra has an interesting wife and four bright Filipino kiddies. The De Veyra family, individually and collectively, constitute the best argument as to the tact and capabilities of Filipinos that the Philippine Islands have in Washington.

The commissioner is a 100 per cent Filipino, a Visayan, and is one of the foremost leaders of the party in power in the islands. During American occupation he has been successively governor of his province, member of the Philippine legislature, cabinet member and executive secretary of the islands.

Like many statesmen of the Philippines, he was originally a newspaper man. He was one of the founders of El Nuevo Dia of Cebu, the first Filipino paper published advocating Philippine independence. The paper came under the censorship of General McIntyre, and on the appearance of the first number the editors were left in the singular position of seeing every prominent article blue penciled.

Mrs. de Veyra, like her husband, is a "live wire" in the Philippines' cause. She is the best known Filipina in America. She is an interesting public speaker and is constantly giving illustrated lectures at women's clubs and other gatherings. Mrs. de Veyra is a publicity bureau all in herself and has put the Philippines on the map, so far as the women folk of Washington congressional circles are concerned.

"I find that the Filipino people have been much misrepresented in the United States," says Mrs. de Veyra. "I do not mean to infer we are perfect, for we are not. My people have most of the defects, I suppose, that other humans have, but at the same time we are far from the people that many Americans have been made to believe. Not only are we a Christian people, but our race has a history that we are not ashamed of. Throughout the Philippine Islands the people are now working earnestly to improve themselves and their conditions so they will be prepared to take over their own affairs. We all love America for giving us a chance to help ourselves and for having promised us our independence, which is one of the dearest desires of the entire citizenship of the islands."

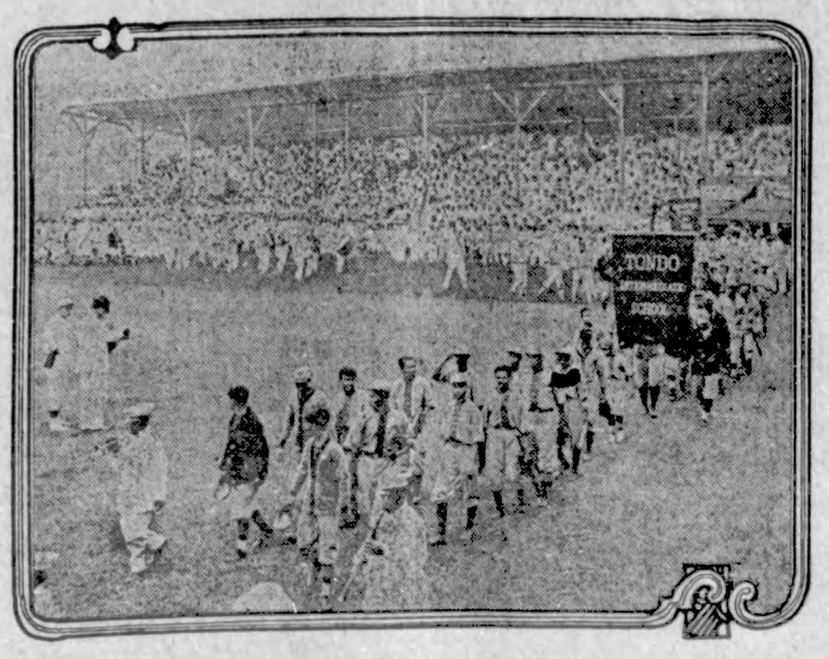
To American women whose ideas of Filipinos have been founded on Sunday supplement descriptions of wild tribes, Mrs. de Veyra's gentle manner and evident culture have been a revelation. She is sought by women's clubs because of her charming manner as an impromptu speaker on the subject nearest her heart—the women of her country.

At a recent Washington gathering she gave in perfect English a concise account of the work of a woman's club in Manila which supplies milk to the babies of the poor and trains mothers to care for their young children. She told of another woman's club which has branches all over the Philippine Islands and which maintains day nurseries for the children of the working women, provides Christmas cheer for the lepers, the insane and the convicts, and gathers data to influence legislation for the benefit of Filipino women and children.

The four little De Veyras, shown in the picture, having attended the public schools in Manila, slipped right into the same grades in the schools of Washington. Even little Mary, the baby of the family, speaks three languages—her native tongue, Spanish and English.

"PLAY BALL!"

They can do it the year around in the Philippines.



Here's indisputable evidence that the Filipino people have been Americanized! The great American game of baseball is the rage in the islands. This photograph shows a parade which preceded one of the big games in Manila. Baseball is played from one end of the archipelago to the other, and, as in other branches of athletic sports, some classy players have been developed.

Preserve the Vitamines.

The use of bicarbonate of sodium in the manufacture of bread is deleterious, because on baking it is converted into the carbonate which tends to destroy the vitamines. The effect of this is obviated by adding such acid substances as buttermilk or cream of tartar. Because the vitamines are so important the growing and importation of vegetables and acid fruits should be encouraged.

IS 700 Bushels of Corn Worth Saving?

Wouldn't you like to save 700 bushels of corn each time you fill your silo? In filling a 100-ton silo you put in about 700 bushels of corn when the ears are run in with the stalks.

With a JENNEY SILO-FILLER-HUSKER you can take the ears off, put them in the crib and still have silage with just as much food value and give you just as good feeding results.

Figure out how much 700 bushels of ear corn is worth at present market price—that's your saving.

Let us tell you all about this money-saving, money-making way of making silage. It is opening the eyes of farmers, Experiment Stations and stockmen everywhere.

You don't have to fill your silo at just a certain time—you can fill it and re-fill it from fall to spring. The saving pays for the JENNEY SILO-FILLER-HUSKER in a shortime. (4-D)

Now is the time to look into this money-saving, corn-saving plan. Come in and see us about it.

POLITICAL ADVERTISEMENTS

FOR REPRESENTATIVE

I am a candidate for state representative for Hancock County subject to the decision of the republican voters at the June Primary.

THOS. H. THOMPSON.

I hereby announce myself a candidate for the office of County Treasurer, subject to the decision of the Republican Primaries to be held June 7th, 1920. Yours very truly,

1-1-20 JOHN SUURBALLE

I hereby announce myself a candidate for the office of State Senator from the district composed of Hancock, Cerro Gordo and Franklin counties, subject to the decision of the Republican voters of said counties at the June, 1920, Primaries.

Dated at Garner, Iowa, this 12th day of January, 1920.

1-22-tf. J. E. WICHMAN

I hereby announce myself a candidate for the office of Sheriff for Hancock County, subject to the decision of the voters at the June, 1920, primaries.

1-29-p. E. PECK HANSON

I hereby announce myself a candidate for the office of sheriff of Hancock county, subject to the decision of the Republican voters of said county, at the Primary election to be held in June.

W. C. ZIESEMER,
1-22-tf Garner, Iowa

I hereby announce myself a candidate for re-election for Supervisor, subject to the will of the Republican voters at June Primary.

G. B. LAWHORN

I am a candidate for re-election, subject to the will of Republican voters at Primary Election next.

Very truly yours,
Chris Jacobs, Auditor

I hereby announce myself a candidate for the office of State Representative from Hancock County, subject to the decision of the Republican Voters of said County, at the June 1920, Primaries.

Dated at Britt, Iowa, this 26th day of January, 1920.

E. P. Healy

I hereby announce myself a candiate for re-election for Supervison, subject to the will of the republican voters at the June primaries. H. C. MEYER.

I hereby announce myself a candidate for the republican nomination for the office of recorder of Hancock county, at the June 1920 primaries.

HATTIE M. ALDRIDGE

I hereby announce my candidacy for State Senator from the 43rd district composed of the counties of Hancock, Cerro Gordo and Franklin, subject to the decision of the Republican voters of the above counties at the primaries in June, 1920. W. P. Chambers.

LEGAL NOTICES

IN THE DISTRICT COURT OF IOWA:—

In Re-Estate of Mary Arnold, Deceased, in and for Hancock County, ss:

Now, on this 14th day of April, 1920, an instrument in writing bearing date the 2nd day of April, 1920, purporting to be the last will and testament of Mary Arnold, having been produced and filed in my office, and by me opened and read, the 10th day of May, 1920, at 11 o'clock A. M., is, by me, fixed as the time for proving the same, and, having prepared and signed a notice of the time so fixed, I now direct that said notice be published, for the period and in the manner provided by law in the Klemme Times, a weekly newspaper published in said county.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the District Court, at my office in Garner, Iowa, this 14th day of April, 1920.

(Seal) A. E. BAUMGARTNER,
Clerk of the District Court

Magnetic Needle From Chinese.

The date of the introduction of the magnetic needle into Europe is unknown, but it came as many suppose, from the Chinese through the Arab sailors and traders, and it probably was already a nautical instrument.

We furnish the good Banking connection. Have you the ambition.

A Banking connection is asset that deserves cultivation. Start it early and it will be ready to serve you when you need it.

STATE NEWS

Gleaned from many fields and summered for busy readers

A fine community building is being erected at Lanesboro. The building when completed will be an improvement of which a much larger town might be proud.

A phonograph needle made of clay which in trial has played 100 records, has been invented by H. R. Straight, secretary and general manager of the Adel Brick and Tile Co.

Sheep men of Lee county have received their wool returns totalling $23,427.15. There were 112 men who shipped wool co-operatively last year thru the county association.

The decision of the state superintendent of banking in refusing a charter to the Citizens State Bank of West Union was overruled by the committee on retrenchment and reform.

The contract was signed for the erection of Ottumwa's new $250,000 Y. M. C. A. building. Construction will start at once and the building will be ready for occupancy Jan. 1, 1921.

The Iowa state board of parole reports that they granted paroles to thirty-eight inmates of Anamosa reformatory at their session just brought to an end. They also report that eight prisoners were granted parole at Fort Madison penitentiary. This session was one of the buisiest the board has experienced for several months past.

Many spraying circles have been organized in Tama county. Twelve of these have been organized with four or six orchards, or 150 to 250 trees each. These men have ordered a small spray machine and spray material and the Farm Bureau will supply competent help to do the work. In this way it is hoped that more communities may be served than though one large machine was used.

Annual report of Sartori Memorial hospital at Cedar Falls, shows a total of 439 patients in that institution during the year. Of that number 310 were surgical, 240 being adults and 70 children. Sixty-five medical cases were treated, 61 adults and four children. But 11 deaths occurred at the hospital during the year. Receipts were $18,633.51, disbursements $18,168.46, leaving a balance on hand of $465.05.

The Pottawattamie County Beekeepers Association was organized June 6, 1918. West Pottawattamie county is an ideal place for beekeeping, the Missouri River bottoms being overgrown with sweet clover and basswood trees. Although in the case of the basswood trees the bees only work with them once in every three years. There are now 16 active beekeepers' association scattered over Iowa, and West Pottawattamie county was one of the first to be organized.

Thirty-one head of pure breds were sold at a combination sale held in the sales pavilion at Ida Grove recently. The animals brought $5195. Eight head of pure bred French draft and Percheron mares and stallions sold for $1630, an average of $204 each. One buyer paid $300 for a French draft mare called Magirl, 6 years old, and $300 for Maiden, another animal of the same breed. Two other animals sold for $195 and $150. Ten Herefords sold for $2410, an average of $241 each.

Four demonstrations on poultry and orchard work were put on in Union county last month. The work was done in communities where the work was entirely new. Farmers and their families attended these meetings in large numbers. Since these meetings, according to County Agent, numerous calls have come to him for information on poultry and spraying material. In 1918 the agent assisted four farmers with their orchards. In 1919 10 were helped and in 1920 it is estimated that from 16 to 20 farmers will call on this office for help. Already 38 farmers have asked the agent to cull their poultry in June and July.

Cedar Heights, a town of 400 people, nestling in the woods at the lea of Cedar Falls, has inaugurated a feature of civic life which will make it famous throughout the State. The newly elected mayor, at a massmeeting at which all but twenty of the residents were present, selected and installed a mayor's cabinet of women numbering twenty-two of the prominent residents of the town. This probably is the first body of women to be instituted as an auxiliary in the United States. It gives to Cedar Height the distinction of inviting women to the deliberations of civic government in advance of actual election to positions on the council itself.

The O'Hara building in the heart of the business section of Cedar Rapids was completely destroyed by fire with an estimated loss of $75,000. Defective wiring is believed to have caused the blaze.

A thoroughbred Poland China boar bought about fifteen months ago for the comparatively insignificant sum of $265 was sold recently at a private sale to W. H. Ellsworth of Goldfield for the record price of $40,000, declared to be the highest price ever paid for a hog in the United States if not in the world.

Iowa News

Items of Interest Summarized for Busy Readers.

A wedding which is attracting attention throughout the State is that of Mary Ketelsen and Louis Peterman of Osage. The startling thing about it is the age of the couple, the bride being 16 and the groom 15. The wedding was the result of an elopment, the couple going to Waterloo to be married. The license record shows that Glenda Wilson was the witness. She swore that the parties were of legal age. The young people were married by Judge G. W. Wood of the municipal court.. Glenda Wilson and E. F. Feely were witnesses according to the marriage return. J. W. Thompson, deputy clerk of courts, who issued the license, said he observed nothing unusual in the groom's appearance as to boyishness.

Iowa spent for road and bridge building during 1919 a total of $16,154,078.45. While the year 1918 showed a decrease of $934,163.29 from the previous year, 1919 showed an increase over 1918 figures totalling $1,922,765.74. Roads, county and township, cost $9,299,356.22. Bridges and culverts cost $6,854,722.43. This is but $45,904 more than the bridge and culvert expenditure for 1918. It is $2,444,633,79 less than the concurrent expenditure for roads, county and township, in 1919. The total, $16,154,078.45 was the largest for road and bridges for a single year in the history of the state. Whether there was more work actually accomplished for the increased expenditure or not is a question. Prices were considerably higher on the average than the year previous so that it is also possible that even with the larger expenditure in 1919 there was less actual road and bridge construction than in the previous year.

The Kellerton farmers co-operative store is one of the best known successful institutions of its kind in the state and, while a young venture, is doing from $5,000 to $7,000 worth of business a month. Business is steadily improving and the prediction is that the store will be doing $100,000 worth of business before the close of 1920. The Kellerton store, owned by farmers, is operated along modern and progressive lines. There is no attempt made to undersell the local merchants of Kellerton, but a legitimate profit is charged and dividends at the end of the year. Where merchandise is taken direct from the car and delivered reductions are made. The farmers surrounding Kellerton have built up a successful co-operative store, but not without their difficulties. As one man expressed it: "Sticking to it has been a big factor in our success. There were times when we felt like throwing over the whole business, but we had a good bunch of directors and by sticking to them we have come out on top.

Iowa's republican delegates to the national convention were instructed by their convention to cast their votes at Chicago for Governor Lowden as a presidential candidate. Senator Cummins was the only speaker, Chairman Tobin declaring the convention had met for business. James Devitt of Oskaloosa placed in nomination the names of Mrs. Frank Dodson of Des Moines, Mrs. James Devitt of Oskaloosa, Charles E. Curtiss of Ames, E. A. Burgess of Sioux City, Charles Pickett of Waterloo, Charles A. Rawson of Des Moines, Col. Claude Stanley of Corning and H. O. Weaver of Wapello as delegates at large. They were elected without question or debate. The republicans of Iowa whole-heartedly indorse the candidacy of Gov. Frank O. Lowden, of Illinois, for president of the United States. This state knew him in his youth and has watched him in his maturity. It knows his worth, has pride in his achievements ,and believes in his sound judgment, patriotic purpose, republican conviction, and administrative capacity.

It costs more to keep a cow and more to produce a yearling calf in Iowa than in Kansas, Missouri or Negraska. The records cover three years. The best cows were found in Iowa and Missouri, where the average value for 11,197 head was $67, as compared with $65 in Nebraska and Illinois, $63 in Kansas, $61 in South Dakota, $57 in Minnesota, and $55 in Indiana. The best bulls were also found in Iowa, where the average value was $125. In Iowa the calf is charged with $12.08 for feed, $1.91 for labor, $1.08 for equipment, $1.25 for interest, and 45 cents for other charges, making a gross cost of $53.96 against which a credit of $1.97 for manure makes a net cost of $51.99 as against $42.37 in Kansas, $46.31 in Missouri and $41.59 in Nebraska. A great deal of this difference is accounted for by the charge of $12.08 in Iowa for feed, which cost only $9.12 in Missouri, $8.34 in Kansas and $6.25 in Nebraska. On this basis, 1506 beef cows on 48 farms in Iowa averaged per head for feed, $24.55; labor, $4.45; equipment, $2.88; interest, $4.24; other charges, $1.21, or a total of $36.22. Against this a credit of $5.90 for manure leaves the net cost $30.32, as against $24.45 in Kansas, $28.77 in Missouri, and $23.87 in Nebraska.

With a total of $131,946.31 paid, up to April 1, by owners of motor vehicles in Black Hawk county for permission to operate their cars during 1920 in Iowa the prospect is bright that the motor vehicle license may reach the $150,000 mark long before the year is out. In March, according to the county treasurer, motorcar owners paid over the counter $8,041 in license fees. That amount represented permission given in one month under the laws to operate 373 pleasure cars and trucks and 24 motorcycles.

No Harmony.

Patience—Do you have harmony in your church choir?

Patrice—Do we? Listen. Last Sunday the soprano wore a pink hat and a green waist, the alto appeared in a green waist and a yellow hat, and the tenor wore a green necktie and a very red nose!

The Place for It.

"Willie!"

"Yes, Pop."

"Can you carry a tune?"

"Certainly, I can carry a tune, Pop."

"Well, carry that one you're whistling out in the back yard and bury it."

Good Night Tip.

"Is that your father I hear coming downstairs?" asked the startled young man of the fair young thing by his side on the parlor sofa.

"No, George," replied the girl, looking inquiringly at the clock on the mantel; "you won't hear papa when he does come down."

Not Idle.

"I'm afraid you're an idle fellow, Sam."

"What's that, sah?"

"I'm afraid you like to idle away your time."

"Oh, no, sah, I doesn't, sah. Why I gits m' wife mo' work dan she can do, sah!"

Not True to Life.

Church—Have you seen the new play?

Gotham—Oh, yes.

"Isn't that scene of the subway car amusing?"

"What's amusing about it?"

"Why, didn't you notice everybody had a seat!"

Sufferings of Rich.

"The poor are often overworked; but they suffer less than many among the rich, who have no work to do, no interesting object to fill up life and to satisfy the infinite cravings of man for action."—William Ellery Channing.

A Bear's Diet.

A bear will eat anything from green grass to elk steak. Favorite foods are fish, berries, roots, insect larvae, honey, frogs and all kinds of fish.

Hermoline

A BETTER LUBRICANT

—FROM THE FORMULA OF A MOTOR COMPANY

The Reason for Hermoline Oils

Over 25,000 motor cars have been sold by the Herring Motor Company in the fourteen years of their business experience.

And from thousands of these car owners came constantly the question—"What is the best lubricant to use in this car?"

So the Herring Motor Company set about to find a lubricant that would be satisfactory in every sense of the word. To do this they established a laboratory, secured the services of men with many years of experience in the oil business, and conducted many experiments to discover an oil that would meet all the requirements of a motor under all conditions.

The practical experience in the thousands of their cars that were in use and this extensive laboratory work showed them that an ideal lubricant should be made from a paraffin base crude which is found in the Pennsylvania fields—and from this Pennsylvania crude according to their formula was manufactured HERMOLINE.

At first these oils were refined only for the use of the Herring Motor Company and their own customers but one car owner told another about its remarkable superior qualities and the demand rapidly increased until today we find HERMOLINE sold by the majority of garages in the cities of Iowa, Nebraska, South Dakota, Kansas, Missouri, Illinois and adjacent territory.

We handle a complete line of HERMOLINE oils and greases for car, truck and tractor. Give them a fair trial and prove for yourself as thousands of others have proved that HERMOLINE is really a better lubricant.

Put it to any test you like, HERMOLINE is the lubricant you should insist on.

E. G. ELL
Klemme, Ia.

The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane.

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.

The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove oil value.

Carrier Pigeons Still Used.

Even to day, when airplanes and wireless play a conspicuous role, carrier pigeons play their part as well. Fliers can be shot down, and wireless messages might be taken up by enemy operators. The pigeon, in many cases, is the safest carrier, for seldom the bird is shot down. As a rule four or five pigeons are sent off with the same message, to make sure that at least one will reach its destination.

Where Onion Gets Its Odor.

The strong flavor and odor of all the members of the onion family are due to the presence of allyl sulphid, an oillike organic compound of sulphur. The flavor-yielding material is very volatile and is broken down by heat to some extent. Consequently, the cooked vegetable has a milder flavor than the raw.

Flowers of Sanctity.

Long ago certain fragrant flowers bloomed. They were of eight kinds, and belonged to the species called "flowers of sanctity." Their names, as rendered from the Sanskrit were: Clemency, Self-Restraint, Affection, Patience, Resignation (repression of any mental perturbation), Devotion, Meditation, Veracity. It is thought that the correct modern botanical titles remain unassigned.—From a note-book.

Soap Used as Pills.

Soap has played a large part in medicine. Medicinal soap when pure is said to be made of caustic soda, and either olive or almond oil. It was much employed in the form of pills intended to have a gently aperient, anti-acid action.

How much should I give to make this a better world?

A CERTAIN man in New York filled out his income tax report.

It showed an income so large that his tax was 53%. *And his total gifts to church and charity for the year were $148.*

Think of it—thousands spent for luxuries and pleasure for himself; and $148 to leave the world a little better than he found it!

Most of us do better than that; but not so very much better.

Our average daily gift for all church causes is

—less than we spend for daily papers
—less than a local telephone call
—less than a third of the day's car fare
—less than 3 cents a day

No wonder that 80% of the ministers of America are paid less than $20 a week. No wonder that the church hospitals turn away thousands of sick people a year. No wonder that China has only one doctor for every 400,000 people. No wonder that every church board and charity society is forever meeting deficits, forever passing the hat.

It isn't because we are selfish; it isn't because we don't want to help. It's just because no one has ever put up a great big program to us, and asked us to think of the work of the church in a systematic businesslike way.

The Interchurch World Movement represents the united program of thirty denominations. They have surveyed their whole task, no business could have done it better.

They have budgeted their needs; no business could have a more scientific budget. They have united to prevent the possibility of waste and duplication. At least a million dollars will be saved by the fact that thirty individual campaigns are joined in one united effort.

And they come to the men or women who love America —to you— this week asking you to use them as the channel through which a certain definite part of your income can be be applied to make this a better world.

Only you can determine what part of your income that should be.

It's a good time right now to answer that question. We're passing through the world just once; how much better will the world be because *you* passed through?

United Financial Campaign

April 25th to May 2nd

The INTERCHURCH World Movement of North America

"VALU[illegible] CLOTHIERS"

FILIPINOS WANT AMERICA TO GIVE INDEPENDENCE

Maximo M. Kalaw Declares U. S. Cannot Consistently Refuse "Self-Determination."

By MAXIMO M. KALAW,
Secretary of the Philippine Mission, Author "The Case for the Filipinos," "Self-Government in the Philippines," etc.

"When they show sufficient capacity," "When they are able to govern themselves," "When they are educated enough." Thus run the answers of many Americans pressed with the question as to when the Filipinos should be granted their independence. Now, "ability," "capacity" and "sufficient education" —What do they mean in black and white?

Maximo M. Kalaw.

Senator Shogun may think no people is capable of self-government that does not establish the judicial recall, or that has no Billy Sunday. John Smith of Somerville may think no people is capable of self-government that does not vote his democratic ticket, or go to church on Sundays.

"Capacity for self-government" is as broad and elastic as the world, and if that should be the criterion for the granting of Philippine independence, America might as well say to the Filipinos, "I will give you independence when it pleases me to do so."

Fortunately, the American promise to the Philippines is not based on such obscure and abstract conditions. It is based on a definite seizable thing. When America, through her Congress, officially told the Filipino people that they would be granted their independence as soon as they could establish a stable government, no abstract or obscure condition was meant. Stable government, according to American usage, means a certain, definite thing.

The United States promised the Cubans the same thing, that "when they have established a stable government, then American troops would be withdrawn." As soon as the Cuban people elected a government suited to themselves, capable of maintaining order and fulfilling all international obligations, there was a stable government in Cuba, and American troops were withdrawn.

When Congress passed the Jones law, it simply borrowed the phrase "stable government" from the Cuban history and applied it to the Philippines. The history of Philippine legislation shows that in black and white. With full knowledge of what it meant, the Filipino people accepted the Jones law and immediately began setting up the stable government required by Congress as a pre-requisite to independence. The stable government is now a fact. It is indeed more than that; it is an undisputed fact.

The official representative of the United States in the Philippine Islands, the Governor General, reported to the American Congress and the administration that "the Filipino people have established the stable government demanded by Congress as a pre-requisite for the granting of independence—namely, a government elected by the suffrage of the people, which is supported by the people, which is capable of maintaining order and of fulfilling its international obligations."

The Philippine question is therefore no longer a question of politics, argument or supposition. To the Philippine mind, at least, it is now a question of whether the United States is ready to discharge its own obligations fully and completely. America went before the world in the recent war as the avowed champion of "self-determination" and Filipinos cannot see how America can consistently refuse to act.

The Filipino people, however, have no grudge or grievance against the American people. Theirs is a message of friendship and gratitude. They seek independence as the natural and logical outcome of America's policy in the islands and of America's solemn promise to them. They come willing to give privileges and concessions not incompatible with their national welfare.

The Filipino people are willing to accept independence under any of the following conditions: Under a League of Nations, guaranteeing its territorial integrity; under the protectorateship of the United States for the first few years; under a treaty of neutrality between the United States, England, Japan, France and other powers, or even without any condition whatever—absolute and complete independence. They have no fear of Japan. Philippine independence, in our opinion, is not inimical to Japanese interests. The Japanese are now free to come to the Philippines, but at the present time there are less than 10,000 Japanese in the islands. There are six times as many Japanese in California as there are in the entire Philippine Archipelago.

The Filipinos are willing to take their chance as a nation. Smaller nations beset by graver problems and dangers have taken a more hazardous chance at freedom, and have succeeded.

2ND MISSION COMES FROM PHILIPPINES

Body Headed by Senate President Quezon Reiterates Demand for Independence.

That the Filipino people are in earnest in their demand for immediate independence is indicated by the coming to the United States of a second Philippine mission to work for independence. Coincident with this announcement the War Department received a cable from Manila stating that the all-Filipino legislature had adopted resolutions reiterating its plea for immediate independence.

The second mission, like the first, is composed of the leading men of the islands and will work in the United States not only for immediate independence, but also to bring about "better understanding, greater confidence and closer economic relations between the United States and the Philippines."

The mission is again headed by Manuel L. Quezon, president of the Philippine Senate, who is well known in America, having been for six years resident commissioner to the United States. Mr. Quezon and the Hon. Sergio Osmena, Speaker of the Philippine House of Representatives and Vice President of the Council of State, are the leaders of the Nacionalista party, which has been in power since 1907.

Senate President Manuel L. Quezon.

While Speaker Osmena is not so well known in the United States as Quezon, he is considered one of the ablest men in the islands. Senate President Quezon recently referred to Osmena as "the greatest Filipino since Rizal."

The personal relations between Osmena and Quezon are probably without a parallel in modern politics. They have been the leading political figures in the islands for 12 years, yet there has never been the slightest indication of rivalry between them. Throughout their college life as well as their long political service each has refused to be a candidate for any position that the other aspired to.

During the years Quezon was the Philippine delegate in the American Congress he won the esteem and confidence of both the Republican and Democratic sides of the chamber. Whenever he spoke he was assured of a good attendance. One of the official short hand reporters once declared Quezon used the purest English of any member of the House.

Osmena, as president of the Nacionalista party, is the leader of the national movement for independence.

"Osmena is the premier 'de facto' of the Philippines," said a leading Filipino journalist, now in America. "A very conscientious and tireless worker, thorough and persistent, a genius for grasping the big features as well as the smallest details of public affairs, cool headed, quiet by temperament and education, a deep thinker, an eloquent speaker, a polished writer, a keen observer of men—such is Osmena."

Speaker Sergio Osmena.

Both Osmena and Quezon have been consistent advocates of Philippine independence, yet when the occasion demanded it they have never hesitated to champion the cause of America's good intentions toward the Filipino people.

Early Use of Lead.

In Job 19:24 is an allusion to the use of lead to fill carved inscriptions upon stone by pouring the molten lead into the cavities of the letters to render them legible and at the same time to preserve them from the action of the weather.

A Solace to Pride.

"You have made some powerful enemies." "That's all right," replied Senator Sorghum. "In so doing I have at least demonstrated that I couldn't be whipped by the little fellows."

FIRST METHODIST EPISCOPAL

NEW PERFECTION

Oil Cook Stoves and Ovens

Perfect Baking Too!

New Perfection Stoves give *speedy, steady, clean, intense heat for every cooking purpose.*

The Long Blue Chimney burns up all smoke, soot or disagreeable odor—drives clean, intense heat directly against the utensil. No fire to build—there's instant heat at the touch of a match.

Do *your* cooking and baking the New Perfection way.

Let us demonstrate the Long Blue Chimney burner.

Jacobs & Son

What's a "fair" price?

WHEN you buy anything, you ought to be willing to pay at least what it cost to produce it; plus a margin of profit to the maker, and to the merchant who has brought the merchandise to you; where you can see it; examine it, try it on, decide that it's what you want.

The ***Service*** rendered by the maker and the merchant are a part of what you pay for; you ought to pay for it willingly. If that service were not rendered there wouldn't be any merchandise here for you to buy.

Now, we aim to charge for our clothes merely *"fair"* prices, fair to both of us. We're going to make a fair profit, too. Our profit comes out of the money you pay us; yours comes out of the clothes you get.

Hart Schaffner & Marx Clothes give you the greatest profit; they cost enough to be good clothes; all wool fabrics; perfectly tailored, smartly styled. They're the best clothes for you; that's why we sell them.

"WHO SHOT HER?"

Synopsis.—Spalding Nelson is occupying the apartments of his great-uncle, Rufus Gaston. The Gastons, leaving on a trip, tell him about mysterious noises and "whispers" that have scared them. He becomes acquainted with Barbara Bradford, who lives in the same big building. He instinctively dislikes and distrusts the superintendent, Wick. The mysteries in his apartments begin with the disappearance of the Gaston pearls from the wall safe. He decides not to call in the police, but to do his own investigating. It is soon evident that someone has access to his rooms. Becoming friendly with Barbara, he learns that her apartments are equally mysterious. She tells him that several years before her sister Claire, who lives with her, had made a run-away marriage with an adventurer, from whom she was soon parted, and the marriage had been annulled. Claire is engaged to be married and someone has stolen documents concerning the affair from the Bradford apartment and is attempting to blackmail the Bradfords. Nelson takes Miss Kelly, the telephone girl, to dinner with the idea of pumping her. Gorman, a hotel detective, recognizes her as the wife of Lefty Moore, a noted burglar. Nelson tells his story to Gorman and puts the case in his hands. Nelson finds a secret passage with a panel door in his room. He realizes he loves Barbara. He and Barbara hear a shot in the building.

CHAPTER VII—Continued.

—10—

I sprang after her, but she moved so quickly that she was out of the window and safely home before I could stop her. Only waiting to see her off the ledge I turned back and hastily pulling the panel into place I dashed for the front of the house. The screams and the shots I was sure had come from the apartment directly below mine. I was certain that there had been murder done there, and my mind was made up to investigate it at once. If I moved quickly there might be an opportunity to catch the murderer red-handed. I let myself out and dashed down the one flight of stairs. As I arrived there, the ascending elevator stopped, and Mr. Wick burst out, followed by an excited elevator runner. Wick was carrying a revolver in his hand.

"Did you hear anything?" he asked excitedly.

"I heard a woman screaming in this apartment and then a shot."

"I heard it, too. In which apartment was it?"

"Right here," I said, pointing to the door.

"Miss Lutan's," he said. "Let's go in. Here's my pass-key. You open the door. I'll be right behind you with my revolver."

CHAPTER VIII.

Inserting the key Mr. Wick handed me, I turned it sharply and flung the door wide. It revealed a luxuriously furnished apartment, the front rooms of which were extravagantly ablaze with light.

For a moment the three of us, Mr. Wick, the elevator boy and myself, stood there with our ears alert for any sound from the apartment. While I do not admit to being a coward, the unknown has its terrors for all of us, and I must confess that the knowledge that Mr. Wick had his revolver drawn was indeed comforting. All was silence in the place.

"John," said Wick to the elevator boy, "you stand here right by the door

"She Has Been Murdered," I Cried; "Get the Police at Once."

and keep your eye on the elevator. If anybody tries to sneak past you, you holler for us."

"'Deed I will, Mr. Wick," said the boy, with chattering teeth. "I'll holler, all right."

"Go ahead, Mr. Nelson," said the superintendent. "I'm right behind you with the revolver."

Without waiting to explore the front rooms, I turned at once and ran down the long hall to the sitting room. If, as I suspected, murder had been done here, I was confident that the scene of the tragedy would be the room directly under mine. The screams I had heard—and the shot—had seemed to come from under my very feet.

Although the lights in the front of the hall were burning, the sitting room was in darkness. As I reached the door, my fingers sought the button, and as the flare of light illuminated the room I looked hastily about me. There was no one there, but my one quick glance showed me that the door of the wall safe, located similarly to the one in the apartment above, was standing wide open,

Quirkly I sprang to inspect the room corresponding to mine, a room, it will be recalled, opening off the sitting room. Here, too, was darkness, and as I turned on the lights, I stood aghast with horror.

On the floor, close up to the inner wall, lay the contorted body of a beautiful young woman. Her eyes were wide open and staring. One arm was twisted under her, and the other hand was clutching at the front of her bodice, where a blotch of ghastly red indicated the path of the shot that I had heard.

"It's Miss Lutan," said Mr. Wick's voice behind me.

"She's been murdered," I cried; "get the police at once."

As I bent over her to see if there was any evidence of life, I saw imprinted in her tender white throat the marks of her assailant's brutal fingers.

"Come," I said, "help me lift her on to this couch, and then telephone at once for a doctor."

Mr. Wick had been all the while standing there, staring at the body as if stupefied by the tragedy, but he obeyed my directions, and with him at her feet and I at her head we laid her down on the couch, where I proceeded to loosen her gown and to try by artificial respiration to restore her blood to circulation.

"Get the doctor at once," I commanded again, "and 'phone for the police."

"John," called out Mr. Wick, "go to the 'phone and tell Miss Kelly to send for Doctor Hunt to come at once."

"Tell her to get the police, too," I insisted.

"And let the burglar escape while we're doing it," objected Mr. Wick. "Come on, let's look through the apartment. He may be hiding somewhere still."

Together, while the boy was 'phoning, we went from room to room, peering into closets and under beds. There was no one there and no traces of the murderer's presence. Even the servants' quarters were untenanted. Only one thing happened that struck me as peculiar. As I started up the hall to search the bedrooms, I looked back and caught Mr. Wick furtively closing the wall safe. His action in surreptitiously closing this without saying anything to me made me suddenly suspicious of him. I recalled that Detective Gorman had put Mr. Wick into his circle of suspects along with the burglar's wife. Could it be possible that the superintendent of the building himself was in connivance with the band of criminals who had been harassing the Bradfords and me? I determined to watch his every move.

"There's no one here," I said, as we completed our round of the various rooms. "The murderer has made his escape. Hasn't that boy 'phoned for the police yet?"

Mr. Wick seemed so averse to carrying out my suggestion about the police that I think he must have sensed the suspicion in my voice.

"I think I had better ask Mr. Kent about it first," he said nervously.

"Who's Mr. Kent?" I demanded.

My thoughts were so taken up with the unexpected tragedy that the name at first meant nothing to me. Suddenly I remembered. It was to the apartment of Mr. Henry Kent that Miss Kelly had 'phoned last night when she was dining with me. I recalled, too, that Gorman had charged me to find out all I could about him.

"Who's Mr. Kent?" I repeated sharply. "What's he got to do with it?"

"He's the owner of the building," explained Mr. Wick. "He doesn't like the Granddeck to be mentioned in the papers. He says any notoriety is bad for its exclusiveness. I don't believe he'd want the police called in. In fact, sir, I'm sure he wouldn't."

"Whether he wants it or not," I said firmly, "it's got to be done. You can't keep murders out of the paper. Either you call the police right away or else I will."

My threat forced him to telephone against his will. I could quite understand his employer's aversion to having a crime in the Granddeck made public. But there was no help for it. There had been a dastardly crime committed, and the police must be informed. Yet it was not to the police that Mr. Wick was telephoning. It evidently was to Mr. Kent's apartment in the building.

"Miss Lutan's been shot by a burglar in her apartment," I heard him say. "Mr. Nelson and me just discovered her body. What's that, sir?"

Just what Mr. Kent's reply on hearing the shocking news had been I had, of course, no means of knowing, but whatever it was, over the superintendent's face came an expression of incredulity and amazement.

"What do you think," said Mr. Wick, turning to me; "he says for me to call up Headquarters at once."

"Of course," I said, "it is the only thing to do."

Nevertheless, as Mr. Wick waited for the number, he kept shaking his head and muttering under his breath something that sounded like:

"To think of his telling me to call in the police!"

With the doctor summoned and the police sent for, there seemed to be little else for us to do but wait, so Wick and I sat down together in the rear sitting room with the elevator boy still on guard at the door.

"Who was Miss Lutan?" I asked.

"Why, Daisy Lutan, the actress," said Mr. Wick in surprise. "I supposed every one knew her."

"I've heard about her," I hastened to say, "but I had no idea that she lived in the Granddeck. Did she live here alone?"

"She keeps a maid, an old woman that has been with her for years."

"Where's the maid tonight?"

"Out to the movies, I s'pose. That's where she goes every night when Miss Lutan isn't playing. When she is, she goes to the theater with her."

"Then Miss Lutan is not playing now?"

"Not for the last month."

"Had there been any one here with her tonight?'

"I'll ask the elevator boy."

"John says she came in alone about fifteen minutes ago," said Mr. Wick when he came back. "She went out

"Women of Her Type Always Have a Lot of Men Friends."

about seven. Her own chauffeur was driving her then, but when she came back she was in a hired taxi. That's something I can't understand."

"How do you suppose the murderer escaped?"

I was trying every avenue of questioning to see if I could not surprise Wick into some damaging admission. I was beginning to suspect that he knew far more about Miss Lutan's murderer than he was telling. I felt somehow that his whole search for the man who had killed Miss Lutan had been entirely perfunctory, a bluff to deceive me. In my growing dislike for the man, I felt that it would not be beyond the range of probability for Wick to have been standing guard at the door while a confederate rifled the apartment.

"I'm no detective," he answered noncommittally. "All I know is that he has gone. He certainly ain't here in the apartment."

It was on the tip of my tongue to suggest that we look in the secret passageway. I felt that the shock it would be to Wick to learn that I knew about this might lead him to open his lips. I felt certain that it was by way of a similar passageway to the one I had discovered in my room that the murderer had escaped. But before I could make up my mind to spcak the doctor arrived.

He made a hasty inspection and then said tersely:

"There's nothing here for me to do. This woman has been dead for some time."

"How long?" I asked.

"It is impossible for me to judge—maybe twenty minutes, perhaps an hour. I should say that death was practically instantaneous. She was killed by a bullet penetrating the heart. Who shot her?"

He looked sharply from me to Mr. Wick, as if suspecting that it might have been one of us.

"A burglar got her just a few minutes ago," Mr. Wick explained. "Mr. Nelson and me heard a scream and a shot. We let ourselves in here with my pass key and found her here. It must have been a burglar that she surprised when she entered the apartment."

"It looks like it," assented the physician. "There are marks on her throat where he tried to strangle her screams. Have you notified the police?"

"Yes," said Mr. Wick.

"There's nothing more that I can do then," said the doctor, making his preparations to depart.

"Would you not wait until the police come?" suggested the superintendent. "They'll be here any minute and probably they'll want a statement from you."

"Very well," said the doctor, "I'll wait."

As we waited the three of us chatted about the crime and about the dead actress. From the conversation I learned that at the height of her meteoric career on Broadway Daisy Lutan had become the wife of the young son of a very rich family. His parents insisted that she had trapped him into matrimony and after long legal wrangling she had been divorced about a year ago. She had received a large sum in settlement, and this with her earnings as an actress enabled her to live in luxury.

"Hadn't she a sweetheart now?" I asked.

"Better make it plural," sneered the doctor. "Women of her type always have a lot of men friends."

"No men ever came to see her here. I'm positive of that," said Mr. Wick.

"Of course not," said the roctor sarcastically. "The reputation of the Granddeck apartments must be protected at all costs."

As we talked two detectives in plain clothes arrived. They viewed the body and proceeded to question the doctor.

"How was this woman killed?"

"By a revolver shot right through the heart."

"Who is she?"

"Daisy Lutan, the actress."

"Who did it?"

"It must have been a burglar," interjected Mr. Wick. "My theory is that she came in unexpectedly and found him at work."

"Who found her?"

"These gentlemen," said the doctor, including both Mr. Wick and me with a wave of his hand.

The detectives turned to Mr. Wick first.

"Tell us about it," one of them directed.

"My name is James Wick," he began as if he was reciting a familiar lesson. "I am the superintendent of the Granddeck apartments. I was in the elevator about half an hour ago when I heard a woman screaming and then the sound of the shot. I took out my revolver and got off at this floor to investigate. At the door I found Mr. Nelson. He, too, had heard the screams and the shot and thought they came from this apartment. I took out my pass key and we went in."

"Were there any signs of the burglar?" asked the other man.

"No, we looked all through the apartment and found no one."

"Was anything missing?"

I waited with bated breath to hear if Wick would tell of having found the wall safe open. If he did not I felt it would be conclusive evidence that there was something he was trying to conceal.

"I didn't notice anything missing," he said glibly. "I wouldn't know, anyhow. I don't know what stuff she had here."

"Who would know?"

"Her maid might. She's out now. Generally she's home by eleven o'clock."

"Did she keep only the one servant?"

"Only the maid and a chauffeur."

"Then she was all alone in the apartment?"

"Yes. She'd gone out all dressed up about seven in her own car. She came home unexpectedly in a hired taxi not more than half an hour ago."

"Did she come home alone?"

"Sure she was alone. At least the hall boys told me so. I did not see her come in, myself."

More and more I was convinced that Wick was lying. I was sure he knew far more about affairs than he was admitting. Why did he keep harping on the fact that Miss Lutan had come in "unexpectedly?" What means had he of knowing what time she was expected home? Furthermore he said he was in the elevator when he heard the screams and the shot. I did not believe it would have been possible for the sounds to have carried that far. The walls were all deadened, and the room where the tragedy had taken place was at the back of the house many feet distant from the elevators. I wondered if the burglar had not been in the place with Mr. Wick's connivance, while he stood guard outside. As he heard me coming he might have taken refuge in the elevator. And why did he have his revolver so conveniently ready?

The detective who had been questioning Wick turned to me.

"Who are you?"

"Spalding Nelson."

"What do you do? Where do you work?"

"I'm a clerk."

"A clerk living at the Granddeck apartments," he sneered. "You must have a good job."

"I haven't any at present," I replied. "I'm living here in Mr. Gaston's apartment, taking care of it while he and his wife are away."

I could see that my statement that I was only a clerk and was not at present employed had not made a favorable impression on the detective.

"Will you explain what you were doing at the door of this apartment when the superintendent arrived?" he demanded with a growing suspicion in his tones.

"That's easy to explain," I retorted. "I was in my apartment directly over this one. I heard her scream and then the shot. It seemed to come from the floor right below me, so I ran down to investigate."

"Is that right?" he asked, turning to Mr. Wick.

The net about Nelson is drawn closer.

(TO BE CONTINUED.)

A New Style.

"Does that new author burn the midnight oil with his toil?"

"No, but he burns the roads with his 'gas.'"

SIX MONTHS I COULD NOT WORK

Lydia E. Pinkham's Vegetable Compound Made Me Strong and Able to Work—I Recommend It To All My Friends.

Bayonne, N. J.—"I had pains in back and legs so that I could not stand caused by female trouble. I felt so tired all the time, had bad headaches, and for six months I could not work. I was treated by a physician and took other remedies but got no relief. A friend told me about Lydia E. Pinkham's Vegetable Compound and it has helped me very much. I am well and strong and now able to do my work. I cannot thank you enough and I recommend your medicine to my friends who are sick."—Mrs. SUSIE SACATANSKY, 25 East 17th St., Bayonne, N. J.

It must be admitted by every fair-minded, intelligent person, that a medicine could not live and grow in popularity for over forty years, and today hold a record for such wonderful success as does Lydia E. Pinkham's Vegetable Compound, without possessing great virtue and actual worth. Such medicines must be looked upon and termed both standard and dependable by every thinking person

TOO LATE

Death only a matter of short time. Don't wait until pains and aches become incurable diseases. Avoid painful consequences by taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles—the National Remedy of Holland since 1696. Guaranteed. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation

PARKER'S HAIR BALSAM

Soap 25c, Ointment 25 and 50c, Talcum 25c.

Little Friends of the Liver

The liver is the regulator of health. If the liver is active and well, good health and happiness prevail; but once you allow your liver to get torpid and sluggish, life becomes a misery. Dyspepsia, Indigestion, Biliousness, Constipation, Headaches and Melancholy assail you, resulting in lack of energy, loss of memory and ill health; but remember Carter's Little Liver Pills touch the liver and correct all liver ills.

CARTER'S LITTLE LIVER PILLS

Small Pill—Small Dose—Small Price

DR. CARTER'S IRON PILLS, Nature's great nerve and blood tonic for Anemia, Rheumatism, Nervousness, Sleeplessness and Female Weakness.

Genuine must bear signature Brent Good

Woman Financial Expert.

Marie Prodhom, who has been appointed director of the Bank of Geneva, Switzerland, and will sign the notes and scrip issued by the bank, is only twenty-eight years of age. She proved herself an excellent financier during the war, and is the first woman in Europe to hold such an important position.

Why That Backache?

Why be miserable with a bad back? You can't be happy if every bad day brings lameness: sharp, shooting pains and a dull, nagging ache. Likely the cause is weak kidneys. You may have headaches and dizzy spells, too, with a weak, tired feeling. Don't delay. Try *Doan's Kidney Pills*. They have done wonders in thousands of such cases. *Ask your neighbor!*

An Iowa Case

Mrs. Mary Christensen, Sabula, Ia., says: "I had an attack of kidney trouble and lame back. A constant dull pain made me very nervous and I felt tired out. Doan's Kidney Pills were so highly spoken of that I decided to give them a trial. They soon removed the lameness and backache and I have had no return of the trouble since."

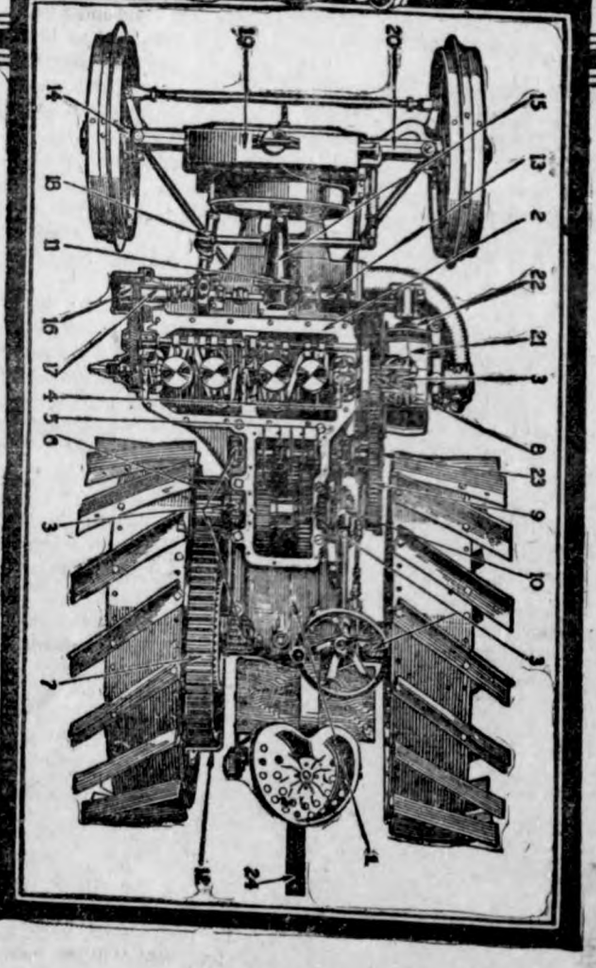
CASE
KEROSENE TRACTORS



Study These Features

1—One-Piece Main Frame.
2—Four Cylinder Case Motor, 4½x6, set crosswise.
3—Hyatt Roller Bearings at all important places.
4—Three Main Crank Bearings, total length 12½ inches.
5—Cut Steel Drop Forged Transmission Gears.
6—Bull Pinion — Steel Drop Forging, teeth cut and hardened.
7—Master Gear — Steel Forging, teeth cut and hardened.
8—Clutch Pinion — Steel Drop Forging, teeth cut and hardened.
9—Cut Steel Spur Gear for first reduction shaft.
10—Steering Gear — drop forged and machined worm and worm wheel — enclosed.
11—Fan Drive — cut steel, spiral gears, enclosed.
12—Housing for Master Gear, retains lubricant; keeps dust out.

Study These Features

13—Magneto — High Tension — dustproof type.
14—Dustproof Front Hubs.
15—Fan Shaft mounted on ball bearings.
16—Speed Governor — fly ball, throttling type, enclosed.
17—Ball and Roller Bearings for Shaft Driving Governor, Fan, Pump and Magneto.
18—Sylphon Thermostat — controls circulation of cooling water.
19—Radiator — copper tube and fin, non-clogging type; cast frame.
20—Steel Front Axle — automobile type.
21—Belt Pulley — mounted on crank shaft — the best place for it.
22—Brake for Clutch Pulley — convenient for quick stops.
23—Dustproof Housing for first reduction gears.
24—Adjustable Drawbar.

How to Judge Tractors Safely

We urge dealers and farmers alike to study the construction of Case Kerosene Tractors. And then make comparisons. This is the only way to get the utmost for one's money.

Above we picture and describe the chassis of the new Case 15-27. After studying the mechanical construction, then let this 15-27 demonstrate its performance. We will gladly send certified records.

This remarkable tractor has won rank as a leader. Before we announced it publicly, it was known to thousands who had seen it at demonstrations. Hundreds of dealers have ordered demonstrators. Any Case dealer or prospective dealer will be furnished with all information promptly upon request.

Iowa News

Items of Interest Summarized for Busy Readers.

Ames.—By producing 87,914,633 pounds of butter, valued at $42,969,285, Iowa in 1919 moved into second place as a butter-producting state, according to figures by the United States department of agriculture. For Iowa this is an increase of more than 3,000,000 pounds over the production of 1918, when 84,888,404 pounds were marketed. Iowa has at present 1,370,000 dairy cows producing on the average of 150 pounds of butterfat per year. It is estimated that each person consumes three gallons of 20 per cent cream worth 30 cents per gallon. Milk is consumed at the rate of 1.1 pints per person. This consumption is increasing at present, due to the campaign being waged in the state for the greater use of milk for children. If Iowa's cows produced 200 pounds of butterfat annually they would require no more outlay for housing and labor and little more for feed than now. The cow-testing associations are making the fight for better cows and greater production per capita.

Boone.—Great plans are under way for the benefit of the boys and girls of Boone county this year. At a recent meeting twelve live stock breeders met with County Agent Beeler to talk over plans, it was decided to back several definite club projects. Corn clubs, colt clubs, pig clubs and heifer clubs will be organized and started at different seasons and the membership will be limited. The calf club will be started at once and a committee is now looking for the heifers. Shorthorn, Angus and Hereford calves will be bought, with this club limited to 12 or 15. Last year 34 chose the Shorthorn breed alone.

Tama.—Forty-five head of Shorthorns from the N. J. Smith herd, one mile south of Tama, were sold at auction for a total of $24,500, or an average of $500 a head. The sale was well attended and buyers were present from all parts of Iowa and from adjoining states. This was the last of the four sales conducted in the past month by the members of the Central Iowa Shorthorn Breeders, previous sales having been held at Cedar Falls, Newton and Marshalltown.

Des Moines.—Economy and thrift have invaded the rank and file of the Mason City, Red Oak, Cresco and Arlington high schools. The Girls' Literary society of these schools have voted that all members shall wear house aprons to school instead of the more expensive dresses and suits which they have been using for their school clothes. A signed contract from all the boys in these schools that overalls will be their outstanding dress until school terminates in June was secured.

Grinnell.—The figures of the census just taken show the population to be 5,362, a gain of but 326 over the census figures of 1910, or but 6½ per cent. It seems incredible to many that the gain should have been so slight, and there is the usual tendency to dispute the count. This does not include the non-resident college students, who make the actual population of this city greater by several hundred through the college year.

Mason City.—Ten thousand acres of Iowa land will be planted to sugar beets this spring. The factories at Mason City, Belmond and Waverly will be running full capacity this fall. The Mason City factory did a very profitable business the past year and will employ many workmen the coming year. Russian labor is employed principally, the workmen being secured by the companies, but the growers are expected to pay them.

Coon Rapids.—Live stock has been moving out of the Iowa feed lots at a rapid rate until recently. The movement has been unusually heavy owing to the necessity of cashing in stock on farms that changed hands March 1, the recent muddy condition of feed lots and the fact that there is no incentive to finish cattle on expensive corn with beef prices as low as they have been lately.

Marshalltown.—During the year ending March 31 the fire department answered 155 alarms. The total loss from fires during the year was $96,833.96, with loss on buildings $32,756.72, and loss to contents, $64,077.24. Covering this loss insurance was carried on buildings and contents amounting to $864,150. Of this amount $433,850 was on buildings and $434,300 on contents.

Des Moines.—Gift of a $10,000 farm for educational purposes to the United Brethren church by Adam Shambaugh of Madison county featured the opening of the Interchurch World Movement financial campaign for $7,000,000 in Iowa. Reports were slow in coming to the state financial director's office, but it is estimated that at least $2,000,000 of the quota was raised the first day.

Des Moines.—Two men dressed in soldiers' uniform shot Mr. and Mrs. C. W. Rosner of Des Moines, dragged them from their automobile and drove the machine away. Rosner and his wife were not wounded seriously. They had "picked up" the two men, believing them soldiers, and driven about three miles when the shooting occurred.

Ames.—Rural ministers and laymen of 30 denominations are to study sociology at the Iowa State college during the three weeks beginning June 14. Classes will also be held in rural education and agricultural extension problems. Delegates are expected from Iowa, Illinois, Wisconsin, Minnesota, Kansas, Nebraska, and Missouri.

Des Moines.—Iowa has an extraordinary system of farm bureau work. In organization it is pretty nearly 100 per cent perfect, while in efficiency it is really several notches above par.

Memorial Day To Be Observed Here

Program Is Being Arranged And Committees Appointed

MAY 30th COMES ON SUNDAY THIS YEAR

At a meeting of the business men of Klemme at the First National Bank roms on Monday night it was decided that Memorial Day should be observed in Klemme this year as usual. As Memorial Day comes on Sunday this year it was also decided that that is to be the date on which to commemorate the event, as Decoration Day should be observed in a quiet and respectful manner, and Sunday is a very appropriate day for the celebration.

The motion was duly made, seconded and carried that Mayor Frank Gruetzmacher be appointed as chief executive and head of all committees to be appointed and that he should have full power in directing the program for the day.

Rev. Meyer, Rev. Depping, and Rev. Buriff were appointed on the committee for program and parade and to make arrangements for a speaker.

C. G. Wateman and R. A. Jorgenson were appointed on the committee to look after musical entertainment as band music and singing at the Park.

F. A. Arnold, M. O. Hocum and J. N. Day were appointed by the Mayor as a finance committee to take care of the expenses of the day, should funds be needed for a speaker and other minor details.

All of the committees were not appointed at the meeting but Mr. Gruetzmacher will appoint committees as he sees fit to make arrangements for the school children, who will march in a body from the Park bearing flowers for the soldiers' graves.

The time for the program was not fully decided at the meeting but it will undoubtedly take place in the morning as is the usual custom here. The services will be held in the park and ample seats will be procured to take care of the large crowd expected. As the day comes on Sunday a program in keeping with the day will be followed out. It is also hoped that a good speaker can be procured for the address of the day and his name will be announced a little later.

The Times "Devil" Says

OUR SCHOOLS A CURE FOR SOCIALISM

From the Des Moines, (Ia.) Capital

The outside world is being told that the city of Davenport has elected a Socialist administration and it is intimated that socialism is liable to spread further into the state of Iowa.

There is a great deal of socialism in the three cities—Davenport, Rock Island and Moline. It is related that a majority of the men employed in the Rock Island Arsenal, drawing big wages from the government, are socialists. Their style of socialism is imported from abroad.

But it must be remembered that local issues control local elections. At Davenport the socialists took up certain popular local issues and their ticket was carried on those issues It is reliably stated that there are not so many socialists in Davenport now as there were before the war.

Readers of newspapers will remember that there was considerable disloyalty at Davenport at the beginning of the war. This disloyalty subsided greatly after the trial of three or four prominent citizens, who were arrested fo talking sedition, and after the conviction of a man of the name of Wallace, who was sent to the prison at Leavenworth, where he died. From that date forward a large number of men who were inclined toward disloyalty either reformed or kept their mouths shut.

A great many foreigners have found our form of government so free that they have been anxious to convert it into a mob and have no law whatever. Socialism, of course, is a dangerous proposition in a republic.

The public schools of America, if given a fair chance with the children of these foreign socialistic families, will convert them from socialism to believeing in a constitutional form of government represented by the republic established by Washington and our Revolutioary fathers.

BELMOND WILL CELEBRATE 4th

That Belmond is to have about the biggest and most attractive and patriotic observance of Independence Day that has ever been known around here is very evident. The committee appointed by President Berg of the Chamber of Commerce to have charge of the celebration met on Monday evening and organized and got ready for action by appointing a number of sub committees, whose names it is announced will be given to the public at a later time. The finance committee immediately got into action and was interviewing Belmond business places and men as to the funds necessary to a rousing good celebration. They have met with splendid response and plans will go forward from this time with increasing surety and rapidity. It is planned to make it a great day for everybody. It is planned to make a celebration that will furnish enjoyment to all ages. Belmond is to be the host and hopes to receive and entertain a great crowd of friendly visitors on that day.—Herald-Press.

EVENING SERVICE HELD IN LIBERTY

Services were held in the Liberty township church last Sunday evening, Rev. Meyer preaching the sermon. This is the first time they have held evening service for some time. The church has it's own electric light plant to light the building and this was also the first time they have had the opportunity to use their new lights. Services will be held here every two weeks and in town every two weeks, alternating, and this arrangemet will be observed during the summer months. The next evening service in Liberty Church will be May 16th.

The school in District No. 1, of Twin Lakes township has closed for the summer vacation. Friday a big program was given by the pupils under the management of their teacher, Miss Lettie Mason. A big picnic dinner was the feature of the day and a big crowd was there to enjoy the fun. Games of all kinds were also played and all report a most excellent time. So well do the people of the township like their teacher that they circuated a petition to request the directors to ask her return next year. This they did with an increase of salary and doubtless Miss Mason will teach the school again next year.

Ben Lilljenberg, of Amery, Wisconsin, has been here the past week or more visiting with his sisters, Blanche Lilljenberg and Mrs. Frank Kluckhohn and other relatives and friends. Blache returned to Amery with him Monday for a few days' visit with her folks. She expects to return to Klemme Saturday.

CHRIS GRAM RETURNS FROM FORD FACTORY

Chris Gram returned Monday from the Ford factory at Detriot, where he went to take a course in repairing, electric lighting and generator work. The course consisted first in assembling and when Chris first started they put him two hours at just inserting bolts, then on a little further for two hours at another job until he finally got clear thru the factory at every operation in putting a Ford together. This part of the course occupied fifteen days, eight hours a day. The other part of the course was mainly electrical work, lighting and generator work a twhich he worked eight hours a day besides attending a school of instruction three hours a day at which lectures and chalk talks were given by experts. He was at the factory about four weeks.

KLEMME HIGH SCHOOL BALL TEAM TO MEET MESERVEY

The Klemme High School have a ball team and they intend to play their opening game with Meservey here this Friday. The Klemme boys have made a ball diamond out in Morningside Addition and have done some good practicing and have a fine line up for the season. Let's go out to the game and watch the boys wallop Meservey.

Later—Game postponed to Fri. 14th.

MOTHERS' DAY, MAY 9

Sunday, May 9th, is Mothers' Day all over the United States, as that is the day which has been set aside to honor mothers, whether living or dead. In honor of mother it is appropriate to wear a red rose if she is living, and if she is dead, honor her memory by wearing a white one.

BELMOND HAS BAND THIS YEAR

Belmond has organized a band of twenty pieces composed of experienced players who will give a concert at Belmond every Saturday night. Mr. A. A. Keiser, a local musician is at the head of the band as leader. They will also rehearse every Tuesday and Friday night and will give twenty concerts during the summer.

J. G. Thorne was here from Clinton last week Tuesday evening looking over the grounds for sewerage and to confer with the mayor and council regarding the same. He was also at Garner loking over their improvements.

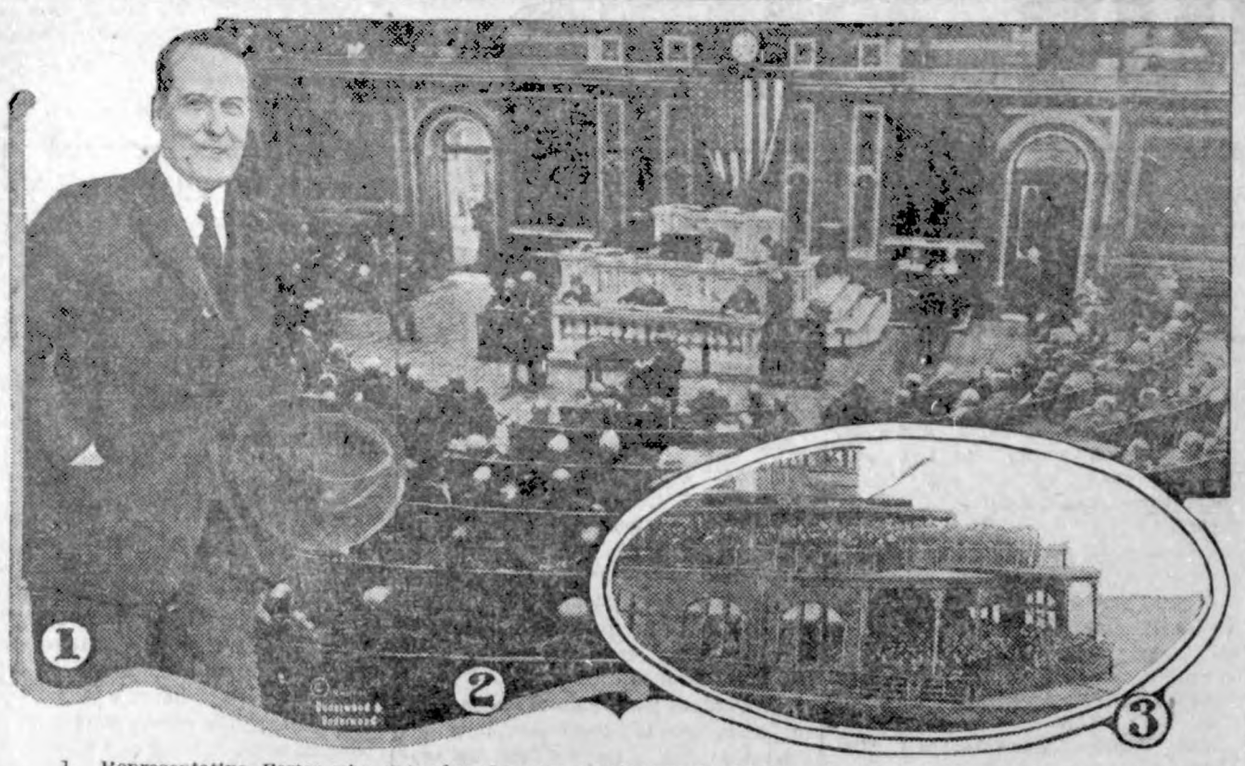
Cal Kraus and family were here a few days the past week visiting, but went to Garner Monday from which place they will go to Wisconsin where Mr. Kraus has a farm. Formerly the Kraus family were runing a hotel at Allison, Iowa, but he traded it for the farm to which they are now moving.

Last week the following places were piped to the mains for city water: The Times Print Shop, Drs. Reuber & Zinn office, Geo. Kessler residence, Asa Gibbs residence and Henry Freie residence. The different places were all tapped at the mains the same day and the water was only shut off a few hours.

Sylvan Johnson was in town a couple of days the past week navigating with a crutch. His leg is getting along well after a long siege of blood poisoning.

Mr. and Mrs. Clarence Larsen and children left Saturday morning for Garden City, Minn., and Good Thunder, Minn., where they will visit with relatives ad friends for nearly two weeks. On their return trip they will stop off at Buffalo Center for a few days. They expect to be gone for about two weeks. This is a vacation for Mr. and Mrs. Larsen and is also the first since they were married. This has been a busy season and they decided that two weeks' vacation would be just about the best thing going and they no doubt will have a good time.

Dr. Scott B. Hall of the Northwestern University, Chicago, was in Klemme last Friday giving a lecture under the auspices of the Red Cross. He came from Garner to here where he also lectured at the school and then went from here to Britt. Dr. Hall lectured to the boys for 45 minutes and then to the high school girls for the same length of time. After lecturing to the students he gave a lecure to the mothers. His lecures were along the lines of morals and the proper physical training for boys and girls.



1. Representative Porter who introduced peace resolution in house. 2. Champ Clark debating peace resolution in house. 3. Strike inconveniences New York commuters.

NEWS REVIEW OF CURRENT EVENTS

Attorney General Sees Red Plot in Rail Strike and Orders Arrest of Many Radicals.

LABOR TROUBLES IN KANSAS

Prospect of Anarchy in Ireland Brings Factions Into Closer Union—Strong Military Measures in Turkey —Sonora Secedes From Mexico—German Coalition Government on Trial.

By E. F. CLIPSON.

As foreshadowed by the general appearance of the railway strike from its beginning and pointed out in the previous issue of this review, the Ethiopian concealed in the woodpile has been the American I. W. W., fostered, supported and directed by the Moscow Third Internationale. If this is not true then the United States department of justice with its secret service, its mass of data and all its splendid facilities for gathering information and evidence, has gone woefully astray.

The Third Internationale is the branch of the communistic government of Russia devoted to international propaganda and organization and pledged to the cause of overthrowing the existing order in America and throughout the world. Its principal aim is to promote revolutionary class struggle and establish wherever possible a dictatorship of the proletariat such as exists in Russia. One of its objects, entering into the dreams of all radicals, is the organization of all workmen, everywhere, into one big union. With such an organization and such a powerful weapon, an oligarchy of labor would be possible. The I. W. W. is committed to these views, hence its fight to disrupt the American Federation of Labor which stands for collective bargaining and the preservation of contractual rights between employers and employees. Observers everywhere have been pointing to the traceable effects of communistic propaganda in the disturbed conditions all over Europe and the strikes and rumblings in America. Wherever the doctrines have gained ascendency, as in Russia, Hungary, portions of the Balkans and recently in a part of Germany, terrible conditions and in some cases actual chaos have resulted.

Attorney General Palmer reports that evidence in his hands proves that William Z. Foster, leader of the late steel strike, and other prominent radicals, have been the concealed brains back of the rail strike. The government's announcement was followed by prompt action in issuing federal warrants for a number of the active leaders of the strike. The warrants charged violation of section 2 of the war-time Lever law.

Before the issuance of the warrants and the determination to take drastic action had been announced, the government's disclosures had begun to have an effect on the strike and its early collapse, or at least gradual death was anticipated. Even before the disclosures from Washington an improvement in the situation was manifest in the West, although acute in New York and some other portions of the East. In Chicago where the strike started and in other parts of the West, railroad men who had been enticed by the "outlaw" movement, began to see signs of a trap and to turn again to the counsels of their old leaders. This was having a gradual effect in the restoration of traffic and normal conditions.

The new railway labor board authorized by the Cummins-Esch law and appointed by the president, will now have the arduous duty of reviewing the whole railway labor question, relative to wages, hours of employment, working conditions, etc. Out of the great volume of testimony to which it will listen and all the data compiled, it is called upon to find a solution which will be equitable to the men, the employers and the public and prevent a recurrence of strife for the near future at least. Some job, nez pas?

The eyes of the entire country and probably some foreign eyes as well, are turned upon the state of Kansas in its efforts to settle labor troubles through a state law and an industrial relations court. Alexander M. Howat, president of the Kansas Mine Workers' union and several other officials, were jailed for refusal to testify before the court. Some railroad men in the state have also been arrested for violating the law by participating in the switchmen's strike. Injunctions are being freely used by the state officials and the chief point of interest is, as to whether the law will stand and be an effective means of settling labor disputes, or will fall under the assaults to be made on it in the higher courts.

Governor Lowden, as was expected, carried the presidential preference primary in Illinois, although his plurality of more than 80,000 over Leonard Wood was somewhat startling. Lowden stock received a boom and so did that of Hiram Johnson whose admirers in the city of Chicago to the number of over 40,000 and upwards of 10,000 down the state, wrote or pasted his name on the ballot. Few of the preferential primaries bind delegates to instructions for the national conventions, although they do express to a considerable extent the wishes of voters. The fight is still an open one with General Pershing edging his hat tentatively into the Republican ring. He has stated that he is not a candidate for the presidency, but, that no man should refuse the high office if called to it by the people. No accurate forecasting of the real convention strength of any candidate is yet possible.

Affairs in Ireland take on a less turbulent aspect. The prospect of anarchy is reported as bringing the factions closer to an agreement. The number of extremists is reported as diminishing and moderates in all parties are said to be frightened at the outbreak of all kinds of crime under the guise of political action. A common meeting ground is being sought, but that it will not be found in the present home rule bill is apparent. Ireland will never indorse the bill with any unanimity. The British government averted a serious crisis by releasing the 70 Irish prisoners who were on a hunger strike after four had collapsed and others were in the last stages of exhaustion. A general strike impended unless the government granted the releases.

Internal problems in China having an important bearing on the future of that country, are in process of harmonization through a financial consortium of the powers. The scheme provides for control, through the banking groups of the different allies, of loans for railroads and the development of public utilities in China. Allied propaganda has been furthering the project for more than a year, but until recently the jealousy existing among the Shanghai Chinese and those of South China against the Peking government, has stood in the way of an agreement. The anti-Peking leaders appear to be satisfied so long as America, England and France direct operations under the loans and Peking officials have nothing to do with the actual expenditures. The remaining problem is to induce Japan to join the consortium on equal terms with the other three nations, thus easing the Japanese yoke on China. With the other powers presenting such a strong front, it is believed Japan will join.

Pending the final disposition of Turkish affairs through the medium of the peace treaty which is expected to be ready for submission to the Turks early in May, England, France and even the sultan's government are preparing for strong military measures against Mustapha Kemal and his nationalist forces. French re-enforcements are reported to have dampened the ardor of the nationalists in Syria and Cilicia. The British have fortified Ismid. The French are marching through Cilicia to the relief of Americans at Aintab and Urfa. A movement is under way to place 150,000 Turks, loyal to the sultan, at the disposition of the British forces and under command of British officers. The French have re-established railroad communication between Adana and Aleppo. Probably 2,000 refugees will be removed from Adana to Cypress.

A disturbed condition exists from the western borders of Turkey straight east for 2,500 miles to the western border of China. In the Caucasus bolshevism is strong. A disquieting situation has arisen at Batoum where the Georgians who have been opposing allied occupation, threaten to join the bolsheviki and take over the whole region. Armenian mobilization has been ordered in preparation for a possible campaign against the Tartars and Azerbaijanese over disputed territory. Warlike Kurds, relieved of Russian restraint, come down from the north and attack and pillage Armenian settlements frequently.

The council of the League of Nations is seeking a guardian for Armenia. That it may be somewhat difficult to find is evidenced by the report of the American military mission to Armenia headed by Gen. G. G. Harboard. The report recently made public states that any country accepting the Armenian mandate will require an army of 59,000 men, a good-sized fleet of naval vessels and an outlay of $757,000,000 during the next five years. The mission demonstrated its complete neutrality by enumerating 13 reasons for accepting the mandate and 13 reasons against acceptance, rather implying in the significance of the numerals, that it is unlucky if we do and unlucky if we don't. Of special bearing on the case of Armenia and other minority peoples who have been under Turkish rule is the declaration of the council of the League of Nations that it will guarantee clauses in the Turkish peace treaty providing for the protection of all non-Moslem minorities.

Ten years of fighting seem not to have diminished the Mexican gluttony for strife. With rebellions on every hand and the Carranza regime holding power only because it seemed to be the most strongly organized body, while no two of the others could combine effectively against it, a new element now enters the situation in the form of secession. Sonora, the northwestern border state with an area of approximately 77,000 square miles and rich in gold, silver, lead, copper and other resources, but having less than 300,000 people, has announced its withdrawal from the so-called republic. By proclamation the republic of Sonora is established, said proclamation being issued by Gen. P. Elias Calles, commander in chief of the military forces. The federals are reported organizing for suppression of the rebels. Other Mexican states may join the movement but whether or not they do, is not likely to change affairs much or either increase or diminish disturbed conditions in the country. A new alignment of factions may occur, but the whole incident takes on the character of a diverting high light in a strenuous presidential campaign being waged in the country.

Germany's coalition government is still on trial with a shifting of elements and sentiments due to the recent troubles. Labor is dissatisfied over the treatment of workmen in the Ruhr difficulties. Moderate socialists, irked by the hard economic conditions, are reported joining the independent socialists and communists. Both reactionaries and extremists are dissatisfied that they have no representation in the government and are accordingly making all the trouble they can. All factions condemn the government on account of the French occupation of Frankfort and other German cities. The hardest problem of the government is the attitude of labor which is endeavoring to rule the cabinet. The principal element of strength in the coalition is in the fact that it is so beset on all sides that it must remain united to prevent a fall and chaos again. France and Great Britain have smoothed out their disagreement over the French occupation. France will withdraw her forces from Germany as soon as the Germans withdraw from the Ruhr, and promises there will be no further independent action on her part.

COAL DUST LODGED IN MINER'S LUNGS

Tells how his cough was conquered and health restored.

"In November, 1916, I was working in a coal mine and the doctors said the coal dust had settled in my lungs. I couldn't lie down on my right side, coughed so I couldn't sleep and had constant pain in my right lung and under my shoulder blades. I coughed so hard the blood would spurt out of my nose. Finally the doctors had me change climate and live outdoors, but didn't improve.

"Then I came home and started on Milks Emulsion. Thank God I did, as it did me a lot of good right from the start, loosening up the coal dust in my right lung. In a few weeks my lungs were free. I could sleep like a baby, had an excellent appetite and my cough left me entirely. I gained back 30 pounds in weight and went back to work in the mines completely restored to health."—G. H. Bunn, 6th Ave. & No. 13th St., Terre Haute, Ind.

Thousands of victims of dust-filled air develop the same trouble that Mr Bunn had. Milks Emulsion costs nothing to try, so why not at least try it?

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. It helps build flesh and strength, and is a powerful aid in resisting and repairing the effects of wasting diseases.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

No matter how severe your case you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and $1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

His Interpretation.

Mortland Jones, the five-year-old son of Rev. Rhys Price Jones, pastor of the First Presbyterian church in Franklin, refused to sing "America" with the rest of the members of the primary class in Sunday school. When questioned he gave as his reason the line of the song, "Land where my fathers died." "My father didn't die," he said, "and I won't sing it."—Indianapolis News.

DRUGS EXCITE YOUR KIDNEYS, USE SALTS

If Your Back Hurts or Bladder Bothers, Drink Lots of Water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.—Adv.

Synonymous.

It was Springer's afternoon off and he thought he would take the children for a little outing.

"My dear," he said, approaching his wife, "suppose we take the children to the zoo today?"

"Why, Will, you promised to take them to mother's."

"All right, if it's all the same to the children."

State of Ohio, City of Toledo, Lucas County—ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

(Seal) A. W. Gleason, Notary Public.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System.

Ouch!

"You seem to hate that fellow Smith," said Brown. "What is the trouble between you and him?"

"I introduced him to my wife the other day," replied Jones, "and the gabby boob had to say: 'Why, I thought that the lady you were with in New York was your wife.'"—Cincinnati Enquirer.

Cuticura Soothes Itching Scalp

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your every-day toilet preparations and have a clear skin and soft, white hands.—Adv.

No regret is vain that inspires us to do better

Home Town Helps

ADVANTAGES OF SMALL TOWN

For One Thing, the Helping Hand Is Never Withheld From Man Who Is Worthy.

"A man coming back to a small town to make his pile will find every advantage," says William D. Pelley in People's Magazine. "The friendly attitude of the country banker, the well wishes and interest of his neighbors, the good will of a public which only asks that he render a service in order to get quick recognition. Time and again, as editor of a small town daily paper, I have been overwhelmed by watching some newcomer in the community open a store or build a factory or start in a profession, and noting how quick was the response on the part of my townspeople. They are very human folk, these townspeople. They are quick to discover if a man has ulterior motives, whether he is feathering his own nest first and looking after the public interest last. And that is the reason many a man returns to the city knocking the country town. He has tried to put something over and failed. He has found his clientele not at all the hicks and rubes he judged them. And having turned the tables on him, he abuses them roundly."

NEW STREET-LIGHTING PLAN

Kansas City Authorities Believe They Have an Improvement on the Cluster Effect.

Something new in the way of street lights is planned for Baltimore avenue by property owners between Twelfth street and Southwest boulevard, says the Kansas City Star. When the street has been widened and paved the owners propose to break away from the "cluster" effect that has been sought on other streets where "bright ways" have been established. And, incidentally, they plan to have the "lightest street" in the city.

The accompanying illustration shows the style of light and standard the property owners have adopted. It is the same style used along Michigan avenue in Chicago—a single pear-

shaped opaque globe on a graceful reenforced concrete standard. There will be 36 such lights on widened Baltimore avenue and the council already has passed an ordinance authorizing them.

The light will be "staggered" at approximately 100-foot intervals. Tests show that with the internal reflectors the single light will give greater efficiency than the old-fiashioned clusters.

Think It Over.

Think it over yourself, today, as you plan for the coming months. In private or public affairs, in business or social or family matters, seek out what points of friction there may be and drop upon them the soothing oil of common sense. Remember that the community is only a collection of interdependent units and that a single selfish act of yours may derange an incalculable number of your fellowbeings and thereby propel the whole a shade nearer to that condition of chaos that every reasoning person must regard with horror. Avoid all senseless and suicidal strife, no matter of what character, and learn to co-operate.—Bermuda Colonist.

Roadways.

For good residential property there should be provided a roadway having a hard, compact surface—20 to 25 feet in width, on a substantial foundation, and concrete sidewalks, four feet in width, the remaining portion of the right of way being treated in a less expensive manner. Drains will be required to carry off the surface water from the right of way and the lots fronting on it.

Would Plant Fruit Trees.

When the trees are planted in the city parks to replace some which have been removed, and other park improvements started, an eastern journal would have the common council plant various fruit trees.

Suffered for Years

Miserable From Kidney Trouble Doan's Made Mr. Barnett Strong and Well.

"I suffered untold agony with my kidneys for years," says John Barnett, 30 Virginia Place, Buffalo, N. Y. "Sometimes I felt that I would burn up with fever, but every now and then would have a severe chill. Often my clothes were wringing wet with perspiration. The kidney secretions were unnatural in color and odor and burned terribly. At night my shoes were so tight on my feet that I could hardly get them off and my hands swelled so I couldn't hold a teacup. My back! Oh, how it ached! I walked with two canes and was all bent over like an aged man. When the terrible pains shot through my kidneys my knees would give way, and many times I had to be lifted to my feet by people on the street. I didn't care whether I lived or died I was so miserable. I finally used *Doan's Kidney Pills* and they cured me of all kidney trouble. *Doan's* made me strong and well."

Mr. Barnett

Acid Stomach Makes the Body Sour

Nine Out of Ten People Suffer From It

It sends its harmful acids and gases all over the body, instead of health and strength. Day and night this ceaseless damage goes on. No matter how strong, its victim cannot long withstand the health-destroying effects of an acid stomach.

Good news for millions of sufferers. Chemists have found a sure remedy—one that takes the acid up and carries it out of the body; of course, when the cause is removed, the sufferer gets well.

Bloating, indigestion, sour, acid, gassy stomach miseries all removed. This is proven by over half a million ailing folks who have taken EATONIC with wonderful benefits. It can be obtained from any druggist, who will cheerfully refund its trifling cost if not entirely satisfactory. Everyone should enjoy its benefits. Frequently the first tablet gives relief.

VICTIMS RESCUED

Kidney, liver, bladder and uric acid troubles are most dangerous because of their insidious attacks. Heed the first warning they give that they need attention by taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for these disorders, will often ward off these diseases and strengthen the body against further attacks. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation

ALLEN'S FOOT-EASE

Gives ease and comfort to feet that are tender and sore.

If shoes pinch or corns and bunions ache this Antiseptic, Healing Powder will give quick relief.

Shake it in your Shoes. Sprinkle it in the Foot-bath. Sold everywhere.

The Army of Constipation

Is Growing Smaller Every Day

CARTER'S LITTLE LIVER PILLS are responsible. Not only relieve constipation, but correct biliousness, sick headache, indigestion, sallow skin—they never fail—renewal of regular habits follow. Purely vegetable.

WRIGLEY'S

The children love Wrigley's—and it's good for them.

Made under conditions of absolute cleanliness and brought to them in Wrigley's sealed sanitary package.

Satisfies the craving for sweets, aids digestion, sweetens breath, allays thirst and helps keep teeth clean.

Costs little, benefits much.

The Shady Sort.

"If you hire the right sort of a lawyer you can get out of this scrape."

"But how am I to know who is the right kind of a lawyer?"

"Pick out one who has a shabby office, although he could easily afford the best."

"What's the idea?"

"A lawyer of that kind is apt to be very successful in handling the affairs of clients who get fussed when they see mahogany furniture, thick carpets and elegant chandeliers."—Birmingham Age-Herald.

LIFT OFF CORNS!

Drop Freezone on a touchy corn, then lift that corn off with fingers

Doesn't hurt a bit! Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic! No humbug!

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.—Adv.

Young America in Doubt.

"What is an annuity, pa?"

"Something you have got coming to you every year."

"Is a birthday an annuity?"

Widely Divergent Interests.

Willis—I suppose the strike in your town is a purely local affair?

Gillis—Not in the least. The works are owned by Boston parties, the manager is from Chicago, the workmen came from Seattle, the labor organizer hails from New York, the strike-breakers were imported from Alabama, and the troops were sent by the governor. Our only local interest is ducking bricks.—Judge.

"DIAMOND DYES" DON'T RUIN YOUR MATERIAL

Women! Don't Buy a Poor Dye That Fades, Streaks, or Runs.

Each package of "Diamond Dyes" contains directions so simple that any women can diamond-dye a new, rich, fadeless color into worn, shabby garments, draperies, coverings, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed even if you have never dyed before. Druggist has color card.—Adv.

High Aspirations.

"You are fond of school, aren't you, dear?" asked a teacher of a pupil who had just finished her first week.

"W'y, Miss Andrews," replied the little tot, "I mean to go to all the schools they is until I get to the highest school, and I mean to study all the histories they is until I study the highest one. I mean to study the history of the angels, even."

DAIRY

TO PREVENT GARLIC FLAVOR

Few Simple Precautions in Herd Management Will Keep Out Disagreeable Odor in Milk.

Dairymen and creamery men in many states are troubled every spring by garlic or onion flavor in the milk. This is due to the cows feeding on garlic or wild onion, one of the first plants to start in the pasture in the spring. The trouble from garlic is not likely to last very long, as this weed is soon cropped off and the grass becomes plentiful enough for the cattle to feed on it in preference to the onion.

Garlic flavor in milk can be removed by heating the milk to 145 degrees F. and forcing air through it at this temperature for 30 to 60 minutes, according to Farmers' Bulletin 608 of the United States department of agriculture. As this method requires a certain amount of equipment, it is much more satisfactory for the average dairyman to keep the odor out of milk by a few simple precautions in herd management.

There are two ways of protecting the milk from garlic flavor. First, prevent the cows from obtaining garlic; and second, manage the herd on garlic pasture, so that there will be the least possible chance of getting the flavor in the milk.

Often the garlic is found only in one patch in the pasture, and this can be temporarily fenced off and pastured with other animals not producing milk.

Where garlic is scattered all over the field it will be impossible to keep the cows away from it, but by removing them to some other field three or four hours before each milking the flavor will be reduced to a minimum. The odor in milk is strongest from cows which have just eaten garlic, and the odor is reduced as the time between the eating of garlic and milking is increased.

In case no garlic-free pasture is available, it would be advisable to drive the cattle to the barnyard three or four hours before milking and feed them on hay and silage. As the season for garlic trouble is short, this should not cause much inconvenience.

Garlic Flavor Can Be Reduced to Minimum by Removing Cows to Some Other Pasture Three or Four Hours Before Each Milking.

The best plan for avoiding trouble from this weed on the dairy farm is to kill it out completely. This can be done with little trouble, and those interested can obtain information on the subject by writing to the United States department of agriculture for Farmers' Bulletin 610, "Wild Onion, Method of Eradication."

MUST OBSERVE CLEANLINESS

Neglect of Tubes of Milking Machine May Cost Milk of Dairy for Entire Day.

Just one time of neglecting to cleanse the tubes of the milking machine may cost the milk of the entire dairy for that day, and more, if one permits the carelessness to continue. No man ever ought to get a milking machine, unless he is determined to keep the pails, teat cups and tubes absolutely clean.

DETECT GOOD WORKING COWS

Value of Keeping Track of Production of Each Individual Animal Is Very Great.

Every dairyman, sooner or later, learns the value of keeping track of the individual production of the cows in his herd in order to detect the workers from the shirkers, so that the loafer and boarder cows may be spotted and eliminated from the milking stable.

GET BEST POSSIBLE RETURN

While All Nutrients Are High Priced It Is Important to Make Every Pound Count.

At present, when all nutrients used in the dairy stable are unusually high in price, it is imperative that every milk producer gain the greatest possible return from each pound of grain or roughage which he feeds.

URIC ACID IN MEAT CLOGS THE KIDNEYS

Take a Glass of Salts If Your Back Hurts or Bladder Bothers.

If you must have your meat every day, eat it, but flush your kidneys with salts occasionally, says a noted authority who tells us that meat forms uric acid which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken, then you suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To neutralize these irritating acids, to cleanse the kidneys and flush off the body's urinous waste get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys, also to neutralize the acids in urine, so it no longer irritates, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure, and makes a delightful effervescent lithia-water drink.—Adv.

Fitted for the Films.

"How are you getting along with your scenario of 'Hamlet?'"

"Nicely. Just cast your eye over these."

"'To be or not to be.'

"'Costly thy habit as thy purse can buy.'

"'Alas, poor Yorick.'

"Well?"

"Shakespeare is just full of good titles."—Louisville Courier-Journal.

Preparing an Alibi.

"There's a friend in the outer office waiting for you, sir."

"Here, James, take this $10 and keep it till I come back."

NAME "BAYER" ON GENUINE ASPIRIN

Take tablets only as told in each "Bayer" package.

The "Bayer Cross" is the signature of the true "Bayer Tablets of Aspirin." The name "Bayer" is only on genuine Aspirin prescribed by physicians for over eighteen years.

In every handy "Bayer" package are proper directions for Pain, Colds, Headache, Toothache, Earache, Neuralgia, Rheumatism, Lumbago, Sciatica, Neuritis.

Tin boxes of 12 tablets cost only a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Playing Safe.

Mr. Hardface—No, dear! I can't kiss you here; it's too light.

Miss Manchaser—But you kissed me on this very spot last night under the electric light.

Mr. Hardface—True, but this is daylight and some one might get a snapshot of me with a concealed camera.

Strange Raise.

"Even brooms are going up."

"Yet you would expect to find a sweeping reduction in brooms."

The Dear, Dead Days.

"Does your wife object to your going out with your men friends?" asked Jimkins.

"Not my married men friends," replied Sheard. "But she draws the line at bachelors."

"Why?"

"She says whenever I go out with a party of bachelors I always return home greatly depressed."

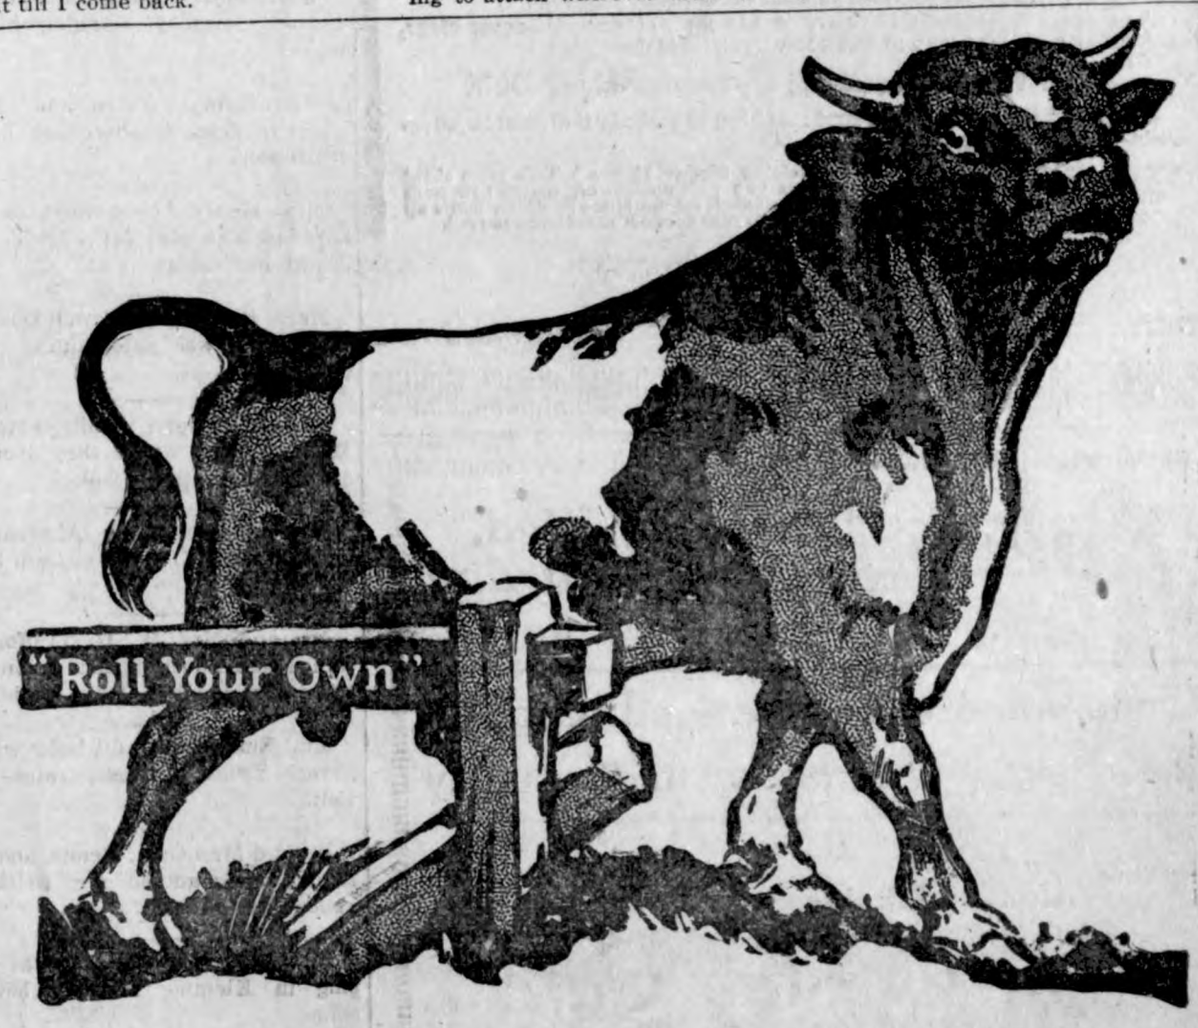
A fast young man is seldom able to keep up with his running expenses.

Perfect Health is Yours If the Blood is Kept Pure

Almost Every Human Ailment Is Directly Traceable to Impurities in the Blood.

You should pay particular heed to any indication that your blood supply is becoming sluggish, or that there is a lessening in its strong and vital force.

By keeping your blood purified, your system more easily wards off disease that is ever present, waiting to attack wherever there is an opening. A few bottles of S. S. S., the great vegetable blood medicine, will revitalize your blood and give you new strength and a healthy, vigorous vitality. Everyone needs it just now to keep the system in perfect condition. Go to your drug store and get a bottle to-day, and if you need any medical advice, you can obtain it without cost by writing to Medical Director, Swift Specific Co., 112 Swift Laboratory, Atlanta, Ga.



HE'S THE OLD RELIABLE

GRAND old "Bull". He's the best there is. He sold over 300,000,000 bags last year.

NEWS REVIEW OF CURRENT EVENTS

Attorney General Sees Red Plot in Rail Strike and Orders Arrest of Many Radicals.

LABOR TROUBLES IN KANSAS

Prospect of Anarchy in Ireland Brings Factions Into Closer Union—Strong Military Measures in Turkey —Sonora Secedes From Mexico—German Coalition Government on Trial.

By E. F. CLIPSON.

As foreshadowed by the general appearance of the railway strike from its beginning and pointed out in the previous issue of this review, the Ethiopian concealed in the woodpile has been the American I. W. W., fostered, supported and directed by the Moscow Third Internationale. If this is not true then the United States department of justice with its secret service, its mass of data and all its splendid facilities for gathering information and evidence, has gone woefully astray.

The Third Internationale is the branch of the communistic government of Russia devoted to international propaganda and organization and pledged to the cause of overthrowing the existing order in America and throughout the world. Its principal aim is to promote revolutionary class struggle and establish wherever possible a dictatorship of the proletariat such as exists in Russia. One of its objects, entering into the dreams of all radicals, is the organization of all workmen, everywhere, into one big union. With such an organization and such a powerful weapon, an oligarchy of labor would be possible. The I. W. W. is committed to these views, hence its fight to disrupt the American Federation of Labor which stands for collective bargaining and the preservation of contractual rights between employers and employees. Observers everywhere have been pointing to the traceable effects of communistic propaganda in the disturbed conditions all over Europe and the strikes and rumblings in America. Wherever the doctrines have gained ascendency, as in Russia, Hungary, portions of the Balkans and recently in a part of Germany, terrible conditions and in some cases actual chaos have resulted.

Attorney General Palmer reports that evidence in his hands proves that William Z. Foster, leader of the late steel strike, and other prominent radicals, have been the concealed brains back of the rail strike. The government's announcement was followed by prompt action in issuing federal warrants for a number of the active leaders of the strike. The warrants charged violation of section 2 of the war-time Lever law.

Before the issuance of the warrants and the determination to take drastic action had been announced, the goverment's disclosures had begun to have an effect on the strike and its early collapse, or at least gradual death was anticipated. Even before the disclosures from Washington an improvement in the situation was manifest in the West, although acute in New York and some other portions of the East. In Chicago where the strike started and in other parts of the West, railroad men who had been enticed by the "outlaw" movement, began to see signs of a trap and to turn again to the counsels of their old leaders. This was having a gradual effect in the restoration of traffic and normal conditions.

The new railway labor board authorized by the Cummins-Esch law and appointed by the president, will now have the arduous duty of reviewing the whole railway labor question, relative to wages, hours of employment, working conditions, etc. Out of the great volume of testimony to which it will listen and all the data compiled, it is called upon to find a solution which will be equitable to the men, the employers and the public and prevent a recurrence of strife for the near future at least. Some job, nez pas?

The eyes of the entire country and probably some foreign eyes as well, are turned upon the state of Kansas in its efforts to settle labor troubles through a state law and an industrial relations court. Alexander M. Howat, president of the Kansas Mine Workers' union and several other officials, were jailed for refusal to testify before the court. Some railroad men in the state have also been arrested for violating the law by participating in the switchmen's strike. Injunctions are being freely used by the state officials and the chief point of interest is, as to whether the law will stand and be an effective means of settling labor disputes, or will fall under the assaults to be made on it in the higher courts.

Governor Lowden, as was expected, carried the presidential preference primary in Illinois, although his plurality of more than 80,000 over Leonard Wood was somewhat startling. Lowden stock received a boom and so did that of Hiram Johnson whose admirers in the city of Chicago to the number of over 40,000 and upwards of 10,000 down the state, wrote or pasted his name on the ballot. Few of the preferential primaries bind delegates to instructions for the national conventions, although they do express to a considerable extent the wishes of voters. The fight is still an open one with General Pershing edging his hat tentatively into the Republican ring. He has stated that he is not a candidate for the presidency, but, that no man should refuse the high office if called to it by the people. No accurate forecasting of the real convention strength of any candidate is yet possible.

Affairs in Ireland take on a less turbulent aspect. The prospect of anarchy is reported as bringing the factions closer to an agreement. The number of extremists is reported as diminishing and moderates in all parties are said to be frightened at the outbreak of all kinds of crime under the guise of political action. A common meeting ground is being sought, but that it will not be found in the present home rule bill is apparent. Ireland will never indorse the bill with any unanimity. The British government averted a serious crisis by releasing the 70 Irish prisoners who were on a hunger strike after four had collapsed and others were in the last stages of exhaustion. A general strike impended unless the government granted the releases.

Internal problems in China having an important bearing on the future of that country, are in process of harmonization through a financial consortium of the powers. The scheme provides for control, through the banking groups of the different allies, of loans for railroads and the development of public utilities in China. Allied propaganda has been furthering the project for more than a year, but until recently the jealousy existing among the Shanghai Chinese and those of South China against the Peking government, has stood in the way of an agreement. The anti-Peking leaders appear to be satisfied so long as America, England and France direct operations under the loans and Peking officials have nothing to do with the actual expenditures. The remaining problem is to induce Japan to join the consortium on equal terms with the other three nations, thus easing the Japanese yoke on China. With the other powers presenting such a strong front, it is believed Japan will join.

Pending the final disposition of Turkish affairs through the medium of the peace treaty which is expected to be ready for submission to the Turks early in May, England, France and even the sultan's government are preparing for strong military measures against Mustapha Kemal and his nationalist forces. French re-enforcements are reported to have dampened the ardor of the nationalists in Syria and Cilicia. The British have fortified Ismid. The French are marching through Cilicia to the relief of Americans at Aintab and Urfa. A movement is under way to place 150,000 Turks, loyal to the sultan, at the disposition of the British forces and under command of British officers. The French have re-established railroad communication between Adana and Aleppo. Probably 2,000 refugees will be removed from Adana to Cypress.

A disturbed condition exists from the western borders of Turkey straight east for 2,500 miles to the western border of China. In the Caucasus bolshevism is strong. A disquieting situation has arisen at Batoum where the Georgians who have been opposing allied occupation, threaten to join the bolsheviki and take over the whole region. Armenian mobilization has been ordered in preparation for a possible campaign against the Tartars and Azerbaijanese over disputed territory. Warlike Kurds, relieved of Russian restraint, come down from the north and attack and pillage Armenian settlements frequently.

The council of the League of Nations is seeking a guardian for Armenia. That it may be somewhat difficult to find is evidenced by the report of the American military mission to Armenia headed by Gen. G. G. Harboard. The report recently made public states that any country accepting the Armenian mandate will require an army of 59,000 men, a good-sized fleet of naval vessels and an outlay of $757,000,000 during the next five years. The mission demonstrated its complete neutrality by enumerating 13 reasons for accepting the mandate and 13 reasons against acceptance, rather implying in the significance of the numerals, that it is unlucky if we do and unlucky if we don't. Of special bearing on the case of Armenia and other minority peoples who have been under Turkish rule is the declaration of the council of the League of Nations that it will guarantee clauses in the Turkish peace treaty providing for the protection of all non-Moslem minorities.

Ten years of fighting seem not to have diminished the Mexican gluttony for strife. With rebellions on every hand and the Carranza regime holding power only because it seemed to be the most strongly organized body, while no two of the others could combine effectively against it, a new element now enters the situation in the form of secession. Sonora, the northwestern border state with an area of approximately 77,000 square miles and rich in gold, silver, lead, copper and other resources, but having less than 300,000 people, has announced its withdrawal from the so-called republic. By proclamation the republic of Sonora is established, said proclamation being issued by Gen. P. Elias Calles, commander in chief of the military forces. The federals are reported organizing for suppression of the rebels. Other Mexican states may join the movement but whether or not they do, is not likely to change affairs much or either increase or diminish disturbed conditions in the country. A new alignment of factions may occur, but the whole incident takes on the character of a diverting high light in a strenuous presidential campaign being waged in the country.

Germany's coalition government is still on trial with a shifting of elements and sentiments due to the recent troubles. Labor is dissatisfied over the treatment of workmen in the Ruhr difficulties. Moderate socialists, irked by the hard economic conditions, are reported joining the independent socialists and communists. Both reactionaries and extremists are dissatisfied that they have no representation in the government and are accordingly making all the trouble they can. All factions condemn the government on account of the French occupation of Frankfort and other German cities. The hardest problem of the government is the attitude of labor which is endeavoring to rule the cabinet. The principal element of strength in the coalition is in the fact that it is so beset on all sides that it must remain united to prevent a fall and chaos again. France and Great Britain have smoothed out their disagreement over the French occupation. France will withdraw her forces from Germany as soon as the Germans withdraw from the Ruhr, and promises there will be no further independent action on her part.

COAL DUST LODGED IN MINER'S LUNGS

Tells how his cough was conquered and health restored.

"In November, 1916, I was working in a coal mine and the doctors said the coal dust had settled in my lungs. I couldn't lie down on my right side, coughed so I couldn't sleep and had constant pain in my right lung and under my shoulder blades. I coughed so hard the blood would spurt out of my nose. Finally the doctors had me change climate and live outdoors, but didn't improve.

"Then I came home and started on Milks Emulsion. Thank God I did, as it did me a lot of good right from the start, loosening up the coal dust in my right lung. In a few weeks my lungs were free. I could sleep like a baby, had an excellent appetite and my cough left me entirely. I gained back 30 pounds in weight and went back to work in the mines completely restored to health."—G. H. Bunn, 6th Ave. & No. 13th St., Terre Haute, Ind.

Thousands of victims of dust-filled air develop the same trouble that Mr Bunn had. Milks Emulsion costs nothing to try, so why not at least try it?

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. It helps build flesh and strength, and is a powerful aid in resisting and repairing the effects of wasting diseases.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

No matter how severe your case you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and $1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

His Interpretation.

Mortland Jones, the five-year-old son of Rev. Rhys Price Jones, pastor of the First Presbyterian church in Franklin, refused to sing "America" with the rest of the members of the primary class in Sunday school. When questioned he gave as his reason the line of the song, "Land where my fathers died." "My father didn't die," he said, "and I won't sing it."—Indianapolis News.

DRUGS EXCITE YOUR KIDNEYS, USE SALTS

If Your Back Hurts or Bladder Bothers, Drink Lots of Water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.—Adv.

Synonymous.

It was Springer's afternoon off and he thought he would take the children for a little outing.

"My dear," he said, approaching his wife, "suppose we take the children to the zoo today?"

"Why, Will, you promised to take them to mother's."

"All right, if it's all the same to the children."

State of Ohio, City of Toledo, Lucas County—ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.

FRANK J. CHENEY.

F. J. Cheney & Co., Toledo, Ohio.

Ouch!

"You seem to hate that fellow Smith," said Brown. "What is the trouble between you and him?"

"I introduced him to my wife the other day," replied Jones, "and the gabby boob had to say: 'Why, I thought that the lady you were with in New York was your wife.'"—Cincinnati Enquirer.

Cuticura Soothes Itching Scalp

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your every-day toilet preparations and have a clear skin and soft, white hands.—Adv.

No regret is vain that inspires us to do better

Home Town Helps

ADVANTAGES OF SMALL TOWN

For One Thing, the Helping Hand Is Never Withheld From Man Who Is Worthy.

"A man coming back to a small town to make his pile will find every advantage," says William D. Pelley in People's Magazine. "The friendly attitude of the country banker, the well wishes and interest of his neighbors, the good will of a public which only asks that he render a service in order to get quick recognition. Time and again, as editor of a small town daily paper, I have been overwhelmed by watching some newcomer in the community open a store or build a factory or start in a profession, and noting how quick was the response on the part of my townspeople. They are very human folk, these townspeople. They are quick to discover if a man has ulterior motives, whether he is feathering his own nest first and looking after the public interest last. And that is the reason many a man returns to the city knocking the country town. He has tried to put something over and failed. He has found his clientele not at all the hicks and rubes he judged them. And having turned the tables on him, he abuses them roundly."

NEW STREET-LIGHTING PLAN

Kansas City Authorities Believe They Have an Improvement on the Cluster Effect.

Something new in the way of street lights is planned for Baltimore avenue by property owners between Twelfth street and Southwest boulevard, says the Kansas City Star. When the street has been widened and paved the owners propose to break away from the "cluster" effect that has been sought on other streets where "bright ways" have been established. And, incidentally, they plan to have the "lightest street" in the city.

The accompanying illustration shows the style of light and standard the property owners have adopted. It is the same style used along Michigan avenue in Chicago—a single pear-

shaped opaque globe on a graceful reenforced concrete standard. There will be 36 such lights on widened Baltimore avenue and the council already has passed an ordinance authorizing them.

The light will be "staggered" at approximately 100-foot intervals. Tests show that with the internal reflectors the single light will give greater efficiency than the old-fiashioned clusters.

Think It Over.

Think it over yourself, today, as you plan for the coming months. In private or public affairs, in business or social or family matters, seek out what points of friction there may be and drop upon them the soothing oil of common sense. Remember that the community is only a collection of interdependent units and that a single selfish act of yours may derange an incalculable number of your fellowbeings and thereby propel the whole a shade nearer to that condition of chaos that every reasoning person must regard with horror. Avoid all senseless and suicidal strife, no matter of what character, and learn to co-operate.—Bermuda Colonist.

Roadways.

For good residential property there should be provided a roadway having a hard, compact surface—20 to 25 feet in width, on a substantial foundation, and concrete sidewalks, four feet in width, the remaining portion of the right of way being treated in a less expensive manner. Drains will be required to carry off the surface water from the right of way and the lots fronting on it.

Would Plant Fruit Trees.

When the trees are planted in the city parks to replace some which have been removed, and other park improvements started, an eastern journal would have the common council plant various fruit trees.

Suffered for Years

Miserable From Kidney Trouble Doan's Made Mr. Barnett Strong and Well.

"I suffered untold agony with my kidneys for years," says John Barnett, 30 Virginia Place, Buffalo, N. Y. "Sometimes I felt that I would break up with fever, but every now and then would have a severe chill. Often my clothes were wringing wet with perspiration. The kidney secretions were unnatural in color and odor and burned terribly. At night my shoes were so tight on my feet that I could hardly get them off and my hands swelled so I couldn't hold a teacup. My back! Oh, how it ached! I walked with two canes and was all bent over like an aged man. When the terrible pains shot through my kidneys my knees would give way, and many times I had to be lifted to my feet by people on the street. I didn't care whether I lived or died I was so miserable. I finally used *Doan's Kidney Pills* and they cured me of all kidney trouble. *Doan's* made me strong and well."

Mr. Barnett

Acid Stomach

Makes the Body Sour

Nine Out of Ten People Suffer From It

It sends its harmful acids and gases all over the body, instead of health and strength. Day and night this ceaseless damage goes on. No matter how strong, its victim cannot long withstand the health-destroying effects of an acid stomach.

Good news for millions of sufferers. Chemists have found a sure remedy—one that takes the acid up and carries it out of the body; of course, when the cause is removed, the sufferer gets well.

Bloating, indigestion, sour, acid, gassy stomach miseries all removed. This is proven by over half a million ailing folks who have taken EATONIC with wonderful benefits. It can be obtained from any druggist, who will cheerfully refund its trifling cost if not entirely satisfactory. Everyone should enjoy its benefits. Frequently the first tablet gives relief.

VICTIMS RESCUED

Kidney, liver, bladder and uric acid troubles are most dangerous because of their insidious attacks. Heed the first warning they give that they need attention by taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for these disorders, will often ward off these diseases and strengthen the body against further attacks. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation

ALLEN'S FOOT-EASE

Gives ease and comfort to feet that are tender and sore.

If shoes pinch or corns and bunions ache this Antiseptic, Healing Powder will give quick relief.

Shake it in your Shoes. Sprinkle it in the Foot-bath. Sold everywhere.

The Army of Constipation

Is Growing Smaller Every Day

CARTER'S LITTLE LIVER PILLS are responsible. Not only relieve constipation, but correct biliousness, sick headache, indigestion, sallow skin—they never fail—renewal of regular habits follow. Purely vegetable.

100 a. Farm on Fine Highway, 4 mi. from R. R. 35 a. under plow. Clay loam soil. Bldgs. worth $3,000. $2,500 personal prop'ty. $9,000. Brush-McWilliams Co., Antigo, Wis.

WRIGLEY'S

The children love Wrigley's—and it's good for them.

Made under conditions of absolute cleanliness and brought to them in Wrigley's sealed sanitary package.

Satisfies the craving for sweets, aids digestion, sweetens breath, allays thirst and helps keep teeth clean.

Costs little, benefits much.

The Shady Sort.

"If you hire the right sort of a lawyer you can get out of this scrape."

"But how am I to know who is the right kind of a lawyer?"

"Pick out one who has a shabby office, although he could easily afford the best."

"What's the idea?"

"A lawyer of that kind is apt to be very successful in handling the affairs of clients who get fussed when they see mahogany furniture, thick carpets and elegant chandeliers."—Birmingham Age-Herald.

LIFT OFF CORNS!

Drop Freezone on a touchy corn, then lift that corn off with fingers

Doesn't hurt a bit! Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic! No humbug!

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.—Adv.

Young America in Doubt.

"What is an annuity, pa?"

"Something you have got coming to you every year."

"Is a birthday an annuity?"

Widely Divergent Interests.

Willis—I suppose the strike in your town is a purely local affair?

Gillis—Not in the least. The works are owned by Boston parties, the manager is from Chicago, the workmen came from Seattle, the labor organizer hails from New York, the strike-breakers were imported from Alabama, and the troops were sent by the governor. Our only local interest is ducking bricks.—Judge.

"DIAMOND DYES" DON'T RUIN YOUR MATERIAL

Women! Don't Buy a Poor Dye That Fades, Streaks, or Runs.

Each package of "Diamond Dyes" contains directions so simple that any women can diamond-dye a new, rich, fadeless color into worn, shabby garments, draperies, coverings, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed even if you have never dyed before. Druggist has color card.—Adv.

High Aspirations.

"You are fond of school, aren't you, dear?" asked a teacher of a pupil who had just finished her first week.

"W'y, Miss Andrews," replied the little tot, "I mean to go to all the schools they is until I get to the highest school, and I mean to study all the histories they is until I study the highest one. I mean to study the history of the angels, even."

DAIRY

TO PREVENT GARLIC FLAVOR

Few Simple Precautions in Herd Management Will Keep Out Disagreeable Odor in Milk.

Dairymen and creamery men in many states are troubled every spring by garlic or onion flavor in the milk. This is due to the cows feeding on garlic or wild onion, one of the first plants to start in the pasture in the spring. The trouble from garlic is not likely to last very long, as this weed is soon cropped off and the grass becomes plentiful enough for the cattle to feed on it in preference to the onion.

Garlic flavor in milk can be removed by heating the milk to 145 degrees F. and forcing air through it at this temperature for 30 to 60 minutes, according to Farmers' Bulletin 608 of the United States department of agriculture. As this method requires a certain amount of equipment, it is much more satisfactory for the average dairyman to keep the odor out of milk by a few simple precautions in herd management.

There are two ways of protecting the milk from garlic flavor. First, prevent the cows from obtaining garlic; and second, manage the herd on garlic pasture, so that there will be the least possible chance of getting the flavor in the milk.

Often the garlic is found only in one patch in the pasture, and this can be temporarily fenced off and pastured with other animals not producing milk.

Where garlic is scattered all over the field it will be impossible to keep the cows away from it, but by removing them to some other field three or four hours before each milking the flavor will be reduced to a minimum. The odor in milk is strongest from cows which have just eaten garlic, and the odor is reduced as the time between the eating of garlic and milking is increased.

In case no garlic-free pasture is available, it would be advisable to drive the cattle to the barnyard three or four hours before milking and feed them on hay and silage. As the season for garlic trouble is short, this should not cause much inconvenience.

Garlic Flavor Can Be Reduced to Minimum by Removing Cows to Some Other Pasture Three or Four Hours Before Each Milking.

The best plan for avoiding trouble from this weed on the dairy farm is to kill it out completely. This can be done with little trouble, and those interested can obtain information on the subject by writing to the United States department of agriculture for Farmers' Bulletin 610, "Wild Onion, Method of Eradication."

MUST OBSERVE CLEANLINESS

Neglect of Tubes of Milking Machine May Cost Milk of Dairy for Entire Day.

Just one time of neglecting to cleanse the tubes of the milking machine may cost the milk of the entire dairy for that day, and more, if one permits the carelessness to continue. No man ever ought to get a milking machine, unless he is determined to keep the pails, teat cups and tubes absolutely clean.

DETECT GOOD WORKING COWS

Value of Keeping Track of Production of Each Individual Animal Is Very Great.

Every dairyman, sooner or later, learns the value of keeping track of the individual production of the cows in his herd in order to detect the workers from the shirkers, so that the loafer and boarder cows may be spotted and eliminated from the milking stable.

GET BEST POSSIBLE RETURN

While All Nutrients Are High Priced It Is Important to Make Every Pound Count.

At present, when all nutrients used in the dairy stable are unusually high in price, it is imperative that every milk producer gain the greatest possible return from each pound of grain or roughage which he feeds.

URIC ACID IN MEAT CLOGS THE KIDNEYS

Take a Glass of Salts If Your Back Hurts or Bladder Bothers.

If you must have your meat every day, eat it, but flush your kidneys with salts occasionally, says a noted authority who tells us that meat forms uric acid which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken, then you suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To neutralize these irritating acids, to cleanse the kidneys and flush off the body's urinous waste get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys, also to neutralize the acids in urine, so it no longer irritates, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure, and makes a delightful effervescent lithia-water drink.—Adv.

Fitted for the Films.

"How are you getting along with your scenario of 'Hamlet?'"

"Nicely. Just cast your eye over these."

"'To be or not to be.'

"'Costly thy habit as thy purse can buy.'

"'Alas, poor Yorick.'

"Well?"

"Shakespeare is just full of good titles."—Louisville Courier-Journal.

Preparing an Alibi.

"There's a friend in the outer office waiting for you, sir."

"Here, James, take this $10 and keep it till I come back."

NAME "BAYER" ON GENUINE ASPIRIN

Take tablets only as told in each "Bayer" package.

The "Bayer Cross" is the signature of the true "Bayer Tablets of Aspirin." The name "Bayer" is only on genuine Aspirin prescribed by physicians for over eighteen years.

In every handy "Bayer" package are proper directions for Pain, Colds, Headache, Toothache, Earache, Neuralgia, Rheumatism, Lumbago, Sciatica, Neuritis.

Tin boxes of 12 tablets cost only a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Playing Safe.

Mr. Hardface—No, dear! I can't kiss you here; it's too light.

Miss Manchaser—But you kissed me on this very spot last night under the electric light.

Mr. Hardface—True, but this is daylight and some one might get a snapshot of me with a concealed camera.

Strange Raise.

"Even brooms are going up."

"Yet you would expect to find a sweeping reduction in brooms."

The Dear, Dead Days.

"Does your wife object to your going out with your men friends?" asked Jimkins.

"Not my married men friends," replied Sheard. "But she draws the line at bachelors."

"Why?"

"She says whenever I go out with a party of bachelors I always return home greatly depressed."

A fast young man is seldom able to keep up with his running expenses.

Perfect Health is Yours If the Blood is Kept Pure

Almost Every Human Ailment Is Directly Traceable to Impurities in the Blood.

You should pay particular heed to any indication that your blood supply is becoming sluggish, or that there is a lessening in its strong and vital force.

By keeping your blood purified, your system more easily wards off disease that is ever present, waiting to attack wherever there is an opening. A few bottles of S. S. S., the great vegetable blood medicine, will revitalize your blood and give you new strength and a healthy, vigorous vitality. Everyone needs it just now to keep the system in perfect condition. Go to your drug store and get a bottle to-day, and if you need any medical advice, you can obtain it without cost by writing to Medical Director, Swift Specific Co., 112 Swift Laboratory, Atlanta, Ga.

HE'S THE OLD RELIABLE

Come In and See This Spreader Work.

We announced a short time ago that we have the agency for the Nisco Manure Spreader. We believed at the time that this was the best spreader made, and now, after scores have examined it thoroughly and commented favorably, we are more than ever convinced that we have the ideal spreader—the original wide-spreading machine.

We want our customers to come in and see this practical, low-down, light-draft spreader. We have it all set up and can put the mechanism in motion just as you'd see it in the field.

Perhaps you don't need a spreader. No matter! Come in just the same and see the "Nisco." Our word for it, you'll be interested anyway. The

NISCO
Reg. U.S. Pat. Off.
The "New Idea" Manure Spreader

stands unique among spreaders. It puts manure on the soil in the best possible condition to furnish necessary plant food. A chain conveyor carries the load to a pair of cylinders, revolving one over the other, where it is thoroughly pulverized and thrown onto swiftly revolving paddles that distribute it evenly over three corn rows. The feed can be easily regulated, 3, 6, 9, 12, 15, 18 loads per acre, or shut off entirely.

The Nisco Spreader will carry a big load of manure—never clogs, and with reasonable care will last a lifetime. It is the

First Wide-Spreading Spreader Ever Built

Introduced 17 years ago—the first machine to embody this great improvement—wide-spreading.

WE'VE AN INTERESTING BOOK TO GIVE YOU. Called "Helping Mother Nature." Tells more about manure than you ever thought of. Shows how fresh manure, distributed by the Nisco Spreader, builds up soil fertility and increases farm profits. Don't miss your copy—it's here when you call.

Wm. Smith was a business caller at Garner Tuesday morning between trains.

Mrs. Henry Griffen and children were up from Goodell last Tuesday afternoon.

Mrs. Henry Lewis went to Clear Lake last Thursday for a few days visit with her sister.

Marie Blank had a "swell time" last week. She was entertaining a case of mumps.

Ray White and family autoed to Miller Sunday where they spent the day visiting with his folks.

Mr. nd Mrs. Tony Ahrenkiel of Goodell were Klemme visitors Saturday evening.

Mr. and Mrs. W. H. Trafford returned last Thursday afternoon from a few days spent in Cedar Rapids.

Mrs. Emil Kraus and baby were at Garner Friday between trains for a visit.

Dr. and Mrs. G. A. Bemis, and Miss Naomi Lewis autoed over to Garner Sunday afternoon.

Mrs. Lester, of Goodell, was shopping in Klemme Monday between trains.

Dr. and Mrs. Paul Barth, of Garner, were in Klemme Monday on business.

Gearald and Mildred McCullough autoed to Garner Sunday and from there they went to Mason City.

Mr. and Mrs. Fred Francis and family were up from Goodell Monday morning for a visit.

Bert Mathews spent Sunday at Garner. Ed. Jacobs also drove up in the afternoon.

Elsie Carolus has been quite ill the past week with pneumonia, but at this time is rapidly improving.

Mr. and Mrs. Heggen and Mr. and Mrs. Peterson, of Kanawha, were Klemme shoppers Monday.

Mrs. Hans Nelson from Goodell was a Klemme caller Monday afternoon.

Mrs. Ahrenkiel and baby from Goodell spent several days the past week at the Tom Blank home.

Mr. and Mrs. John Adams of State Center, Iowa, were over Sunday visitors at the Blank home.

Mrs. John Gruetzmacher and Mrs. P. M. Griesemer were at Garner Tuesday afternoon between trains.

Margaret Dickinson, accompanied by her sister, Arvella, went to Crystal Lake Tuesday afternoon for a visit with her folks.

Iowa News Briefly Told

Des Moines.—Damage to the extent of over $200,000 was sustained by the Des Moines Gas company when their plant was wrecked by an explosion of unknown origin, exclusive of the enormous loss in revenue from the cutting off of the gas supply for several days. The total death list was four, with several so seriously injured that their life hangs in the balance. Two separate investigations have been launched to ascertain the cause of the explosion—one in charge of the Polk county coroner, the other by the gas company. The men who could have told the most about its causes are dead—and the jury who will probe the cause of the disaster must depend largely on the testimony of men who were not present when the accident happened, in finding out what caused the explosion. Twenty-eight thousand families in the city of Des Moines were without gas and numerous devices were temporarily applied as gas substitutes for cooking. All Des Moines newspapers were published under great difficulties the first day following the explosion, being unable to set type by machines, only in a few instances where electric heating pots were in use. Hotels were unable to serve their guests with cooked food. Express trains from every direction were speeding toward Des Moines with shipments of electrical appliances to replace the gas heating devices and replenish the stock of local dealers which was depleted within a few hours after the disaster became known.

New Hampton.—Every pound of butter shipped from the New Hampton creamery in 1919 to the market brought a price of western extra on better, the last shipment being a 92 test and sold at 68½ cents. State and national reports credit New Hampton butter with scores of 92 and 93, the 93 being the highest market score used. Eighty-six test from other creameries sold at 61½ cents the same day or a net gain of 7 cents for the New Hampton product. During the year 1919 the 170 patrons of the creamery contributed 769,995 pounds of cream, with an average test of 24.1 per cent. This cream contained 185,944 pounds of butterfat and was made into 224,244 pounds of the highest test creamery butter at an overrun of 22.6 per cent.

Iowa City.—The thirty-fourth convention of the Iowa Academy of Science was held in Iowa City, April 23 and 24. Between 150 and 200 scientists of Hawkeye schools and colleges returned to the Athens which was the meeting place of the academy nearly a decade ago. Prof. T. C. Stephens of Morningside college, is president of the organization; and Assistant State Geologist James H. Lees is secretary. Prof. A. O. Thomas of S. U. I. is treasurer. A feature of the meeting was the moving pictures of the Barbados-Antigua expedition, on which Prof. C. C. Nutting of Iowa university, who headed that expedition, lectured.

Des Moines.—Declaring that several hundred millions of dollars of stock in new enterprises, many of them of doubtful value, have been floated in Iowa during the last 12 months, the United States treasury department appeals to farmers to investigate thoroughly before buying. The review quotes the methods employed in placing these stocks with farmers—the salesmen usually sell each $1,000 worth of stock on the basis of $250 cash and note for $750. The salesmen pocket the cash and turn the note over to the promoter.

Iowa City.—Forrest P. Hagan of Pleasanton, with an oration on "The Plea for Cuba," won first place and the Samuel Lefevre prize of $20 in the annual freshman oratorical contest of the University of Iowa. Vernon Sharp of Rolfe, speaking on "A Vision of War," was second and Charles DeVaul of Albert City won third with an oration on "The Great War."

Dubuque.—The new city jail of this city is completed and is awaiting its first prisoners. Under the new city manager plan all city prisoners will be kept in the city lockup instead of being placed in the county jail under the jurisdiction of the sheriff. There are accommodations for 20 prisoners beside two solitary cells for temperamental persons.

Cedar Rapids.—Patrick O'Neil of Cedar Rapids was shot dead by a revolver in the hands of his five-year-old son James. The gun was thought to be unloaded. The child had been in the habit of playing with the revolver, but it had never held cartridges until a few days ago.

Guthrie Center.—Three shipping associations, organied by farmers of their respective localities, have been organied at Guthrie Center, Adair and Stuart, each with a membership of about 85.

Cedar Rapids.—A warrant has been issued for the arrest of H. C. Beeson, formerly of Des Moines, organizer of the Iowa Bankers' Managing company, on a charge of fraud. It is alleged that he failed to account for $100,000 he obtained from the resale of the company's stock at an advance of from $50 to $100 above the par value of $50. It is charged that this stock was resold on the company's blank forms. Beeson is missing, and his present whereabouts are unknown. The company is in the hands of a receiver.

REALIZE VALUE OF GARDENS

British Housing Authorities Forbid Erection of Dwellings Without Suitable Breathing Spots.

The new methods of land development in Great Britain now adopted by local authorities mark a clean breakaway from the "jerry planning" methods of the past. Instead of crowding from thirty to forty houses per acre in closely packed streets, local authorities, acting under the guidance of the ministry of health, are adopting the standard that in urban areas not more than twelve houses, and in rural areas not more than eight houses, should be built per acre. As a beneficent result of the adoption of these new standards the large garden is to be henceforward a fundamental feature of every newly built home.

The distance between houses on opposite sides of a street is not less than seventy feet, thereby making a broad park line road. Under the new method the cost per house of garden suburb roads on an estate with twelve houses per acre and with a frontage of twenty-five feet per house is less than under the old method with twenty houses to the acre and only 17-foot frontages to the houses.

This is the opening out of a new period of English town and village development. Under a clause added to the housing and town planning act in the committee of the house of commons every urban local authority with upwards of twenty thousand population, must between 1923 and 1926 prepare a town-planning scheme, and under the clause the exercise of town planning care will become general.

CONSIDER THE GARDEN PATH

Matter Worthy of Careful Thought When Improvements Around Home Are Being Planned.

It is the question of paths that comes to the fore when garden improvements are being discussed.

There are not many gardens in which the paths could not be improved, either in their sustance or their relation to surrounding things. They require as careful consideration as the beds and borders or the lawn in the making of new gardens.

Turf paths are deservedly popular if they be something more than narrow strips of grass. The latter are ineffective and troublesome. But a wide turf path kept neatly both in surface and edge is a delight, especially when it runs beside or between broad masses of flowers or well-grouped ornamental shrubs. It would be better for the garden-maker, however, not to indulge in this fancy unless he be prepared either to keep the paths in order himself or to pay for the necessary labor.

Good paths of stone or brick are a never-failing delight, but bricks are difficult to obtain—more difficult now than at any time in memory.

Birds in Cemeteries.

Not long ago it was suggested that with excellent propriety we could make of every cemetery a bird sanctuary or refuge. The proposition appears to have found wide favor through numerous articles in the press, and a few instances are known where the idea has been made a reality.

What could be more fitting than to make of these silent and sacred resting places of our dead, the abodes of creatures that bless and beautify the world of the living.

What could be simpler than to plant and nurture such shrubs and trees as by the berries and fruits they bear would attract to them these untiring servants of man? The decorative value of such planting would obviously be considerable. The songs of birds, the sweetest of nature's music, will take away from these silent cities something of the sadness and gloom that inevitably enshrouds them.

Good Citizenship.

To be a good citizen one must not live for himself alone, he must support religion, education and many worthy objects, and must in all ways be a good neighbor and a good friend. These obligations at times cost money, and where do we find the best of such people? It is safe to say, in most cases, that those who have saved and been thrifty are the ones who are most dependable. They are the best neighbors, the best friends, active in supporting the church, the school, lectures and all other good works that enlighten and make for happy and self-reliant people.—Exchange.

Protect Insect-Killing Birds.

We have come to an era of bird-life conservation. Economic, humane and sentimental interests, united in common cause, have won in the long contest in which bird life was at stake. It is lamentably true that we have lost forever some dozens of species and that the fate of twice as many more is hanging in the balance, but, says William M. Morrill in Our Dumb Animals, the tide of destruction has been stemmed, the hand of the despoiler stayed; henceforth safety supplants slaughter, preservation takes the place of persecution.

NEWS REVIEW OF CURRENT EVENTS

Allied Premiers Slice Pieces Off Turkey, But Do Not Know What to Do With Them.

DISAGREE ABOUT GERMANY

French Don't Like Lloyd George's "Economic Pressure" Ideas—Administration Gets Two Slaps in State Primaries—Senator Johnson Wins in Nebraska.

By EDWARD W. PICKARD

With President Wilson, and consequently the United States, represented only by an "observer" in the person of Ambassador Johnson, the allied supreme council in session at San Remo decided that Turkey should be sliced up to a considerable extent, and that Germany must observe the treaty terms. As general propositions that sounded all right, but when it came to the necessary details there was woeful vagueness, so far as the correspondents could learn. Take the case of Turkey. The treaty with that country was substantially completed and the Turkish representatives notified to be in Paris on May 10 to accept it. The "big three" decided that seven big pieces should be severed from the sultan's empire—Armenia, Mesopotamia, Cilicia, Syria, Palestine, Georgia and Azerbeidjan—but the future of these territories is left for the future to determine. No one of the nations of Europe so far has signified a willingness to accept a mandate for any part of Asia Minor, though several of them are determined to cling to ports and zones of influence. The League of Nations declined to take charge of Armenia because it has neither the money nor the means of action. The United States, on which the Armenians relied and which they still hope will come to their rescue, can do nothing at present. When Great Britain, France and Italy are able to act as a unit, or when the league of nations is able to function, the destiny of the small nations freed from the Turk may be settled. Meanwhile Turkey is merely required to relinquish sovereignty over them, as was the case with Austria and the regions along the Adriatic. The supreme council, it is said, will ask Sweden and Norway to help the Armenians to establish a free state, and from Amsterdam comes the news that the Dutch would be willing to take over that job. If necessary, Canada is willing to accept the mandate, Lord Curzon says.

Politely disregarding President Wilson's protest, the allied premiers have decided that the sultan shall be permitted to retain Constantinople, though the Dardanelles are to be internationalized and other precautions will be taken to render him harmless there. His territory will not extend far into Europe, for Adrianople and Kirk-Kilise are given to Greece, as is Gallipoli though it will be controlled by allied forces. The only outlet to the Aegean for Bulgaria will be Dedeagatch, which will be governed by an international commission.

There are now in Turkey some 200,000 allied troops and Greece is in a position to send heavy reinforcements, so it is believed the Turks will do whatever the allies require.

In the matter of enforcing the treaty with Germany the discord among the allied premiers is especially marked. They all agree that the Germans must observe the terms of the pact, and have so notified Berlin. But what steps shall be taken in case the Germans are disobedient? There's the rub. Lloyd George insists that economic pressure, in the form of cutting off supplies of food and materials, will be sufficient, and in this he has had the support of Nitti. Millerand, on the other hand, asserts that military action, such as the French took recently in the matter of the Ruhr region, is the proper method and indeed the only method that will make the Germans behave. Backed by the political, press and public opinions of France, he says Germany must be compelled to carry out her pledges to the limit, and he does not believe she will do this unless she knows the penalty for evasion will be the military occupation of more German territory.

At this distance one is inclined to sympathize with the French view. Since it is perfectly easy for Germany to get food from the neighboring neutral countries with the enthusiastic cooperation of their merchants, and raw materials from the same and other sources, Lloyd George's pressure probably would be farcical in a measure. The Germans have not carried out the terms of disarmament, and now they are formally asking that they be permitted to retain an army of 200,000 with the entire general staff and corps of officers. They assert that this force is necessary to maintain order in the interior, and that, anyway, the army will not accept an order for its dissolution. The French, like many others, probably look with skepticism on the frequently recurring "revolutions" in Germany, and certainly they feel that the Germans are not to be trusted for a minute. The British view of the treaty of Versailles differs radically from that of the French, and if the Lloyd George government has its way that pact will before long be greatly modified in favor of the beaten foe. France is neither so forgiving nor so eager for trade that she wishes to restore Germany speedily to her old commercial status.

Despite existing differences and the hopes of Berlin, it is probable the allied premiers will come to an amicable understanding before long. Indeed that result may have been reached before this review reaches the reader. It is impossible to guess what will be the influence of President Wilson's views in the settlement of the pending problems.

The proclamation of an independent republic in Siberia east of Lake Baikal may serve to simplify conditions there, and it is believed it will be recognized by the soviet government at Moscow. In that case there would be left little excuse for further occupation of Siberian territory by the Japanese or any other foreign nation.

Since President Wilson has made the peace treaty a main issue of the campaign, it must be admitted that he suffered two rather severe set-backs in the state primaries of last week. In Nebraska, William Jennings Bryan, advocate of reservations, was elected a delegate to the convention in San Francisco, despite the utmost endeavors of Senator Hitchcock and the administration forces to keep him at home. The prohibition question entered largely into the fight, for Bryan had declared his intention of putting a bone-dry plank in the Democratic platform and of routing the faction, led by Governor Edwards, which favors the modification of the prohibition legislation so that the use of mildly alcoholic drinks may be restored. Hitchcock had openly sided with the Edwards view. The Peerless One does not intend that his party shall sidestep the matter. The result in Nebraska was affected by the action of vast numbers of women who, though not formerly active members of the Democratic party, registered as Democrats so as to vote for Bryan and dryness. Senator Hitchcock was given the state's preferential vote for the presidency, whatever that may be worth.

The other blow to the administration forces was delivered by the Democrats of Georgia, where support of the president and his peace treaty policy was the main issue. To be sure Attorney General Palmer, leading the Wilson contingent and standing for unconditional acceptance of the treaty, was victorious; but Senator Hoke Smith, supporter of ratification with reservations, and Tom Watson, opponent of the treaty and league covenant, together received a vote nearly twice that given Palmer. Watson led Palmer in the popular vote by several thousand. It seems the treaty as it stands is not really popular in Georgia, and the same is true in other parts of the south.

Senator Hiram Johnson, whose preconvention campaign is making the other Republican aspirants sit up and take notice, followed up his Michigan victory by capturing Nebraska. General Wood ran second for the state's preference and General Pershing was a rather poor third. It is said the Germans, who in the past have always supported Hitchcock, went into the Republican primaries almost solidly for Johnson, and that he also was given the Irish vote.

The Democratic national executive committee, in session in Chicago, selected Homer S. Cummings, chairman of the national committee, as temporary chairman and keynote sounder of the San Francisco convention. He was the choice of the administration and was chosen unanimously. E. G. Hoffman of Indiana, national vice chairman, will call the convention to order, and, of course, old Colonel Martin will be sergeant-at-arms, as usual. The Republican national committee will not name the temporary officers of the Chicago convention until next month, but already there is a strong movement to make former Senator Albert J. Beveridge temporary chairman and keynoter. It is believed Senators Lodge and Borah would withdraw in favor of the Indiana man.

The new national board of railway labor at its first session adopted a rule of procedure that put the finishing touches to the "outlaw" strike of switchmen and that will serve to discourage similar demonstrations in the future. In effect, this rule is that the board will not consider complaints from any persons who at the time are impeding transportation. At once the bottom fell out of the strike, which was on the point of collapsing, anyhow. During the week the leaders of the switchmen tried to have the strike called off, but the men accused them of selling them out. Many of the latter quietly sought their old places. The others must now obtain re-employment as new hands, having forfeited their seniority rights. Traffic conditions in Chicago, New York and other centers were improved, but not yet entirely restored. Along the Jersey City water front 700 freight handlers who had been on strike returned to work, their demand for $5 a day having been granted.

A serious fight took place at Butte, Mont., between striking I. W. W. miners and a sheriff's posse, in which one man was killed and 14 wounded. Governor Stewart was so alarmed by this and resulting disturbances that he asked General Liggett, commanding the western department, for federal troops. A detachment of the Twenty-first infantry was sent from Fort Wright, Wash.

About a dozen of the states of Mexico are now declared to have joined in the revolt against Carranza which started with the secession of Sonora. The bewhiskered president is not idle, however, and his forces under General Pina were reported to be massing for an attack on the Sonora troops on the Chihuahua boundary. There has been fighting close to Mexico City. At the close of the week there were hopes that an agreement would be reached by the Sonora officials and a peace mission that was on its way from the capital, but the revolt has spread over so much territory that it seems likely only the retirement of Carranza will put an end to hostilities. The government at Washington is watching developments closely but has given no indication that it would take sides in the quarrel.

The overall craze that is sweeping over the United States, though it can have little direct economic value, is an interesting expression of popular anger against the clothing profiteers. In isolated cases it already has caused some reduction of prices, but in general it must be regarded as a worthy demonstration that is likely to be taken up by faddists and distorted out of all reason.

We are still waiting to be told, authentically, how the cost of living can be lowered. The experts have been saying that increased production is the solution of the matter, but when one reads that American production is now on a basis of 40 per cent above domestic needs, and then looks at the prices demanded for all the necessities of life, one doesn't know what to think.

LABOR SHORTAGE NOW BEING FELT

Keep Rainy-Day and Wet-Land Jobs Out of Way of Rush Work in the Fields.

ONE OF IMPORTANT FACTORS

Farm Laborers and Tenants Are Caught by Lure of High Wages and Are Leaving Farms for Cities—Some Simple Rules.

(Prepared by the United States Department of Agriculture.)

Do nothing today which can be put off until tomorrow.

That is an apparent perversion of the ancient and excellent proverb, and most people may be inclined to look upon it as pernicious—but, properly interpreted, it is a sound principle in farm management and one that a great many farmers will particularly need to apply in the face of the shortage of labor with which this year's crops must be made. It applies to tasks that interfere with work in the fields at times when field work can be done. It does not mean procrastination. It means getting the indirectly productive work done in advance, if possible, but if it can't be done in advance put it off till the rush work in the fields is out of the way. It is one of the important factors, say farm-management specialists of the United States department of agriculture, in full utilization of farm labor.

Great Need This Year.

And full utilization is likely to be more important this year than it has ever been before. Reports coming to the department of agriculture from all sections of the country are to the effect that farm laborers and tenants are caught by the lure of high wages and are leaving the farms for the cities. A great many farmers, apparently, will be forced to carry on their operations this year with less help than they have ever had before. Unless such labor as is left on the farm is utilized to the best possible advantage, there is danger of a serious curtailment of production.

Farm-management specialists say, however, that a great deal can be accomplished toward helping production by getting the most out of the labor available. They lay down a few simple rules that they believe will help toward attaining this result.

The best farmer, they say, is the one who gets the other work out of the way and keeps the teams moving whenever the land is in condition for field work. The amount of products that a farmer can grow depends on getting the field work done when the weather will permit it. Nothing except necessary work like feeding and milking should be permitted to take men from the fields, and it planned where possible to things done and still keep working ten hours a day.

Plan no wet-land work, when there is work in the can be done. By wet-land meant such things as cut and brush in the fence row ing the fences, repairing buil a great many other necessary but things that can be done well when the ground is to plow.

Rainy-Day Work.

Leave no rainy-day work, rule says, to be done when raining, for profits are limited amount of outdoor work t done. Rainy-day work is work and if it is not done days it will have to be done fair days and will interfere work. It includes things that done under shelter, such as seed corn, mending the harn repairing tools.

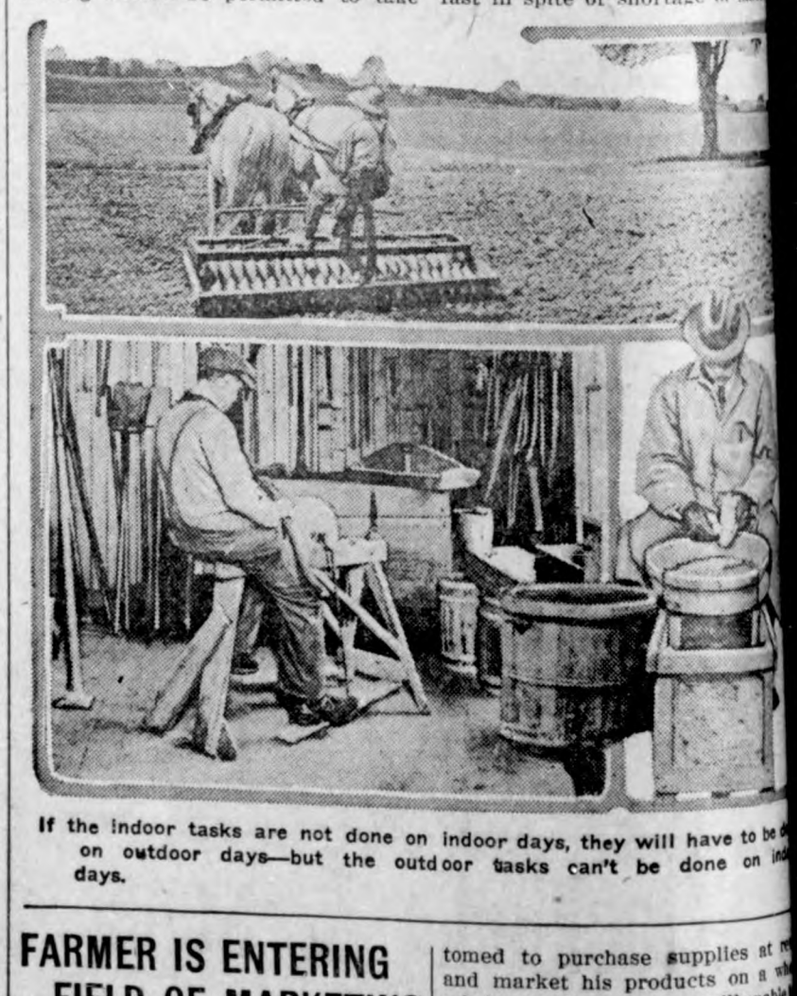
Jot down in a note book, th ists advise, the things that attention the next rainy day will enable you to plan you quickly when you get up some ing and find the rain pouring Do first the jobs that are in of getting in the way of the weather work.

Put in long days in rush with the assurance that you down on rainy days or when is over. And then comes the rule, "Do nothing today which well be put off till tomorrow." are a great many things that be put off till tomorrow. If oats is delayed until the w days of late spring, there will light harvest. If the corn is not tivated even for one week after old enough to cultivate, the fie be weedy and the crops poo dairy cows are neglected, the soon be no milk. This class of therefore, demands immediate tion. Put off the other things or less remote tomorrow wh rush work is out of the way.

Back to Old Proverb.

Then, when the rush work revert to the proverb in its form, "Put off nothing until row which can be done today." applies to work that may be d time within a wide latitude, b time comes when it cannot be any longer and it may stop the work. Seed corn, for example, be tested and shelled any time it is thoroughly cured, but if work is neglected until the fiel ready to plant, then that most able work in the cornfield may be layed. That is a fair illustrati "get-it-out-of-the-way" work.

It takes more planning, more ing, and more force of character this work, in seasons when there rush work than it does to concen on rush work. Only by using his can the farmer handle the "get-of-the-way" work in advance, b must apply the rule methodically unfailingly if he is to get ahead fast in spite of shortage of labor.



If the indoor tasks are not done on indoor days, they will have to be d on outdoor days—but the outdoor tasks can't be done on in days.

FARMER IS ENTERING FIELD OF MARKETING

Opportunity Offered to State and Federal Agencies.

Practice of Purchasing Supplies at Retail and Selling Products on Wholesale Basis Is Gradually Being Reversed.

Farmers' organizations, as well as the so-called regular dealers, need market information, and here state and federal agencies have a wide field for service because the farmer is actively entering the field of marketing. There are in this country today more than 15,000 farmers' business organizations, with a membership of approximately 2,000,000, according to the bureau of markets, United States department of agriculture. Almost all of these organizations are at local markets, but their extension in greater numbers to the terminal and distributing centers is only a matter of time. The farmer has been accustomed to purchase supplies at r and market his products on a wh sale basis. Organization will enable to purchase supplies at wholesale retain for himself some of the com sions of the middleman. More di marketing also is expected to re prices paid by consumers.

GENERAL FARM NOTES

Groom the cow twice daily, bef milking.

* * *

The sky is a poor roof under wh to store farm machinery.

* * *

Remove the manure from barn tw daily where animals are kept up day.

* * *

Keep the long hairs on the udd clipped back so they will not ca dirt so easily.

* * *

Success lies not in the number cows that a man keeps, but rather kind of cows he keeps.

SHOE POLISH

CHANGE IN PHYSIQUE

That Average Stature of American Men Was Affected by War Declared Untrue.

Wholesale clothing manufacturers that there has not been any in the size of their garments war. They are manufacturing garments, but the proportion sizes is no greater now than ree years ago. In short, their erns have not changed. Yet would be necessary if the statmerican men had been affectappreciable way by the year alf or two years of military

facturers of ready-to-wear nd undergarments agree with ing manufacturers that there no change in their size patspite the reports of numerous als who take "a size larger" an they did before the war. manufacturer put it, the proof soldiers who need larger shirts or suits today than they years ago is so small that it effect on wholesalers. Salesturally remember certain indiases of increased chest developut, taking the country by and here has been no appreciable in the physique of the male of the population, at least as eir clothing is concerned.

ot difficult to judge some men clothes—policemen and letter for example.

MARTHA JANE A DIPLOMAT

Even Stern Mamma Couldn't Deny She Had Obeyed the Strict Letter of the Law.

Martha Jane's sweet tooth had been indulged so much that her mother had issued the decree, "No more candy," and the raminder of the box had been relegated to the top shelf. A few days ago it was brought down and judiciously apportioned to Martha Jane, for whom a taste spelled more, and even a second taste did not satisfy. When her mother saw her about to take a third helping she remarked, emphatically:

"Now, don't let me see you take another piece."

Presently Mrs. S—— was called from the room, and when she returned she found her four-year-old daughter in the farthest corner of the couch, hastily making way with a nice, plump chocolate cream.

"Martha Jane," said her mother, in her sternest tones, "didn't I tell you not to let me see you take another piece of candy?"

"I know you did, mother," said the little diplomat, "but I took this one while you were gone."

Fact.

"Before I unchain the dog, answer me this: Are you one of these here bolsheviki?"

"No, madam; I'm just a plain hobo or bum."

"In that case, here's a piece of pie."—Philadelphia Bulletin.

DAIRY FACTS

COWS NOW HEAD PROCESSION

At Top of List of Farm Animals So Far as Value Is Concerned—Quality Is Improving.

The expansion which has been taking place steadily in the dairy industry of this country during the last seven years has at last put milk cows at the head of the list of farm animals so far as value is concerned. This is shown by a recent report by the bureau of crop estimates, United States department of agriculture. The value of these animals now exceeds that of horses and cattle other than milk cows, the two classes formerly standing higher on the list. On January 1 of this year there were approximately 23,747,000 milk cows in this country, an increase of 272,000 head, or 1.2 per cent, as compared with a year ago.

Head of Jersey—Milk Cows Now Lead All Other Farm Animals in Value.

Their aggregate value is placed at $2,021,681,000.

Ten years ago the average milk cow was worth $35.29, compared with $78.20 a year ago and $85.13 January 1, 1920. It is generally recognized that the quality of the milk cows of this country is improving at the same time that their number is increasing.

The class of cattle, consisting of calves, steers, bulls and cows, not kept for milk production and designated as "other cattle," shows a decrease of 700,000 head, or 1.6 per cent. Ten years ago the average value per head of animals in this class was $19.07, a year ago it was $44.22, and $43.14 this year. The number of "other cattle" in the country at the present time is approximately 44,385,000, and their value $1,914,575,000.

DRY CORN FODDER AS SILAGE

Cattle Like It and Do Well on It, but It Is Not as Good as That From Green Corn.

In reply to numerous inquiries on the feeding value of dry corn fodder in comparison with the fodder used as silage, H. H. Kildee, head of the Animal Husbandry Department of Iowa State college, says that the fodder put into the silo makes better feed than the dry fodder.

Many of the farmers have followed the practice of filling their silos with dry fodder after the silo has been emptied or nearly so. In almost every case the fodder will need the addition of considerable water to make good silage. The water may be put in the fan-box of the ensilage cutter. Many farmers, however, pump the water directly into the silo.

Silage made in this manner is not so good as that made from green corn. Cattle like it and do well on it. It is reported that last year farmers filled their silos as many as three times with dry fodder. The fodder was cut at the same time as the corn for ordinary silage and was left standing in the field until needed.

AVOID DIRECT HEAT OF SUN

Proper Care of Cans Must Be Taken in Transferring Milk to Station for Shipment.

In taking the cans of milk to the station for shipment, care should be exercised to see that they are covered with blankets in order to keep off the direct heat of the sun. Dairy supply houses handle special blankets for covering cans which it is highly desirable to use where milk is shipped for any distance and refrigerator cars are not supplied.

DAIRY NOTES

Keep the cows in clean quarters.

* * *

The profitable marketing of dairy products is very important.

* * *

Grass by itself is not considered a balanced ration for the milk cow.

* * *

The smaller the opening into which the milk goes the less the danger of dirt.

* * *

The general farmer is finding that the dairy cow is a valuable asset in his farming operations.

THAT FADED FROCK WILL DYE LIKE NEW

"Diamond Dyes" Freshen Up Old, Discarded Garments.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods,—dresses, blouses, stockings, skirts, children's coats, feathers—everything!

Direction Book in package tells how to diamond dye over any color. To match any material, have dealer show you "Diamond Dye" Color Card.—Adv.

Didn't Fill the Bill.

One day as Harold's father was hanging up a few pictures Harold begged him to let him hang one up. His father gave him a small one and walked into another room. When he returned he found Harold sitting in a chair puffing and mopping his forehead.

"What's the matter, son? Can't you get it up?"

"Naw. I guess I's too short at one end."

USES OF ASPIRIN

Bayer Company, who introduced Aspirin 18 years ago, give advice.

Aspirin created a sensation when introduced by Bayer over eighteen years ago. Physicians at once proved its wonderful efficiency in the relief of pain. The genuine, world-famous Aspirin, in "Bayer Tablets of Aspirin" is safely taken by millions for Colds, Headache, Rheumatism, Neuralgia, Earache, Toothache, Aching Joints, Neuritis, and Pain generally.

Be sure the "Bayer Cross," which is the mark of true "Bayer Tablets of Aspirin," is on each genuine package and each genuine tablet.

Boxes of 12 tablets cost but a few cents and contain proper directions. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

The Lord Helps Those, Etc.

Mrs. Johnson—How does yo' feel dis mawnin', Joe?

Mr. Johnson—I feels bad—mighty bad! I wish dat Providence would have mussy on me an' take me.

Mrs. Johnson—How can you expec' it to ef you don't take de doctor's medicine?

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Still Married.

Gerald—I tender you my hand.

Geraldine—It isn't legal tender. You are not divorced yet.

There are times when words fail a man—but if he has a wife it doesn't matter much.

Thousands of Women

Owe Their Health To

Lydia E. Pinkham's Vegetable Compound — overshadowing indeed is the success of this great medicine. Compared with it, all other medicines for women's ills seem to be experiments.

Why is it so successful? Simply because of its sterling worth. For over forty years it has had no equal. Women for two generations have depended upon it with confidence.

Thousands of Their Letters are on our files, which prove these statements to be facts, not mere boasting.

Here Are Two Sample Letters:

Mother and Daughter Helped.

Middleburg, Pa. — "I am glad to state that Lydia E. Pinkham's Vegetable Compound did me much good when I was 35 years old. I was run down with female trouble and was not able to do anything, could not walk for a year and could not work. I had treatment from a physician but did not gain. I read in the papers and books about Lydia E. Pinkham's Vegetable Compound and decided to try it. The first few bottles gave me relief and I kept on using it until I got better and was able to do my work. The Vegetable Compound also regulated my daughter when she was 15 years old. I can recommend Vegetable Compound as the best medicine I have ever used."—Mrs. W. YERGER, R. 3, Box 21, Middleburg, Pa.

Fall River, Mass. — "Three years ago I gave birth to a little girl and after she was born I did not pick up well. I doctored for two months and my condition remained the same. One day one of your little books was left at my door and my husband suggested that I try a bottle of Lydia E. Pinkham's Vegetable Compound. I started it immediately and I felt better and could eat better after the first bottle, and I continued taking it for some time. Last year I gave birth to a baby boy and had a much easier time as I took the Vegetable Compound for four months before baby came. On getting up I had no pains like I had before, and no dizziness, and in two weeks felt about as well as ever."—Mrs. THOMAS WILKINSON, 363 Columbia Street, Fall River, Mass.

Wise Is the Woman Who Insists Upon Having

Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO., LYNN, MASS.

Cause and Because.

"Doctor," said a beldam of a rural village, "can you tell me haw it is that some folks be born dumb?"

"Why — hem — why, certainly, madam," replied the doctor. "It is because they come into the world without the power of speech.

"Dear me!' remarked the old lady, "just to see what it is to have a physical edication. I be right glad I axed you. I've axed my old man a hundred times that there same question, and all he would say was: 'Cause they be.'"—Boston Transcript.

A Need Omitted.

"I see the treaty of Versailles was taken back to the White House wrapped in brown paper."

"They should have added vinegar in consideration of its wounds."

Charity.

The clergyman of a poor parish was showing a rich lady round, hoping to touch her heart and so receive a big check for his people.

"We are now passing through the poorest slums," he said, as the car turned into a side street. "These people have little to brighten their lives."

"I must do something for them," the lady sighed, adding to the chauffeur:

"James, drive the car slowly and turn on the big lamps."—Tit-Bits.

Plain Diagnosis.

"Here is the case of a physician arrested because he prescribed whisky for a patient without inquiring what the patient wanted the whisky for."

"Any dub could tell that without asking. The patient wanted a drink."

Another Royal Suggestion

DOUGHNUTS and CRULLERS

From the NEW ROYAL COOK BOOK

DOUGHNUTS made the doughboy happy during the war and no wonder. There is nothing more wholesome and delightful than doughnuts or crullers rightly made. Their rich, golden color and appetizing aroma will create an appetite quicker than anything else in the world.

Here are the famous doughnut and cruller recipes from the New Royal Cook Book.

Doughnuts

3 tablespoons shortening
⅔ cup sugar
1 egg
⅔ cup milk
1 teaspoon nutmeg
1 teaspoon salt
3 cups flour
4 teaspoons Royal Baking Powder

Cream shortening; add sugar and well-beaten egg; stir in milk; add nutmeg, salt, flour and baking powder which have been sifted together and enough additional flour to make dough stiff enough to roll. Roll out on floured board to about ⅛ inch thick; cut out. Fry in deep fat hot enough to brown a piece of bread in 60 seconds. Drain on unglazed paper and sprinkle with powdered sugar.

Afternoon Tea Doughnuts

2 eggs
6 tablespoons sugar
¼ teaspoon salt
½ teaspoon grated nutmeg
2 tablespoons shortening
6 tablespoons milk
2 cups flour
3 teaspoons Royal Baking Powder

Beat eggs until very light; add sugar, salt, nutmeg and melted shortening; add milk, and flour and baking powder which have been sifted together; mix well. Drop by teaspoons into deep hot fat and fry until brown. Drain well on unglazed paper and sprinkle lightly with powdered sugar.

Crullers

4 tablespoons shortening
1 cup sugar
2 eggs
2 cups flour
1 teaspoon cinnamon
½ teaspoon salt
3 teaspoons Royal Baking Powder
⅔ cup milk

Cream shortening; add sugar gradually and beaten eggs; sift together flour, cinnamon, salt and baking powder; add one-half and mix well; add milk and remainder of dry ingredients to make soft dough. Roll out on floured board to about ½ inch thick and cut into strips about 4 inches long and ½ inch wide; roll in hands and twist each strip and bring ends together. Fry in deep hot fat. Drain and roll in powdered sugar.

Local News!

Frank Perkins and family and Mrs. Geo. Stokesberry autoed to Corwith Tuesday for a visit with friends. Mr. Perkins is the gentleman who is employed at the Klemme Meat Market.

Mrs. N. G. Moberly received a telegram Sunday stating that her father had died at Farm City, Illinois. Mrs. Moberly left here Monday night for that place.

The County Clerk reports that all petit jurors are excused until May 18. Grand jury will report Tues. May 11.

A number of our local fishermen have been at the river the past few days tempting the fish with nice big fat worms. A few brought home some good catches, but most reported no luck.

Carl Beier returned last week from Kansas City, Mo., where he was attending an auto and tractor school. He came home on account of a small pox epidemic as the school would soon close.

Mrs. Oscar Rice and baby from Clarion, came Tuesday for a visit at the Musfelt home. Mrs. Fred Musfelt and little Laura Lanahan who have been at Clarion for the past two weeks, returned with Mrs. Rice.

The other day Chris Blumer got his hand caught in the polishing machine at Wellemeyer's. The belt came off and wrapped around his hand pulling it into the brushes and cutting and bruising the fingers.

Did you notice the eclipse of the moon Sunday evening? Perhaps not but perhaps some of the young men ad ladies of the tow can tell you all about it, as doubtless some of the "star gazers" noticed it.

John Opsal has been suffering with a sore arm for the past week but at this time he is much better. The rouble started from a pin scratching his arm and blood poisoning was evidently setting in as the arm was swelled up considerable.

Mr. and Mrs. Charlie Suckow left last Wednesday evening for their home at Centerville, Iowa, after two or three weeks' visit with Klemme relatives and friends. While here Mr. Suckow did the interior decorating of he Liberty Township church.

Mr. and Mrs. H. L. Smith and baby returned to Fort Atkinson, Wis., Friday afternoon after a week's visit with Klemme relatives and friends. Mrs. Smith was formerly Florence Sampson of this place. They were also accompanied by Miss Viola Sampson who will spend the summer at Fort Atkinson.

Hermoline

A BETTER LUBRICANT

—FROM THE FORMULA OF A MOTOR COMPANY

1,000,000 Gallons Used in 1919

HERMOLINE is not a new lubricant—it is a better lubricant.

For the past six years it has been used by thousands of motorists, who desired to secure the advantages of better lubrication. Over 1.000.000 gallons of HERMOLINE were used in 1919.

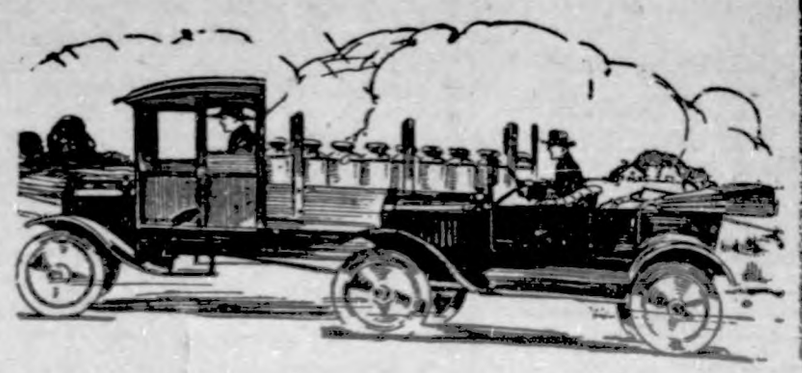
HERMOLINE is a better lubricant because it is made strictly from Pennsylvania crude—and it has long been known that motor lubricants made from Pennsyluania crude are superior to all others HERMOLINE is a better lubricant because it will retain its body under the most excessive heat developed in your motor, because it will keep a constant film of oil over the working parts, providing perfect lubrication under all conditions—because it will keep cylinders, valves and spark plugs in good condition and because it will make for smoother operation and longer life of the motor car, truck or tractor in which it is used.

The reason why you will find it hard to get a strictly Pennsylvania base lubricant of this sort, other than HERMOLINE, is because the supply of Pennsylvania crude is limited. But by limiting the sale of HERMOLINE to a few states, it is possible for motor car, truck and tractor owners in these states to secure this better lubricant.

Buy your HERMOLINE from us. Let us explain the advantage of buying it by the can or barrel.

Put it to any test you like, HERMOLINE is the lubricant you should insist on.

E. G. ELL
Klemme, Ia.



The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.
The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove all value.

T OUT THE OLD HOOK AND LINE, BOYS!

turday is the biggest day in the dar for most red blooded men in ountry and especially in this neck e woods, for on that day a fellow allow forth after the finny tribe ut fear of being nabbed by a warden just after he has caught e string of fish. Saturday, May opens the season for fishing fish in Iowa lakes and streams ated in the Iowa Fish and Game The law further states that "no n shall use more than two lines, one hook upon each line, in still g—or in trolling a spoonhook osed of three hooks fastened to- r may be used." Nor shall any n take more than forty game fish s, pike, crappies, pickerel, or r game fish) all together of diff- t kinds, nor can he take more twenty of one kind of bass, pike ickerel. Regardig the size of fish out as follows—black bass must not be smaller than eleven inches in length, striped or white bass must be eight iches, pike fifteen inches, pickerel eighteen inches. It might be well for some to remember these laws as it will save them a lot of trouble in the event they should meet up with a game warden and they had more than the limit, or fish too small.

Well, let's get the gang together boys, and go fishing the first day again and then come home and tell about "that big one that got away, gee whiz, he almost pulled the boat over" etc.

Origin of Garden Carrot.

Wild carrot or Queen Anne's lace (Daucus carota) is thought to be the plant from which the cultivated garden carrot originated. The garden carrot, if allowed to grow unmolested for several years, gradually loses the highly developed crown-tuber for which it is valued as a vegetable, and becomes indistinguishable from the ordinary wild carrot.

KODAKS

We have the Eastman line of Kodaks in all sizes and prices. You will want a Kodok to take with you on your trips this summer.

We also carry a full line of films, film packs, developers, papers and supplies.

Leave your films here for developing and finishing by experts who do our work and who give best satisfaction.

NIGGER GOES TO LODGE

Depot Agent M. O. Barr has a very smart dog by name of Nigger. Now Monday night Mr. Barr went to lodge as he usually does on Monday night, and dog Nigger had to stay home as dogs are ot allowed as regular members in the Klemme lodge. However, a little later, Nigger perhaps thought as long as his master could go to lodge he could also, and with this intention he started out. He must have sneaked by the first guardian of the door to the wearers of the three links for he was not discovered until he got into the lodge room proper. We don't know yet how Nigger got by with the pass word but he might have got it from the goat in the ante-room, anyway, he got into the place and also got out again in a much bigger hurry. He probably will give it up as a bad job for as close as he can come to wearing the "three links" would be a dog chain.

EVANGELISTIC SERVICES BEGAN SUNDAY

Evangelist Frank McKeegen is here and began the campaign last Sunday at the First Methodist Church in the morning. In the evening he spoke at the M. E. church and continues his sermons there in the evening for the balance of the week. His talks are interesting and instructive and it is well worth anyone's time to go and hear him. He will be here for three weeks.

The husband arrived home much later than usual "from the office." He took off his shoes and stole into the bedroom. His wife began to stir. Quickly the panicstricken man went to the cradle of his first-born and began to rock it vigorously. "What are you doing there, Robert?" queried his wife. "I've been sitting here nearly two hours trping to get this baby to sleep," he growled. "Why, Robert, I've got him in bed with me," replied his wife. Then there were words.

KLEMME HIGH BEATS MESERVEY

The Meservey High School team came over last Friday afternoon in autos to have a baseball game with the Klemme High School. It was the first game of the season for both the teams but showed that the Klemme players were far superior. The teams agreed to play seven innings and when the Klemme men had nailed six scores to the home bag and Meservey had but one, the visiting team gave up the chase and quit before the Klemme sluggers took the last bat, otherwise they might have run up a dozen more scores as our boys said they were just beginning to warm into the game.

We believe the boys have the "makings" for a real bunch of baseball playrs. They of course need some coaching in batting work, base running and good plays, but they will get there soon. They have some other games scheduled for the season besides a return game with Meservey at that place.

LAST "ROASTING" PLACE

A Humboldt editor is having a warm time with one of his subscribers. The patron's father died and, in the obituary notice, the publisher stated that a large number of people followed the remains to their last "roasting" place." The relatives demanded a change of the word roasting to resting, but the editor was game and refused to grant the request unless seven years' back subscription would be settled. As a sudden call may come to our readers who are delinquent, they should step in and square up.—Algona Republican.

Didn't Forget His Manners.

Bobbie had been tol often that if he stumbled over or in front of an older person to say "Excuse me." One morning he fell downstairs, landing in a little huddled up heap. His mother, expecting an outburst, was surprised to see him manfully pick himself up and say " 'Scuse me."

PAINFUL ACCIDENT

Lawrence Retliff met with a painful accident Saturday while discing. He was repairing in front of the machine when the horses started up, knocking him down, drawing the disc partly over him stopping with the disc on top of him. He was compelled to start the horses and have them draw the disc on over him before he could be released.

He was able to drive the horses to the house but received some severe cuts and a broken arm.—Belmond Independent.

While driving his car around the mail route last Saturday Harry Bonwell saw a crow drop something from the air. The object fel in the grass at the roadside with the crow in hot pursuit. Harry turned on the gas and beat the crow to its prey which proved to be a little chicken which had not been injured in the least. Harry rescued the orphan and will undertake to raise it to frying size at which time its gender and pedigree will no doubt determine the length of its life. —Renwick Times.

The editor of a newspaper of a certain small southern town was given an article to print, praising in very elegant language the life and works of a certain Southern Colonel. The Colonel and the Editor were not the best of friends. The article came out, but in spelling "scarred", in that very important phrase, "battle scarred veteran," one "r" was omitted. The Colonel threatened violence but the Editor promised to admit his error in the next issue. In the following issue in large type appeared:—"The Editor of this paper regrets very much an error in spelling in our last issue. In describing our most worthy Colonel, instead of "battle scared veteran" it hould have read, "bottle scarred veteran." That day the Editor ceased to dit. His wife was a widow.

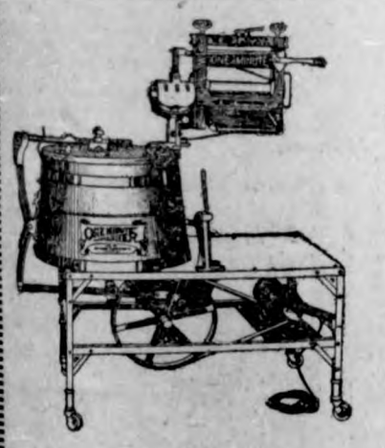
Four bids on the proposed paving, xcavating, and tiling of the Daniel Boone trail from Algona to the Rock Island tracks north of Bancroft, (the lowest of which was $4.30 by a newly rganized local paving company), were rejected by the board of supervisors at the meeting held at Algona last week, Tuesday. Only one member of the board of supervisors voted n favor of letting the contract, and hat was W. J. Anderson. However under the state law, it is possible for the board to reconsider the paving proposition and let the contract for he same, prvided the contract price does not exceed the low bid at the last regular meeting. The board, in our estimation, acted very wisely in deferring the paving proposition for the present, at least with the present extremely high cost of everything and he shortage of materials.—Fenton Reporter.

Starlings by the Million.

Starlings in Europe traditionally (and actually) congregate in such great flights that their millions darken the sky like a passing cloud. They are the terror of the fruit grower, but they do at least one compensative service by eating the destructive land snails which are very numerous, and with which the United States is not similarly afflicted.

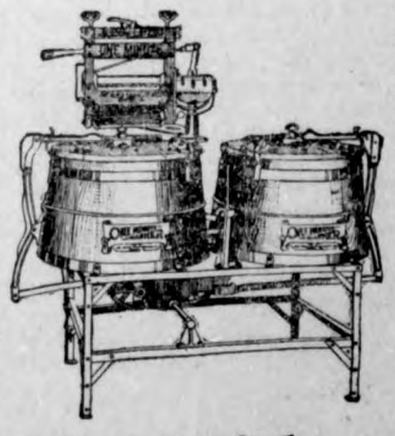
Over One Million Satisfied Users of "One Minute" washing machines!

Many Satisfied Users in Klemme and Vicinity!



The simplest washing machines on the market, less parts, takes up less room, easily moved about on casters. Tub is made of best cypress which is a nonconductor and holds the heat. It puts the clothes on the line at nine.

The machine is made in both single and double tubs and either equiped with electric motor power fixture to be run by your own engines. All machines have swinging, power run wringers; nothing to get out of order.



We have just received a half car load of these machines--several are already sold; come in now and get yours. Let us give you a demonstration, or try it in your own home.

The Times "Devil" Says

Dubuque's street car strike was settled with an 8-cent fare allowed by the city commission and seven tickets for 50 cents. The 8-cent fare, seven rides for 50 cents is an increase from 7 cents or four rides for 25. The car men will be raised from 42 cents to a maximum of 60 cents.

Two hundred and fifty sweeet potato plants will be given to each of 100 boys ond girls by the Benton County Fair association. This is to create interest in a new and profitable crop in Benton county. This number of plants will be enough to set out a row ten rods long and should produce with good care 15 bushels of sweet potatoes.

At an election held at Ayrshire to pass on issuing $65,000 additional bonds to complete the consolidated school building at that place, the proposition carried. The original amount voted last fall was $125,000. In this contest 128 voted for the proposition and 39 against it. Four ladies voted "no." The additional amount will make the building cost $190,000.

Robert Armstrong of Fontanelle was tethering one of his horses on the grass in the dooryard when he handed the rope to his six-year-old son, Charles, to hold while the father went to the barn on a short errand. The horse, although being ordinarily gentle, became frightened and ran away. The boy had wrapped the rope about his wrist and was dragged to his death.

A recent storm drove some strange fowls under cover in the vicinity of Cascade. One of the wanderers was captured and it was identified as a night heron. Two years ago a large flock of sea gulls visited that community, something never before heard of. According to a bird specialist of national repute, during certain seasons there are flocks of birds constantly passing to and fro above, far too high to be discernible to the naked eye, going from coast to coast and from tropics to the north.

A 35,000,000-ton vein of coal will be opened up within ten miles of Des Moines during the next 30 days. It is the biggest vein of coal in the state and the richest to be found in Iowa. Leases covering 10,000 acres of farm land have been secured and more than 125 holes have been drilled to test the land. The coal lies between 275 and 375 feet under ground and the vein averages four feet, eight inches in thickness. In addition, there are from 40 to 50 feet of slate covering it.

Iowa people use their highways more than is commonly supposed. The traffic on the roads consists of 91.1 per cent of state people with only 6.9 per cent of interstate tourists. Tonnage on Iowa highways is enormous, and shows the need of roads of great durability. Passenger automobiles lead the traffic list, most of these being Iowa cars. The present condition of the highways does not encourage truck travel. Ninety per cent of the tonnage on the highways is motor-driven. It is shown conclusively that the travel on any main road is beyond the strength of a gravel road, which many people seem to think is the best material with which to build.

A religious census has been taken of the 4,000 students at the Iowa State college. The result shows adherents to 43 different religious sects. The list includes, besides the leading denominations, such others as Hinduism, Jewish Catholic, Havagschwan church, Spiritualism, Mormonism, Armenian Gregarian, Judean, Greek orthodox and Free Thinkers. Sixty-five per cent of the student body answered "yes" to the question whether they were church members. Of the remainder, 22 per cent expressed a church preference, although not members, and only 11.9 per cent said they were not members or failed to express themselves at all. Of the men students 63 per cent are church members, 23 per cent are not members but expressed a church preference and 13 per cent had no preference. Of the women students, 73 per cent are church members, 18 per cent are not members but expressed a preference and only 9 per cent have neither a membership nor a church preference. The total student membership of the principal denominations at the time of the census was as follows: Methodist, 986; Presbyterian, 373; Congregational, 198; Christian, 230; Baptist, 164; Lutheran, 158; Catholic, 155; Episcopal, 60.

Erastus Coffin, seventy-eight years old, pioneer Mahaska county settler, ended his life by hanging himself in the barn at the rear of his Oskaloosa home. No reason for the suicide is known. He was an active Republican, a veteran of the Civil war and a prominent resident of Oskaloosa.

Eleven girls and not one boy is the graduating record of Jewell high school this spring. The senior class, which will be graduated in about thirty days, is composed exclusively of girls this year, something never known to happen there before.

Almost Good for Nothing.

"Judging from the paltry salaries some of our ministers are paid," observed the near cynic, "one might say with truth that they are good for almost nothing."

Home Town Helps

HOME GARDEN STILL NEEDED

All Food Thus Raised Is a Distinct Gain, Helping to Overcome World's Shortage.

It has been proved that organization will effect a material increase in the supply of food products. During the war home gardening was carried on to an extent that very greatly relieved the shortage. Many families supplied their tables with vegetables entirely out of their own garden plots. Every ton of food thus raised is a gain. What is needed now is organization, and this should be effected as a preliminary step. If the people will support this movement, in full recognition of its importance, a great acreage will be added to the productive area of the country. The farm lands that heretofore have produced market truck will probably be devoted to other staples, or possibly to grazing. There will be no waste land, but, on the contrary, more land under cultivation.

The seriousness of this situation cannot be too strongly urged. Every person who is in a position to become a gardener during the coming season should do his bit for the relief of the country from the food stringency.—Washington Star.

PATH OF GOOD CITIZENSHIP

Oath Taken by Residents of Old Athens Might Be Revived Today With Good Results.

As a part of the campaign to "sell Indianapolis to its own citizens," those in charge of arrangements for the convention of the Associated Advertising Clubs of the World have written what they term a sales contract which will be distributed among clubs and other organizations. The contract is a reminder of the oath that residents of Athens took centuries ago. It said:

"We will never bring disgrace on this, our city, by an act of dishonesty or cowardice.

"We will fight for the ideals and sacred things of the city, both alone and with many.

"We will revere and obey the city's laws, and we will do our best to incite a like reverence and respect in those about us who are prone to annul them or set them at naught.

"We will strive increasingly to quicken the public's sense of civic duty.

"Thus in all these ways we will transmit this city, not only not less, but greater, better and more beautiful than it was transmitted to us."

Beautify the Home.

There are so many native shrubs, vines and flowers to be planted about the farm homes that their absence is a deplorable fact. In a recent drive of a thousand miles we saw only four farmhouses where attention had been paid to beautifying them. Naturally, they were noticed. Don't dot the lawn with fantastic flower beds of annual flowers. Put hardy shrubs around the foundation, the taller growing ones behind. Then in front of these plant the perennial flowers such as iris, crocus, narcissus, peony, sweet william, phlox, etc. Keep the lawn open. A few ivy or wild grape vines make a hideous outhouse less noticeable. Shrubs can be transplanted in November. Get as much soil with them as possible and tamp the roots firmly in place.—Farm Life.

Home Always Good Investment.

There are many estimable citizens who do not own a home, but that does not disprove the fact that homeowning is a cure for unrest and the nomadic instincts. With persons of small means, the ownership of a home implies sacrifice and discipline. The character of the home builder not only becomes stronger, but he imbibes unconsciously the essence of patriotism. He upholds American institutions, because he is a part of them.

There may be other methods of turning one's savings to profitable account besides buying or building a permanent home. But there is no other method that gives more solid returns in confidence for the future, in family protection, and in Americanization of ideals.—Chicago Journal.

Plan Home Wisely.

The attractiveness of a home isn't dependent on the amount of money spent on it. A small and inexpensive house may be as beautiful in its way as a large and costly mansion. The essential thing isn't the cost. It is the good taste of the designer.

The old lesson is repeated. "With what do you mix your colors?" was the question put to the famous painter. "With brains, sir," was the retort. The house needs to be designed and planned with brains.

Pays to Own Home.

A citizen who owns his home, no matter what his vocation, is a more responsible member of the community, as well as more advanced in an assured standard of comfort and prosperous employment. To own a home is a long step toward the possession of a substantial income, and one in which the dividends are secure and always timely.

NEWS REVIEW OF CURRENT EVENTS

Herbert Hoover Clears His Political Position and Announces He Will Accept Republican Nomination.

GERMANY GROWS MORE QUIET

Emir Feisel an Accomplished Trouble-Maker—Mustapha Kemal Stirs Feeling Against Christians—Denmark in the Limelight—Daylight Saving Confuses.

By E. F. CLIPSON.

Mystery regarding the political position and party affiliations of Herbert Hoover has been dispelled by the announcement of his conditional willingness to accept the Republican presidential nomination. He has said that he will accept if it is felt that the issues necessitate it and it is demanded of him, and further clarifies his attitude in the following words:

"If the Republican party—with the independent element, of which I am naturally affiliated—adopts a forward-looking, liberal, constructive platform on the treaty and on our economic issues, and if the party proposes measures for sound business administration of the country, and is neither reactionary nor radical in its approach to our great domestic questions, and is backed by men who undoubtedly assure the consummation of these policies and measures, I will give it my entire support."

Although Mr. Hoover's declaration created somewhat of a sensation, it relieved the tension existing in the camps of other candidates. Surrounded by silence and secrecy, his attitude had occasioned more or less quaking in both Republican and Democratic strongholds. No one prominent on either side felt like hurling a javelin at him for fear that it might rebound and act as a boomerang. Each party wanted his support and the competition had been so keen as to take on the characteristics of a race, with each side endeavoring to get to him and land him first.

Mystery entered the situation some weeks ago when Secretary of the Navy Daniels, positively refusing to give a name, but speaking most emphatically and authoritatively, said he knew who the next president of the United States would be. The most active guessers were practically unanimous in the theory that the secretary had in mind Mr. Hoover, and that the food man had made promises or had definitely committed himself to the Democratic party. The theory as to the definiteness was modified later when Mr. Hoover, pushed to some extremity for a declaration as to his political affiliations, stated that he had of late years been aligned with the Progressive Republicans. In the congressional elections of 1918 he appeared to favor the Democrats, and made some statements indorsing the leading policies of President Wilson.

The action of Mr. Hoover has brought the political pot from a more or less simmering state to an actual boiling point. His entry makes him a strong contender for the Republican nomination, and his declaration of principles will have much to do with preventing both parties from adopting either extreme reactionary or extreme radical viewpoints. He has stated that no one should be able to dictate the policies of great parties, yet every man and woman has a right to decide what issues and measures he will support. He thus creates a position which makes it possible for him to repudiate both parties after their national conventions. Some observers see in this a hint that if the candidates and platforms of the two parties do not satisfy the liberal thought of the nation, Mr. Hoover will be willing to support a third and independent ticket. Meanwhile several booms have already been affected by his entry into the race. His supporters are engaged in an active campaign. In the Minnesota primary, where it was necessary to write or paste his name on the ballot, he showed unexpected strength, and he looms strong in several state primaries which are to come.

The money question, as usual, enters into the political situation. Senator Borah charges the managers of General Wood and Governor Lowden with using unwarranted sums. Denials come from both candidates, with an expression of willingness to have their expenditures probed. Inasmuch as the legitimate expenses of such campaigns require large funds, it is difficult to see how any candidate can make much of a showing without them. Former Secretary McAdoo reflects this condition when he states that he has no fund, therefore is not a candidate.

In Germany, the coalition cabinet headed by Herr Mueller promises to remain in power until the elections, early in June. Concessions to the labor element had much to do with stifling the radical crisis in the Ruhr basin. Spasmodic hostilities in that and adjacent areas had not been completely suppressed, but the outbreaks had taken on a guerrilla aspect, with the red forces disintegrating under lack of supplies, poor discipline and inefficient leadership. Considerable of a bluff to affect enforcement of the terms of the treaty of Versailles seems evident in the Ruhr and contiguous situations. If the Ebert government had been permitted to send troops into the neutral zone, it would have suspended one of the important provisions of the treaty. The weakening of this one provision could have been made the basis for assaults upon other portions of the covenant, with a gradual and possibly complete defeat of the unfulfilled terms.

Settlement of the German crisis is not absolute. Factional disturbances are occurring, and are likely to continue, but that an ultimate condition resembling order will be brought about is not unlikely. The effect which the troubles have had on foreign credits, so necessary to Germany, and the consequent withholding of food supplies, raw materials, etc., has had a profound influence on the nation as a whole. One of the most disastrous consequences following the Kapp-Luettwitz revolution and later troubles has been the effect upon the morale of German workmen. They are reported as loitering on their jobs, discontented and strongly imbued with the feeling of ill treatment. Production is in an unhealthy state; precisely what the red leaders desire for the furtherance of their designs.

Emir Feisel, who lately proclaimed himself king of Syria, looms as an adjunct in a class with D'Annunzio, Mustapha Kemal and other trouble makers. Self-determination for Syria is not only his fetish, but he is for the complete independence of the country; wishes both French and British troops sent home at once, and all zones of influence by other nations abolished. His activities and the working out of his designs are being watched by the Jews of the world, as a complete fulfillment of his program would render impossible the establishment of the proposed Zion nation. Mustapha Kemal, nationalist leader in Turkey, continues his campaign to stir up feeling against Christians in Asia Minor. In a recent proclamation he deposes the sultan as chief of the Moslem world, and raises a call to arms throughout Islam. Fortunately his influence is not general as yet, but there is no denying the fact that he is an important factor, with a strong following in Turkish politics and a growing ability to create antagonism to the allies and all Christians.

Ludwig C. A. K. Martens, self-styled soviet envoy to the United States appears to be the next prominent candidate for deportation. Martens contended in an investigation held by the senate committee on foreign relations that the bolshevik government had not interfered in the internal affairs of the United States. At the same time the state department had secured and has now made public a series of soviet dispatches inciting American bolshevists to violence and the overthrow of the present form of the government of the United States. The dispatches were found on the person of a soviet courier captured at Riga, en route to this country. The department of justice announces a perfect case against Martens.

Denmark, which before had been regarded as placid, busy, and opulent from profits accruing through the great war, shows a strong disposition to get into the limelight of disturbance. Social democrats have been active for abolition of the monarchy, a general strike and the inauguration of a republic. A strong display of military force enabled the government to meet the first outbreaks of trouble successfully. Coming as it did with other European uprisings, the assumption that it is connected with them and part of a general plan is not unwarranted. The prosperous condition of the country is the principal augury for lack of success of any radical designs.

Daylight saving has become a local issue throughout the country, with the prospect of rather chaotic conditions in regard to time reckoning and many consequent dilemmas. New York city, which by the sun is only one hour ahead of Chicago and other mid-western points, by the adoption of daylight saving becomes two hours ahead. Communities which turn the clock ahead one hour will be that much at variance in time with others in the same longitude which do not take the same action. Railroads of course will stick to a standardized schedule, but that portion of the public moving from one place to another is sure to encounter confusion. So far the difficulty asserts itself in the financial relationships of different parts of the country, with the bankers hampered by the varying conditions. The only alternative if New York persists in the new schedule, seems to be for mid-western and western bankers to arise an hour earlier.

The freak tornado which visited Alabama, Georgia, Illinois, Indiana, Michigan, Missouri and Ohio took a toll of nearly 200 lives, with hundreds more in the injured list. Chicago and vicinity suffered heaviest, with Georgia next in the number of casualties. The storm was not only unusual in the area covered, but in the shifting of the centers of intensity and the fact that it visited regions which were considered ordinarily immune from such dangers. The latter was especially true in the vicinity of Lake Michigan, where scientists have always claimed the existence of such a body of water neutralized the menace of severe windstorms. Another freak of the storm which has affected scientific theories and established a new precedent was its coming so early in the year. Such visitations in the United States had before been almost exclusively confined to summer months and generally followed severely hot weather. The late demonstration is regarded as one of the vagaries of the month of March.

The international monetary situation has been eased considerably through the shipment of British gold to the United States. This has lessened the strain on British credit and while it has depleted to some extent one of their most valuable home resources, it has improved their position abroad and increased the standing in international markets of the British pound. This has been reflected in advanced quotations for pounds sterling. With every advance their purchasing power increases. France shows an improving position in the evident intention of the nation to economize and to finance itself from its own resources. The great confidence of the French nation and its latent financial strength are seen in its ability to float huge loans at home.

Defeat of suffrage in Delaware leaving the amendment short one state of the 36 necessary for ratification, puts the issue in the delayed class for the present. The National Woman's party and others prominent in the cause, pin slight hopes to favorable action in Louisiana, North Carolina, Vermont, or Connecticut. In Louisiana the legislature meets May 10. Governor Bickett is said to be favorable to a special session of the North Carolina legislature in July. Suffrage adherents will endeavor to win both states although they have received little encouragement as yet in the South. The governors of Vermont and Connecticut have refused to call special sessions of their legislatures and to get consideration in either of those states, suffrage forces will have to overcome the announced objections of the governors

A FAILURE

By LILLIAN R. READ

(©, 1920, by McClure Newspaper Syndicate.)

The ice on Placid lake was at its best, and the skaters glided merrily over its smooth, translucent surface in great numbers.

Among them, on this particular afternoon, was Doris Ruskin, who was being pursued by three of the most popular young men of the town, each of whom sought the privilege of accompanying her home. But the girl was a dexterous skater, and she led them a merry chase around the lake, keeping well ahead of them until she was nearly exhausted. Then in her excitement, as she turned her head to see how closely she was pursued, she bumped into somebody with great force, and they both went sprawling on the ice.

"Oh, Billy, I'm sorry. Did I hurt you?" She could not restrain her laughter when she saw the blank look on his face as he picked himself up and clumsily assisted her to her feet.

"No. Are you hurt?"

Doris had turned her ankle, and found that she could not walk without support. "I guess I hurt my ankle," she said. "Would you mind taking off my skates?"

He assisted her to a seat on the shore, and proceeded to remove the skates. He was very much confused at first, for Billy Weston was not at all popular among the young people of the town, especially the girls. Even in high school he had been regarded by his classmates as a queer sort of a chap.

But Doris Ruskin, who had been in his class, had always pitied him, and wished that they might become better acquainted, so she took this opportunity. "I guess I'll have to ask you to assist me home, Billy, for I really can't walk alone."

She chatted gaily all the way home, telling of her experience at a business college, and later of her new position in the bank.

"By the way, Billy, what have you been doing since graduation?" she inquired.

The boy's head drooped. What had he done? All he could truthfully say was, "Nothing."

"Why," the girl ejaculated, "I thought you were going to be a newspaper man. You always had such big ideas at school, you know."

"Yes, that's just it, Doris, big ideas and that is all. I just can't get anywhere. I've written and written, stories, advertisements and everything else, but no one would buy them. 'No pep,' they always say. And here I am, broke, without even a typewriter. That would help me immensely in my writing, but—oh, what's the use!"

"You poor boy," Doris said, consolingly. "I wish I could help you."

"Thanks, but it's no use. I'm a hopeless failure.

They had reached her home, and as he turned to leave he took her hand. "Doris," he said, softly, "I don't know why I told you all that I did. Somehow you seemed so friendly and kind—so different from the others."

"I'm glad you did tell me," Doris said, "for I think I can help you. Won't you come over tomorrow evening and bring some of the ads you have written? I have a typewriter, you know, and I should like very much to see some of your work."

The next evening Billy came, and they sat down together to look over his work. "These ads are great!" the girl cried enthusiastically.

It was several hours later when they looked at the clock, and Billy arose to leave. They had worked hard and accomplished a lot of work.

"Now, Mr. Billy," spoke the "general manager," "tomorrow the big work begins. You take these ads and show them to the managers of all the principal stores in town. Tell them that they need your ads; that the use of them in the daily newspapers will double and treble their trade. Make them buy. Don't take 'No' for an answer."

The next evening Billy rushed into Doris' house without even ringing the bell. He was brimming over with enthusiasm, and his dark eyes sparkled as they had not sparkled in years. "They took 'em!" he cried. "Thought they were great. I've sold every one and have orders for more."

The good work continued, and for weeks and months the two labored on untiringly, selling their work as fast as they could produce it. Then the climax came. A large newspaper concern in a nearby city heard of Weston's work, and he obtained a very promising position as assistant advertising manager.

On the evening before his departure for the city, he called on Doris, and found her strolling in the garden. Billy thought she looked more beautiful than ever; but, for the first time, he noticed a tired, worn-out expression on her face, which had always been so happy and smiling. Words failed him for the moment, as he gazed lovingly at the girl who had made a man of him, and made his life worth living. Suddenly he took her hand and pressed it fervently to his lips. "Doris," he whispered, "you have worked hard for me, and worn yourself out, and I haven't even thanked you. I did not realize until just now how much you have done. Dearest, I can't think of going ahead alone, for I want you always to be my 'general manager.' Will you come?" She answered with a shy little nod, and he drew her into his arms.

ASPIRIN—Its Uses

First Introduced by "Bayer" in the Year 1900

The name "Bayer" identifies the true, world-famous Aspirin prescribed by physicians for nineteen years. The name "Bayer" means genuine Aspirin proved safe by millions of people.

In each unbroken package of "Bayer Tablets of Aspirin" you are told how to safely take this genuine Aspirin for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis and Pain generally.

Always say "Bayer" when buying Aspirin. Then look for the safety "Bayer Cross" on the package and on the tablets.

Handy tin boxes of twelve tablets cost but a few cents. Druggists also sell larger packages.

Aspirin is trade mark of Bayer Manufacture Monoaceticacidester of Salicylicacid

Mistaken Locality.

Say, is a shipment of liquor to go this vessel?" "No; this vessel is ng to a dry dock."

LIFT OFF CORNS WITH FINGERS

Doesn't hurt a bit and costs only few cents

Magic! Just drop a little Freezone that touchy corn, instantly it stops ching, then you lift the corn off with e fingers! Truly! No humbug! Try Freezone! Your druggist sells tiny bottle for a few cents, sufficient rid your feet of every hard corn, ft corn, or corn between the toes, nd calluses, without one particle of ain, soreness or irritation. Freezone the discovery of a noted Cincinnati enius.—Adv.

MONKS MADE FIRST PANCAKES

elicious Comestibles Once Formed Supper of Holy Men on Eve of Ash Wednesday.

Perhaps you admit ignorance as to nowing how pancakes first came to e produced? Well, the story is very nteresting and worth telling, London nswers says.

Monks were the originators of pankes, and we are told that on Shrove uesday their supper consisted of thin akes, made in a pan with flour, milk, ggs, fat, lard, etc.—hence pancakes. The idea was to use up all the foodstuffs remaining, which were prohibited on the following day—Ash Wednesday, the commencement of Lent. In the olden days the poor people would gather round various monastery gates, it being the custom for the monks to distribute what pancakes they had left after supper among the hungry and slum dwellers.

Shrovetide, and Shrove Tuesday by the way, were, in the first place, called shrive days. They were so called from the fact that in the Roman Catholic church confessions are then made and received preparatory to the fast of Lent. Shrive, which meant confession, later came to be called Shrove—thus we now get Shrove Sunday and Shrove Tuesday.

Naturally

"There is no royal road to good writing." "Of course not. You have to begin by taking a subject."

If a man should wear a red coat, a green vest and yellow trousers, he would feel that life isn't serious.

25 MILLIONS!

"Cascarets" is biggest selling Laxative-Cathartic for Liver and Bowels

Twenty-five million boxes of Cascarets were sold last year to folks who wanted relief without injury, from Constipation, Biliousness, Indigestion, Gases, Colds and Sick Headache. Cascarets work while you sleep, removing the toxins, poisons and sour, indigestible waste without griping or inconvenience. Cascarets regulate by strengthening the bowel muscles. They never weaken or shock the liver like calomel or harsh pills. Cascarets cost so little too.—Adv.

He that can have patience can have what he will.—Franklin.

Cuticura Comforts Baby's Skin

When red, rough and itching with hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Adv.

Electricity in Next War.

That the use of high explosives in modern warfare has about reached the end of its development, is the opinion of a French inventor of one powerful compound of that nature. Neither can poisonous gases, it is indicated, be made much more dangerous than were those contrived in the world war. Flying mechanisms of various types promise much greater menace, and it is probable that any new developments in scientific warfare visible in the next international disagreement will be electrical in their nature. Electricity's use in the last war was relatively small.—Popular Mechanics Magazine.

Its Efficacy.

"Talk about your patent medicines," said Gap Johnson of Rumpus Ridge, "but castor ile has got 'em all beat. It'll cure anything."

"Git out!" skeptically returned a neighbor.

"Well, I've noticed that when any of our 14 children complain of being too sick to do some task or nuther and wife gethers a spoon and rotches for the castor ile bottle, that there child is cured that minute, no matter if there hain't more than three drops in the bottle."—Kansas City Star.

His Most Important Function.

"An editor is a man who puts things in the paper, isn't he, pa?"

"Oh, no, my son; an editor keeps things out of the paper."—Boston Transcript.

The after-effects of a cup of Postum Cereal

are good cheer and satisfaction. No frayed nerves, no unnatural wakefulness at night.

What wonder, then, that so many housewives serve Postum instead of coffee as the table drink!

Postum Cereal must be boiled fully fifteen minutes after boiling begins, to develop its full, rich flavor.

"There's a Reason" for Postum

Battle Creek, Mich.

DAIRY FACTS

MUST MAKE BETTER BUTTER

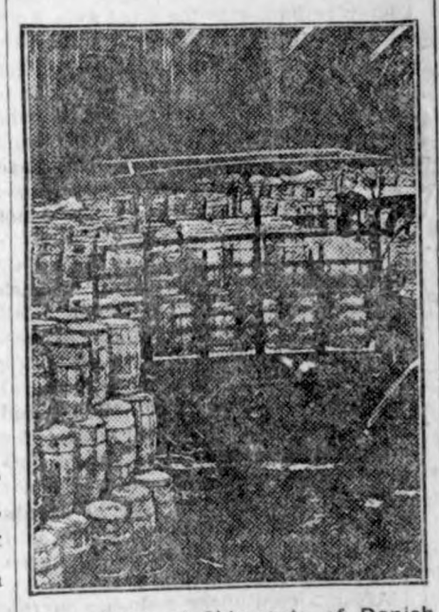
Imports Emphasize Impressive Lesson for Dairymen—Foreign Competition Active.

To meet foreign competition, dairy farmers of the United States must be able to produce a better quality of product and produce and market it more economically and more efficiently, according to specialists in the bureau of markets, United States department of agriculture.

Arrivals of shipments of Danish butter are already affecting prices on the New York City market. Argentina is producing nearly three times the amount of butter and cheese consumed, and some of the surplus may be expected to come to this country or compete with our products in foreign countries. Before the war Siberia was rapidly extending its dairy industry and when conditions become settled in that country it may be expected to come back as a factor in the world's market. Recently there have been signs of interest in dairying in South Africa, and the industry as developed in New Zealand and Australia must be reckoned with.

If the dairy products manufactured in the United States are of a better quality than those from other countries they need not fear competition. Canada's cheese industry illustrates this. A strict system of government supervision in the training of cheese makers, in the operating of the factories, and in the grading, marketing and exporting of the product, exists there. This has tended toward an improvement in the quality of Canadian cheese until it ranks with the finest on the English markets.

The dairy industry in Argentina has grown rapidly since the beginning of the war. Before the war butter exports from that country totaled 3,262 tons a year; in 1918 they were five times that. Cheese exports were far exceeded by the imports in 1913. Now the conditions are reversed—over 6,000 tons of cheese being exported in 1918.



Part of One of Shipments of Danish Butter Arriving in New York Which Have Caused American Dairy Interests to See the Possibility of Growing Foreign Competition.

Today most of these exports are going to European markets, but should conditions become favorable it may be expected that some of these will come to this country. The bureau of markets warns dairymen to be prepared to meet this competition.

CANS BETTER THAN BUCKETS

Most Convenient for Collecting Milk at Barns and Conveying It to the House.

Milk and cream from even a few cows can be much more conveniently handled in regular milk cans than in the shallow pans and wide-mouthed buckets commonly used. Cans are convenient for collecting the milk at the barn and transferring it to the house.

These cans may be bought in various sizes. For handling cream and skimmilk where separators are used, or even where cream is set to sour for buttermaking, the "shotgun can" is very convenient. It can be easily covered and set in water and is convenient to handle.

DIFFICULT CHURNING CAUSES

Among Other Things Cream May Be Too Thin and Temperature May Not Be Right.

Difficult churning may be due to several factors:

Too thin cream. It should test between 30 to 35 per cent fat.

Wrong churning temperature of the cream. Sixty degrees is about right.

In a few instances it may be due to the action of certain germs.

In some instances it may be due to feeding foods which produce a large percentage of hard fats.

Sour cream churns easier than sweet cream.

Early Weaning Means Increased Profits

INTERNATIONAL PIG MEAL

Makes Little Pigs Great Big Hogs

When you feed International Pig Meal your pigs wean earlier and in better condition than through any other way of feeding. That means increased profits on their sale either as Shoats or Hogs.

Feed International Pig Meal when pigs are from three to four weeks, feeding one-half tablespoonful in warm skim milk, then increase the ration according to directions and bring to top of the market thirty to sixty days earlier than your neighbors.

This is the Pig Meal that saves milk—one pound dissolved in a gallon of water or skim milk is the equal of one gallon of fresh dairy milk. International is the result of the experiments and experience of practiced practical feeders, trained chemists, milling experts, and all the resources a $1,000,000 Company could put behind it.

International Pig Meal builds fat, bone, muscle, and creates top-notch body tone. It brings your pork to market in condition to command top prices, and it's economical. International saves corn, milk, time and takes the guess-work out of feeding.

Order a $5.00 sack for every ten pigs you own

Beyond Challenge.

"Who would you decide is the author in our literature with the largest vocabulary?"

"I should say the man who wrote the dictionary."

EAT LESS AND TAKE SALTS FOR KIDNEYS

Take a Glass of Salts if Your Back Hurts or Bladder Bothers.

The American men and women must guard constantly against Kidney trouble, because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out, they weaken from overwork, become sluggish; the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times during the night; if you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys; to neutralize the acids in the urine so it no longer is a source of irritation, thus ending bladder disorders.

Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia-water beverage, and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.—Adv.

The nails on invalids' hands grow considerably faster than on the hands of a person in good health.

Another Royal Suggestion

BISCUITS, BUNS and ROLLS

From the NEW ROYAL COOK BOOK

BISCUIT! What delight this word suggests. So tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These are the kind of biscuits anyone can make with Royal Baking Powder and these unusual recipes.

Biscuits

2 cups flour
4 teaspoons Royal Baking Powder
½ teaspoon salt
2 tablespoons shortening
¾ cup milk or half milk and half water

Sift together flour, baking powder and salt, add shortening and rub in very lightly; add liquid slowly; roll or pat on floured board to about one inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

Royal Cinnamon Buns

2¼ cups flour
1 teaspoon salt
4 teaspoons Royal Baking Powder
2 tablespoons shortening
1 egg
½ cup water
½ cup sugar
2 teaspoons cinnamon
4 tablespoons seeded raisins

Sift 2 tablespoons of measured sugar with flour, salt and baking powder; rub shortening in lightly; add beaten egg to water and add slowly. Roll out ½ inch thick on floured board; brush with melted butter, sprinkle with sugar, cinnamon and raisins. Roll as for jelly roll; cut into 1½ inch pieces; place with cut edges up on well-greased pan; sprinkle with a little sugar and cinnamon. Bake in moderate oven 30 to 35 minutes; remove from pan at once.

Parker House Rolls

4 cups flour
1 teaspoon salt
6 teaspoons Royal Baking Powder
2 tablespoons shortening
1½ cups milk

Sift flour, salt and baking powder together. Add melted shortening to milk and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out ½ inch thick. Cut with biscuit cutter. Crease each circle with back of knife one side of center. Butter the small section and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 15 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.

"Bake with Royal and be Sure"

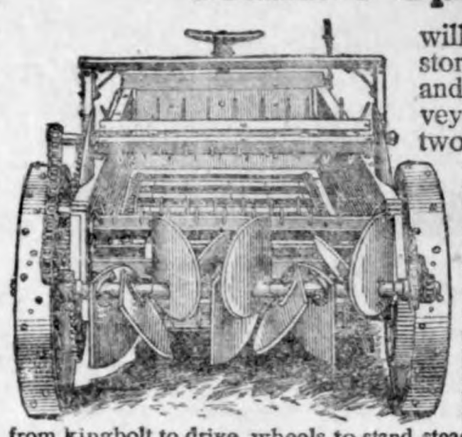
Everybody Agrees With Us Nisco Spreader Is Best

Since we began telling in the public press about the **Nisco Manure Spreader,** our store has been a central point of interest with farmers for miles around.

And to a man, they all agree that the **"Nisco" is the most** practical spreader they ever saw. Even men who have used other spreaders for years, quickly concede the superiority of the "Nisco."

Now, this is very gratifying to us because we took the Nisco Agency only after personal investigation, and this unanimity of approval confirms our good judgment. There isn't a doubt that the

NISCO
Reg. U.S. Pat. Off.
The "New Idea" Manure Spreader



will handle manure—fresh or stored—easily, economically and efficiently. A chain conveyor carries the manure to two cylinders, revolving one over the other, where it is thoroughly fined and pulverized. Then, swiftly revolving steel paddles distribute this fine manure over a strip wider than the wheel base of the machine itself—actually across three corn rows. The "Nisco" will spread 3, 6, 9, 12, 15, 18 loads per acre according as the feed lever is set and do it evenly. It is built low; mounted on wide tire wheels, and strong enough from kingbolt to drive wheels to stand steady hard service for a lifetime. Never clogs nor strains a team unduly.

First Wide-Spreading Spreader Ever Built

Leads now as it did when first invented 17 years ago. The first machine to embody the wide-spreading feature.

We've An Interesting Book To Give You

"Helping Mother Nature." This book is valuable. Tells fertility facts you never dreamed of. Gives suggestions about the care and use of manure that it will pay you to follow out. Don't miss your copy—ask when you come in—it's waiting.

Farm Implements — Klemme, Iowa

Local News!

Mr. and Mrs. Pieper from Meservey were Klemme visitors Friday.

Dwight Smith of Garner was in town Saturday, disposing of oil stock.

M. O. Hocum and family autoed to Garner Saturday evening for a visit.

May 15th is the biggest day this year! Let's go fishing!

Miss Hattie Gutterman of Garner, spent Sunday with Klemme friends.

August Lau was at Garner Monday between trains on business.

Mrs. Cordes of Goodell, was visiting in Klemme Saturday between trains.

The union prayer meeting which was held at the M. E. church last Thursday evening was well attended.

Miss Donna Baumgartner was a passenger to Garner Monday for a visit.

Octave Church came from Garner Friday evening for a short visit with her Klemme girl friends.

Mr. ad Mrs. Fred Lemke from Meservey, were in Klemme last Friday shopping.

Donna and Johnie Baumgartner went to Garner last Friday to take in the Garner high school field meet.

Mr. and Mrs. J. Jorgenson and Mr. and Mrs. Louis Mulroney drove over from Garner Friday for a visit with the Editor and wife.

Dr. C. B. Tice and family, who have spent several weeks in Klemme, returned to Mason City about a week ago.

Drs. Reuber & Zinn are gradually getting their building erected after several weeks of delay. They will push the building as rapidly as possible in order to get room for their many improvements.

Mrs. Schroeder, our neighbor across the street, has adorned her garden with a fine new steel fence—which will make it ather hard for us to swipe vegetables from that direction this summer.

Mr. and Mrs. Wm. Barz and daughter, Naomi, and Katherine Zeiger, autoed over from Garner last Thursday evening for a visit with Klemme relatives.

The First National Bank have a statement in this issue showing how the business stood at the close of business on May 4th. Total footings being past the half million dollar mark. It's a good showing.

Mr. and Mrs. E. G. Ell, Lee Ell and Albert Yahnke left last Friday evening for Chicago to drive three new Ford Cars back to Klemme. They got the cars back in good shape and record time.

The streets of Grner are pretty well torn up now as they have begun excavating for the paving. The streets running north and south on each side of main street are to be paved first, begining at the east entrance to the town.

A number of auto loads of Klemme Odd Fellows went to Garner last week Tuesday to take in the big doings which the Ganer organization put on at their hall that evening. A banquet was served and a musical program was also given.

Messrs. M. O. Hocum and P M. Griesemer drove to Mason City last Friday afternoon on business and while there stayed over to take in the Commandery, a higher brach of the Masonic Lodge. Special work was being put on that evening.

The town of Thompson have organized a band for this year and the unique part of it is that about half the players are ladies, some married and some still a "Miss." They have twenty pieces in the band. They expect to give concerts about the first of June.

Mr. and Mrs. J. N. Day, accompanied by Mrs. J. E. Baumgartner, drove to Garner last Friday evening where Mrs. Baumgartner took the morning train for Mason City. J. E., who has been in the hospital there for about two weeks recovering from an operation for apapendicitis, returned with her and they arrived in Klemme Saturday night. We are glad to see "Bum" back again in town. Altho he was a little wobbly on his pins for a while he is looking as good as ever again and says he feels fine.

Iowa State Happenings

False branding of bread, as to net weight, was given a blow by W. B. Barney of the state food and dairy commission. Barney has ruled that after July 1 all wrapped bread will have to bear a label showing the net weigh of the loaf.

Fire which, according to the occupants, was started by a spontaneous combustion in the coal bin, seriously damaged the Ottumwa Blank Book company and two adjoining places of business with an estimated loss of $7,500 to $10,000.

This year the common June bugs, which are the parents of the white grubs, will appear in large swarms. These swarms will be especially noticeable in that part of the state north and east of Cedar Rapids about June 1. Trees will be stripped of their leaves by these insects during this time, but there will be no injury to crops.

Four hundred former army trucks have been delivered to the Iowa state highway commission for work on Iowa roads this summer. A great share of those have already been sent to the counties for use while a central fleet of 200 will be kept in Ames for emergency work. Of the latter number 150 are three-ton trucks and the balance are lighter cars for inspection work.

The new automobile law is providing a large fund for highway improvement. The first of April, 356,685 automobile license plates had been issued this year. Collections total $5,067,367.-33. Ninety-four per cent of this sum goes to the state highway fund. It is expected that 425,000 auto license plates will be issued and that another million dollars or more will accrue to the state highway fund.

Denying that he quit the ministry because he intended to sue his wife for divorce, Rev. C. H. Morris, formerly pastor of Central Church of Christ of Marshalltown, and widely known in the Christian denomination in Iowa, has entered a controversy in the newspapers of Denver, Colo., in defense of his action in suing for divorce his charming and talented wife, Mrs. Ethel MacDougal Morris.

Travelers waiting at the Union station in Cedar Rapids for trains either have to patronize the depot soda fountain or go thirsty. Railroad authorities advised the custodian of the station that Cedar Rapids water was unfit to drink, although the city chemist, who makes a daily analysis, has not found it to be that bad and physicians have not traced any sickness to such cause. Anyway, the bubblers at the depot aren't working.

The directors of the Iowa State Fair association will offer $132,492 in cash premiums at the 1920 state fair. Cattle top the list with $37,583 in premiums, with horses exhibited standing to win $27,305. General agricultural exhibits can win up to $10,900 and boys' and girls' clubs will contest for $5,266.50 in cash awards. An old-time horse shoe pitching contest will net $300 to the winners. Speed events have a purse of $21,500. There will be an even $100 in prizes for those who enter the "spelling bee."

After a continuous residence on the old home farm for 50 years, the Misses Eleanor and Belle Fraser of near Bradford are leaving the farm and will make their home in Bradford. The sisters came to the place that has so long been home to them in April, 1870. At that time there was nothing to mark the spot except a straw stack and five acres broken. Only five houses existed between them and Iowa Falls. There was none between there and the Popejoy home, present site of the town of that name. Their home was the half-way place between Alden and Hampton.

A woman giving her home address as Ames has been going up and down the state selling a map that purports to be an official publication issued by the state highway commission. This map is labeled, "Official Highway Guide." Also it contains a note, "This is a true and approved copy of the official highways and roads on file with the Iowa highway commission." The state highway commission has issued a statement to the effect that it stands sponsor for no map and has no connection whatever with any alleged official guides.

Thirty-nine cows and heifers sold in Marshalltown for $120,175, an average of $3,082, and the one bull offered brought $6,200, making the total $126,375 of $3,160 for the 40 head. The top price was $11,100 paid for Blackcap Lassie, Sixteenth, calved May 27, 1917. The sale was largely attended, women making up half of the crowd. The offerings were all sold to breeders in the state with one exception, Blackcap of H. D., which went to John Mills of Kirksville, Mo., for $5,000.

At least $100,000,000 worth of Iowa farm products cannot be moved on account of the freight car shortage. Unless they can be moved within sixty days the farmers will be compelled to hold them until the new crop is added to them, on account of the demand for cars for moving coal, etc.

A recent meeting of the farmers and others interested in Des Moines county in a new co-operative company was held in Danville recently and it was decided to organize a company capitalized at $20,000. Of this amount $14,000 has already been raised.

Local News

C. H. Tompkins, of Garner, was a Klemme visitor Monday.

Ray Nelson, of Garner, was a Klemme visitor Saturday evening.

R. A. Jorgenson was at Garner Friday on business between trains.

Mr. and Mrs. Buzicky of Britt were in Klemme Friday visiting.

Mr. and Mrs. Dan Miller of Goodell were Klemme callers Friday.

Henry Church came over from Garner Friday noon on business here.

C. C. Tessier was over from Garner last Friday doing electrical work here.

Mrs. Wright from Britt was visiting at the Wm. Wenz home last week.

Mrs. Valentine Josten is on the sick list this week.

Dick Osborn and family, of Kanawha, were Klemme visitors Saturday.

Marlin Croner and wife and Mrs. Schroeder autoed to Mason City last Thursday.

Miss Betty Pritchard came from Garner Friday evening with Mabel Waterman for a short visit.

Mr. and Mrs. Harvey Sweigard, of Garner, were in Klemme Monday visiting with old friends.

A fine baby boy arrived at the home of Mr. and Mrs. Wm. Suckow one day last week.

Mr. and Mrs. Hans Willer of Meservey were visiting in Klemme last Thursday afternoon.

A baby boy was born to Mr. and Mrs. Fred Neuhring last Saturday morning. Fred says "he is some fine boy alright."

Mrs. Trafford came from Illinois last week to remain for some time visiting at the home of her son, W. H. Trafford and family.

Belmond gave their first band concert Saturday night on the street. They have a bunch of experienced players and will no doubt have one of the bst bands near here.

Wm. Hampell's ten year old boy fell from a horse about a week ago, breaking one of his arms. The boy is getting along well now and soon will be as good as new again.

Man with small family wanted for steady work year round. Can furnish 4-room living quarters. 55c per hour, work rain or shine. Apply Belmond Cement Manufacturing Co., Belmond.

Mrs. George Bartholomew, a former resident of Klemme, and who at one time worked for Frank Gruetzmacher, died at Titonka last Friday. The cause of her death was a stroke of paralysis.

Kanawha and Belmond have both organized ball teams for this year and are getting their diamonds in shape for the games. Kanawha will play Sunday games at the lake east of Kanawha.

Mr. and Mrs. A. D. Gimer have purchased a nice home at Mason City. We understand that they will move to that enterprising city some time in August. Mr. Gimer is giving up the creamery work on account of his health.

The show which was here all last week at the Idle Hour drew a large crowd, especially on Saturday night when the house was packed and there was S. R. O. (standing room only). Manager Pavey has some big pictures coming in the near future. This week Saturday night he shows a special picture featuring Helen Gardner in "Cleopatra." Another big picture will be "The Boomerang" on the 25th. adv

E. P. Healy, of Britt, was in Klemme Friday talking to the voters and also to visit old friends. Mr. Healy is out for representative and we believe if he is elected to the office he will mak a good executive as he has years of practical business experience. Thos. Thompson of Garner, who is now County Treasurer, is his opponent for office. Both the men are good men and both will make good representatives for the office if elected. It seems to be heads or tails as to who is the best man.

Curiosity of Language.

The Greek word for iron, sideros, is the same as Latin for star, now called sun. But how did this happen? The good Greeks centuries B. C. had no spectroscopes and were not aware that iron exists in a billion suns. This curiosity of language was noticed by linguists once spectroscopists proved that iron is seen in every direction in the sideral (iron) universe.

POLITICAL ADVERTISEMENTS

FOR REPRESENTATIVE

I am a candidate for state representative for Hancock County subject to the decision of the republican voters at the June Primary.

THOS. H. THOMPSON.

I hereby announce myself a candidate for the office of County Treasurer, subject to the decision of the Republican Primaries to be held June 7th, 1920. Yours very truly,

1-1-20 JOHN SUURBALLE

I hereby announce myself a candidate for the office of State Senator from the district composed of Hancock, Cerro Gordo and Franklin counties, subject to the decision of the Republican voters of said counties at the June, 1920, Primaries.

Dated at Garner, Iowa, this 12th day of January, 1920.

1-22-tf. J. E. WICHMAN

I hereby announce myself a candidate for the office of Sheriff for Hancock County, subject to the decision of the voters at the June, 1920, primaries.

1-29-p. E. PECK HANSON

I hereby announce myself a candidate for the office of sheriff of Hancock county, subject to the decision of the Republican voters of said county, at the Primary election to be held in June.

W. C. ZIESEMER,
1-22-tf Garner, Iowa

I hereby announce myself a candidate for re-election for Supervisor, subject to the will of the Republican voters at June Primary.

G. B. LAWHORN

I am a candidate for re-election, subject to the will of Republican voters at Primary Election next.

Very truly yours,
Chris Jacobs, Auditor

I hereby announce myself a candidate for the office of State Representative from Hancock County, subject to the decision of the Republican Voters of said County, at the June 1920, Primaries.

Dated at Britt, Iowa, this 26th day of January, 1920.

E. P. Healy

I hereby announce myself a candiate for re-election for Supervison, subject to the will of the republican voters at the June primaries. H. C. MEYER.

I hereby announce myself a candidate for the republican nomination for the office of recorder of Hancock county, at the June 1920 primaries.

HATTIE M. ALDRIDGE

I hereby announce my candidacy for State Senator from the 43rd district composed of the counties of Hancock, Cerro Gordo and Franklin, subject to the decision of the Republican voters of the above counties at the primaries in June, 1920. W. P. Chambers.

HOME TOWN HELPS

URGES ALL TO OWN HOME

Secretary of Labor Wilson Gives Many Reasons Why Building Should Be Undertaken Now.

I want to see every worker own his own home.

A man can borrow money on what he puts into a home. He can't on what he pays out for rent.

Your bank will assist you to build a home.

Own a home for your children's sake.

Construction adds to the wealth of the country. Build now.

A comfortable home is the first step to independence. Any official of your bank will tell you more about it.

Let us make America a nation of home owners. The president of your bank will be glad to talk it over with you.

Save your money by building a home.

During the war it was patriotic not to build. Now we can best show our patriotism by building.

Add to the nation's wealth and your own resources by building a home. The officials of your bank will advise you how to finance it.

Let everyone employed on this job help set a pace that will make building popular and profitable.

Best efforts on this building will prove an inspiration for some one to erect another near-by.

"One good turn deserves another." Good work here will encourage others to build.

Efficient work here will encourage others to build elsewhere.

Build now that city hall, courthouse, schoolhouse, church, factory, memorial. Build now.—W. B. Wilson, secretary of labor.

GET BUSY ON THAT GARDEN

Cultivation of Vegetables Just as Important This Year as It Was in 1919.

With springtime, we ought to have a revival of interest in gardens. For, whatever the paragraphers may have said about the war gardens, the fact is that they did a lot of good. We ought to have more of them this year than we have ever had; there will be just as much need for them.

The war gardens did not receive the credit to which they were entitled. Few people appreciated just how much they helped the nation. Funny stories were told concerning them; facetious remarks were made in connection with those who undertook to grow a little food in the backyard. But every vegetable brought to maturity contributed just that much to cutting the cost of living for the producer.

There is no reason to believe that garden vegetables will be cheaper this year than they were last year. There is every indication, in fact, that they will be fully as high or higher. It is going to cost just as much to produce the vegetables; labor is no cheaper this spring than it was last spring—nor is anything else. So it will be well for people who have a plat of ground to begin figuring upon growing something upon it, and this is the season to do the figuring.—Columbus Dispatch.

Many More Gardens Needed.

Thousands of families learned the value of home gardens in wartime. United States department of agriculture specialists believe it essential that these families' interest be maintained and that other thousands be added to the home-food producers.

"Now is the time to begin making plans for your 1920 thrift garden," these specialists declare. "First, locate a piece of suitable land; second, make your plan; third, get your seeds; fourth, start work at the earliest possible moment."

A request to the United States department of agriculture, Washington, D. C., will bring a booklet that will tell how to plan your garden, how much seed to buy, how to get the land in shape for cultivation, how to take every other step in the process of making your back yard or some other vacant lot help feed you.

Old Prediction Verified.

Utilization of the Nile as a source of Palestine's water supply, predicted thousands of years ago, when the ancients were combating the same problem, was accomplished by a remarkable engineering achievement of General Allenby's army. Pipes were laid from the "sweet water canal" near Kantara, which has its source in the Nile, and water pumped at the rate of several million gallons a day across the Suez canal, through the desert, supplies the lower portion of Palestine.

Neglectful Husbands.

John D. Rockefeller, Jr., said in a discussion of the divorce evil:

"So many men are like Dr. Cutler.

"'Doctor,' I said to him one day, 'how is it I never see you any more at the theater or restaurant with your former sweetheart, Miss Amanda?'

"'Oh, Amanda's married now,' said Dr. Cutler.

"'Indeed!' said I. 'To whom?'

"'To me,' said Dr. Cutler."

NEWS REVIEW OF CURRENT EVENTS

Insurgent Switchmen Call a Strike in Defiance of Regular Unions and Force Tie-Up.

FRENCH TROOPS IN GERMANY

Japanese Take Vladivostok and Will Stay in Siberia—The Rent Situation in America—Liberals Gain in Denmark—Lakes-to-Sea Ship Canal Project Up.

By E. F. CLIPSON.

The railroad strike which started in Chicago and became acute coincident with the Easter blizzard, spread rapidly until nearly every prominent rail center in the country was affected. The first few days found traffic seriously disorganized around the Great Lakes and some other portions of the middle West by the double results of the storm and the walkout. From the beginning it was evident that the labor trouble was not one directly involving the men and their employers, but was an internal fight taking on the characteristics of civil war among the unions themselves.

Starting with a rebellion of radical elements among switchmen against the authority of the Brotherhood of Railroad Trainmen and the Switchmen's union of North America, it spread and was supported by similar elements in other branches of railway employment. Insurgent switchmen, however, formed the center of the movement and the other railway unions were involved to a lesser extent. Many enginemen, firemen and others were forced to stop work, but it appears that few of them walked out voluntarily. They were rendered idle by the action of the switchmen.

The strike was unauthorized, a breach of contract, and received no sanction from brotherhood officials. In fact, it was condemned at once by the regular officials and their organizations to the extent that they have aided in every way its suppression, even going to the unprecedented length of authorizing strike breakers and sanctioning the employment of men from other unions to take the places of the striking switchmen. Many switchmen have stood by their regular organizations refusing to take any part tacitly or otherwise in the outlaw action. During the worst periods of the trouble probably 50 per cent of the switchmen have been at work and loyal in their sentiments to the regular organization. Taking into consideration others also loyal in sentiment but intimidated by the radicals, it becomes evident that a substantial majority was opposed to the strike. Among the other important unions the percentage of "regulars" has been much higher than among the switchmen.

Responsible unionism has been under fire and has borne a heavy attack with the public, as usual, the chief sufferer. The whole railroad wage question was scheduled for early consideration and a complete hearing under the new railroad law. The strike was a virtual serving of notice that the insurgents cared nothing for the law and would not wait for a hearing—in effect a defiance of responsible unionism, law and the public. At least, so it is regarded by the officials of railway brotherhoods, employers and public sentiment so far as it can be gleaned. In the strike are clearly reflected the borrowed doctrines of European radicals, and many observers profess to see the direct results of propaganda by the Russian "Third Internationale" and its most prominent sentimental proponent in this country—the I. W. W.

After a few days of the strike railway officials were claiming in a few instances almost normal restoration of traffic and in general, conditions 40 to 50 per cent of normal. But the whole country has been hampered with a curtailment of the movement of food, fuel, perishable commodities and practically all the necessaries of life. Employment has been affected with a consequent lessening of production, contributing to further increase in prices and the cost of living. But since responsible unionism has been under direct attack and public sentiment has been aroused, the two forces see a clearing of the atmosphere and ultimate good as a result of the fray.

Germany seems surprised and endeavors to muster a show of indignation that the French should have taken seriously the terms of the peace treaty. With the movement of the German reichswehr in unauthorized force into the Ruhr basin (part of the neutral zone of 50 kilometers on the right bank of the Rhine) the French promptly occupied the German cities of Frankfort, Darmstadt, Homburg, Hanau and Dieburg and surrounding territory. French officialdom points out that Germany had already slipped out of ten compliances with the treaty, the most important being failure to disarm, nonpayment of indemnities, no prosecution of her war criminals and failure to deliver coal to France; also that if permitted to get away with such a vital violation as invasion of the neutral zone, she would soon discard all pretenses of living up to the pact. It is further pointed out that Noske far from reducing Germany's army to the point demanded in the treaty, had really been building up a great and potent military force from the remnants of the old army. The French, and they are not alone in the assertion, claim that Germany still has 12,500 cannon, and could now mobilize more than 2,000,000 trained men armed with rifles, machine guns and minenwerfer. The assertions are a tribute to German organizing efficiency and charge that camouflaged as auxiliary troops, safety guards, policemen, civic guards, regulars, volunteers, home guards, etc., the country really has no less than 3,500,000 men who can be called upon and 2,000,000 who could be rendered immediately effective. Every man in the country was recently a soldier and now each one under Noske's genius, has become a policeman or something similar, belonging to a military organization and with a complete military equipment in his home. The French occupation has been criticized as lacking allied support, but the allies were drifting apart on important matters before that. At any rate, the occupation appears to be complete so far as it has gone and promises to end with a compromise with allied supervision of German operations in the Ruhr districts or full German compliance with French terms.

American forces have left Siberia while Czecho-Slovaks and others are getting out as rapidly as possible, with the exception of the Japanese. Japan will not leave Siberia for the present, having on the contrary, occupied the city of Vladivostok and ended the Red regime there. Prior to that had occurred several brushes between the Russians and Japanese, notably an engagement March 18-20, at Nikolaevsk, in which the latter lost 700 men. Japan is said to fear the extension of bolshevik theories to Korea, Japan itself, Manchuria and other spheres of Japanese influence. Czecho-Slovak officers recently arrived in this country do not hesitate to assert the belief that German intrigue figures in the far Eastern situation and that ultimately Germany, Russia and Japan will reach a workable understanding if not an actual alliance.

In the training camp for the great presidential contest Hiram Johnson had an inning distinctly all his own in the result of the Michigan primary. The California senator made a runaway race of it, badly distancing all competitors. Lowden supporters claim it was a setback for Wood, while Wood supporters claim it was a setback for Lowden. It was a setback for all the Republican candidates except Johnson, so far as Michigan is concerned. That state has been undergoing some severe political throes since Ford carried it in 1916 and received the state's vote on the first ballot in the Republican convention. Affiliations and alignments have suffered many changes since. The recent prosecution and conviction of Senator Newberry and a number of his supporters has thrown further discord into the Republican ranks. Senator Johnson seized the psychological moment and made a vigorous, effective personal campaign. New York will send uninstructed delegates to both conventions, although Leonard Wood's managers claim the Republican delegates will favor his nomination. Rhode Island also sends an uninstructed delegation. Senator Johnson is conceded a good chance in New Jersey where he has been making a strong campaign, also in Nebraska and most of the Rocky mountain and Pacific coast states. Much interest attaches to the primaries in Illinois, Indiana and Ohio.

The battle between landlords and tenants in the United States assumes almost equal interest with strikes, politics, national and international problems. In New York recently enacted anti-rent-profiteering legislation, received its first tests with results wholly favorable to tenants. In every case tried evictions were defeated and tenants were granted stay-overs of from one to three months when they proved their inability to find new homes. In Chicago and many other cities tenants are organizing leagues to resist what they consider unduly increased rents. Many court battles are impending and in some cases arbitration has been invoked successfully, resulting in some compromises and some material reductions. Real estate boards have acted effectively in some instances in settling controversies and the problem is receiving wide attention from municipal authorities and financiers. Loan corporations with large capital have been formed in a number of cities to promote building and help end the housing shortage. In spite of all remedial measures and all the oil being poured upon the troubled waters, landlords and tenants are looking toward May 1 and other moving days, with misgiving.

Denmark having staged its demonstration, is outwardly quiet. The net result of the disturbance seems to be a distinct gain for the liberal elements, with the king considerably out of favor and an increased leaning of the people toward a republic. Both reactionism and radicalism received setbacks; the former through the will of the people to have the constitution amended and strengthened, and the latter in the failure of agitation to secure its entire abolishment. As a result of the troubles the king was forced to dismiss the unpopular cabinet of M. Liebe and permit the formation of a new ministry headed by M. Friis, which is considered popular enough to endure at least until the elections of April 22.

Construction of a ship canal from the Great Lakes to the sea, utilizing the St. Lawrence river, will be widely agitated during the coming year and undoubtedly will be a live issue in congress. Investigation of the project was authorized by congress over a year ago. Canada took similar action with the result that an international joint commission was formed which is now making surveys with a view to reporting both to the congress of the United States and the parliament of Canada, as to cost and feasibility. The organization chiefly interested in pushing the canal is known as the Great Lakes and St. Lawrence Tidewater association, composed of 14 states—Illinois, Wisconsin, Minnesota, Michigan, Indiana, Ohio, Iowa, North Dakota, South Dakota, Idaho, Wyoming, Montana, Colorado and Nebraska. Active opposition has developed among commercial organizations in New York state and the issue promises to be keen.

Failure of the bolshevik offensive against Poland leaves that country in better position to enforce its peace terms with the Russian reds, the principal item of which is a reconstitution of the Polish frontier line of 1772 running roughly along the Dwina and Dniester rivers. Plebiscites among the inhabitants are provided for and may modify the boundary to some extent, but it is believed, not essentially. Expecting to inflict a peace by force, the bolshevik government last month refused to consider the main Polish terms. The Roumanians, Letts and Esthonians are reported to have reached an agreement with the reds and to be awaiting the result of peace pourparlers at Warsaw.

A HERO'S WELCOME

By DAISY M. TWORT.

(©, 1920, by McClure Newspaper Syndicate.)

"Conrad is coming tonight!" Louise Pearson cried as she paused beside the counter behind which Frances Keith stood measuring off a yard of ribbon for a waiting customer.

"We can't tell just what time, but as soon as his mother knows that he is in town, she is to phone everyone on the street, and we all are going to turn our lights on, and so have a grand illumination by way of a welcome home. As you have no phone, you'll have to keep watch, and when the lights go on, you can set a lamp in your window. It will look awfully old-fashioned, but I suppose it is the best you can do. If your folks didn't belong among the old families, your poor little house would have been hustled off the street years ago," and with an irritating laugh, Louise turned away.

Conrad Roberts was the most popular boy in the small town of Firsex, and the girls had vied with one another in showering attentions upon him while he had been in France.

During high school days, he had shown a decided preference for the society of Frances Keith, but now he was coming home as a hero, it was rumored that Louise Pearson would be the favored one. Not only was she unusually attractive, but she was also a favored child of fortune, and her pretty clothes and her runabout were the envy of all the other girls.

Louise herself took it for granted that Conrad would seek her out first. She was sure he had written to her more often than to any of the other girls; an opinion which Frances did not share.

Extracts from Louise's letters found their way into the local papers, and were read at the afternoon clubs. Frances felt that hers were too sacred to show to anyone excepting her mother. It seemed to her quite too good to be true, that Conrad was on his way home at last; and it was with difficulty that she calmed herself sufficiently to pay attention to the wants of the people who found their way into the store that afternoon.

It was not until she was on her way home, that the remembrance of Louise's irritating laugh came to trouble her.

"I don't believe I will light our lamp at all," she said to her mother. "It will only emphasize our poverty, and seem such a stingy welcome to Conrad when all the other houses on the street are brilliantly lighted."

"Don't be foolish," Mrs. Keith advised, "If Conrad is the boy I think he is, he will realize that old-fashioned things are sometimes the most dependable. Set the light in the front window, and run up the shade, so as to give the house a cheerful look, then busy yourself about something that will take up your mind. It is more than likely that Conrad will not come tonight, but walk in upon us sometime in broad daylight, when we least expect him."

With a sigh of impatience, Frances arose to follow out her mother's suggestion. Going into the kitchen she took from the shelf a large lamp, carefully trimmed the wick and polished the chimney until it shone. As she lit it, she fervently wished that she had a fairy wand, by a wave of which she could change the feeble glow of the kerosene lamp into a bright light that would send a welcoming ray far down the street.

"Conrad never will notice it," she reflected dismally as she placed the lamp in one of the front windows. Having done this, she returned to the living room, where she settled herself to work upon the sweater that was to make her little sister happy on Christmas morning.

So busy was she that the minutes slipped by unnoticed, and it was with surprise that she heard the clock strike eleven.

"Oh! do you suppose that Conrad has come?" she cried, springing up and running to the door to see if the other houses were lit up. As she looked out, she was astonished to find that the street was in darkness, not a light to be seen.

"Why, mother!" she called out, "it is perfectly black out-of-doors. Even the street lights are out."

As she spoke she caught the sound of a footstep and the next moment a familiar voice said:

"Is that you, Frances?"

It was Conrad. "Of all dark places this town is the blackest!" he cried, as he made his way up the steps and into the hall.

"There must be some trouble at the power station," Frances said, trying to steady her voice. "Mother told me that old-fashioned things were sometimes the most dependable. How glad I am that I lit our lamp after all."

"I am not sure, but I should have lost my way, if you hadn't," Conrad said. "I missed the last train from Rosehills and had to foot it. When I reached Firsex I found it in darkness; not a light in town excepting yours. It was my beacon star, just as you have been, dear heart."

"But Louise thinks it is she for whom you care," Frances returned in a troubled voice.

"Louise is well enough in her way," Conrad made answer, "but she is apt to be uncertain as her light was, and for a welcome home a fellow wants a light and a love that never fails."

Ancient Cities Built Near Water.

Every ancient city of note was located on or near the sea or a river.

"TAKING STO

Should Sentiment Always Precedence?

"Taking stock" of oneself is a odical duty, probably not always ticed, and is as necessary as stock of your household effects "store goods." The right minded will do this. In unmolested he gives way to deep meditation gathers his thoughts to ascert brains, energy, and ability are pating properly, working toget lines that answer to an ambition looks for a satisfactory return.

If there be a deficit, his should be to discover the leak may be that he lacks the nerve into a retrospective analysis, in initiative that will prompt throw his horoscope in the future less he can do these things never be able to pull himself any "rut" in which his condition placed him. He must "take st

"Stock taking" leads to mode efficiency, and is demanded of worker if unsatisfactory condition to be overcome. In the case of farmer it may be that he is a "too high-priced farm"; interest rent may be an "overhead" ite the profits. There may be other sons why profits are not shown, just possible that he is sacri profit and encouraging loss be of sentiment, but he does not that this is the cause. The farm his birthplace; reared upon it, knows every nook and corner of old place. He fished in the hunted squirrels in the woods, h the hayfield, grew to manhood upo place, courted and married and bro up his family there. These are that commend themselves, and shouldn't sentiment have a say? many this will appeal. But are good reasons to continue? Does one owe it to himself and to his pendents to "take stock," and put to effect action that will bring a ance on the credit side of the ledg the balance that will bring happi and give a comfort far greater tha mass of unpaid bills and a home of worry, and a devotion to sentim Should he not look around for favorable conditions, which may be found?

Procrastination is said to be a th In this case the axiom is undoubte true. To allow the adverse condit under which you may be laboring continue may keep you for years in the present unsatisfactory positi

There was a man at Brazil, I who made weekly visits for upw of a year to the office of the Cana government at Indianapolis, Ind., from the agent secured all the inform tion he possibly could as to condit in Western Canada. But he lacked cision, did not "take stock," or if took it, failed to act. This was fo teen years ago. He lived on a s farm, which gave him a mere existe and no promise of anything more. is still on the same place and no bet off today than then. He had a fri working in a glass factory, who a had but little means. He became terested in Western Canada. He p sessed, though, spirit and action. W the impulse thus prompted he mov to Saskatchewan and took up a far Today he is the owner of a splen section of land, has plenty of mon in the bank, and could retire with handsome competence.

That which has been the good fo tune of the Brazil glass worker, w had "taken stock" and profited by may be that which will follow a other of like temperament and a f wish to erect for a satisfactory futur

Western Canada submits for cons eration and approval conditions in a ricultural lines that are exceptiona There is land there that annually pro duces about the same return as an other farming land, and it can be pu chased at but a portion of what t place which has not been a source profit can be sold for. A section i stead of a quarter-section, worked u der western conditions, with no mo effort, solves the big "overhead" ex pense. The social conditions, whi are an important factor in decidin on a new home location, are ideal.—Advertisement.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

HAD TERRIBLE COUGH AND NIGHT SWEATS

Cough about gone, eats and sleeps well, and gained 12 pounds.

"In December, 1913, I had a fearful cough, and my physician ordered me to change climate immediately. I went to San Antonio, Texas, and entered a sanatorium. Left there and came to Oklahoma City in October, 1915. Had no appetite, could not sleep, had night sweats and was losing from one to three pounds a week. I also had catarrh of the bowels, which the doctors had been unable to relieve.

"Relatives urged me to try Milks Emulsion. I did so and began to improve, slowly at first, but steadily. My weight has increased 12 pounds, I have no temperature, and my cough is about gone. I can eat heartily, sleep well, and am working at my trade again."—V. W. Neff, 610 No. Dewey St., Oklahoma City, Okla.

Nature does wonders in fighting off disease, if given the chance. Milks Emulsion is a powerful help in providing strength and flesh. It costs nothing to try.

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. Chronic stomach trouble and constipation are promptly relieved—usually in one day.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

No matter how severe your case, you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and $1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

Exception to Rule.

You Can't Rub It Away; Rheumatism is in the Blood

Liniments Will Never Cure.

If you are afflicted with Rheumatism, why waste time with liniments, lotions and other local applications that never did cure Rheumatism, and never will?

Do not try to rub the pain away. Try the sensible plan of finding the cause of the pain, and go after that. Remove the cause, and you remove the pain.

You will never be rid of Rheumatism until you cleanse your blood of the germs that cause the disease. S. S. S. has never had an equal as a blood purifier and scores of sufferers say that it has cleansed their blood of Rheumatism, and removed all trace of the disease from their system.

Get a bottle of S .S. S., and get on the right treatment to-day. Special medical advice free. Address Medical Director, 111 Swift Laboratory, Atlanta, Ga.

WAS GONE BEYOND RECALL

Headgear for Which Young Wife Had Pined Adorned Head of One More Fortunate.

"Every day for a week," the young wife said wistfully, "I've gone down to look at a hat in a show window—a wonderful hat, Tom; the kind of hat a woman dreams of but sees only once in years. Of course, I knew that I could not hope to buy it, as it was far more expensive than we could afford. The price was—"

"Perhaps we could manage it, dear, if you wish it so much," Tom interrupted fondly. "Business has been a little better the last month. I have two new contracts for large apartment houses. How much is the hat?"

"That is dear of you, Tom," she responded with a grateful smile, though her eyes grew sad, "but it is too late. Our cook happened to pass the store. I saw her wearing it home."

Tough on the Patient.

Nurse—Oh, doctor, what shall I do? Your patient followed your directions perfectly.

Doctor—Well, there's nothing to worry over.

Nurse—Yes, there is; the directions blew out the window and he jumped out to follow them.

Some men know more, some less, and some not even so much.

SOMETHING TO WORK WITH

Young Man Perfectly Willing to Practice Economy if Old Gentleman Would Supply Materials.

There is a well-known banker whose only son does not, his father contends, appreciate the value of a dollar by about 99 cents. A short time ago the youth approached the old gentleman with a request for a considerable sum in addition to his regular allowance.

"Look here, my boy," the father said severely. "You do not seem to realize that you spend a great deal of money—throw it away, in fact. Don't you think it about time that you began to economize a bit?"

"Yes, I do, father," the young man responded earnestly. "Been thinking just that—fine thing, economy; provide against rainy day, and all that sort of rot. I'd love to start right in economizing, but I can't, because I haven't a cent to economize. If you'll just pass over that thousand, however, I will begin, right away!"

Gulls of the Pacific Coast.

Along the Pacific coast there are three common species, the glaucous-winged, the western and the California gulls, which are not found in the East. They are white-headed species, not strikingly different from the herring gull.—A. A. Allen, in American Forestry.

FARM ANIMALS

BEEF ANIMAL FOR HOME USE

Unprofitable Cow or Heifer That Does Not Promise to Be Good Producer May Be Killed.

The farmer buys more beef than he takes from the farm. Only about 10 per cent of meat furnished by the average farm is beef. In the North and West the average consumption of beef per family is nearly 300 pounds and in the South it is less than 100 pounds.

The beef animal killed for home use, suggest specialists of the United States department of agriculture, may be a beef steer or an unprofitable cow, or a heifer that does not promise to be a good producer and would not bring a good price for beef on the market. Very little veal is killed on

Most Farmers Buy Beef From Village Butchers Who Operate Wagons in Country.

the farm for home use. Much of the beef bought by farmers is bought in the summer from village butchers who operate meat wagons or cars in the country. On the average farm there are no facilities for keeping fresh meat during warm weather.

STEER-FEEDING EXPERIMENT

Cottonseed Meal and Velvet Beans Used With and Without Addition of Shelled Corn.

In a steer-feeding experiment conducted last year on the government farm at Beltsville, Md., four lots of two-year-old steers were fed. The purpose was to compare cottonseed meal and soaked velvet beans when used with and without the addition of shelled corn.

The addition of corn to a ration composed of corn silage, cottonseed meal and wheat straw did not pay. The addition of corn to the ration of velvet beans and corn silage was profitable.

The lot receiving corn silage and soaked velvet beans with a small quantity of cottonseed meal as an appetizer produced the most economical gains and showed the greatest profit, even though the daily gains and the selling price of the cattle were lower than those of any of the other lots.

TO DOUBLE VALUE OF STOCK

President of Michigan Association Wants Every Farmer to Agree to Use Only Purebreds.

St. Joseph county, Mich., plans to double the value of its live stock within three years. Current activities to accomplish the purpose are described by William T. Langley, president of the St. Joseph County Live Stock Breeders' association, in a statement he has furnished the United States department of agriculture.

"We want every man," he declares, "to give us a pledge to use nothing but purebred sires.

"We have a sign in the making that reads 'Purebred Sire Farm' that we want posted on every farmyard gate.

"We want nothing but high-grade and purebred females."

A general association has been organized that includes the members of the various breeding associations and also all breeders of grades that pledge to use only purebred sires.

GROUND RYE BEST FOR PIGS

It Is Better Mixed in Equal Parts With Middlings, Ground Oats, Barley or Corn.

It is generally recommended that rye be ground for feeding to pigs. It is best mixed in equal amounts with middlings, ground oats, ground barley or corn. If the mixture is placed in the self-feeder, care must be taken to see that there is a good supply of water available for the pigs. They should have continual access to salt also.

LIVE STOCK NOTES

The higher the breed of cattle, the better is the beef.

* * *

There is no danger of a good grade of tankage spreading hog cholera.

* * *

A good bull is just as good as a stag as far as market value is concerned.

* * *

Horses are as poor as their feet. Always examine this section of their anatomy when a trade is in prospect.

SALTS IF BACKACHY AND KIDNEYS HURT

Stop Eating Meat for a While If Your Bladder Is Troubling You.

When you wake up with backache and dull misery in the kidney region it generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels; removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so it no longer irritates, thus ending bladder weakness.

Jad Salts is a life saver for regular meat eaters. It is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink.—Adv.

Old clothes are about the only bad habits some women have.

State of Ohio, City of Toledo, Lucas County—ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

A brilliant orator is one who always uses the right word in the right place at the right time.

Many School Children are Sickly

and take cold easily, are feverish and constipated, have headaches, stomach or bowel trouble.

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

Used by Mothers for over 30 years

Are pleasant to take and a certain relief. They tend to break up a cold in 24 hours, act on the Stomach, Liver and Bowels and tend to correct intestinal disorders and destroy worms. 10,000 testimonials like the following from mothers and friends of children telling of relief. Originals are on file in our offices:

"I think MOTHER GRAY'S SWEET POWDERS FOR CHILDREN are grand. They were recommended to my sister by a doctor. I am giving them to my little three year old girl who was very puny, and she is picking up wonderfully."

"We have used MOTHER GRAY'S SWEET POWDERS FOR CHILDREN at different times for past nine years, and always found them a perfect children's medicine and very satisfactory in every case."

Get a package from your druggist for use when needed.

Do Not Accept Any Substitute for MOTHER GRAY'S SWEET POWDERS.

Thousands of Happy Housewives in WESTERN CANADA

are helping their husbands to prosper—are glad they encouraged them to go where they could make a home of their own—save paying rent and reduce cost of living—where they could reach prosperity and independence by buying on easy terms.

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such crops come prosperity, independence, good homes, and all the comforts and conveniences which make for happy living.

Farm Gardens—Poultry—Dairying

are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc., give you the opportunities of a new land with the conveniences of old-settled districts.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

Three-fourths of the foreign-born people in the United States live in the cities.

Another Royal Suggestion

PIES and PASTRIES

From the NEW ROYAL COOK BOOK

CHEER up! There is no further reason for worrying about table variety. The new Royal Cook Book gives new suggestions for every meal every day. The book is so full of surprises there will never be another dull meal in the home. Here are a few suggestions from the new Royal Cook Book.

Plain Pastry

This recipe is for one large pie with top and bottom crust

2 cups flour
½ teaspoon salt
2 teaspoons Royal Baking Powder
½ cup shortening
cold water

Sift together flour, salt and baking powder; add shortening and rub in very lightly with tips of fingers (the less it is handled the better the paste will be). Add cold water very slowly, enough to hold dough together (do not work or knead dough). Divide in halves; roll out one part thin on floured board and use for bottom crust. After pie is filled roll out other part for top.

Rich Pastry

2 cups pastry flour
½ teaspoon Royal Baking Powder
⅛ teaspoon salt
⅔ cup shortening
cold water

Sift flour, baking powder and salt; add one-half shortening and rub in lightly with fingers; add water slowly until of right consistency to roll out. Divide in halves; roll out one half thin; put on in small pieces half remaining shortening; fold upper and lower edges in to center; fold sides in to center, fold sides to center again; roll out thin and put on pie plate. Repeat with other half for top crust.

Apple Pie

1½ cups flour
1½ teaspoons Royal Baking Powder
½ teaspoon salt
2 tablespoons shortening
4 apples, or 1 quart sliced apples
2 tablespoons sugar
1 teaspoon milk

Sift flour, baking powder and salt; add shortening and rub in very lightly; add just enough cold water to hold dough together. Roll half out on floured board, line bottom of pie plate; fill in apples, which have been washed, pared and cut into thin slices; sprinkle with sugar; flavor with cinnamon or nutmeg; wet edges of crust with cold water; roll out remainder of pastry; cover pie, pressing edges tightly together and bake in moderate oven 30 minutes.

Wm. Howard and Billy Busch left last Wednesday evening for Flint, Michigan, to drive two new Buick Sixes back to Klemme for the C. W. Wiles garage. They stopped over at Chicago Thursday and saw Cleveland wallop the White Sox in a ball game and then went on to Flint. They got back to Klemme, a distance of 748 miles, Monday afteroon. That was getting along pretty good. They had good roads all the way and enjoyed the trip.

The town of Wesley have recently installed an electric siren whistle as a fire alarm. The mayor tried it out last week Tuesday and according to the Wesley News-World the thing made some great noise and capable of disturbing the most sleepy man in the world. Garner recently installed a whistle of this kind and they also use it for a work whistle, blowing it at seven in the morning, at noon, and six in the evening, thereby testing it out three times a day so it is sure to work in case of fire.

Richard, the Hunchback.

Of all the kings of England, perhaps Richard, the hunchback, has the most sinister reputation, his only rival being the crafty John. He died on Bosworth field, fighting for the crown he had gained by murder. It is a matter of history as well as of Shakespeare—not always the same thing—that the tide of success turned against Richard when Lord Stanley took himself and his men from his side to that of Richmond. When hard pressed, Richard cried: "I am king of England! I will not budge an inch." Then, being overwhelmed, he died, crying, "Treason! Treason!"

No Substitute for Bread.

When bread ran short in 1812 Napoleon's generals tried to make up for it by issuing double, and even triple, rations of meat, but this, with other causes, contributed to the diseases which ravaged the forces. As far back as Caesar's campaigns there are records of similiar troubles, and Lord Wolseley in "The Soldiers' Pocket Book" refers to the desirability of making the soldier's rations palatable as well as abundant.

Bacteria Long Lived.

How long some bacteria may live under proper conditions is brought out by M. W. Lyon, Jr., of George Washington university in a letter to Science. He tells of a culture of organisms of paratyphoid beta kept for more than ten years sealed in a test tube at Howard university, which, when transferred to another medium, produced the reactions that proved the bacteria to be alive and active.

True In Some Cases.

A book reviewer in the London Times makes the rather remarkable assertion that the word "interesting" is not one that should ordinarily be applied to a work of fiction. It is remarkable because, for some occult reason, he considers the word unsuitable in its application to any fiction of whatever character. If he had said that it has no fitness when applied to much current fiction he would have aroused no surprise.—Exchange.

Hart Schaffner & Marx Clothes

Good Work Clothes, too

PERHAPS the Hancock County farmers, and a good many of our fellow townsmen, think we lose sight of the fact that they wear work clothes a big part of the time.

But we don't; we may not talk so much about them, but that's because buying them isn't so important a matter with you.

It's clothes for "dress up" that you're particular about; they involve more of an investment and they're the ones you rely on when you want to look right.

That's why we have Hart Schaffner & Marx clothes for you—they're stylish; worth the money.

But you'll find the same values in the things we have here for work wear. Shirts, overalls, gloves, caps, shoes—anything you need, at surprisingly low prices.

Our satisfaction guarantee goes with work clothes as well as the rest of our goods; money's worth or money back.

Hermoline

A BETTER LUBRICANT

—FROM THE FORMULA OF A MOTOR COMPANY

Protect Your Motor Car with a Better Lubricant

Motor car lubricants are used to protect the wearing parts. These parts really operate on a film of oil that must be kept constant under all conditions or metal will grind against metal and wear and destruction will result.

Naturally, a lubricant that will maintain this film of oil most perfectly under all conditions is the best one to use. There is but one kind of a lubricant that will give your car the *greatest* protection in this way—and this is a lubricant made from Pennysylvania crude oils.

HERMOLINE lubricants are made exclusively from the best Pennsylvania crude. This means that they will stand up under the hottest temperatures created within your motor when other lubricants break down. This means that HERMOLINE will assure you safe and constant lubrication. This means that HERMOLINE will give greater protection, longer life and smoother and better operation to your car.

You can be sure of securing lubricants made exclusively from Pennsylvania crude oils when you ask for HERMOLINE—and you can get HERMOLINE lubricants of all kinds at our store.

Put it to any test you like—HERMOLINE is the lubricant you should insist upon for your motor car, truck or tractor.

E. G. ELL

Klemme, Iowa

The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane.

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.

The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove oil value.

WHO CAUGHT ANY FISH

Saturday, May 15th, opened the fishing season in Iowa and of course all the fishing sports were out that day to help open up the ponds. Now so far we have been unable to find anyone who caught more than the law allowed and even Lew Lewis failed to make a catch that was worth looking at. Well we were among the "suckers" alright for we broke all previous records in rolling out of bed early (4:30 A. M.) and was about the first on deck. Marlin Croner, Ole Bryntetson, Frank Terhufen and the Ed. left in one car and Lew Lewis and Ed. Ell in another. The reason they would'nt take aybody with them was because they were afraid they wouldn't have room to haul all the fish back. First lake we hit was Cornelia hid some where southwest of Belmond. Nobody even got a bite, nibble or a look at anything like a fish only the minnow we had for bait. We gave it up for a bad job and pulled for Morse Lake about sometime before noon. Nothing doing there except a couple of bullheads and a few mud turtles. We also found Lewis and Ell here. They had stopped fishing and gone to eating. We tried our luck awhile and soon went to eating also. Then we hit for West Lake and Ye Editor carried away all honors of the day here and showed up the other guys as poor fishermen. We actually, by careful count, induced three little bullheads to swallow our hook and we nabbed them, Ye veriy it was "some" fishing trip. All told there were thirteen fish caught that day in our gang. Reports from fishers at other lakes also report that fishing was bum. Croner bought a box of sardines at Goodell and strung them on his fish stringer, but as yet we have not learned whether he got by with it or not. He claims they were young pickerel and that he caught them. "Kimmel" bought dried herrings and strung his chain; it was as close as they could get to a fish.

I have just secured the agency for

Druggist **Klemme, Iowa**

YOUR LIBERTY BOND

The United States Government borrowed money from you to finance the war. You hold the Government's promise to pay you back. This promise is called a Liberty Bond or Victory Note. On this Bond is stated the conditions under which the Government borrowed the money from you.

For instance: If you hold a Bond of the Third Liberty Loan, it states that on April 15th and October 15th of each year until maturity, you will receive interest on the amount you paid for the Bond. Other issues bear other rates of interest and other maturity dates, all of which are clearly stated on the Bond.

Now, if you keep your Bond until the date when the Government pays you in full for it, you do not need to worry if, in the meantime, the price is low one day or high the next. You and Uncle Sam rea living up to your agreement with each other, and neither will lose by it.

On the other hand, if you sell your Liberty Bond now, you will find that the man you sell it to will not give you a dollar for every dollar you paid for it. The price has been brought down because so many people are oerinffg to sell their Bonds. If the market is flooded with tomatoes, you can buy them cheap, but if everyone is clamoring for tomatoes and there are few to be had, the price goes up. The same is true of Liberty Bonds. Short-sighted people are dumping them on the market, and wise ones are buying them.

The best advice that can be given to the owner of a Liberty Bond is this: Hold the bond you bought during the war; it is as safe and sound as the United States Government itself.

Buy as many more at the present low rate as you can afford. If you hold them to maturity, you are bound to make the difference between what they sell at ow and their face value. You will also receive good interest on your investment.

Hold on to your Liberty Bonds and buy more.

PARK MOWING BEE

Last Friday Mayor Gruetzmacher rounded up everybody he could find who owned a lawn mower and asked them to report at the city park at six-thirty p. m. with said machine and plenty of elbow grease. The city dads are having difficulty in finding anyone who will take the job of keeping the grass mowed so they solved it in that way. Sixteen men and lawn mowers were on the job and mowed the entire block in about an hour. Then Mayor Gruetzmacher invited the gang to the drug store where ice cream was served (at the expense of the town) but which all enjoyed. It was good sport and everybody had a lot of fun trping to chase down the guy ahead with his lawn mower. Fred Ridder was the only lazy man on the job (he belongs to the council, you know), well, we said he was lazy because here he come with a funny looking mower, a cross between a submarine and a grain binder. Fred had an electric motor mounted on his mower with a log cord attached to the same which he connected to the lamp sockets in the band stand and whizzzz away he went with the motored lawn mower and how the grass did fly, a regular storm of green hay was all we could see. The motor did the cutting and all he had to do was shove the mower around a little and watch the grass fly, and now if that ain't a lazy man for you we'll eat all the grass he can cut in a week. But don't forget that everyone is invited to come again every Friday night—with a mower.

"BOBBIE" PULLS A STUNT

Last week Thursday afternoon Art Kuck and Mart Hocum framed up a deal on John Henschen. They kidded "Bobbie" about being a poor shot with a shotgun and bet him that he couldn't hit Art's hat tossed up in the air. "Bobbie" was o take six shots at Art's lid and Art in turn was to have three plugs at "Bob's" sky-piece. Now that was a fine proposition and "Bob" took them up as he expected he could easily knock his opponent's hat to smithereens and back. Mart tossed up Kuck's hat and "Bob" blazed away with Mart's automatic. He pulled and he missed and then cussed, blazed away some more, missed the blooming hat and cussed some more. Then it was Art's turn and he proceeded to plug "Bob's" lid full of lead and made a nice ventilator in "Bob's" bug-cage. Of course that got "Bob's" goat and he took another pot shot at Kuck's lid. The gun went ping-booof and the funny noise put a bug in "Bob's" ear and he got a bright idea that he was the subject of a frame-up and that Hocum and Kuck had taken all the shot out of the shells he was shooting at Kuck's hat. "Bob" got busy, sneaked over to his house, got some of his own shells and then came back and bet Art again that h could hit his hat. Of course Art took him up supposing "Bob" would miss again with the fake shells but here is where "Bob" got in his dirty work. He slipped the shells out of the gun and put in his own shells, had Art's hat tossed up again, aimed, pulled, and BANG! That's all, but just ask to see Art's hat and see what "Bobbie" done to the roof of it. Keen work, we would say.

HANCOCK COUNTY AGRICULTURAL SOCIETY RE-ORGANIZES

Re-Organized and Capitalized at $25,000.00

Ole Peterson, of Britt, was in Klemme Tuesday and while here dropped into the Times Office. He informed us that they had re-organized the Hancock County Agricultural Society and had formed a new organization capitalized at $25,000. It was necessary to do something as the fair grounds were badly in need of new buildings to take care of the exhibits and so in order to raise the money for this purpose the old company was dissolved at a meeting of the members some time ago. A new Floral Hall will be erected and also a new Stock Pavillion, with which new buildings there will be plenty of room for all exhibits and it will not be necessary to turn any away in the future for lack of show room. Those who hold life membership tickets in the old company will be given credit of $10 on the new stock they puchased in the new Society. It has been a hard time for the society in the past to make a go of it and they should have incorporated in the first place and be on a surer footing. Ole Peterson also informed us that the fair association in the future would do away with all free tickets, everybody must pay entrance fee and no life membership tickets would be issued. He intends to call on all the farmers in this vicinity and will be back again in about a week.

GARNER CHURCHES MAY CONSOLIDATE

It may be possible that the two Methodist Churches (First and Grace Methodist churches) at Garner may consolidate in the near future. Since German has been abolished forever from the churches it is unnecessary to have two churches of the same denomination i a town where formerly one was an English and the other a German Methodist church. Garner is like a lot of other towns, they have now two Methodist churches both using the American language and it is foolish to run two churches where one would answer the purpose. With this in view they are endeavoring to consolidate and the outlook is favorable toward that end. Now the same can very well apply to Klemme. We have two Methodist churches here running at a double expense; supporting two ministers where oe could do the work; heating and lighting two churches where one could be so run at half the cost; in short this is the time to economize and so why not get "just as much religion at half the cost"? We are up against the same proposition as the Garner churches—consolidate or go to an enormous expense of building a new church for one and a parsonage for the other. The Klemme problem is nearly the same with the exception of the parsonage, as both are good but not modern. As to the churches they are both too small, they are old, out of date, ad badly need repairing. Consolidation would solve it; build one large church and unite the congregations, have but one minister, and save half the expense. It is a question which is now being strongly talked over in many communities and is in keeping with the persent Inter Church World Movement.

IDLE HOUR THEATRE, KLEMME, IOWA

One Night Only ***TUESDAY, MAY 25***

AMERICA'S GREAT EMOTIONAL ACTOR

HENRY B. WALTHALL

And a brilliant All-star cast in seven parts

The Boomerang

The sensational photo-play the Pack Trust so vainly tried to keep from the Public Eye. Why? Because it tells The TRUTH!

No Red Blooded American can afford to stay at home the evening the Idle Hour shows this dramatic marvel of the movies. This is the BIGGEST and BEST photoplay that ever played here.

Has the man who tills the soil the same rights that the lap dog of the millionaire has? *"THE BOOMERANG" will tell you.*

SCENE FROM "THE BOOMERANG" FEATURING HENRY B. WALTHALL

DR. MISSMAN WILL HAVE NEW LOCATION

Dr. Missman will soon move into new quarters which will be located up stairs over the rooms he now occupies in the State Savings Bank building. The Doctor is making this change in order to have more room as he has recently purchased a new up to date X-ray outfit and which he has now installed in his new location. His old rooms are somewhat crowded and the added equipment would require much more room. He expects to be fully settled about the first of June in the rooms up stairs.

HIGH SCHOOL BEATS TOWN PLAYERS

Last Thursday evening a twilight game of base ball was battled out between the Klemme High School squad and the town sluggers, resulting in the defeat of the latter by about 5 to 2. The High School boys are showing some real baseball pep and have the star marks of becoming a future strong aggregation for Klemme.

Knew His Age.

Allan, on his second birthday, was told by his mother that he was two years old. That same day his mother weighed him, and as she lifted him off the scale she said: "You weigh just thirty pounds." That evening, when the little boy's father came home he said: "Well, Allan, how old are you?" Allan hesitated a few seconds and then replied, "Two years and thirty pounds."

Spirit Photography.

A famous French psychologist is quoted as saying that not only does the soul exist after death, but it can be photographed and he has written a book to prove it. He presents in his volume conversations with departed spirits and also their pictures, but if he thinks he is an original discoverer he has much to learn. "Spirit photography" is an old art—or should it be said, trick?—so old that it seems to have gone out of fashion in this part of the world. It may be added that the photographs seldom made the "spirits" beautiful.

Lights Frighten Fish Away.

Norwegian experiments with fishing with the aid of electric lights lowered into the sea have been failures, the illumination apparently frightening the fish away.

The House of Whispers

CHAPTER VIII—Continued.

—11—

"I guess so," said Wick. "That's where his room is. He's only been here in the Granddeck a few days. I don't know much about him."

"And that's all you know about it?" said the detective, turning to me again.

I hesitated. Should I or should I not tell them of the wall safe that I had seen Mr. Wick closing? There was no way I could prove it. Undoubtedly Wick would deny having done so. It would be his word against mine. As superintendent his word would undoubtedly carry. I decided it would be best to withhold my information to a more propitious time.

"That's all I know, except what Mr. Wick has told you," I said.

"Very well," said the detective in charge. "You can go now, and you, too, Doctor."

Mr. Wick was escorting the doctor to the door. The detectives had withdrawn to the room where the body lay and were holding a whispered conference. I stepped quickly to the wall safe, and making sure that I was unobserved, tested the knob. It was securely fastened. I congratulated myself on having said nothing about it. Wick, I felt certain, would deny having shut it, and there was no proof that it had been opened when we had entered.

As I returned to my own apartment upstairs, nearing the top of the short flight of steps between the floors I was astounded to see a female figure flitting across the hall and entering the Bradford apartment. Though I had opportunity for only a brief glimpse, I recognized her at once. It was Claire Bradford.

The door of my apartment was standing wide open. I remembered that as I had run downstairs a few moments ago, I had neglected to close it after me. From the direction in which she had come, it was plain that Claire Bradford had been paying another surreptitious visit to my quarters. What could have been her purpose? There must have been some strong impelling motive to make her dare the perilous journey along the window ledge, and now, at the imminent risk of discovery, to pay me a second visit. I began seriously to doubt whether the explanation she had offered me was the true one. I was beginning to feel that there was more than a possibility that she was again in the clutches of the unscrupulous rascal who had once been her husband.

Greatly puzzled, I made a hasty survey of the apartment, but could find nothing that appeared to have been disturbed. Going back to my own room I hastened to place a handkerchief out of my window as a signal to Barbara, for I knew she would be anxious to know the meaning of the sounds we had heard below. In a very few moments I heard the tap of her riding-crop on my sill and hurried to answer.

"What was it?" she asked in an excited whisper.

"Daisy Lutan, an actress, who lived on the floor below, has been murdered—shot."

"Who did it?"

"I don't know. Mr. Wick and I went into the apartment together. There was no one there."

"How terrible!" she exclaimed.

"It is, indeed," I answered, "but it may help us."

"What do you mean?"

"With the police in the house making investigations, there'll be no more threats from the blackmailers for a while. They won't dare bother you for the present."

"Do you really think so?" she questioned with a little sigh of relief.

"I'm sure of it."

"Have the police been called in?"

"Yes; two detectives are downstairs now."

"I'm glad," she said. "With the detectives here, they won't dare molest us, will they?"

"Of course not," I answered. "Is your sister at home?"

"Yes," she answered. "Our guests have just gone. Mother has retired, and Claire is in the living room writing a note. They heard nothing, so I did not tell them anything about it."

"That was wise. They'll hear it soon enough. Has your sister been in the apartment all evening?"

"She hasn't been out all day unless she went out just to drop the letter she was writing down the mail chute in the hall. Why do you ask?"

"I was merely wondering if there was any way she could learn of the murder."

"How could she? Isn't that too terrible about Miss Lutan? But I mustn't talk any longer. Good night."

"Wait a moment," I cried. "There are some things I must discuss with you before I meet Gorman. How about meeting me at the Astor at eleven?"

"I can't promise, but I'll try. Good night!"

There was nothing further that I could do, and I felt sadly in need of rest. Throwing off my coat and waistcoat I began making preparations for bed. The notion took me to once more investigate the secret passageway. I pushed sharply on the panel as I had done before, but this time I could not budge it. I tugged and worked and pounded, but it stuck fast in spite of all my efforts. As I was struggling to force it open, there came a sharp ring at the bell of the apartment. As I was, in my shirt sleeves, I answered it. The two detectives I had seen downstairs stood there.

"What is it?" I asked.

"I arrest you for the murder of Daisy Lutan," said one of them, and with that they sprang forward and pinioned my arms.

"Why, this is absurd," I laughed in their faces, conscious of my utter innocence of the crime. "I had nothing to do with it."

"That remains to be seen. Put on your coat and come along."

Still holding me fast, they went back with me to my bedroom. Clutching me tight they made me put on my coat, and no sooner had I done so than one of them snapped handcuffs on me.

"Look at this, Jim," said one of them, pointing to a spot on the front of my coat.

"That's blood all right," said the other, after inspecting it.

"I got that when I was helping Mr. Wick lift the body to the couch," I protested.

"Tell that to the judge," the detective called Jim scoffed. "Better look around for the gun, Cullen."

"You'll find no gun here," I cried. "I never owned one."

Nevertheless Cullen began rummaging through the drawers of my dresser. Suddenly he gave a triumphant exclamation and drew something from beneath a pile of shirts in the second drawer.

"Here it is," he announced, holding

"Here It Is," He Announced, Holding Up Before My Astonished Eyes an Automatic Revolver.

up before my astonished eyes an automatic revolver.

"I never saw it before," I gasped.

The detective merely laughed.

"There's one bullet gone," said the man who was examining it.

"Come along, young fellow," said the other detective gruffly. "The bullet settles it. We've got the right party."

CHAPTER IX.

A prisoner in a police station cell. I passed a sleepless night. Conscious as I was of my utter innocence and confident of my speedy release, nevertheless I had to admit that the detectives from their point of view were perfectly justified in placing me under arrest.

For a burglar to have gained access to the apartments without the connivance of the employees seemed almost an impossibility. For him to have escaped from the building after having murdered Miss Lutan without being detected seemed also highly improbable. Then, too, there was the damning evidence of the blood on my coat and the fact that I had been found at the door of the apartment. I had not observed the stain on my clothing until the detectives discovered it. My explanation of how it had gotten there was the true one, yet I could readily realize that it might sound fishy to others.

On the face of it the tragedy in the Granddeck looked like an inside job. The revolver, with one bullet missing, was the strongest sort of evidence that I was the murderer. Yet I never had seen the weapon before and could not imagine who could have placed it there. There was only one explanation possible. It had been purposely planted there with the definite object of throwing suspicion on me.

The one person—the only person—whom I knew to have been in my rooms after the murder was committed was Claire Bradford. Could she have done it? I remembered that Barbara had showed me a revolver in her possession. I wondered if this could be the same weapon. I did not think it possible that Claire herself could have used it. I could imagine no motive why Claire Bradford would want to kill Miss Lutan, yet it must have been she who had hidden the revolver in my dresser. What had been her motive? How had she got possession of the revolver after the murder?

Come what may, I had no intention of telling any one—not even Gorman—of Claire's second visit to my apartment. For Barbara's sake I made up my mind I would keep my lips closed about that incident, even if I had to stay in prison indefinitely. At the police station when the detectives had brought me in, I had quietly but firmly refused to answer any questions, although they had badgered me for nearly two hours before they let me alone.

"Where did you live before you came to the Granddeck?"

"Where did you work?"

"Where is Rufus Gaston?"

"Where do your people live?"

"Why did you kill Daisy Lutan?"

"Where did you get the money you have?"

"We've got the goods on you. Why don't you confess?"

These were the sort of questions that were flung at me, first by one and then the other. Evidently at first they had had hopes of breaking me down.

"I have nothing to say," had been my unvarying answer to all their questions.

Finally they gave it up and locked me in a cell for the night, leaving me thankful that the honor of being a suspected murderer relieved me from sharing a cell with some of the frowsy prisoners I saw brought past my barred door.

"Haven't you any friends you would like to have notified?" was the last question they asked as they left me.

"I have nothing to say," I repeated once more.

Nor was this answer this time mere stubbornness. Who was there that I could notify of my plight? Birge and Roller, my two intimates, were somewhere on the high seas. The men whom I had known in the office where I had worked, for obvious reasons, were not to be called on. I had no idea of the whereabouts of my aged relatives beyond the fact that they were somewhere in Maine.

I had no intention whatever of communicating the fact of my arrest to my mother. Indeed, I was hoping that she would not hear of it until after my innocence was established.

I thought of Gorman. I would have been glad of his counsel, but I remembered that I did not know where he lived. He had told me he was giving up his position at the hotel. It would be useless to try to find him until morning.

Yet in spite of my apparent friendlessness, although to all appearances there was no one in New York to whom I could turn in this time of trouble, it was a wonderful comfort to feel that I was sure of one stanch friend—Barbara Bradford.

Although we had been acquainted but a few days, and although hardly a word of love had passed between us, I knew that her feeling for me already was something greater than friendship. I knew that she trusted me and that she would remain faithful in her affection for me, no matter what accusations were brought against me. I had been madly in love with her from almost the first time I saw her. Whatever happened, I must keep her out of it. I must find some means of warning her to say nothing to any one. I knew that her first impulse as soon as she heard of my arrest would be to come to my rescue, regardless of the fact that in establishing an alibi for me she would be blasting her own reputation. Under no circumstances, even if I was convicted, must she be permitted to speak. No explanation can account for the presence of a young girl alone in a man's rooms at eleven o'clock at night, even though she and I both knew how utterly undeserving of censure her presence there was and how important had been her motive in coming there.

Mention of Barbara's name in any way in connection with a murder case would be certain to wreck her sister's matrimonial plans. It would mean the ruin of her mother's ambitions and the unmasking of the parlous condition of their finances. It would mean that the reproaches of her mother and sister would be heaped on my Barbara's poor head.

I was still unsatisfied in my own mind as to just what part Claire Bradford was playing in the web of mystery about us. She was emotional and flighty, given to doing rash things. I felt that there was a strong possibility that relations with her ex-husband had been in some way re-established. I felt at times that she was being used as a tool by the conspirators in the Granddeck mysteries. If Claire was involved in any way, it behooved me to move carefully lest she should be betrayed in my efforts to clear myself.

There was nothing for me to do but to sit tight and take my plight as philosophically as I could until I could get in touch with Gorman. As soon as it was morning, I bribed a jail attendant to bring me a morning newspaper. On the first page I found an account of the murder under glaring headlines and read it with intense interest, my conviction growing with each line that I read that the police case against me was far better backed up than I ever imagined it could be.

Then and there I made up my mind never again to believe anything on purely circumstantial evidence. No one knew better than I how utterly innocent I was of that crime, how upright my conduct in New York had been, and how honest my motives for all my recent actions had been, yet this is what I read in the newspaper:

BURGLAR MURDERS WELL-KNOWN ACTRESS

Miss Daisy Lutan Found Mysteriously Shot in her Luxurious Apartment in the Granddeck.

Marks on Throat Where Murderer Had Choked Her

Police Arrest John S. Nelson, a Clerk, Out of Work, in Whose Rooms They Found a Revolver.

Daisy Lutan, an actress, whose matrimonial affairs recently brought her much notoriety, was found last night murdered in her apartment in the Granddeck. She had been instantly killed by a bullet wound through the heart, and there were marks on her throat where her assailant had tried to choke her. John S. Nelson, a clerk out of work, who had been acting as caretaker for one of the tenants in the building, was arrested.

There was blood on his coat when Detectives Cullen and Edwards took him prisoner, and they found in his room a revolver with one chamber empty hidden under a pile of shirts in the dresser.

The apartment Nelson is occupying is directly above that of Miss Lutan. The police theory is that Nelson let himself into the apartment by swinging down from his window, and that Miss Lutan, returning unexpectedly, found him ransacking her rooms.

The crime was discovered by James Wick, superintendent of the apartment house, who was in the elevator when he heard screams followed by a shot. Getting out of the elevator to investigate he found Nelson at the door of the Lutan apartment.

Nelson glibly explained that he had heard a shot and was trying to see where it had come from. Mr. Wick's suspicions were aroused by his manner, and he made Nelson come with him into the apartment and kept him there until the arrival of the police.

Little is known at the Granddeck about young Nelson, and he stubbornly refuses to make any statement about himself. He was employed only a few days ago by Rufus Gaston as caretaker for his apartment. As Mr. Gaston is absent from the city it cannot be learned how he happened to give Nelson employment. The police believe he may have obtained the position through false references in order to gain an opportunity to loot the apartments in the building.

Superintendent Wick had ascertained that Nelson was once employed by a shipping firm in the Wall street district but had been discreditably discharged. His former employer confirmed this, but would say nothing about Nelson beyond stating that he had been discharged for cause.

Although Nelson was not over well supplied with money he had been seen recently ordering elaborate meals in some of the most expensive restaurants. Miss Nellie Kelly, the telephone girl at the Granddeck, reported that only the night before Nelson had taken her to dinner, ordering champagne and hiring taxicabs, and had tried to pump her about the tenants in the building.

The one fact that stuck out in the whole article that seemed of vast importance to me was the fact that Wick had informed the police that I had been discreditably discharged from my last place of employment. How did he know that? Certainly I had not told him. I had told no one of the occurrence except Barbara Bradford, and I was sure she had not revealed it to anyone.

It was indubitable proof to me that Wick, or someone with whom he was conniving, had been having me shadowed. Even my great-uncle Rufus did not know where my place of employment was. Evidently the plot to discredit me had begun the day I arrived at the Granddeck. I had been discharged on account of some mysterious note my employer had received. I began now to believe that Wick must have had me followed to my place of business and to have sent that note for the express purpose of bringing about my discharge. But why? That was the puzzle.

(TO BE CONTINUED.)

Seventy to a House.

Warsaw is probably one of the most densely populated cities in the world. Its growth in area has been retarded by the fact that under the Russian regime certain fixed city limits were drawn many years ago, and for military reasons no houses were to be built outside of these limits. In a recent census it was found that the number of inhabitants to a building in Warsaw was about 70, as compared with only seven or eight in London.

Catarrhal Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

A Hearse Horse.

The man entered the cab and instructed the driver to take him to his residence near the cemetery. On dismounting, he gave the cabby eighteen pence, his exact legal fare and no more.

The cabby looked at the coins, slowly pocketed them, and said, pointing to the horse:

"D'ye see that white 'oss with the short tail?"

"Yes," said the man, rather puzzled; "what of him?"

"Oh, nothink; only I 'opes as the next time you're brought here as it'll be by a black 'oss with a long tail! Evenin', sir."—Edinburgh Scotsman.

Her Jewels Gone.

"Mrs. Swellman has been robbed of her jewels and Mrs. Meanly is the guilty—"

"Gracious! You don't mean to say that she stole—"

"What else is it but stealing? She offered Mrs. Swellman's cook $5 a week more and her maid, $3 and now she has them."—Boston Transcript.

Embryo Politician.

"Mother," said little Ray in an aggrieved tone, "you have no constitutional right to send me to bed without my supper."

"What do you mean, Raymond?"

"You are exercising rule without the consent of the governed."—Boston Transcript.

Cupid sometimes grafts a peach on an old shrub.

His Views.

"All the world's a stage."

"Maybe so. But some people have on too much makeup."

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Adv.

A Touch of Mischief.

There had been a difference of opinion in the preacher's family in which six-year-old Elizabeth thought she got the worst of it. So at prayer time she was unhappy and resentful toward the world in general and her own ministerial family in particular. But she knelt at her mother's knee as usual and went through her usual evening petitions. Finally she prayed:

"Oh, Lord, make all the bad people good."

Then as an afterthought she added:

"And, God, if you can, please make all the good people nice."—The World Outlook.

Prosperous Martinique.

The number of manufacturing industries in Martinique has been increasing, although most of the plants are small. The factories in operation are 15 sugar factories, 114 rum distilleries, eight lime kilns, one factory for canning pineapples, one factory where chocolate powder and coco butter are made, one factory for alimentary pastes, two ice factories, two forges and foundries, one copper shop, one tile, terra cotta and brick factory 11 gaseous water factories and four printing houses.

Some Wag.

Redd—Black took his dog over to France with him when he left with his regiment, didn't he?

Green—Oh, yes.

"And they have returned, I hear."

"Yes."

"Both of their old jobs back?"

"Well, the dog has. I saw him chasing his tail today."—Yonkers Statesman.

At the Jungle Hop.

Mrs. Chimp (excitedly)—Did you hear about George Giraffe? Got a knot in his neck!

Mrs. Rhino (a late comer)—Gracious! How did it happen?

Mrs. Chimp—He was dancing with Heloise Hippo and tried to pull some cheek to cheek stuff.—Buffalo Express.

Their Material.

"Paw, what are castles in Spain built of?"

"Mostly of gold bricks, my son."

For Every Home

A table drink that refreshes, but leaves no after-depression—

Instant Postum

Much used nowadays instead of coffee as a breakfast beverage because of its similarity in flavor to coffee, but with entire absence of ill effect, since Postum contains no "caffeine."

Instant Postum is made quickly in the cup, with economy as well as convenience.

Sold by Grocers Everywhere

Made by POSTUM CEREAL CO., Inc.

Home Town Helps

TO LEVY TAX ON BILLBOARDS

Commission Recommends That Massachusetts Legislature Get Revenue From Advertising Devices.

Taxation of billboards and all other kinds of outdoor advertising devices, as well as regulations of their size, location and manner of construction, is recommended in the report of the special billboard commission submitted to the legislature.

The only advertising signs exempt from the legislation recommended by the commission are those which have been erected in conformity with existing law and which call attention to the person occupying the premises on which the sign appears or to the business that is done on these premises, or advertising the property itself or any part thereof as for sale or to let.

For all other signs, the commission recommended that an annual excise tax be levied, the amount to be determined by the division of highways of the public works department, having in mind in each case the location of such sign or device, the character of the neighborhood, the number and class of persons usually passing within reasonable distance of the sign, and such other factors as in the judgment of the members of the division will give to a sign in that particular location a particular value for advertising purposes.—Boston Transcript.

KEEP CAR IN A GARAGE

The new car may be taken care of easily when your home happens to be situated at the side of a hill. This is an inexpensive garage and is built where the cellar would ordinarily be. It is one of Los Angeles' popular ways of combating the high cost of garaging.

Towns on the Honor Roll.

More towns where memorial tree planting has been reported for the honor roll of the American Forestry association of Washington are announced as follows: Lanham, Md., Augusta, Ga., Thompson, Ga., Carbondale, Ill., Indianapolis, Ind., Greendale, Ky., LaGrange, Ky., Louisville, Ky., New Orleans, La., Waltham, Mass., Caruthersville, Mo., Camp Dix, N. J., Brooklyn, N. Y., Mamaroneck, N. Y., Mohegan Lake, N. Y., New York city, Tarrytown, N. Y., Sharon Hill, Pa., Marion, Va., Bridgeport, Conn., College Park, Ga., Milledgeville, Ga., Logansport, Ind., Hobart, Ind., Frankfort, Ky., Middlesex, N. J., Elmira, N. Y., Metuchen, N. J., Lumber Bridge, N. C., Addyston, O., Hatboro, Pa., Memphis, Tenn., Appleton, Wis. The American Forestry association is registering the thousands of memorial trees being planted and will send free tree day programs on request and free certificates of registration.

Beauty Always Appreciated.

Noble architecture and fine landscape gardening exemplify the helpful effect of art. The people's enjoyment of them, of buildings and parks, shows our need of beauty and the necessity of gratifying the desire for beauty. The existence of this craving and the satisfaction of it are evidence that a people has risen from barbarism to civilization.—Spokane Spokesman Review.

Early Care of the Lawn.

Get ready to reseed and top dress the lawn as soon as the frost is out of the ground. Fertilize and roll. If the fertilizer is to be dried sheep manure test it carefully in a flower pot and see that there is no weed seed in it. Much of the sheep manure has been dried, but not sterilized.

Pay Debt to Community.

Don't think your only debts are those mensurable in dollars and cents. Your community also has a claim on you in the way of interest and a bit of time now and then.

JUST KIDS

By JENNIE LITTLE.

(©, 1920, by McClure Newspaper Syndicate.)

As the car swung round the curve and stopped, the motorman almost thought he was seeing double, for beside the white post stood a small boy and girl, as like as two peas in a pod. The conductor, smarting from the sarcastic comments of an old lady whom he had carried past her street, changed his scowl to a grin as he swung them up with a "Well, well, look who's here! Does your mother know you're out?"

"No, 'cause we're visiting Gramma," piped up the feminine portion of the party, who was the acknowledged spokesman in public, for Bobs was the victim of a most unmanly lisp.

As they passed down the aisle of the hot car, the listless or grumpy expression on the other passengers' faces changed as if by magic. They squeezed into a vacant space beside a mother trying vainly to amuse her fretting baby, who promptly stopped his wailing, and with a gurgle of mischief made a pass at Betty's curls.

"How long have you had him?" she asked, with a delightful giggle.

"He had his first birthday last week," smiled the mother.

"Oh, my, hasn't he lasted good?" was the admiring remark, as she cast a most unfavorable look of comparison at the battered features of a doll held tightly under one arm. "I only got Bella last Christmas. We've got a new baby brother home."

Bobs burrowed deep into newly acquired back pockets, the pride of his heart, taking as much time as possible, that none might overlook the existence of said pockets.

"Two marbleth," he announced briefly.

Just then a young man stepped on the car, and Betty hailed him as an old friend.

"The twin terrors, as I'm alive!" he exclaimed, his eyes searching eagerly about for a third party. "You're not alone?"

"Yes," said Betty, "but it's all right. It hasn't been a nice day at Gramma's. Aunt Alice cried hard last night when she thought I was asleep, and she hasn't laughed or played with us today. Bobs was bad, and when he upset the milk bottle in the 'frigerator, Gramma said, 'Children I'm 'zasperated. Go out and amuse yourselves till I call you.' So we started to water the lawn, and how did we know Grampa was coming round the corner just as we turned the hose that way? Then he told us to go straight off the lawn, so we took a walk down the street.

"We stopped to speak to a big mooly-cow looking through the fence, and she blew both her old horns at us. So we thought we'd ride a little way, till it's time for Gramma to want us back."

Poor Jack Barnes was as uncomfortable as a mere man could be under this running fire of explanation, and, red of face, signalled for the next stop.

"You'll go right back now," he said, firmly, and marshalled them off, followed by the delighted smiles of Betty's audience.

"I hope you are not going to be cross, too," said the engaging young sinner. "Guess everybody got out the wrong side of the bed this morning. Why didn't you come to see Aunt Alice last night? Then maybe she wouldn't have cried."

When they reached the gate, three distracted relatives came rushing from as many directions, but Jack turned to the grandparents.

"I found these twinsters having a joy ride on a car, so I made them about-face in case you wanted them."

"The little rebels," cried the old gentleman; "they ought to be spanked for giving us the scare of our lives." But Grandma thankfully folded them to her heart.

As they went to the house, Jack turned stiffly to the young lady, who, after her first cry of welcome, had not spoken.

"I didn't intend to force myself upon you again, after what happened last night, but I really would like to hear your reasons for letting that cad Hastings take you to the dance after you had promised me. If it was just a way of letting me down easy, why all right, of course."

"Well," answered that young person, coldly, "when I saw you an hour before devoting your time to a beautiful stranger, I certainly didn't think you needed my company, and the roadster will not accommodate three."

"Daylight breaks over me," cried Jack. "My sister arrived on the 5:30, and I was showing her about town a bit, and telling her about the finest girl in the world, who had so often wished to meet her." And you thought—oh, Alice Camden, I guess it's up to you to ask me in to supper and begin where we left off before this big mistake."

That night as the young adventurers were being put to bed, Alice led Jack to the foot of the stairs, where Betty's voice floated down—"and bless mamma and Daddy, and the new baby, and make Bobs a better boy tomorrow." Even a worm will turn, and from the next room came a defiant challenge: "Mind your own bittineth. I can pray for mythelf!"

There was a pause, fraught with great possibilities, then the prayer was concluded with a voice of Pharisaical sweetness:

"I'm going to be good, anyway, Lord, but you can help me a little if you feel like it!"

COUGHING, WEAK AND RUN-DOWN AFTER FLU

Regained flesh and strength quickly, and tells how.

"I nearly died from 'flu' last October, and it left me with a terrible cough. The doctor gave me one bottle of medicine after another, but it did me no good. Went to Charlotte, N. C., and took treatment of a specialist without any permanent benefit.

"I saw Milks Emulsion advertised and started using it. It helped me right from the start. I had no appetite and my stomach was in bad shape. But 12 bottles have straightened me out entirely. I eat anything without distress, my cough is gone, and I have gained back my strength and flesh."—Emma Withers, Box 50, Belmont, N. C.

Dont' trifle with a weak, run-down condition. It leaves you open to serious diseases. Get your strength back. Milks Emulsion costs nothing to try.

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. As a builder of flesh and strength Milks Emulsion is strongly recommended to those whom sickness has weakened, and is a powerful aid in resisting and repairing the effects of wasting diseases. Chronic stomach trouble and constipation are promptly relieved—usually in one day.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

No matter how severe your case, you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and $1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv

Billions of Tons of New Fuel.

For the production of cheap electric power, briquettes and certain by-products the government of Victoria is planning to develop immense deposits of brown coal, estimated to exceed 20,000,000,000 tons.

IN BUYING ASPIRIN ALWAYS SAY "BAYER"

Look for the name "Bayer" on tablets, then you need never worry.

"Bayer Tablets of Aspirin," can be taken safely for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Joint Pains, Neuritis, and Pain generally.

To get quick relief follow carefully the safe and proper directions in each unbroken package or "Bayer Tablets of Aspirin." This package is plainly stamped with the safety "Bayer Cross."

The "Bayer Cross" means the genuine, world-famous Aspirin prescribed by physicians for over eighteen years.

Handy tin boxes of 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Taken in the Other Sense.

Miss Mugg—I think you are just beautiful, my dear.

Miss Bute (modestly)—That's where we differ.—Boston Transcript.

Pleasant Method.

He—"It makes me a better man every time I kiss you." She—"I've been hoping, dear, that you would reform."

When a man seeks notoriety he usually finds more than he can use in his business.

Other people's happiness gives the pessimist a headache.

Lucky is the man who loses his reputation—if it is bad.

WOMEN! DON'T BUY POOR DYE!

Say You Want "Diamond Dyes"—No Other Kind! Don't Spoil or Streak Your Material

Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into worn, shabby garments, draperies, coverings, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed even if you have never dyed before. Druggist has color card.

War Graves Maps Popular.

The war graves map is now a popular publication in Europe. In its larger form it shows 2,000 military cemeteries, and in the more detailed editions it shows the numbered graves.

Can't Get Down to That.

Jules, the headwaiter, says he has enough money to retire on, but he can't reconcile himself to the idea of becoming one of the persons who have to give tips.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

At the Pawnbroker's.

"Will you let me have something on this watch?" "I suppose I'll have to; time is money."

Even a miser may give you advice freely.

An Exception.

Jack—Lip-service is but mockery.

Belle—Oh, not in love-making.—Baltimore American.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callous. Instantly it stops hurting, then shortly you lift that bothersome corn or callous right off, root and all, without one bit of pain or soreness. Truly! No humbug!—Adv.

Self-love is the root of most people's discontent.

Terrible Tortures From Itching Skin Diseases

No Sure Relief Until the Cause Is Removed.

When the blood becomes infested with millions of tiny disease germs that attack the skin, then the fiery irritation and intense itching will remain with you until these germs are removed from the blood.

Genuine relief therefore, can only be expected from a treatment that goes right to the seat of the trouble, and strikes at its cause. Such a remedy is S. S. S., the reliable old blood purifier that kills the germs of disease, and sends a new supply of rich red blood coursing through the veins.

S. S. S. has been used successfully in some of the worst cases of eczema and other skin disorders.

For valuable literature write to Medical Adviser, 108 Swift Laboratory, Atlanta, Ga.

The Right Way

in all cases of

DISTEMPER, PINKEYE INFLUENZA, COLDS, ETC.

of all horses, brood mares, colts and stallions is to

"SPOHN THEM"

on the tongue or in the feed with

SPOHN'S DISTEMPER COMPOUND

Give the remedy to all of them. It acts on the blood and glands. It routs the disease by expelling the germs. It wards off the trouble, no matter how they are "exposed." A few drops a day prevent those exposed from contracting disease. Contains nothing injurious. Sold by druggists, harness dealers or by the manufacturers. 60 cents and $1.15 per bottle. AGENTS WANTED.

SPOHN MEDICAL COMPANY, GOSHEN, IND.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

Local News

Miss Mildred McCullough went to Ames, Iowa, last Thursday to attend the Agricultural Carnival and Field Meet and also to visit with a cousin. She returned to Klemme Monday.

It was reported to us that Herman Priebe lost some cattle in the storm Tuesday evening when they were struck by lightning as they were standing near a wire fence in the pasture.

We had quite a heavy rain here Tuesday evening. About an inch of rain fell in less than an hour. A heavy wind and electrical storm accompanied the rain.

The rains the past week have somewhat delayed the corn planting in these parts but at present the weather is improving and work is again being take up in the fields.

The warm rains of the past week have brought out the leaves and blossoms on the trees and it really is beginning to look a little like summer.

Al White says that he and his family expect to leave the latter part of this week by auto for Wisconsin to take a vacation and also to take a few good fishing trips.

Only one more week of school after this one and the Klemme school kids will begin to ejoy their summer vacation of three months. The Garner schools will close this week.

Dr. Reuber returned Saturday from Des Moines where he spent several days attending the convention of the Iowa State Medical Society. He reports a very interesting and instructive meeting.

Tonight (Thusday) the Garner High School have their commencement exercises and have the honor of being the largest class to graduate from that school. Two Klemme young ladies are in the class: Miss Mabel Waterman and Miss Lulu Newberger.

LAND SALE

We will sell on public auction the following land: The North ½ of the Northeast ¼ Section, No. 3, in Twin Lake Township, Hancock County, Iowa; tract of land 73 acres. CITY MEN BADLY NEEDED ON FARMS

Shortage of Hired Labor Threatens to Curtail Production of Food.

MEREDITH MAKES AN APPEAL

Increase of Wages From 15 to 25 Per cent Fails to Relieve Situation—Total Acreage Undoubtedly Will Be Reduced.

Washington—With a shortage of hired farm labor, as acute as in 1918, threatening to curtail food production on American farms, E. T. Meredith, secretary of agriculture, has issued an appeal to city men, college students and others to spend their vacations working on farms, particularly as helpers in harvest fields.

Reports secured by the federal department from its representatives in practically every state in the Union show that the supply of hired farm labor in this country is only about 72 per cent of the normal supply, compared with approximately 84 per cent of a normal supply a year ago. This year's shortage is almost exactly the same as that of two years ago when large numbers of men were in military service.

May Cut Production.

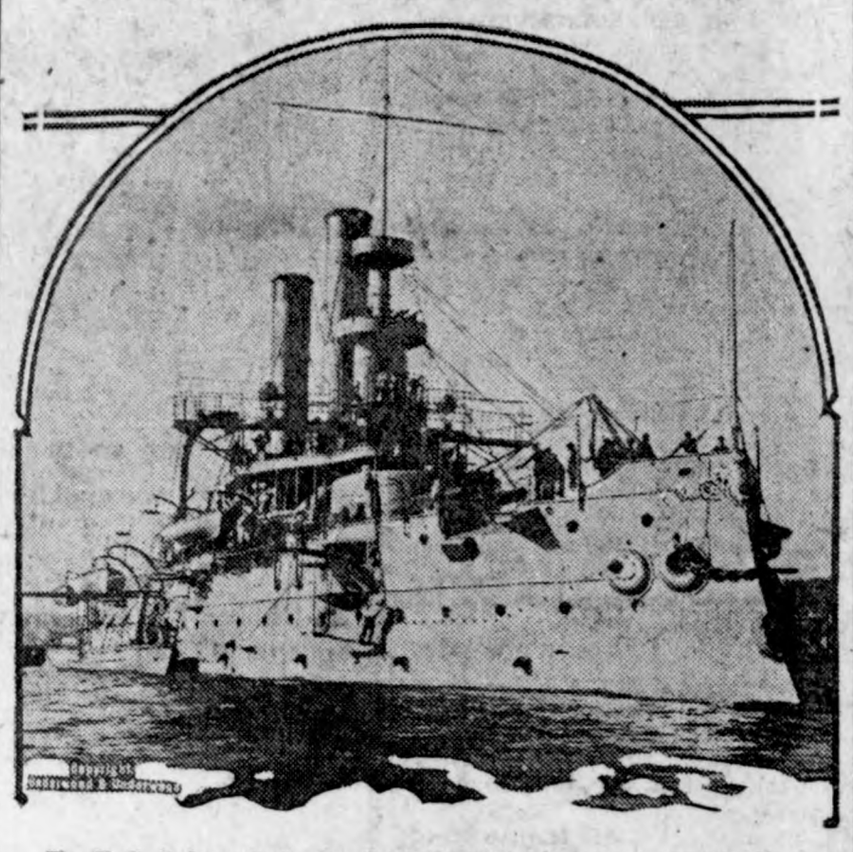
The present shortage has arisen in spite of the fact that farm wages are 15 to 25 per cent higher than last year. The situation, unremedied, cannot fail to have unfavorable effect on production, according to the United States department of agriculture, and will tend to prevent any reduction in the prices of farm products. While the total acreage undoubtedly will be reduced as a result of the present situation, it will not be in as large proportion as the reduction in the labor supply, because the farmers with their families are exerting themselves to the utmost to overcome their handicap. Cultivation this year will be less intensive than formerly. More land will be put into grass and such other crops as require a minimum of labor, it is said, and the tilled fields will be less intensively cultivated.

Secretary Meredith calls on all business men and students to spend their summer holidays helping relieve the present situation and so aid in combating high living costs. In making this appeal it is recognized that, at the outset at least, such labor is not as efficient as experienced farm labor, but the excellent results secured in 1918, when city men in large numbers aided the farmers, leave no doubt as to the success of the present drive if the men will respond.

Plan to Help Farmers.

The United States department of agriculture was represented by Asher Hobson at the meeting of the National Farm Labor conference held in Kansas City recently and the office of farm management, of which Mr. Hobson is assistant chief, is laying plans looking toward offering effective aid in dealing with the farm labor situation, particularly in the harvest season. It is expected that definite announcement regarding work along this line will be made in the near future. Until other provision has been made by the department all persons interested in finding work on farms should write to the directors of agricultural extension at the agricultural colleges in the various states. These directors are prepared to supply the names of county agents having farms in their respective counties that need farm labor. By this method anyone desiring to help on a farm can get in direct communication with the farmer.

FLAGSHIP TO BE USED AS TARGET



The U. S. S. Iowa, in its day the pride of the American navy and flagship of the late "Fighting Bob" Evans, unless plans of naval experts fail, will be used as a moving target for modern dreadnoughts, its movements directed by powerful wireless apparatus invented by John Hays Hammond. The Iowa is about thirty years old and is of no further use as a fighting machine.

ONE DRINK JAILS BRIDEGROOM

Brooklyn Judge Lets Him Go to Try to Square Things With His Wife-to-Be.

Brooklyn, N. Y.—Togged out in his wedding finery, namely, a perfectly correct afternoon outfit, Alexander Kioskowsky, aged forty, woke up in a cell.

His recollections of what happened were vague. He remembered he had started from his boarding house to make his first venture in married life. His wife-to-be was waiting for him. His disposition to be prompt at the altar was fixed in his mind, but a tempter whispered to him that one little glass of half of 1 per cent beer would not hurt him. The barman whispered "try whisky," as if he was doing him a favor, and he did. That was the last recollection he had until the cell custodian woke him up and told him to get ready to go to court.

The facts in the case were duly presented to Magistrate McGuire by Patrolman McGovern, who had picked the expectant bridegroom out of the gutter.

"If you promise me that you will not take another drink until you are safely married I'll let you go," said the magistrate.

Kioskowsky promised, with marked fervor, and then started out to square things with the woman who may or may not consent to be Mrs. Kioskowsky.

Discovers Way to Balk Idiocy

Surgeon Perfects New Method of Treating Tumor of the Human Brain.

SAVES SCORES OF PERSONS

Discovery Is Result of Long Series of Experiments on Animals—Locates Tumors and Obstructions Every Time.

Baltimore, Md.—Dr. Walter E. Dandy, associate in surgery at Johns Hopkins hospital, has discovered a process by which purified air is pumped into the channels of the human brain, thus making possible a study of the living brain.

The discovery is regarded of tremendous importance in that it already has saved scores of persons from idiocy and premature death, by making possible the exact location of brain tumors, and thus their eventual removal.

The discovery of Doctor Dandy is the result of a long series of experiments on animals.

Fluid That Feeds the Brain.

In each hemisphere of the brain there is a large ventricle or chamber connecting with an elaborate system of channels filled with a fluid produced apparently by one of the glands and delivered to the brain through the spine. This fluid passes slowly to the surface of the brain, there to be absorbed by the brain tissue, and it might be described as the fluid on which the brain feeds.

An excess of this fluid is known as hydrocephalus, or water on the brain. Doctor Dandy has discovered that it frequently follows a tumor which blocks the passage of the fluid. Nature provides but one method of disposing of it, absorption. When that is prevented by a tumor, the fluid collects and presses against the brain, destroying it. Sometimes patients will live for years as imbeciles.

Trials So Far Successful.

In every case where it has been used the method has been successful in locating tumors and other brain obstructions within a hair's breadth. One of the most remarkable features of the discovery is that it is most efficacious when only a local anesthetic is used. It was discovered that the patient felt no ill effects and was able to give assistance to the surgeon.

In one case described by Doctor Dandy a patient was operated on half a dozen times for a tumor of the brain without success. Doctor Dandy used his process and located the tumor, which was removed from a point not considered by diagnosticians.

A photograph of the patient prior to the operation showed a face with sagging lines and the vacant stare of imbecility. A photograph a few months after the operation showed a man apparently in full possession of his senses.

King Alfonso Was Fined for Walking on Grass

Madrid.—King Alfonso was fined two pesetas for walking across the grass in the Gardens of the Alcazar. Every member of his suite who followed the king across the greensward likewise was fined.

The first intimation the royal party had that it had committed an offense was when a guardian approached and said: "Your majesty, walking on the grass is forbidden. I must fine you according to my instructions." At first King Alfonso was abashed, then he laughed and paid the money.

Later the mayor of the town called at the palace and apologized to the king, but his majesty told him the guardian had acted properly and should be rewarded for devotion to duty.

WORDS TO THE NAVY

WILSON'S ADDRESS BROUGHT OUT IN SIMS-DANIELS CASE.

REVEALS PRESIDENT'S POLICY

Shows He Was Dissatisfied With British Methods. Told Fighters to Do Audacious Thing.

Washington, D. C.—During the investigation of the Daniels-Sims case before the senate naval committee, President Wilson authorized the publication of a speech he delivered confidentially to officers of the navy on the quarter deck of the dreadnaught Pennsylvania on August 11, 1917.

In his criticism of the navy's conduct of the war, Admiral Sims has always stressed the complaint that the administration was laggard in fully co-operating with the British admiralty in the early months of the war.

Publication of the president's speech to the naval officers reveals that Mr. Wilson himself was strongly dissatisfied with the methods of the British navy.

In laying the text of his remarks before the committee, Secretary Daniels said they showed the "bold and vigorous" policy the president had outlined for the navy.

In opening his address to the officers, Mr. Wilson said:

"Admiral Mayo and gentlemen:

"I have not come here with malice prepense to make a speech, but I have come here to have a look at you and to say some things that perhaps may be intimately said and, even though the company is large, said in confidence.

"This is an unprecedented war, and, therefore, it is a war in one sense for amateurs. Nobody ever before conducted a war like this and therefore nobody can pretend to be a professional in a war like this. Here are two great navies, not to speak of the others associated with us—our own and the British, outnumbering by a very great margin the navy to which we are opposed and yet casting about for a way in which to use our superiority and our strength.

"Now, somebody has got to think this war out. Somebody has got to think out the way not only to fight the submarines, but to do something different from what we are doing.

"We are hunting hornets all over the farm and letting the nest alone.

"None of us know how to go to the nest and crush it and yet I despair of hunting for hornets all over the sea when I know where the nest is and know that the nest is breeding hornets as fast as I can find them. I am willing for my part and I know you are willing because I know the stuff you are made of—I am willing to sacrifice half the navy. Great Britain and we together have, to crush that nest, because if we crush it the war is won. I have come here to say that I do not care where it comes from. I do not care whether it comes from the youngest officer or the oldest, but I want the officers of this navy to have the distinction of saying how this war is going to be won.

"I am willing to make any sacrifice for that. I am ready to put myself at the disposal of any officer in the navy who thinks he knows how to run this war.

"I wish that I could think, and had the brains to think, in the terms of marine warfare, because I would feel then that I was figuring out the future history of the political freedom of mankind. I do not see how any man can look at the flag of the United States, and fail having his mind crowded with reminiscences of the number of unselfish men who have died under the folds of that beautiful emblem. I wonder if men who do not die under it realize the distinction they have?

"There is a distinction in the privilege and I, for my part, am sorry to play so peaceful a part in the business as I myself am obliged to play, and I conceive it a privilege to come and look at you men who have the other thing to do and ask you to come and tell me how this thing can be better done, and we will thank God that we have got men of originative brains among us.

Bluebeard Gets Life.

Los Angeles, Calif.—A total of nine murders of women he had married was confessed by the man who, under the name of James P. Watson, was sentenced to life imprisonment for the murder of Nina Lee Deloney, according to Thomas Lee Woolwine, district attorney.

The alleged confessions, according to the district attorney, acounted for all those missing among the twenty or more women the man was said to have married.

Nebraska Marshal Passes Away.

Omaha, Neb.—Thomas J. Flynn, 50 years old, United States marshal for Nebraska, died at his home here after an illness of seevral months. He was well known throughout the state.

Supply Friends With Sugar.

Great Falls, Mont.—Montana residents are shipping sugar by parcel post to friends in Minnesota, North Dakota and other states, according to reports presented to the state convention of wholesale grocers here.

HOOVER WOULD ALLOT SUGAR

Tells House Committee Government Made Mistake in Not Buying Crops —Shortage to Continue.

Washington, D. C.—Herbert Hoover, former food administrator, appearing before a house committee investigating the sugar situation, declared that the world shortage of the product was likely to continue two or three years. The pressing need was rationing, he said, with immediate government action to control the supply through commercial, not legalistic, methods.

Mr. Hoover said that if the government had bought the Louisiana and Cuban crops last year, it would have meant a lower tax on the family pocketbook. Even now, he said, there was a chance to help by limiting the supply to non-essential industries. He told the committee that prohibition had stimulated the use of sugar in manufacture of sweet drinks and thus had added to the drain on stocks needed for home consumption.

Mr. Hoover, who was a member of President Wilson's second industrial conference, told the senate labor committee he did not believe that the relationship between employers and employees could be settled by any form of legal repression, whether it be by injunction, compulsory arbitration or industrial courts. He said labor unquestionably had been affected by reports of the excessive profits of some employers, although he was emphatic in asserting that unlike Europe, the United States had not been threatened by any attempt by labor leaders to use the strike as a political weapon.

"We have got to throw tradition to the wind.

"As I have said, gentlemen, I take it for granted that nothing that I say here will be repeated, and therefore I am going to say this: Every time we have suggested anything to the British admiralty the reply has come back that virtually amounted to this, that it had never been done that way, and I felt like saying, 'Well, nothing was ever done so systematically as nothing is being done now.' Therefore, I should like to see something unusual happen, something that was never done before; and inasmuch as the things that are being done to you were never done before, don't you think it is worth while to try something that was never done before against those who are doing them to you?

"There is no other way to win. America is the prize amateur nation of the world. Germany is the prize professional nation of the world. Now, when it comes to doing new things and doing them well, I will back the amateur against the professional every time. He knows so little about it that he is fool enough to try the right things. The men who do not know the danger are the rashest men.

"Please leave out of your vocabulary the word 'prudent.' Do the thing that is audacious to the utmost point of risk and daring because that is exactly the thing that the other side does not understand.

"I think that there are willing ears to hear this in the American navy and the American army because this is the kind of folks we are. We get tired of the old way and covet the new ones.

"I am not discouraged for a moment, particularly because we have not even begun and, without saying anything in disparagement of those with whom we are associated in the war, I do expect things to begin when we begin. If they do not, American history will have changed its course; the American army and navy will have changed their character. There will have to come a new tradition into a service which does not do new and audacious and successful things."

Huge Profit in Sugar.

Salt Lake City, Utah.—Federal investigators have determined that the Utah-Idaho company, with headquarters here, by selling sugar at 22.75 cents per pound wholesale, to which it was raised May 1, from 13 cents, are realizing a net profit of $14.15 per 100-pound sack, according to announcement by United States Attorney Isaac Blair Evans.

Another Ark to Depart Soon.

Washington, D. C.—Another "soviet ark," loaded with radical aliens, will be started on its way to Russia shortly, the house appropriations committee was told by Anthony Caminetti, director of immigration. "I am now ready to deport in large numbers," Caminetti said.

No Wet Planks Likely.

Washington, D. C.—Both republican and democratic national organizations have decided definitely that there will be no "wet" plank in their platforms this year.

Slays Wife and Sons.

Webster City, Ia.—Angered because she had left him, Harvey Beasley shot and killed his wife and two small boys at their home here, and eluded the sheriff and his posse by riding to Iowa Falls in an automobile, where the trail was lost.

The bodies of Mrs. Beasley and the boys were found by the former's sister-in-law, who arrived on the scene in time to see Beasley leaving in haste. The bodies were wriggling in a great pool of blood.

EARLY POTATOES ARE OF MUCH IMPORTANCE

Don't Crowd Out More Intensive Garden Vegetables.

Wherever Space Will Permit It Is Advisable to Plant at Least One Peck of Seed—Put Sugar Corn Between the Rows.

One peck of medium-sized seed potatoes, cut so there will be two good eyes to a piece, and dropped one piece to a hill, will plant 350 feet of row, according to the United States department of agriculture. If seasonal and other conditions are right this peck of seed potatoes should produce at least sixteen-fold, or four bushels of potatoes. Some home gardeners have grown six and seven bushels of early potatoes from a peck of seed, but that is exceptional. Sixteen pecks of potatoes, or 48 quarter-pecks, will provide the potatoes for at least 48 dinners for a family of five, with some left from each dinner to be fried for breakfast the following morning.

Potatoes are important in the diet, and early potatoes from home gardens are especially appetizing. It may not pay to crowd out the more intensive garden vegetables in order to grow early potatoes, but wherever space will permit at least one peck of seed should be planted. A good plan is to plant late sugar corn between the potatoes about the time the potato vines begin to show signs of ripening. Then as the potatoes are dug, hoe the soil around the corn. Late cabbage plants are often set between the potatoes and a crop of cabbage is produced after the potatoes are removed. It always pays to keep the land working.

BIG REVENUE FROM TOBACCO

Figures Have Always Been Larger Than Those From Customs Tax —$178,000,000 in 1918.

The internal revenue from tobacco has always been much larger than the customs receipts, says the United States department of agriculture. In the first years' operation of the law, 1863, the internal revenue was $3,000,000, in the next year $9,000,000 and the amount increased to $31,000,000 by 1870, $41,000,000 by 1877, and $47,000,000 by 1882. After that year, the amount declined and remained relatively low until 1898, with a low-water mark of $26,000,000 in 1884. Suddenly, in 1899, the income jumped to $52,000,000, and the amount reached $71,000,000 in 1912. $85,000,000 in

Tobacco Field in Virginia.

1916, $102,000,000 in 1917, and $156,000,000 in 1918. The receipts of internal revenue and customs together produced $13,000,000 in 1865, $52,000,000 in 1897, $75,000,000 in 1909, $104,000,000 in 1913, $132,000,000 in 1917, and $178,000,000 in 1918.

QUICKLY PERISHABLE CROPS

Difficult to Form Any Reliable Judgment for Marketing Berries, Melons and Peaches.

It is particularly difficult to form any reliable market judgment for quickly perishable, short-season crops like strawberries, peaches, and melons, says the United States department of agriculture. Markets in such lines are irregular, differing widely at the same time in different cities because the nature of the crop does not admit of safe transfer between distant points and does not allow long keeping in cold storage. These lines feel quickly and severely the effect of oversupply, whether of car lots or from neighboring sources. As these crops are not strictly necessities, the demand is somewhat uncertain, depending largely upon the buying power of the public, which may vary greatly from season to season.

SMALL FLOCKS OF CHICKENS

More Should Be Kept Where Conditions Make It Feasible in Villages and Towns.

Where conditions make it feasible and cheap, small flocks of poultry should be kept to a greater extent than at present by families in villages and towns, and especially in the suburbs of large cities. The need for this extension of poultry raising is particularly great in sections where the consumption of poultry products exceeds the production, with the result that prices are high.—United States Department of Agriculture.

STANDARDS HELP FARM PROBLEMS

Lesson Taught by Denmark's Success in Butter Business Is Emphasized.

OF BENEFIT IN HOME TRADE

Recent Importations Bearing Well-Known Foreign Brand Call Attention to Value of Recognized Grades in Marketing.

(Prepared by the United States Department of Agriculture.)

It was no less a person than Shakespeare's Hamlet who asserted that there was something rotten in Denmark. But whatever truth there may have been in that assertion, American butter interests today readily acknowledge that there is nothing impure in Denmark's butter.

Danish butter usually is of very good quality. That, in fact, is the reason that dairy and butter interests in the United States have been looking with a suggestion of concern—more than is deserved, perhaps—on the importation of Danish butter which has been taking place at New York recently at the rate of several hundred casks weekly, each cask weighing 112 pounds. Experts use this incident to emphasize the lesson which Denmark's success in the butter business teaches with respect to standardization. While perhaps the greatest value resulting from the application of standards in Denmark lies in its benefit to that country's export butter trade, in America a corresponding benefit could be enjoyed in domestic trade, since our home butter consumption normally far exceeds our exports.

A Recognized Brand.

The Danish government has a brand which the law provides can be placed on all butter meeting certain rather exacting requirements. This is the brand to be found on the casks which have been arriving at New York and which is recognized the world over as a guaranty of good quality. Experts in American dairy marketing problems point to the value of the Danish official mark not with the idea of advocating that this government adopt a similar plan of officially branding butter, but to emphasize the value which results from adopting recognized standards. They call attention to the fact that America is producing much butter which scores as high or higher than the Danish importations.

In some cases private brands are well enough known to profit fully by the high grade maintained. But this can not be said of all American butter of fine quality. Today no uniform grades are universally adhered to and consequently much butter has to be marketed at lower prices than it would otherwise bring because it bears no brand or score indicating its real value.

Apply Grades More Widely.

The government has established standards for scoring butter and anyone who will get in touch with one of the five principal butter markets where inspectors are maintained—Minneapolis, Chicago, New York, Philadelphia, Boston—can have his butter inspected at small cost. What is needed, it is claimed, is that the federal grades be more generally applied. Not only would high-grade butter more generally command the price it deserves, but many producers now more or less indifferent to grading would be induced to improve the quality of their output.

A few weeks ago perishable food inspectors representing the Bureau of Markets, United States Department of Agriculture, were called on to inspect 4,000,000 pounds of butter intended for export to a European country. The bureau was able to certify that most of the butter came up to the standard required by the exporting house. Having received federal certificates to this effect the exporters could safely proceed with their shipments to Europe. The incident is considered of special interest because the house exporting the 4,000,000 pounds had previously had trouble with an uninspected shipment abroad because it did not come up to specifications. By utilizing the federal inspection service it was possible for these exporters to be sure that butter accepted for shipment was up to a certain standard.

Standardization Promotes Efficiency.

Since the inauguration of federal food inspection by the Bureau of Markets in 1917, an increasing number of producers, buyers, and sellers have come to appreciate its value, as is indicated by the demand for inspection of perishable fruits and vegetables and butter. This is a big advance in the right direction, market experts say, but immeasurably greater benefits can be enjoyed when producers and dealers generally come to understand the grades which inspectors apply, and constantly work with them in view. Standardization will promote efficiency, not only in the butter industry, but in handling most perishable fruits and vegetables.

With a wide acceptance of federal grades and standards, production could be carried on far more profitably and distribution far more economically than at present. Anyone interested in this question can secure full information by writing the Bureau of Markets, United States Department of Agriculture, Washington, D. C.

Part of a big importation of butter recently arrived in New York, which furnishes an object lesson in the value of standards and grades for food products.

PROFIT FROM STOCK AND VARIOUS CROPS

Enterprises Should Be Adopted That Are General.

Limited Demand for Some Product Not Generally Grown Will Sometimes Afford Few Farms Opportunity for Expansion.

Are the crops and live stock the farm is producing for sale to the nonproducers of the community or for export to other communities such as can be made profitable when produced and sold locally or exported?

The best guide here, says the United States department of agriculture, is the practice of the community; enterprises should be adopted that are found generally on its farms. A limited demand from the nonproducers of the community for some product not generally grown locally, and for which many local farms are not adapted, will sometimes afford a few farms opportunity for expansion.

For instance, the plan suggested by the department for providing dairy products should, if followed, produce enough surplus calves to develop here and there cattle-raising and cattle-feeding farms. Some farms will be specially adapted to this purpose by having an abundance of suitable but unsalable by-products, cheap pasture, or pasture land unadapted to cropping. Other farms may develop a considerable business in the production of pork, or of pigs for supplying farms where brood sows are not kept.

"BETTER SIRES" FOR RABBITS

Official Emblem of Recognition Is Granted to Florida Man—Animals Not Officially Listed.

The first person in the United States whose "live stock" consists entirely of rabbits, and who applied for enrollment in the "Better Sires—Better Stock" movement, is Hamilton Coleman of Bay county, Florida. Rabbits are not officially listed among the classes of animals for whose improvement the better sires campaign is being conducted. However, in response to the spirit of co-operation shown and considering that the breeds of rabbits listed are raised for meat, the official emblem of recognition has been granted to Mr. Coleman. The rabbits listed include Flemish Giants, Spotted Giants, New Zealands and Belgian hares.

GENERAL FARM NOTES

Test your seed corn ear by ear.

* * *

Farm wages are higher than ever.

* * *

Treat small grain seed with formaldehyde to prevent smut.

* * *

Barley is an excellent grain feed for stock, being almost the equal of corn.

* * *

Use of a muddy or rusty garden tool is a misdemeanor punishable by failure.

POULTRY

RIGHT STOCK FOR BREEDING

Fowls Should Be Healthy and Vigorous for Best Success—Yearling Hens Preferred.

For success in raising chickens it is necessary to have healthy and vigorous breeding stock, for the lack of vigor in the newly hatched chicks is often traceable to weak parents. Only the most vigorous and the best grown birds should be put in the breeding yards. Each bird should be full of life and energy and free from any serious deformity.

Yearling hens are usually better than pullets for breeders, because hens are more mature and do not lay so many eggs during the early winter, and consequently do not reduce their vitality

Select Only Most Vigorous and Best-Grown Birds for Breeding Pens.

so much before the breeding season. Vigorous hens two to four years old can often be advantageously retained in the breeding yard.

The male bird chosen should be young and active. An early hatched, well-developed cockerel is usually satisfactory, poultry specialists of the United States department of agriculture affirm, or a good, vigorous yearling or two-year-old cock may be chosen. The hens used for breeding purposes should be given the best care possible; they should be provided with large runs and should not be forced for heavy egg production during the early winter.

DEADLY FOE OF LAZY FOWLS

When Trap Nests Are Used No Amount of Cackling Will Deceive Owner of Poultry Flock.

Trap nests are the deadly foe of the lazy hen. When they are used, no amount of cackling and appearance of industry can conceal the fact that she isn't delivering the goods. They are the one accurate way by which the owner of a flock can check up on the laying ability of the individual hens.

Besides being valuable in locating the drones, their use is advisable for the following additional reasons:

They help to make the birds tame, thereby tending toward increased egg production.

They furnish definite knowledge concerning the egg production of individual fowls.

They furnish the most satisfactory basis for utility or other breeding.

They show which hen lays each individual egg, thus furnishing the essential basis for pedigree breeding.

YIELD WHITE-SHELLED EGGS

Mediterranean Breeds Are Best Suited for Production—Do Not Make Good Sitters.

Poultry of the Mediterranean or egg breeds are best suited for the production of white-shelled eggs. Representatives of this class are bred largely for the production of eggs rather than for meat production. Among the popular breeds of this class are: Leghorn, Minorca, Ancona and Andalusian. One of the outstanding characteristics of the egg breeds is the fact that they are classed as nonsitters. That is, as a rule, they do not become broody and hatch their eggs. When fowls of this class are kept, artificial incubation and brooding are usually employed.

POULTRY NOTES

Small or dirty eggs should be used at home.

* * *

Early cockerels are going to bring good prices this spring.

* * *

Feed growing chicks a dry mash to which they can help themselves.

* * *

Stand by the hen, handle her right, and she will lay eggs with all her might.

* * *

Fine cut clover and sprouted oats are healthful and stimulating to young chicks.

* * *

Be sure that growing chicks have plenty of feed so that they will make continuous rapid growth.

* * *

Never overfeed chicks by thickly scattering the scratch feed in the litter. Feed small amounts frequently.

* * *

Preserve eggs in the spring and summer for use during the fall and winter when eggs are scarce and high in price.

DAIRY

MAKING MILK DISEASE-FREE

Thriving Vermont Municipality Is First Small City to Adopt Strict Regulations.

Barre, Vt., a thriving municipality of about 15,000, is the first small city in the United States which requires dairymen furnishing it with milk to place their herds under federal-state supervision for the eradication of tuberculosis. The result has been accomplished by close and persistent cooperation on the part of the mayor and other municipal authorities, the United States department of agriculture, the state commissioner of agriculture, the local veterinarian.

Eradication of tuberculosis was begun in a thoroughly systematic manner. The regulations of the federal bureau of animal industry and of the state commissioner of agriculture were supplemented by a city ordinance. The city provided at its own expense a large barn, in which were assembled

The Sort of Cow Condemned by Dairy Experts.

all small herds, scattered lots, and individual cows. The city also furnished necessary conveyances, and employed a man who devoted his time to notifying owners when to bring their cattle in for test, assigning them stalls as they came in, and keeping the cattle moving out promptly after tests were completed.

Two hundred and sixteen herds, composed of 2,107 individuals, were tested, and 379 reactors—17.9 per cent of the total—were found. Those reacting to the test were promptly shipped out and slaughtered under federal inspection.

Among the larger cities whose milk is obtained entirely or chiefly from tuberculin-tested cattle that have passed federal and state tests are Birmingham, Ala., and Washington, D. C. In addition, numerous others have ordinances requiring the tuberculin test applied under local supervision.

PROPER MANAGEMENT OF COW

Ration Should Be of Such Kind That Animal Will Be in Good Flesh on Freshening.

During the dry period, the cow should be given a good ration so that she will be in good flesh when she freshens. This will improve the quality as well as the quantity of the milk. Just before freshening the grain ration should not be too heavy and should contain plenty of bran. The bowels should be kept well regulated. If necessary, one to one and one-half pounds of Epsom salts may be used as a drench. The cow should have a period of rest of four to six weeks in order to give the best supply of milk during the period of lactation.

GOOD COWS ARE ECONOMICAL

Animals Provide Cheapest, Best and Most Wholesome Feed—No Way of Doing Without Them.

The first reason for having good milk cows on the farm comes from the fact that they provide the cheapest, best and most wholesome food for the family. Their value is hard to estimate when we consider the amount saved on the bills. Their produce is a superior substitute for many foods necessarily purchased at high prices. In fact, there is no economic way of doing without plenty of good milk cows on the farm.

SILO HAS MANY ADVANTAGES

Owner Can Carry Maximum Number of Cows and Supply Necessary Succulent Feed.

The farmer who has a silo can carry a maximum number of cows and supply his herd with a palatable, succulent feed of a uniform quality at any time during the year, conditions favorable to a large milk production.

DAIRY NOTES

Use clean bedding only.

* * *

In selecting a sire attention must be paid to the average type of females in the herd.

* * *

The old country breeders were very careful in the females selected to replenish their herds.

* * *

Improvement of the herd comes through the sire. Therefore, make sure you get a right good one.

* * *

A good-sized barrel in a dairy cow indicates large capacity for digestion. There should be a good spring of ribs.

UNDER U.S. GOVERNMENT SUPERVISION

Burned Out!

Not a pleasant thought, we admit, but it is happening to some one every minute of the day and night—seven days a week.

You can't figure out when your turn will come but you can be ready.

Insure your insurables and put your other valuables—papers, deeds, maps, contracts, insurance policies, etc., in a safe deposit box at this bank.

The prudent man prepares!

First National Bank
KLEMME, IOWA

Drs. Reuber & Zinn will soon have their building remodeled as the brick layers finished up their work on the building. As soon as everything is fiished up they will install their X-ray machine and other new equipment, which they have not yet unpacked.

Mr. and Mrs. S. A. Harvey will soon move into the Blank house in the southwest part of town which they have rented for the coming year. They are now living in the rooms over the State Savings Bank. When they vacate the rooms Dr. Missman will move his office equipment into them.

The revival meetings are in full progress this week and are to be continued the rest of this week at the Methodist Episcopal church. Beginning Sunday morning the meetings will be held at the First Methodist church where they will be continued all of next week until the close of the campaign.

Dandelion soup should be easily made now according to the appearance of most lawns in town. The little yellow pest is out in full bloom and those who enjoy "greens" are the only ones who find pleasure in digging up the weed.

Miss Warnock, who has taught in the Klemme schools two years, will teach in the Gowrie schools next year which is a much better school than here and a better position. Miss Bryson, who has been here but one season will attend school again next year. Supt. Collis has ben here one year but will return to Klemme again next year.

The Rock Island depot at Belmond was robbed about a week ago and a small sum of money was taken, after which the yeggs set fire to the building. Firemen arrived on the scene in time to save the building, however, the office and part of the waiting room was burned out and a lot of valuable records were also destroyed in the fire. The job has the appearance of home talent according to reports.

Twenty-eight counties in Iowa were reported May 10 to have organized Salvation Army Advisory Boards. These boards have supervision of the Home Service Program for 1920, which is a nation-wide movement, wherein the Salvation Army offers its sixteen major social activities to every community where they are desired. It is stated by Salvation Army authorities that every county in Iowa will be co-operating with them by the end of the summer. One of the activities is said to be of aid to the farmers in obtaining farm help. Hancock County is now fully organized.

Its Advantages.

"The trouble with Jorkins is that he thinks he is smart and has been buying paper wheat." "But, dear me, George, couldn't anybody see there is no nourishment in such a substitute as that?"

Hart Schaffner & Mar

all-wool clothes

Will "put in overtime" for you

IF you're among those men who work with their hands as well as their brains you probably like to "dress-up" when the day's work is done. You should be as well dressed as any business man. You're entitled to the best and that's what you'll get here:

Clothes by Hart Schaffner & Mar

They're stylish, sturdy, economical; made by well paid, contented craftsmen; they save you money because they work overtime; "stay on the job" for a season or two after an ordinary suit has "punched out."

Money back if they don't.

Hermoline
A BETTER LUBRICANT
—FROM THE FORMULA OF A MOTOR COMPANY

Increase Your Truck Mileage

Great loads (ordinarily overloads)—working over all kinds of roads—long hours at a stretch—the motor working almost constantly with very little coasting—such conditions of service develop a tremendous degree of heat within the cylinder walls of the average truck motor.

Against these mighty forces of friction and heat, only the very best of lubricants should be used. And there is only one "best" lubricant—that made from strictly Pennsylvania crude oil.

HERMOLINE is admittedly a superior oil for truck use for the reason that it is not only made strictly from the best Pennsylvania crude but, in addition, it is refined by a scientifically correct formula of a motor company—a formula based upon this company's long experience in selling and serving in the automobile, truck and tractor fields.

HERMOLINE is free from the serious faults of inferior oils.

HERMOLINE does *not* evaporate through the filler tube under even the greatest heat. It does *not* fail to provide the necessary protecting film of oil, without which even the best quality of steel would quickly be ruined when operating with usual motor speed.

Increase your truck mileage and add years to the life of your motor by using HERMOLINE.

Let us help you select the correct grade of HERMOLINE for your truck—or your car or tractor. You'll be pleased with the results—your motor will show new life—new power.

Put it to any test you like, HERMOLINE is the lubricant you should insist on.

E. G. ELL
Klemme, Iowa

The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane.

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.
The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove oil value.

WHAT HAVNER STANDS FOR

H. M. Havner, candidate for the publican nomination for governor the June primaries, solicits your pport upo a definite platform in ch he derlares his position upon portant issues before the people of a today. One of his most empha- d planks is his fight in the enact- nt of a law in Iowa which will pro- e for a court of industrial relations settle disputes between capital and or through legal and orderly means her than by strikes and lockouts. Strikes and lockouts have cost ev- citizen of Iowa money during the t year. The coal strike and the sent railway troubles have prevent- the farmers from marketing their stock and grain, and are in part sponsible for the present shortage cars. Strikes and lockouts have own thousands of Iowans out of rk in recent months, against their l, and have caused inconvenience suffering to the public, which has been represented in the settlement these disputes.

Haver is making a square fight to opt a new principle in the adjust- nt of these questions. If you be- ve that labor troubles should be tled by compulsory arbitration be- re a strike is called, rather than ough first calling a strike and later bitrating it, he is your man. He nds also for law enforcement, busi- ss methods in state administration, d a cleaning out of the machine ich has controlled Iowa public fairs for the past two years. He vors enactment of soldier bonus gislation granting Iowa fighters as eral treatment as that extended by y state to their service men. He is native Iowan, who was born and ised as a farmer, who worked as a rm laborer in his youth, and who is e owner of several farm properties day operated under his personal di- ction. He is a graduate of Simpson ollege at the state university of wa, a veteran of the Spanish Amer- an war, and has made a substantial ccess in his own business. He has tter opposition from those who ve suffered through his enforce- nt of the laws, and is fought by olitical ringsters every where be- use he is not a cog in any machine, nd will not be uder obligations to y political clique if elected. He is ot asking for your vote because he a good fellow, a fine orator, a poli- cian, or the representative of special nterests. He presents a definite plat- orm, and asks for your active sup- ort if he stands for the things in overnment in which you believe.—Political Advertisement.

The Real Object.

One thing about getting an early start is that you may not have to hur- ry so much later on, but the real ob- ject is to quit early.—Atchison Globe.

SEWERAGE FOR KLEMME NOW A QUESTION OF TIME ONLY

Monday evening the Mayor and Council of Klemme met and discussed the sewerage question which has been agitated here for some time past. They have looked over various plants in other towns and have consulted with engineers on the subject and have had engineers visit Klemme and look over the grounds, with favorable reports from them. Monday night they decided to put over the sewerage question and all voted in favor of the project, so now it will only be but a short time before Klemme will have an up-to-date sewer system. This is the best move the council, or any previous council has ever done for Klemme and is a move in the right direction. Every broad minded citizen will agree with them that Klemme needs sewerage and should have it as soon as possible. Of course there will be some people opposed to it, but there are always some who are continually carrying a hammer with them to knock on every improvement that comes up, but after they have the improvement established they usually tell everybody how they helped to put it over and are proud of the fact that they really do live in a good live town. Now don't "knock," get the habit and be a "good booster" for Klemme and watch Klemme grow!

MISS MABLE WATERMAN WINS HONORS AT GARNER HIGH

Last week was a busy week for the students of the Garner High School and last Thursday evening the commencement exercises were held. The graduating class this year numbered twenty-eight and was the largest class ever graduated from the Garner school. Among the twenty-eight graduates ten of them had an average of better than ninety per cent. William McConnel, son of Rev. McConnel carried away the highest honors as his average was 95.39 per cent. Mable Waterman, daughter of Mr. and Mrs. John Waterman of this city, was a very close second as she had an average of 95.15 per cent. The next highest was Mitchell Sprole who had an average of 94 and a fraction per cent. The Klemme schools can feel justly proud of Miss Waterman's record at the Garner High School as she finished her eleventh grade here last year and then completed her work at Garnert his year. We also extend congratulations to Miss Waterman for the excellent standing she made at the school this year. A scholarship also goes to Miss Waterman as a reward for her high record at school.

Nothing New.

A western concern proposes to manufacture "ready-made pie crusts" which are guaranteed to keep a year. —Baker's Weekly.

"They Shall Not Have Died In Vain"

How fitting it is that on the thirtieth day of May each year, at a time when the beauties of nature are unfolding and summer time is nigh, we should pause in honor of and in tribute to those who died on the land, in the air and at sea while in the service of our country.

Memorial Day! What a wealth of memories the day brings forth to true Americans! With what reverence will we think of our boys who are sleeping 'neath the battle scarred soil of France—likewise the boys of 1898 and 1861 and 1812 and 1776, all of whom gave their all that this nation might live and that we might enjoy peace, happiness and prosperity.

This year, on Memorial Day, let us consider thoughtfully our great responsibility to these heroes of ours and to the nation which they fought and died for. In civilian life, we too, must "Carry On," lest all their efforts go for naught, in behalf of our everasting peace and the survival of our principles of liberty, equality and justice.

Those whom we honor have fought the good fight—they have gone to their Great Reward. We can do no less on Memorial Day than to highly resolve that they shall not have died in vain and that government of the people, by the people and for the people shall ot perish from the earth.
—(Empeco Paper News)

Tommy Nelson, Sr., left Monday evening for Denver, Colorado, where he will visit relatives for a few weeks. From that place he expects to go further west for visits, stopping off at Redwood City, California, where he will "chin over old times" with Walt Bloom and family. Then he expects to go to the vicinity of Portland, Oregon, for a longer stay with relatives. Tommy does not exactly know how long he will be gone but it will perhaps be many moons before we will see him again. If he likes the country and climate and can get along with the natives he will udoubtedly make his home in the west. We wish him a lot of good times and that he will thoroughly enjoy the trip.

DECORATION DAY SERVICES

As we mentioned previously in the columns of the Times Decoration Day would be observed on Sunday here this year. The exercises will begin in the city park at 3:00 P. M., Sunday May 30th. And in accordance with the dayt he services will be of a religious character interspersed with a patriotic address by Rev. Frank McKeegan, evangelist, who is now conducting a campaign in Klemme. Religious ad patriotic singing and music by the band will constitute a part of the program of the day. After the services in the park the citizens will march in a body to the cemetery, led by the Klemme band. Come to Klemme Sunday afternoon and help observe Memorial Day in honor of the heroes who have fought for Uncle Sam.

SMALL CYCLONE FORMED NEAR KLEMME SATURDAY

Saturday afternoon about five o'clock heavy clouds rolled up in the southwest following a hot and sultry day. Conditions were ideal for wind storms and it was but a short time when a "twister" formed southwest of here a few miles. The revolving funnel took on speed and gathered up loose dirt which was whirled upward but the small cyclone broke up before it reached Klemme, and no damage was done. However, a heavy wind with rain cut loose for a few minutes. Cyclones were reported to have done considerable damage in southern Minnesota that day and other localities suffered from heavy winds.

NOTICE OF APPOINTMENT OF EXECUTOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Executor of the Estate of Mary Arnold, late of Hancock County, State of Iowa, deceased. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated May 18th, A. D. 1920.

F. A. Arnold,
Executor

(3-J-10)

Nails and Teeth Not Poisonous.

Nails and teeth of animals are not in themselves poisonous. A scratch or bite from a dog or cat may prove poisonous, but only because some impurity or germ has been deposited in the ugly wound that results. When a serpent bites it discharges a special poison, which is secreted from glands.

OLD COUPLE KILLED BY TRAIN AT MESERVEY

Hit By Eastbound Train Monday Afternoon

Mr. and Mrs. Henry Pals, aged about seventy-five years old, and residing south of Meservey, were struck by the eastbound passenger Monday afternoon as they attempted to drive across the tracks with a horse and buggy ahead of the approaching train. Mrs. Pals was almost instantly killed when the train struck the rear of the buggy. Mr. Pals was picked up unconscious and the examining physicians held little hopes of his recovery as he had received severe internal injuries.

It seems the old couple were entirely unaware of the danger and did not hear the warning of the crossing bell which was ringing long before the train came near. Men near the depot tried to call to them, but they did ot hear the warning or see the rain coming unil they had reached the middle of the track, when the old gentleman became excited and held the horse back. The train struck the buggy in the rear and threw out the occupants. The horse ran away uninjured.

It is a sad accident, but seems to be a further warning for people to stop, look and listen before crossing a railroad track.

STEWARD HENRY WILLE

Steward Henry Wille, infant son of Mr. and Mrs. Cornelious Wille, was born April 7th, 1920, and passed from this world Thursday morning, May 20th, 1920, at the age of about six weeks. The little one was born with a defective spine which was the cause of its untimely death. The bereaved parents have the sympathy of the entire community in their sorrow of their little son whom God took back to Heaven again.

CARD OF THANKS

We wish to thank our many friends and neighbors for the kindness ad sympathy show us in our sorrow when death called our little son. We also wish to thank those who gave flowers in memory of our little child.

Mr. and Mrs. Cornelious J. Wille

NEW BOOKS

A new lot of sixty books have been received from Des Moines for the circulating library. This consignment is especially rich in books for children and in books on business principles and methods. There is also an excellent selection of fiction and some animal stories that are classics. The boys will be delighted with a number of the volumes and the girls have some of peculiar interest to them also, and there are fairy books and old time story books for the little folks.

ELMER HARTBECK PASSES AWAY AFTER LONG ILLNESS

Elmer Hartbeck who has been suffering from tuberculosis, passed away Monday night after a long battle with the dreaded disease. He contracted the disease while serving his country in the army, but all that medical aid could do for him was of no avail and death came as a relief to his long suffering. Funeral services were held yesterday and his remains laid At Rest. We will publish the obituary in the next issue as at this time it was not prepared for publication.

The Times "Devil" Says

Thos. H. Thompson, candidate for Representative for Hancock County, was in Klemme Friday calling on the voters, and judging us to be a voter he also dropped into the Times Office for a visit. Now Tommy is a very busy man at hte court house these days and it will be impossible for him to call on all the voters so don't feel slighted if he hasn't paid you a visit. He is well known all over the county and it looks like he will take a good majority of the votes. We don't believe he will find very much opposition in this neck of the woods as he has a lot of friends here and in this vicinity who will support him at the primaries, as he has lived in Twin Lakes township as a boy and has grown to manhood near here and is therefore well known. When you look over the little old ballot at the primaries and come to Tommy's name al you have to do is mark in a little cross and Tommy will smile on you as he always does.

Iowa News

Items of Interest Summarized for Busy Readers.

Atlantic's chapter of the Eastern Star will entertain the eighteen grand lodge officers of Iowa on June 1.

Fred Hassler of Manning has sold a fine Poland China boar, "Checkers," for $20,000. It is a big price, but the animal is worth it.

The state meeting of rural mail Grinnell and the time is announced as August just preceding the Grinnell fair and the state fair.

Actual work of paving the roads in Cerro Gordo county has been started. The primary road between Ventura and Clear Lake has been closed to traffic and work started on it.

Sumner Kemp, pioneer saw mill man of Alden and one of the first white men to settle there in the early '50's is dead at his home. He was 87.

April of this year was the coldest since 1907, and as one result plowing for corn in Iowa is probably not more than one quarter done and there has been no corn planted as yet.

Judge William A. Sloane of the class of 1877, Grinnell College, has been appointed to the Supreme Court bench of California. He is chairmen in California for the Grinnell College Advancement Fund.

With the turning of the first shovel of dirt in breaking ground for the new Waterloo high school at Fifth and Locust streets the erection of the great institution of learning for the young people of that city is an actuality.

Davenport people have pledged $229,924 for the interchurch movement, to be paid over a five-year period, according to reports given at a meeting of teams. The total for the one year period, reported was $52,-151.41.

Cost accounting committees have been appointed by the Farm Bureau in Benton county in ten townships to keep track of the production of hogs. A number of these committees were started to work in the past few weeks. These committees vary in size from four to six members. Each member is furnished a farm record book in which to keep his accounts.

"Iowa's Yellowstone Park"—the Devil's blackbone park, in the northwest corner of Delaware county, will be opened officially to tourists June 5. It will attract more visitors this year than ever before. The state fish and game department is considering establishing a hatchery in the park.

Dubuque hopes to realize enough money to pay its indebtedness of $900,000 by reclaiming 700 acres of land underlying Lake Peosta. Permission will be asked of the United States government to construct the necessary dams for drying the lower end of the lake, where a large number of ideal factory sites can be developed.

The Des Moines river reached the highest point this year for several years, swollen by spring rains in northern and central Iowa. It began to rise steadily and continued its rise until it was within a few inches of the top of the highest concrete levee on the river front at the Locust street bridge in Des Moines, with indications that it would rise over the top of the levee.

A school to train men in poultry culling and production will be held under the auspices of the poultry husbandry department of Iowa state college, June 21 to 26. This school is designed to train persons interested in culling so that they can help out county agents. Forty counties in the state will be provided by this school with special men to demonstrate poultry work during the summer.

Case 15-27 Kerosene Tractor

Pulls 3 or 4 Plows

In fields where plowing is difficult—tough or baked soil, stiff grades, etc.—this Case 15-27 Kerosene Tractor will pull 3 plows easily. Where conditions are favorable, this tractor can pull 4 plows.

So it is a favorite on the average farm. It is neither too large nor too small.

In addition to its field work, it is designed for belt work, having the pulley properly placed. It will drive a Case 26x46 Thresher equipped with feeder and wind stacker or other machines requiring similar power.

The Case 15-27 has abundant reserve power. While rated at 15 horsepower on the drawbar, it can deliver more than 18 horsepower. While rated at 27 on the belt, it can deliver 33 horsepower. It is ever ready for the hardest jobs. It never tires.

All gears are cut steel, enclosed and run in oil. It has a four-cylinder valve-in-head motor, mounted crosswise on a one-piece main frame. This affords the use of all spur gears.

A Case Sylphon Thermostat controls the cooling system and insures complete combustion of kerosene. A Case air washer delivers clean air to the carburetor.

There are dozens of betterments found only in this tractor. You should be familiar with them, so that you may make a careful comparison.

May we have the opportunity soon to point out Case superiorities?

CHAPTER IX—Continued.

—12—

As I pondered over it I decided that my chance meeting with Barbara Bradford in the park had upset the plans of a blackmailing band, and that they were avenging themselves on me for my unwitting part. I was certain that Wick and Lefty Moore's wife were in connivance with them, and that the gang possibly included Claire Bradford's ex-husband. Wick had a passkey that enabled him to enter the Lutan apartment. Undoubtedly he could also enter mine as well. But Wick could have nothing to do with the planting of the revolver in my rooms. I was positive about that. He had not been out of my sight for a single moment from the time that we had discovered the body. The only way that it seemed possible to involve him in that was on the theory of a prearranged plot to make me appear the murderer. Was it possible that Claire Bradford had participated in this? I knew she had been in my rooms after the murder. It must have been she who put the revolver there.

One of the detectives who had arrested me appeared at my cell door.

"Come along," he commanded gruffly.

As I came out I was again shackled and led to the patrol wagon that was waiting. I had supposed that I was being taken to court to be arraigned, but such was not the case. I found myself at police headquarters, where both my photograph and my fingerprints were taken. I refrained from giving any information about myself, beyond giving my name and age, being careful to have my name recorded as John S. Nelson. Out in my home town everybody for years had known me by my middle name "Spaulding," and I was hopeful that they might fail to identify me if they read anything about me.

When everything that might serve to identify me had been recorded, I was taken into a large room where perhaps half a hundred men were assembled, most of them wearing masks. I looked about with curiosity. I had read of this ceremony. I was being "lined up" before the members of the city's detective force to see if any of them could identify me and to give them an opportunity to familiarize themselves with my features in case it should ever be necessary to arrest me again.

"Never saw him before," I heard one of them say. "Guess he must be a western crook."

"He's no amateur," said another. "That job up at the Granddeck was done by a professional."

Many slighting comments were made, too, on my personal appearance. I learned for the first time that I had a "bad ear," and that my eyes were shifty. The only emotion these comments aroused in me was a feeling of pity, not for myself but for all poor unfortunates who fall afoul of the law. Even though a man is presumed to be innocent until he has been convicted I had observed that since the first moment of my arrest everybody had taken it for granted that I must be guilty and had treated me with little respect or consideration.

From headquarters I was taken to the police court and without further delay brought before a magistrate.

"John S. Nelson, arrested for the murder of Daisy Lutan," said the detective.

"Have you counsel?" asked the magistrate.

"No," I replied.

"I will assign Mr. Myers as the prisoner's counsel," he announced.

A young chap, evidently just out of law school, stepped forward, and drew me a little to one side.

"Plead 'Not guilty,'" he directed, "and be careful to say nothing more."

"Of course," I replied. "I'm not guilty. I had nothing to do with it."

I could see by his face that he did not believe me and as I turned again to the court I made up my mind that even if the court had assigned him as my counsel I would tell him nothing.

"How do you plead?" asked the court.

"Not guilty," I replied.

"Remanded without bail for further examination until Thursday morning," snapped the court, and I was led back into an anteroom, Mr. Myers and the detective accompanying me. The latter there surrendered me to some official, presumably a prison keeper.

"Looks pretty bad for you," said Myers, as we were left alone for consultation.

"I suppose it does look that way," I laughed.

"No chance to make it self-defense," he went on, plainly amazed at my manner. "No jury'd ever stand for a burglar shooting in self-defense."

"No," I admitted. "I suppose they wouldn't. Fortunately I'm no burglar."

"If we could make out it was a lovers' quarrel," he suggested.

"If I had ever known Miss Lutan," I admitted, "that might not make a bad defense."

"Look here," he replied indignantly, "young fellow, you are up against it harder than you seem to realize. They've got the goods on you, and it'll be the chair for yours if you're not careful. You've got no chance proving an alibi."

"Why not? I never saw Miss Lutan until I saw her body in her rooms. I never was in her rooms until I went in there with Mr. Wick after we had heard the shot. What's more, I never owned a revolver in my life and never saw the one the detectives found until they pulled it out of my dresser drawer."

Incredulously he listened. I could see that he did not believe a word I was saying.

"You don't look like a dope fiend, either," he observed scathingly.

"Look here," I retorted, "it is bad enough to have the police take it for granted that I am a criminal and a murderer, but when the counsel the court assigns me starts out on the same course, we quit right now. I'll get a lawyer of my own when I need one."

"I'll come around this afternoon and see you again," he said coolly. "A few hours in the Tombs will make you see things differently."

A few minutes later I found myself ensconced in a cell again, still confident of my speedy release, but somewhat puzzled as to what would be my best method of procedure. I was unacquainted with any lawyers; in fact, with any one in the whole city with whom I could consult. My immediate hope lay in my friend, Detective Gorman. There was nothing for me to do but to wait until I heard from him.

Fortunately I had had the forethought when the detectives were arresting me to take from its hiding-place in the bookcase my little hoard of money. This enabled me to send out of the prison and have a luncheon brought in. Making myself as comfortable as possible, I sat down to wait for Gorman, occupying my mind meanwhile with thinking of Barbara Bradford.

The thing uppermost in my mind was how to prevent her from being in any way involved. She must never know that only by her testimony would I be able to prove an alibi. Should she ever realize this, I knew that her sense of justice would make her come forward and tell the truth, even though it meant the loss of her own reputation and the scandalizing of all her acquaintances. She must not be permitted to talk.

She must not even try to see me while I was in prison.

The one way—the only way—I saw by which I could escape from the law's toils without implicating her was through the speedy rounding up of the band of criminals who I was positive were responsible for Miss Lutan's murder as well as for all our troubles. I was relying on Gorman to do this.

A keeper's voice interrupted my chain of thought.

"You're wanted down in the counsel room," he said. "There is a visitor for you."

"A visitor," I cried excitedly. "Who is it?" I thought of course it must be Gorman come to my rescue.

"It's your sister," he announced.

My sister! A thrill shot through me at his announcement. I knew of course it could not be my sister. Both of them were mere children far away in the West. It must be Barbara.

I Stood There Astounded. It Was Not Barbara; It Was Her Sister Claire.

Undoubtedly she had resorted to this ruse to make sure of seeing me while at the same time concealing her own identity.

Overjoyed at her coming, delighted to know that I had read her heart aright and that my confidence in her trust in me was justified, I hastened with the keeper to meet her.

Delighted as I was at her coming, I was formulating in my mind how best to make it clear to her that she must leave at once and that no matter what happened she must keep her lips closed about the events of last night. Under no circumstances would I permit her to sacrifice herself to save me.

In the counsel room a veiled figure awaited me. I sprang forward eagerly toward her. The woman standing there put up one hand in a repelling gesture and then flung back her veil.

I stood there astounded. It was not Barbara. It was her sister Claire.

CHAPTER X.

For a full minute Claire Bradford and I stood there observing each other. Even before a word was spoken I think we both sensed our mutual distrust. As I studied her, I was trying to conjecture what could have been the motive so impelling that she had dared to come even within prison walls to see me. Had Barbara sent her? I doubted it. I was sure that more than likely her visit was to plead with me to keep silent about her part in the tragedy. I was certain she was going to ask me to pledge my word to tell no one of her second visit to the Gaston apartment.

Yet as I studied her weak, beautiful face, so like Barbara's and yet so different, with its sensuous mouth and roving, brilliant eyes, I still was wondering how it was possible for a girl of her refinement and social position to have become enmeshed with such common criminals as the two employees of the Granddeck, Wick and the telephone girl.

"To what am I indebted for the honor of this visit," I asked at length, adding with some sarcasm, "from my sister?"

Never for a second had I imagined that other than a selfish motive could have brought her thither, and the conversation that followed was all the more surprising to me on that account.

"I had to say I was your sister," she answered quickly. "I wanted to be sure of seeing you and I did not wish anyone to recognize me. You know, I believe, who I am?"

"You are Barbara's sister," I replied.

"That's why I came," she cried, "for Barbara's sake. I have come to plead with you for her."

"To plead—with me—for her," I echoed in astonishment.

"Yes," she cried passionately. "She's young. She's little more than a child. She did not realize what she was doing. You must not let anyone know you even know her. You must never, never tell."

"Never tell what?" I answered noncommittally.

She answered with a convulsive sob. I thought for a little that she was going to break down completely. Her manner and the pallor of her face attracted the attention of the keeper who was in the room with us, and he started forward as if expecting her to fall in a faint. Resolutely she pulled herself together and went on in calmer tones.

"Oh, I know all about it. I know that she is completely fascinated by you. I know that she has been meeting you in the park. I know that she has lunched with you at the Astor." She hesitated and her face crimsoned—"I know that she has even visited you in your rooms late at night. Oh, please, please, I beg of you, if there is a spark of manhood in you, do not take advantage of a silly girl's weakness. Please help me protect my little sister's name; promise—you will, won't you?"

"Why should I?" I replied carelessly, repressing my desire to leap at once to Barbara's defense and explain how pure and honorable her conduct had been and how lofty the motive that had governed her actions. Tempted though I was to defend her, I realized that this might be an opportunity to learn something of Claire Bradford's associates, and I determined to make the most of it. How else could she know of all my meetings with Barbara unless she was in league with the persons who had been having me shadowed? How the knowledge that Barbara had been in my apartment could have come to her was a mystery beyond me. I would have sworn that that was a secret sacred to our two selves.

"Listen to me," she commanded, speaking in low tones, "Barbara is my baby sister, innocent of the ways of the world. I must save her from herself, and her heedlessness. Never, never, if I can help it, shall she suffer the agony and shame and disgrace that I have known. Years ago I, just as she is now, became infatuated with a man far below me in the social scale. He, too, was a criminal."

I sniffed indignantly at the "he, too," but she paid no attention.

"I ran away from school and married him and learned too late that he had a wife and child already. All my life, ever since, that terrible thing has followed me. It's like a specter ever rising to confront me. Even if I have to kill you, I am going to save my little sister from following in my steps."

"Where is Gaston Maurice now?" I asked. "Have you seen him recently?"

She gasped and shuddered, looking at me incredulously.

"You," she breathed excitedly, "who are you? How do you know his name?"

"Never mind how I know it," I replied. "What I want to know is where is he now? When did you see him last?"

"Not for years—not since long before my father's death—not since the marriage was annulled."

"Nor heard from him," I persisted.

"No, nor heard from him," she hesitated, "unless—"

"Unless what?" I insisted, as she stopped abruptly.

"I can't tell you," she said firmly. "I don't know. They must have come from him, from someone that knew—the letters."

"What letters? Tell me about them."

"I can't tell what I don't know. I haven't the least idea where Gaston Maurice is. I had hoped he was dead in the war. Yet he can't be. I have had anonymous letters threatening me. They must have come from him or from someone whom he told of our marriage? How else could they know?"

Her distress was so real and her manner so convincing that I decided that she must be telling the truth.

"Well," said I, "if you cannot tell me where to find Gaston Maurice there is one thing that you can tell me."

"What is that?"

"Why did you visit my apartment late last night? Why did you put that revolver in my dresser?"

"Revolver," she queried in a puzzled tone, "what revolver?"

"The revolver with which Miss Lutan was killed."

She eyed me in shocked surprise.

"Why do you say this to me? I never saw the revolver."

"You cannot deny that you were in my apartment last night.""

"But the revolver," she protested. "What do you mean by that? I know nothing of any revolver."

"Last night, a few minutes after Miss Lutan was murdered," I said sternly, "some man or woman entered

"You Cannot Deny That You Were In My Apartment Last Night."

my rooms and placed a revolver with one chamber discharged in the dresser in my bedroom. It was evidently placed there for the purpose of throwing suspicion on me, of making me out the murderer. The detectives found it there and arrested me. If you did not enter my apartment to hide the revolver, why then were you there?"

"I knew nothing about the murder," she answered irrelevantly, "until this morning—until I read about it in the papers."

"What about Wick?" I hurled at her. "Didn't Wick tell you?"

"Wick," she repeated in a puzzled way. "Oh, Mr. Wick, the superintendent. No, I have not seen him for several days."

"Did you do nothing yesterday at his direction?"

"How absurd! Of course not."

"Why, then, did you go into my rooms?"

She looked at me with a frightened face, and her manner became more confused.

"I really believe you are trying to implicate me in your crime," she ejaculated. "It's absurd for you to try to question me this way."

"Lady," interrupted the keeper, "you'll have to be going now. Time's up."

"Promise me," she begged hastily in an undertone, as she departed, "whatever you think about me, you'll keep my sister out of it."

"I'll promise nothing, unless you confess everything," I repeated, determined, if I could, to drag her secret from her, even though I, as well as she, was eager to shield Barbara's name.

Claire Bradford's attitude, I must confess, puzzled me greatly. Her denial that she had seen the revolver, or that she had been working in conjunction with Wick seemed to ring true, and I was also inclined to believe her statement that she knew nothing of her former husband's present whereabouts. While I was pondering over her statements, my cell door opened and Gorman was let in.

"Well, young fellow," he said, "this sleuthing business didn't turn out exactly the way we expected it to, did it?"

"You don't think I'm guilty, do you?"

I waited in agony for his answer. If he failed me, there was no one, absolutely no one, to whom I could turn.

(TO BE CONTINUED.)

Unappreciative Guest.

Ralph, three years old, was spending the day with his aunt. Thinking a custard would appeal to him, she inquired if he liked them, at which he answered: "Oh, my, yes." However upon being served it fell short of his expectations. He ate a little and passing it to his aunt said: "You can have it Aunt Myra. I am so full, and if you want some water to wash it down, here's my glass."

Millions of Tiny Germs Cause Your Catarrh

Real Relief Comes Only by Cleansing the Blood of the Germs.

You must realize that your blood is loaded down with catarrh germs, and these germs must be removed from your blood before you can expect real, rational relief from the disease. And of course, you know that you cannot reach these germs in your blood with sprays and douches.

S. S. S. will cleanse your blood of the cause of Catarrh, and give real relief. It has been in constant use for more than fifty years, and is sold by all druggists. Buy a bottle of S. S. S. today and lose no further time in getting the right treatment.

Valuable advice regarding your case will be furnished free. Address Medical Adviser, 103 Swift Laboratory, Atlanta, Ga.

Americanization.

He was a Chinaman. He ran a laundry, and no one ever heard him speak a word of English. I often wondered why he had not learned our beautiful language. But to my queries he only shook his head.

One day when I paid for my weekly wash, he returned less change than usual. "You've short-changed me, Ping Pong!" I cried.

Ping Pong smiled blandly, showed me his Americanism of Foreign Merchants' certificate and, speaking for the first time in faultless English, replied: "No; I've raised!"—Iowa Frivol.

BUILT MANY CENTURIES AGO

Florida's Shell Mounds Believed to Date Back to Before Beginning of Christian Era.

Florida's shell mounds, which are found in different portions of the state, are unquestionably of human construction, and were probably built by some race of people who inhabited the country about the beginning of the Christian era. These mounds were found overgrown with herbage and forest as long ago as when the first red man set foot in Florida, and the fact that the deposit of earth above them was sufficient to give place to the root of trees proved their great age.

There have been found in all these mounds pieces of pottery imbedded in the shell conglomerate, as well as articles made of shell and bone, rude stone implements and many bones of fish and animals, such as deer, terrapin, rabbits, alligators and others. There are in the entire state about forty mounds, the most important of which are those of King Phillip's town, near the outlet of Lake Harney, which are 450 feet long, from 100 to 150 feet broad, and with an average height of eight feet.

Rather Wide.

"The red element certainly has cheek." "Well, cheek is mostly what the red stuff goes on."

SUBSIST MAINLY ON DAT

Fruit Is the Mainstay of Life to People of Egypt, Arabia, and Persia.

East is west so far as the palm concerned, Hawaii, California, Florida, Cuba, Egypt, Palestine, they know their palms. Of all varieties none is so dear to the heart as the date palm. We all know its delicious fruit, but few can conceive the desert dweller's love for it, for he only can appreciate its grateful shade in the sweltering desert heat.

The date palm is always a sure sign of water, for to thrive it must have this. Rising often to a height of 100 feet, it is a haven of refuge to the parched traveler, who knows that to dig near it is to find water. Then there is the delicious fruit to be considered, too. Many of us know the date as a luxury—sometimes stuffed or otherwise, but a considerable part of the inhabitants of Egypt, Arabia and Persia, subsist almost entirely on its fruit. They boast also of its medicinal virtues. Then the camels feed upon the date stone.

Louisiana has 19 registered women statisticians, which exceeds the record of any other state.

A little folly is desirable in him that will not be guilty of stupidity.—Montaigne.

Try Postum Instead of Coffee

at the family table for a week or two and see if everyone doesn't relish the change.

Postum Cereal

a drink of delicious flavor—should be boiled fully fifteen minutes to bring out its full-bodied richness.

Better health and comfort usually follow a change from coffee to Postum.

Catarrhal Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of catarrhal deafness that cannot be cured by HALL'S CATARRH MEDICINE.

All druggists 75. Circulars free.

METHOD IN THAT MADNESS

Why Dad Could Not Bring Himself to Make Serious Objections to Gerald's Smoking.

"Henry!"

Mrs. Brown's voice was stern. Mr. Brown recognized the signs of a coming storm, so he prepared to listen.

"I saw Gerald—our boy—smoking a pipe today—actually, a dirty, smelly pipe!" the poor woman ended with a sob.

"Well, what can we do?" exclaimed her husband. "The boy's seventeen, and has two dollars a week pocket money. I don't see—"

"You mean to say that you will allow him to smoke? Why, it's sheer madness!"

Henry nodded. Then, after witnessing the unique spectacle of his wife speechless for once, he strolled off into the garden, where he came across Gerald in a corner with the pipe going full blast.

"Hello, my boy!" he cried. "This is something new, isn't it? Er—by the way, I've left my pouch in the house. Can you give me a fill?"

Then he, as he walked away puffing happily, murmured:

"It may be madness, but there's method in it. I can see Gerald's pouch being quite a money saver to poor old dad."—Rehoboth Sunday Herald.

Ups and Downs.

"An orator has to come down to the level of his audience's intelligence," remarked the mild egoist.

"There used to be some such idea," replied Senator Sorghum. "But the orator nowadays has all he can do to rise to the occasion."

ASK FOR "DIAMOND DYES"

Don't Buy a Poor Dye That Fades, Streaks or Ruins Material.

Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into worn, shabby garments, draperies, coverings, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed even if you have never dyed before. Druggist has color card.—Adv.

Wanted: A Ticket Seller.

"I see you advertise for a ticket seller and ask that ladies weighing more than 200 pounds kindly do not apply."

"Yes."

"Isn't that discrimination?"

"No; merely common sense. Any lady shaping up larger than that could not get into my glass cage."—Film Fun.

ASPIRIN INTRODUCED BY "BAYER" IN 1900

Look for name "Bayer" on the tablets, then you need never worry.

If you want the true, world-famous Aspirin, as prescribed by physicians for over eighteen years, you must ask for "Bayer Tablets of Aspirin."

The "Bayer Cross" is stamped on each tablet and appears on each package for your protection against imitations.

In each package of "Bayer Tablets of Aspirin" are safe and proper directions for Colds, Headache, Neuralgia, Toothache, Earache, Rheumatism, Lumbago, Neuritis, and for Pain in general.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Additional Charge.

"Twenty dollars for this job of plumbing?"

"That's correct."

"But you were not on the premises more than an hour, and I paid for all the material you used."

"There was a piece of glass on your driveway. I damaged a tire," said the plumber, briefly.—Birmingham Age-Herald.

Cuticura Soothes Baby Rashes.

That itch and burn with hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each everywhere.—Adv.

GOT CHARACTERS MIXED UP

According to English Actor, History Is Not a Strong Point With Theatergoers.

The late H. B. Irving once told in Philadelphia a story about his father's performance of Sardou's "Robespierre." He said:

"Two dear old ladies sat in their stalls at the Lyceum, waiting for 'Robespierre' to begin.

"'By the way, who was Robespierre?' said the first old lady.

"'Why, don't you know?' said the second old lady. 'He's the man who was murdered in his bath by Marie Corelli.'

"'Oh, no, my dear!' said the first old lady. 'That can't be right, for Marie Corelli is still alive. I remember who it was, now. It was Charlotte Bronte.'"

Then, at the end of the story Mr. Irving added:

"I once told this anecdote to a duchess. When I finished the duchess gave a kind of puzzled laugh and said:

"'Poor Shakespeare!'"

Practicing Her Lesson.

I recently visited my married sister, who has a flaxen-haired daughter of three years. During my visit I taught my little niece to put one arm around my neck, the other about my sister, and "all three kiss together."

A rather shy young man called upon me one evening and, though we had met but twice before, I sat with him on the couch in order to show him some pictures.

Before I realized what she was doing my infant niece had one arm around my neck and was reaching frantically for the young man, all the while repeating: "All free tiss todezzer."—Exchange.

FARM POULTRY

RIDDING HOUSES OF VERMIN

Outline of Method Recommended by Poultry Specialists of Department of Agriculture.

The following method of ridding hen houses of mites and lice, when the weather conditions are such as to permit of the birds being kept outside the house for five or six hours, is recommended by poultry specialists in the United States department of agriculture.

Close all the doors and windows and see that there are no cracks or any other openings to admit air. Set an iron vessel on gravel or sand near the center of the house. Place in the vessel a handful of shavings or straw saturated with kerosene and on these sprinkle sulphur at the rate of about one pound to every 90 or 100 square feet of floor space. Instead of using the shavings and kerosene, the sulphur may be saturated with wood alcohol.

When everything else is in readiness, light the material and hastily leave the house. In case any anxiety is felt about fire, a glance through a window will show whether everything is all right. There is very little danger of fire when proper precautions have been taken to have plenty of soil beneath the vessel. After three or four hours, throw all the doors and the windows wide open to drive out the sulphur fumes thoroughly. Then let the fowls in one by one. As each enters, catch it and dust it well with insect powder, which will destroy the lice on the birds. Tobacco dust is also good to use instead of insect powder.

The birds and house have now been freed from vermin for the present, but the eggs of the insects have not been destroyed, and in a week another swarm will be hatched out. Therefore it will be necessary to repeat the operation once or twice before the pests are exterminated. After this care should be used to see that no strange fowl is admitted to the house or yard without having been thoroughly rid of lice, for one lousy hen will contaminate all the rest.

Fumigating Hen House to Get Rid of Mites and Lice.

GIVE GROWING CHICKS MILK

Where Supply Can Be Obtained It Should Be Kept Before Them in Open Dish or Pan.

Nothing is better for growing chicks than a liberal supply of sour milk. If it can be obtained it always should be kept before them in an open dish or pan where they can eat and drink it freely. Where sour milk is fed, the amount of beef scrap in the dry mash may be reduced one-half.

Plenty of fresh, clean water is absolutely necessary for all growing chicks. In hot weather it should be given twice daily and put into fountains or dishes and placed in the shade so as to keep as cool as possible. Clean the water dish thoroughly each day before filling.

SURPLUS FOWLS PROFITABLE

Males and Females That Have Outgrown Their Usefulness Provide Additional Income.

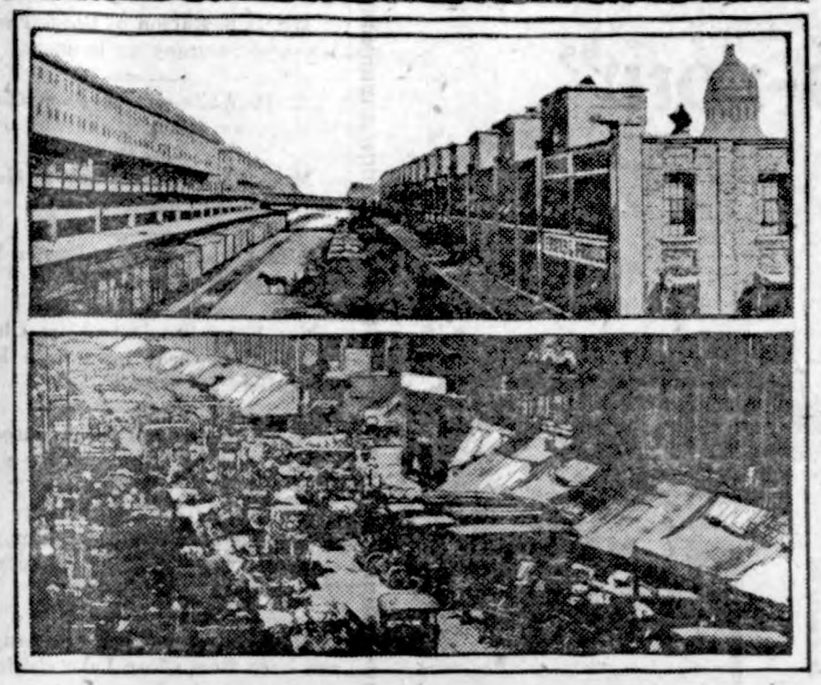
Most farmers find the profit in the commercial part of the poultry business in market eggs, but the surplus males and the females that have outgrown their usefulness provide an additional income which is worth while.

GEESE MAKE GOOD FORAGERS

Fowls Pick Up Large Portion of Their Ration if Allowed Free Range on Farm.

All geese are good foragers and even when young will pick up a large part of their ration if allowed free range on the farm. They eat grass and fresh vegetable growths of all kinds, as well as bugs and worms.

CITY MARKETS HELP LOWER FOOD COSTS



Above: Atlanta's Modern Wholesale Food Terminal—Cars Are Unloaded Directly Into Warehouses. Below: Costly Congestion in Chicago's Produce Center.

(Prepared by the United States Department of Agriculture.)

High food prices likely would receive a severe jolt if every city with a population of 100,000 or more would establish a city food terminal for its wholesale trade, the bureau of markets of the United States department of agriculture believes.

All large European cities have such markets and they have proved very helpful in keeping down the cost of food distribution. The cities of this country have been slow in adopting any kind of a unified terminal system. Most of them are getting along as best they can with no plan. All but those of the smallest size usually have several scattered terminals at which food products are unloaded from train, boat or truck. Frequently the wholesale houses are located at some distance from the freight depots. This necessitates loading the products into a truck or wagon, carting them across the city, and unloading them again at the wholesale house.

All these expenses add to the price the consumer eventually pays for his food. A city terminal market eliminates this unnecessary handling and cartage, for under such an arrangement the wholesale district and the terminal are brought together, and the contents of cars or boats are unloaded directly into the wholesale houses.

Delayed Planning Costly.

In recent years both New York and Chicago have worked on the problem of establishing a central terminal market, but the size of those cities makes it a difficult problem and as yet no practical solution has been found. The situation in these cities has awakened some of the smaller municipalities—now growing at an amazing rate—to the value of a unified terminal system, and the necessity of installing one before congestion increases. Los Angeles and Atlanta, through private capital, have been provided with unified terminal markets, and Seattle has a wholesale municipal market. Other cities, in addition to Chicago and New York, which are working on this problem are Indianapolis, Memphis, Tenn., and Washington, D. C.

The idea of a terminal food market is simple. Under the plan which it involves all wholesale houses are built in a locality which is convenient to all transportation lines. It is not necessary or even desirable to have them in the heart of the city, where land values are high. The incoming cargo of food is unloaded directly from the car or boat into a wholesale house and is taken away by retail truck or wagon from the other side of the house. There is no intermediate handling or cartage. Cold-storage plants and auction rooms are also a part of a good terminal food market.

Buying Simplified for Retailer.

This system of food distribution expedites the unloading of cars. Under present terminal conditions unloading is often slow and every week in the year many cars of perishable products spoil before they reach the wholesaler or even get inside the railroad yards. A well-planned city terminal food market has adequate trackage, switches and platforms, which facilitate the unloading of the cars and prevent congestion inside and outside the yards. Quick release of cars is important if crops are to be moved before they perish. Furthermore, the retailer finds his buying simplified when all the food products are concentrated in one place, and the work of the food inspector, too, becomes easier.

The biggest saving in money, however, comes in lessened cartage and less handling and deterioration of the food. Where the wholesale district of a city is remote from transportation lines, the cartage of the food products from the freight house to the wholesaler mounts into hundreds of thousands of dollars every year, all of which is added to the bill the consumer pays. This includes the cost and upkeep of the trucks and wagons and the wages paid the men who load and unload them and drive.

Food Spoilage Costly.

To cartage cost must also be added the loss caused by the deterioration of the food products during the trip. Extremes of temperature can do considerable damage to perishable products in a short trip. The cost of the food which spoils in transportation is added to the cost of the food that is salable when it reaches the retailer and the price the consumer pays goes up another notch.

Farmers who ship on a consignment basis are able to get their remittances quicker under a terminal system than they can where the wholesale district is scattered.

In some cities the food terminals are owned by the municipality, in others they are built by the railroads or by private individuals, but in every instance central food terminals have proved their worth.

The bureau of markets in the United States department of agriculture has made a study of terminal food markets and is prepared to advise any municipality on the right ways of conducting one.

DOUBTFUL WORTH OF PROLIFIC JACK BEAN

Scientists Find Litt'e to Favor West Indian Plant.

In Southern Sections It Has Some Value as Green Manure Crop—Cattle Do Not Make Profitable Gains on Ground Seed.

Savage disciples of Voodoo worship in the American tropics ascribe supernatural powers to the jack bean. These tribesmen plant a row of the seed around their rude gardens in the belief that the plant will punish trespassers. This custom was doubtless brought by negro slaves from Africa, where the very similar sword or fetich bean is thus worshiped. But the bureau of plant industry, United States department of agriculture, fails to support this weird belief concerning the bean. Nor do these scientists find much else to recommend this plant stranger from the West Indies.

The jack bean, it appears from abundant experiments, is a prolific plant. It is not unusual for the seeds in the 14-inch pods of a jack-bean plant to outweigh its own herbage; and the herbage, if cut green, frequently crops at the rate of 16 to 20 tons per acre. This wonderful productiveness makes the bean a favorite of the get-rich-quick gentry who seek to introduce a new and marvelous commercial plant. This popularity among unscrupulous promoters accounts in part, at least, for the numerous aliases under which the jack bean is known. "Pearson bean," "wonder bean," "Wataka bean," "Gotani bean," "South American coffee bean," etc., are only a few of the names in which the jack bean has been rechristened.

It has some value in the south as a green-manure crop, and there is evidence to show that it may be a good silage crop when cut green.

Cattle do not relish the jack bean hay, nor do they make gains upon the ground seed, which product they must be taught to eat.

The bean is eaten by natives of Mexico, but most experimenters describe it as flat and coarse in flavor.

The seed contains a large proportion of a material known as urease, and used in medicines, but the demand for this product is extremely limited.

After all, the scientists warn the prospective buyer of "wonder beans" to have a specimen identified, or else confine the first plantings to small areas until the doubtful values of the bean are better established and a better market provided than seems to exist at present.

GENERAL FARM NOTES

Humus prevents baking.

* * *

Selling on a rising market is good business, too little followed.

* * *

Marquis wheat is said to be the best spring wheat for all conditions.

* * *

Potatoes to produce profitably require an abundance of plant food.

FAINTING AND DIZZY SPELLS

The Cause of such Symptoms and Remedy Told in This Letter.

Syracuse, N. Y.—"When I commenced the Change of Life I was poorly, had no appetite and had fainting spells. I suffered for two or three years before I began taking Lydia E. Pinkham's Vegetable Compound and the Liver Pills which I saw advertised in the papers and in your little books. I took about twelve bottles of your Vegetable Compound and found it a wonderful remedy. I commenced to pick up at once and my suffering was relieved. I have told others about your medicine and know of some who have taken it. I am glad to help others all I can."—Mrs. R. E. DEMING, 437 W. Lafayette Ave., Syracuse, N. Y.

While Change of Life is a most critical period of a woman's existence, the annoying symptoms which accompany it may be controlled, and normal health restored by the timely use of Lydia E. Pinkham's Vegetable Compound.

Moreover this reliable remedy contains no narcotics or harmful drugs and owes its efficiency to the medicinal extractives of the native roots and herbs which it contains.

Constipation and Sluggish Liver

Don't take chances. Get Carter's Little Liver Pills right now. They never fail to make the liver do its duty. They relieve constipation, banish indigestion, drive out biliousness, stop dizziness, clear the complexion, put a healthy glow on the cheek and sparkle in the eye. Be sure and get the genuine.

CARTER'S LITTLE LIVER PILLS

CALLS NIGHT AND DAY PROMPTY ATTENDED

Large latest Xray and Electro Therapeutic Machine

Eyes Examined and Refracted. Glasses Fitted.

The MOLINE Tractor is Universal

Work of 3 Teams and 3 Men

One man with one tractor does all field work from plowing to harvest

Hay harvest is near.

The top speed, short of help, hot sweaty days are near at hand, when the hay crop must be cut and cured.

Are you ready?

You are not completely ready without a Moline Universal Tractor and a Moline Mower No. 4, 6 to 10-foot cut, attached to this tractor, because:—

1. ***With this equipment, you can cut 25 to 30 acres per day.***
2. ***You require but one operator for Tractor and Mower.***
3. ***You can work all day and as late at night as is necessary.***
4. ***You can work steadily with no stops.***

Here is what one man and a Moline-Universal Tractor can do in a ten-hour day:—

Plow 7 to 9 acres
Disc 27 acres with a 7' Tandem Disc Harrow
Disc 38 acres with a 10' Disc Harrow
Harrow 76 acres with a 20' Peg Tooth Harrow
Cultivate from 13 to 20 acres with a two-row Cultivator
Drill 35 acres with a 10' Grain Drill
Harvest 40 acres with a 10' Grain Binder
Harvest 10 acres with a Corn Binder
Mow 25 acres with a 8' Mower
Rake 40 acres with a 12' Rake

Immediate deliveries—a satisfactory stock of repair parts always carried; real service guaranteed.

A demonstration on your own farm cheerfully arranged.

If desired you can use the "drag behind" or horse drawn implements you now have with the Moline-Universal the same as with other types of tractors.

Local News

Primary election, Monday June 7.

Miss Josten went to Garner last Friday between trains.

Marlin Croner was at Garner last Friday on business.

Miss Donna Baumgartner was a Garner visitor Monday between trains

Dona and Johnnie Baumgartner spent Saturday visiting at Belmond.

Miss Edna Smith returned Saturday from a week's visit at Belmond.

C. J. Jannsen and wife of Meservey were Klemme visitors Friday.

Mr. and Mrs. Earnest Palmby came down from Minnesota to see Elmer Hartbeck before he passed away.

Rev. Meyer traded his old Overland car for a later model of the same make. He now burns up the roads with a "six."

August Baumgartner and Deputy Sheriff Eck Raw drove over from Garner last Wednesday on official business.

The Evangelistic Meetings which are being held at the First Methodist Church all of this week will come to a close Sunday night.

H. Ludeke wet to Garner Monday morning on the passenger to deliver a violin which he had repaired for a Garner party.

The paving gang at Garner began to pour cement onto the streets yesterday. The paving work is progressing rapidly and a few paved streets will soon be in shape to travel on.

Albert Schmidt left last week Wednesday evening with a car load of cattle he was shipping to Chicago. He got back to Klemme Saturday morning.

G. W. Kluckhohn & Sons must predict a siege of hot weather and sunshine in the near future for Monday they installed a new awning on their store building.

I. C. Hastings, better known as "Fat," has had the honor of being elected a member of the Iowa State Historical Society. Mr. Hastings is a lawyer at Garner and is a partner of J. E. Wichman.

Two or three auto loads of Klemme Odd Fellows went to Clear Lake Monday evening where they witnessed work in the second degree. Two Klemme me, two Garner men and two Clear Lake men took the work.

The Court House at Garner from now on will be closed Saturday afternoons, so if any Klemme people have business there it will be well for them to bear in mind that the officials at the court house are taking Saturday afternoons off now and are perhaps down at the lake fishing.

Mayor Frank Gruetzmacher and Councilmen Wiles, Koerner, Ridder and Blank drove to Latimer, Iowa, Moday to inspect the sewerage system which that live little city is installing this year. They also gathered information on the system as to the cost, labor, material and other items.

P. M. Griesemer, M. O. Hocum, John Day, Dr. Missman and Dr. Thomas drove to Clear Lake last Friday afternoon to attend the big Masonic doings being held there that afternoon and evening. Work was put on in the Council Degrees. An Eagle Grove team put on the degree work, after which a banquet was served.

Fishing si getting good at Clear Lake, and the fish really started in to gobble the bait Saturday afternoon. Just before the big storm came the pickerel and pike were biting lively and Sunday mornig they started in again and with the afteroon came the crappies ad silver bass fishing, say fishermen who were there that day.

10 KILLED IN FIGHT

DEADLY BATTLE FOUGHT IN VIRGINIA TOWN.

EVICTION GIVEN AS CAUSE

Company Detectives Sent to Oust Families—Mayor First to Fall When Resistance Shown.

Mateawan, W. Va.—Ten men, including Mayor Cabell Testerman of Mateawan were killed and three badly injured in a battle here between the police and citizens on one side and private detectives on the other.

Besides the mayor the dead include five private detectives and four miners. Police say the trouble arose when a party of private detectives arrived here from Williamson to evict from company's houses the families of miners who had been dismissed from the company's employ.

Eight families, the police declare, had been turned out when Mayor Testerman approached Albert Felts, the leader of the detectives, and wanted to know by what authority their action was taken and by what authority they had arrested one of the miners.

While they were talking, according to the police, Felts shot the mayor, firing from his coat pocket. Almost instantly Felts was killed himself, the police say, by "Sid" Hadfield, chief of police of Mateawan. Immediately the shooting became general, numbers of persons joining in the fray.

Most of the men were employed by the Stone Mountain Coal Co., whose mines form the principal industry of the community. Several weeks ago it became known that efforts were being made to unionize the mines and two of them were closed. Later, the miners declare, some of their numbers were dismissed and private detectives were sent here to dispossess those who lived in company houses. Feeling had been running high.

GIRL PROVES HEROINE.

Telephone Operator's Quick Wit Results in Capture of Bank Robbers.

Howe, Neb.—The three unmasked bandits who held up the Bank of Howe last Friday afternoon, and locked two of the institution's officials in the vault and secured cash and Liberty Bonds estimated at between $7,000 and $10,000, were quickly apprehended because of the quick wit of Miss Emma Reimers, telephon operator at the Howe exchange. The exchange is just across the street from the bank, and when Miss Reimers saw the men enter the bank and draw the shades, her suspicions were aroused by this action, and she tried to call the bank. When she received no answer, she called various citizens, who hurried to the bank just as the bandits left, and fired a volley of shots at the robbers.

Later, officials at Atchison, Kan., were notified of the robbery, and a posse of five deputy sheriffs and four police officers took the trail after the bandits had crossed the Missouri river bridge at Atchison. They detoured and met the bandits seven miles southeast of Atchison on the Missouri side of the river. A gun battle ensued in which two of the robbers were mortally wounded, the third escaped and two officers were wounded, one severely. The loot was recovered.

MANUFACTURERS IN LINE.

Agree to Follow Retailers in Effort to Reduce Prices.

New York.—For the first time since the war, American manufacturers, caught in the epidemic of retail price-slashing, which is spreading from coast to coast, have announced their determination to begin an immediate reduction in prices. It is expected that within a month from 10 to 25 per cent will be chopped off the manufacturers' quotations on all commodities.

The National Association of Manufacturers promised to "make all reasonable efforts to reduce prices" at the meeting in the Waldorf-Astoria hotel.

One group favored immediate decrease "of from 15 to 25 per cent." The limit of decrease, however, was struck from the resolution.

Pass Cold Storage Measure.

Washington, D. C.—The cold storage bill requiring that the date of entry of goods into cold storage be marked on them when they are offered for sale and limiting the period of such storage was passed by the senate without division and with little debate. The measure limits the total storage period to 12 months. A maximum of $1,000 fine and one year's imprisonment on conviction of violation of the act is provided and the sum of $200,000 appropriated for its administration.

Food Prices Go Upward.

Washington, D. C.—Coincident with reports of nation-wide price cutting, the department of labor's bureau of labor statistics announced that foodstuff prices between March 15 and April 15 showed the greatest increase of any thirty-day period since April, 1915.

Reports from retailers in fifty-one cities, the bureau said, showed that in the thirty days dating from March 15, prices for twenty-two common articles of food advanced 5 per cent and reached the highest points on record.

NEBRASKA POLITICANS MEET

Hold Conclaves At Omaha and Lincoln and Adopt Plans for Campaign—Harmony the Watchword.

Nebraska politicians formulated their platforms for the coming campaign during the past week, the republicans holding their convention at Lincoln and the democrats at Omaha. Both conventions were harmonious affairs, due to a great extent, to the number of women delegates in attendance. Platforms adopted by unanimous consent by the two parties, summarized, contain the following principles:

Republicans.

Indorsed Fordney adjustment compensation bill for ex-service men.

Declared the covenant of the league of nations acceptable only with the Lodge reservations.

Indorsed Knox peace resolution.

Favored strict enforcement of state and national prohibition amendments.

Pledged support to equal suffrage amendment.

Indorsed civil administrative code.

Commended Governor McKelvie and other state officials.

Favored amendments to the primary law.

Democrats.

Indorsed league of nations without reservations.

Favored equal suffrage amendment to Nebraska constitution.

Favored eight-hour day and right of collective bargaining.

Condemned mutilation of state primary law.

Favored establishment of commission to study child welfare.

Deplored wholesale issuance of pardons, paroles and furloughs.

Approved principle of co-operation between producer and consumer.

Opposed government interference in time of peace with freedom of speech, press and assembly.

Indorsed candidacy of John H. Morehead for governor.

Censured extravagance of Governor McKelvie in the code system.

Indorsed warfare on profiteering.

Approved following measures passed during democratic administration: Reduction of tariff, federal reserve bank act, farm loan bill, good roads measure, establishment of federal trade commission and the Philippine bill.

TAKES DRASTIC ACTION.

Commerce Commission Makes Move to Relieve Freight Congestion.

Washington, D. C.—In its first general order directed at the freight jam, the interstate commerce commission instructed all railroads to forward traffic without regard to previous routing and at the same time, abrogated all railroad rules governing car service. It means the restoration of freight traffic such as prevailed under the railroad administration.

The commission agreed that an emergency exists on the lines of all railroads, suspended regulations with respect to car service, and directed that freight be forwarded on routes most available to expedite its movement to any destination. Detailed orders were issued to all principal roads east and west concerning daily delivery of cars for the purpose of expediting delivery of 20,000 box cars to the lines west of Chicago and 30,000 open cars to eastern roads within 30 days.

City Loses Model Young Man.

David City, Neb.—J. S. Vaughn, newlywed, church singer, baker employed by G. W. Gates & Son, has departed, and citizens here who befriended him, total their losses at $1,500. Vaughn in three months bought an automobile and mortgaged it, won a rich widow owning her own home for his wife, lifted his voice in the village choir and established credit in all the town stores. Recently Vaughn bought two diamond rings on credit, obtained $700 from his bride, bought a supply of clothing at the stores, sold his mortgaged car and departed. He left his bride here.

3,350 Cars Grain Spoiling.

Austin, Tex.—A shortage of 3,350 cars to move grain said to be spoiling at points in the Panhandle due to lack of storage, was reported to the interstate commerce commission by the Texas railroad commission.

Bound for Middle West.

New York.—Scores of Dutch farmers with their wives and children arrived here on the steamship Noordam from Rotterdam on their way to farms in Iowa and South Dakota.

Floods Delay Legislative Session.

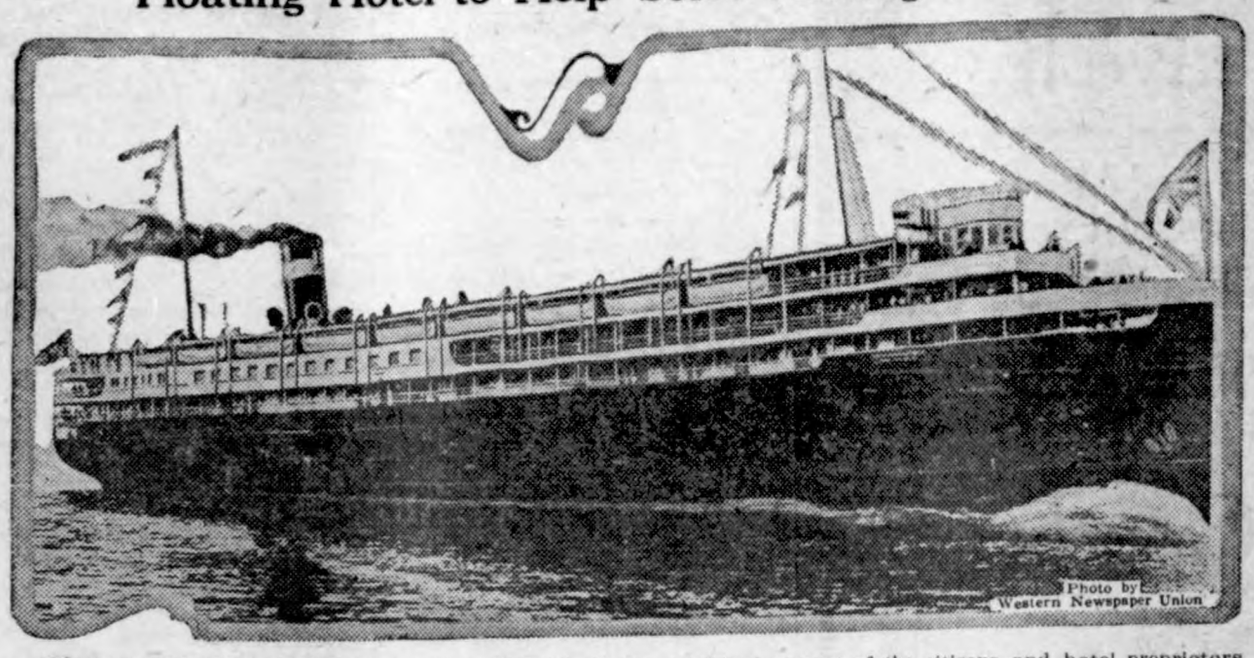
Pierre, S. D.—The extra session of the South Dakota legislature, which was to have convened May 17, has been postponed. Railway traffic conditions, due to floods, are the cause. The session will be held some time in June.

Wholesalers Put On Lid.

Chicago, Ill.—Big wholesale houses here are restricting credit to their own customers. Marshall Field & Co., reputed the biggest wholesalers of dry goods in the country, urged retailers to cut their stocks to the bone and be "prepared for whatever comes," and began calling in customers who are back on their bills. Butler Brothers, jobbers, predicted a steady fall in prices for the next two years to the pre-war level.

Wholesale fur and silk prices already are well on the downgrade.

Floating Hotel to Help Solve Housing Problem



The steamship Noronic has been sent to Detroit, at the combined request of the citizens and hotel proprietors, to help solve the housing problem there by serving as a floating hotel.

Say Thousands Die from H.C.L.

United States Scientists Give Startling Facts Gleaned From Investigation.

CHILDREN MOST SUSCEPTIBLE

Claim Vice President Marshall's Adopted Son Killed by Lack of Nutritious Food—Proper Diet Is Needed.

Washington.—The high cost of food is killing thousands of Americans and undermining the health of thousands of others.

This is the deduction made by scientists connected with the government, whose job is to figure out just what kinds of foods are necessary to sustain the human body.

The reason for the H. C. L. casualty list is that the most expensive foods are the ones most necessary to good health. Economical shoppers select the cheaper food and thereby deprive themselves and their families of life-sustaining elements.

The disease that develops is called acidosis. It is not a new disease, but its prevalence in America has developed in the last five years. The word "acidosis" is so new that it hasn't got into the dictionary.

The disease is more prevalent among children. It was the malady that killed Vice President and Mrs. Thomas Marshall's adopted son. That child had been properly cared for after the Marshalls adopted him, but he was undernourished before he fell into such fortunate hands and several years' of proper feeding failed to restore his health.

"Bread and other starchy foods are the cheapest," said Dr. Carl Voegtlin, professor of pharmacology, government hygienic laboratory. "For this reason they are consumed more extensively. They are the foods that, used to excess, bring on acidosis."

The principal symptom of acidosis is abnormality in breathing. The respiration is more difficult because the lungs are trying to eliminate the excess of poison.

What is the preventive or remedy for acidosis?

Sometimes doctors give bicarbonate of soda or magnesia—alkalines that neutralize the acids—to prevent acidosis after operations, after ether anesthesia or relieving established acidosis or diabetes.

Proper Diet Needed.

But to keep from getting acidosis there is a better way. The necessary alkalines can be taken into the body in a mixed diet, containing green vegetables, fruits and milk.

"One cannot emphasize too much the value of milk, fresh vegetables and fruits," declared Doctor Voegtlin. "From these foods one gets sodium and potassium carbonates and other inorganic salts that are absolutely necessary in neutralizing the acids if one is to keep well. The juices contain the alkalines the body needs. We should have them regardless of cost, for it is not economy to save money and ruin our health.

"The starchy foods, such as cakes, pies, hominy, hot cakes, biscuits, bread and potatoes should never make up more than 50 per cent of the menu, and should be much less, if possible. People should eat lettuce, cabbage, spinach, carrots, turnips, onions, apples, pears, oranges, grapefruit and other fruit and vegetables.

"String beans contain about the right proportion of foods and we should eat all we can get of them. The people now eat a half-pound of meat a day per capita, which is just 100 per cent too much. Sugar is a luxury that could be entirely eliminated with no bad effects. The best rule to follow is a mixed diet, with emphasis, especially now that summer is near, on the green vegetables and fruits and milk and its producers, and eat plenty of food at regular intervals."

Wolves in Manitoba Meet Trains, Claim

Winnipeg, Man.—According to Christopher Possett, station agent at Gunton Village, a short distance from here, the only thing wolves don't insist on doing in his town is voting.

Possett was here to get provincial permission to carry a gun and says the wolves know the railroad timetables as well as the chief dispatcher and come in droves to meet the incoming trains.

He was given the permit, bought a gun and loaded up with enough ammunition to last him a year or two.

HOOVER GETS A MEDAL

The National Academy of Sciences' medal for eminence in the application of science to public welfare was awarded Herbert Hoover in Washington. The award specified his application of science to the conservation, selection and distribution of food.

German Liners Are Marked

Crafts Which Once Flew the Double Eagle Crippled by Plotters.

IMPERATOR IS ONE VICTIM

Giant Vessel Develops List at Sea—Bombs Found on Washington—Moccasin Sunk and Callao Disabled.

New York.—Former German liners and cargo ships, now being operated under the United States flag, appear to have become the objects of sabotage by Germans or "reds," who are determined that the craft that formerly flew the double eagle shall not prove of great value to a nation that helped to overthrow Germany. Great Britain is said to be following similar clews, some of which indicate that the attacks on shipping may be the result of the spreal of communism and soviet teachings to the ranks of the International Seamen's union, which controls the men on the ships under the American and other allied flags.

The four most aggravated cases which are being considered involve three American vessels and the Imperator, which is flying the flag of the Cunard line since she was turned over to England by the United States. The United States ships are George Washington, on which President Wilson traveled to and from the peace conference, and the cargo carriers Moccasin and Callao.

Attempts to Damage Ships.

The Imperator, while on a trip to Europe early in March, developed a mysterious list while at sea, which her officers and crew were unable to remedy. It is held to have been caused by a deliberate attempt to disable the giant liner.

The Moccasin turned turtle in the Erie basin several months ago. When divers investigated they found her seacocks had been opened and so tampered with that it was impossible to close them. Several bombs were found on the George Washington several weeks ago just before she was scheduled to sail for Europe. The Callao, on her recent arrival at Rio de Janeiro, was found in an unseaworthy condition as the result of deliberate tampering with her machinery.

ENDS 150-YEAR FEUD

Trouble Started by Dog Has Just Been Settled.

Egyptian Authorities Interfere When Two Villages Engage in Bloody Battle.

Cairo.—An assize case has ended which is one of the most remarkable held in Egypt for years. It originated in a vendetta, not between families—but between two whole villags, Hamidat and Ashraf, near Keneh, Upper Egypt, northeast of the ruins of Thebes.

One hundred and fifty years ago a dog from the village of Hamidat bit an Ashraf man, who died. A quarrel followed between his relatives and the owner of the Hamidat dog, which developed till all the inhabitants of Ashraf considered that all persons of Hamidat blood were guilty of the death. The hatred of one village for the other became hereditary, and assassination was common between them whenever the conditions of the country favored disorder.

Last spring Ashraf attacked Hamidat in force. A score of Hamidatians were killed, 120 houses were burned and harvests were carried off.

Hamidat remembered the dog and bit back, killing 16 of the assailants.

These slayers have just been tried, 71 accused being brought up and one lawyer briefed for every five persons by the defense. Twenty-one received sentence of 10 years' penal servitude.

It is noteworthy that the vendetta did not include women, who during 150 years had indulged only in verbal warfare.

England's first factory for the manufacture of artificial silk has been opened near Derby.

Farmer, Plowing Up Snake Den, Killed 47 Reptiles.

Peter Neyen, while plowing on a farm near Tipton, Ia., turned over a den of snakes. Neyen ran for a grubbing hoe, which was nearby, and with it dispatched the reptiles. There were 15 snakes in the bunch, and they were of every kind and color.

Making another round of the field and coming to the same place, Neyen turned over another big roll of snakes, which he immediately killed, and this time the number was 32, making a total of 47 snakes in the bunch. The snakes measured from 15 to 18 inches in length. The only kind missing was the rattlesnake.

It may take a woman longer to make up her face than her mind.

MOVE IS SPREAD

WAVE OF PRICE-CUTTING SWEEPING OVER NATION.

TIGHT MONEY ONE FACTOR

Inadequate Shipping Facilities Advanced As Reason—Only Temporary, Says Financier.

Chicago, Ill.—A wave of price cutting in retail clothing costs reported from the Mississippi valley to the Pacific coast is under way, according to reports reaching here. Dispatches from 24 cities told of promised reductions in certain necessities ranging from 15 per cent to minus profit.

Financial authorities here said the indications were that the price decline would be limited to ready-to-wear clothing, principally women's garments and silks. Shoes were in the list affected.

Tight money and inadequate transportation facilities were cited as two of the prime reasons for the movement. Delays in delivery of goods in which much money had been tied up, together with inability of farmers to move grain and live stock to market were said in many instances to have worked a hardship on merchants.

An officer of one of the leading department stores of Chicago declared that the price reduction now being reported meant also that merchants were trying to satisfy what he called the hysterical demand from the public for lower prices." These current reductions, he said, might be only temporary.

A financial authority here said that if reports of price cutting were dependable, they indicated a tendency toward a reduction in investments. Though this might be temporary, it was said, it was undoubtedly good, in that it suggested that merchants were getting ahead more cautiously. Sales are being held under various names.

CARRANZA ESCAPES.

Deposed President Eludes Pursuers, Says Texas Paper.

El Paso, Tex.—The El Paso Times has come out with a story quoting a refugee Carranza official here as having advised other Carrancistas in the United States that Venustiano Carranza, deposed president of Mexico, accompanied by his son-in-law, General Candido Aguilar, has found refuge on the Mexican gunboat Progreso.

Carranza, this information has it, dodged through the net of rebels surrounding the besieged presidential party in the mountains of the state of Puebla and, after a hard ride through tropical jungles, made his way to the gunboat, the captain and crew of which remained loyal when Vera Cruz turned rebel.

Declares Sugar Cornered.

Washington, D. C.—Retail sugar prices can be reduced 50 per cent, J. H. McLaurin announced, following a conference which he and a committee of the Southern Wholesale Grocers' association held with Attorney General Palmer.

"The trouble with the sugar situation," said McLaurin, "is hoarding and interference by brokers. They have cornered the supply. The attorney general must stop speculation in sugar."

Villa Still On War Path.

Chihuahua City, Chihuahua, Mexico.—Because of Francisco Villa's pretensions to remain a political and military factor in Chihuahua there is little likelihood that an agreement will be reached between the government and the revolution against Carranza, it became known here, following a conference between Gen. P. Elias Calles, supreme field commander, and Alberto Gomez, Villa's personal envoy.

Denver City of 256,369.

Washington, D. C.—Denver, Colorado's largest city, which ranked as the 27th municipality of the country in 1910, has outgrown Louisville and St. Paul, which ranked 24th and 26th respectively, 10 years ago. The census bureau announced Denver's population as 256,369, an increase of 42,08[illegible] 20.1 per cent over 1910.

Cuts Off Funds for Europe.

Washington, D. C.—President Wilson and his cabinet have decided that the allies and Germany must work out their own financial recovery, unaided further by the United States.

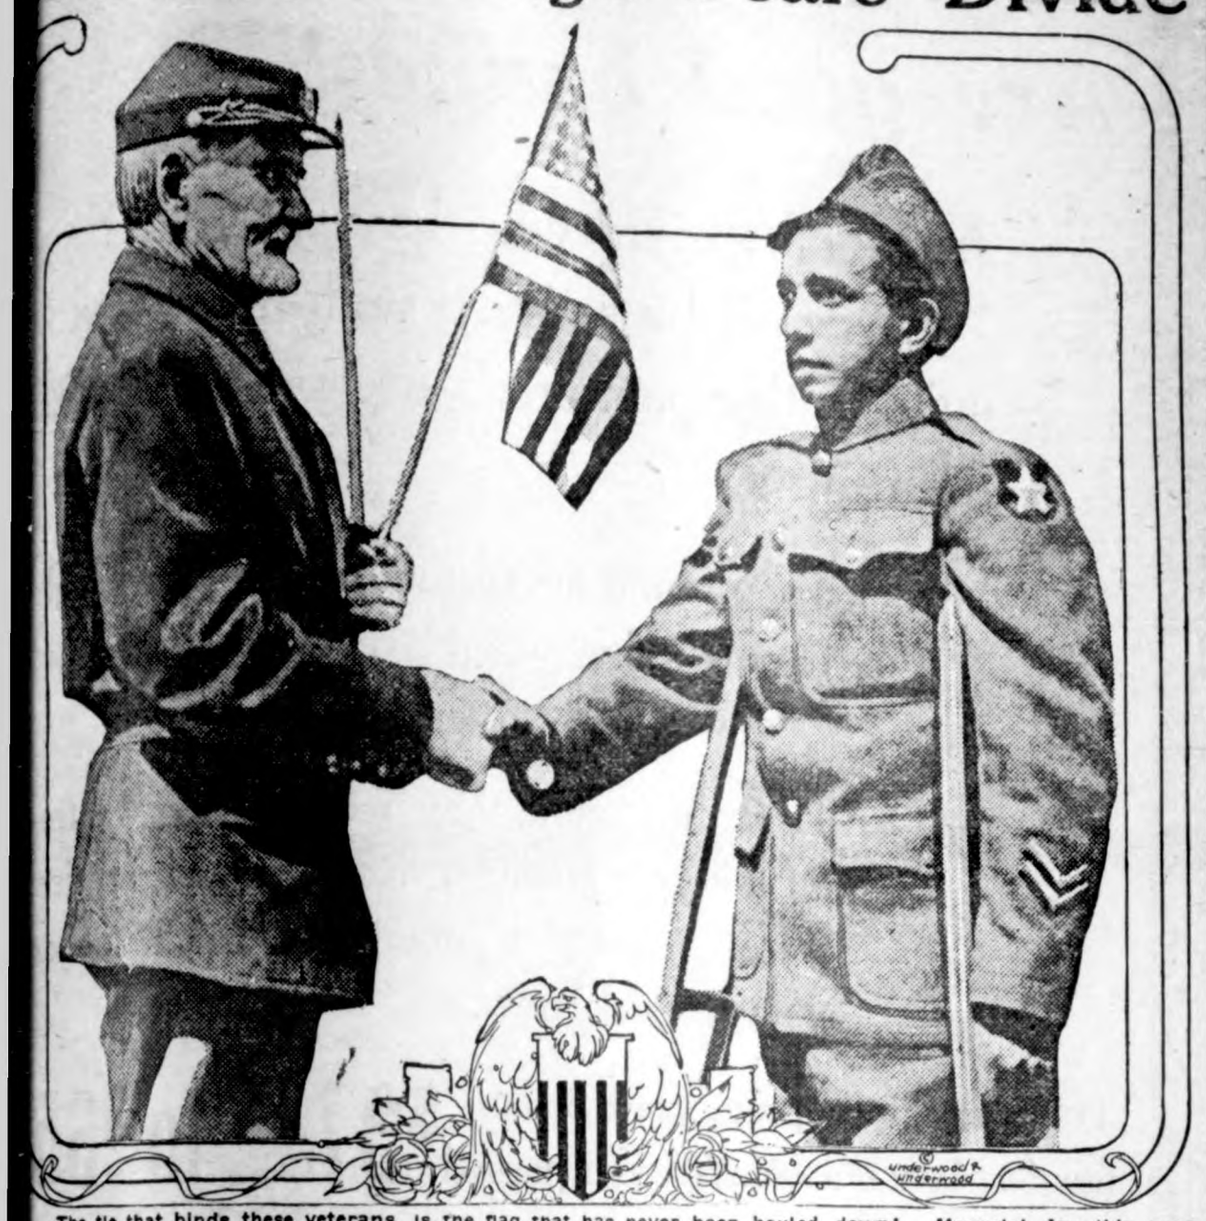
This decision is understood to have been precipitated by an agreement between the British and French premiers which, in effect, would secure the United States with the [illegible] writing of the German indemnity, which to have been tentatively set by the allies at $30,000,000,000.

Kansas Banks Fail.

Topeka, Kas.—The state banking department took over control of [illegible] over state bank at Hanover, Washington county, and the Aulne State bank of Aulne, Marion county, two banks whose failures were reported recently.

As to rumors on the New York and Chicago stock markets relative to "bank failures in Kansas," State Bank Commissioner Wilson said: "We have certainly had gone wild to make it appear that the failure of two small Kansas banks should affect the country's market centers."

rothers, Though Years Divide



The tie that binds these veterans is the flag that has never been hauled down! Memorial day this year rings this feeling uppermost in the minds of all true Americans.

EMORIAL DAY IN MANY LANDS

m This Time There Will Be Graves of Soldier Dead to Be Decorated Overseas.

EMORIAL DAY this year finds the thoughts of many Americans thousands of miles away. With cinema- rapidity the principal Memorial scene has changed from the 83 ional cemeteries, where tiny flags orate nearly 400,000 graves to nce, where 76,247 of the flower of erican manhood lie buried in 2,342 eteries.

illing the ever-thinning lines of e and gray is the mighty khaki- hosts of democracy. There is the riotic oratory by the foremost men, this time by men tried by war. re is the usual booming of guns, nforced this year by the blazing llery of the A. E. F.

ut the significance of it all is almost international observance of great American Memorial day. the first time graves of American diers, like monuments of democ- y, are found in rugged Scotland, in et English churchyards, at Coblenz Germany, on the icy wastes of Si- ia and in the fields of sunny Italy, well as on the slopes of Montfau- and at Suresnes, in France.

uresnes, the great American cem- y just outside of Paris, might be ained in perpetuity by the United tes for the purpose for which it s so generously given by the nch nation. It lies on the beauti- slopes of Mont Valerien, sentinel- by a historic fortress. Border- the curved frontage of its 13,000 are meters runs a shady boulevard, ich the municipality of Paris has ently named "Boulevard Washing- ."

The Seine Winds Past.

rom this spot of the sepulture one erlooks the city of Suresnes, with Seine winding past its doors, and world-famous Bois de Boulogne, ng yet farther on down the gentle clivity toward the French capital. Writing to the mayor of Suresnes, J. Gen. H. L. Rogers, former quar- rmaster of the A. E. F., but now artermaster general of the army, id:

"The commander-in-chief is deeply nsible of the touching devotion thus nifested by the people of the town Suresnes, both in the donation of a ce that shall be sacred to the mor- remains and the honored memory our heroic dead and in the noble olution to watch over their resting ce. He also desires for me to im- rt to you his appreciation of the butes, instituted at your suggestion, the memory of our first American esident, in giving the name of Wash- gton to the boulevard leading the space allotted for this hallowed rpose."

Shell Holes Opened Up.

The graves registration service, hich comes under General Rogers, d which did such laudable work roughout the war under the able adership of Lieut. Col. Charles C. erce of Philadelphia, re-enforced by ,000 negro troops, combed the entire ttle area of France in an effort to ate and identify the bodies of all ldiers who fell. So thorough was final inspection that even shell es were opened up in the search missing bodies.

The cemetarial branch of the quar- termaster corps, in charge of Maj. H. R. Lemly, organized, equipped and supplied four units of the graves registration service, which after preparatory training at the casual camp at Governor's island and at Camp Merritt were sent overseas in command of Lieut. Col. Pierce, then a major.

It was the business of the graves registration service to locate all cemeteries under the prescribed procedure under the laws of the country in which they are established. In France, Belgium and Italy practically the same laws exist, and the same procedure is followed in establishing American burial grounds.

An officer of the graves registration service took the initiative in all acquisitions. A letter was prepared for the signature of the commander-in-chief, addressed to the French military mission, or the commanding general of the region, if in the zone of the interior, asking for the allotment of whatever space was required.

Inspect and Test Grounds.

Commissions were then appointed by the French authorities, consisting of representatives of the engineers, sanitary department, the prefect and the ministry of war, and the American authorities designated an American officer of the graves registration service as the fifth member of the commission.

The commission inspected and tested the grounds, in company with the municipal authorities, making recommendations upon which the ministry of war procured the ground for the French state and set it aside for an American cemetery. It is thereafter controlled and administered entirely by the graves registration service.

On the battle front space was chosen by the American commanding generals directly, or through an officer of the graves registration service. However, the same procedure of acquisition was followed, the only difference being that the emergencies of battle were met promptly, and the slower process of legal formalities arranged afterward.

Graves Given to the A. E. F.

In many cases plots in French cemeteries have been given to the A .E. F. These include space for 25 to 500 or more graves. In Great Britain the government provided ample cemetery space for American use and requested that the expense be borne by the British people. In Germany space was requisitioned by the authorities of the army of occupation. The subject of American graveyards in Germany will be a proper matter for settlement by one of the many commissions resulting from the Paris peace conference.

While the graves registration service had nothing to do with burials, it was required to identify bodies whenever possible, and register all graves, appropriately mark them and maintain such a complete system of records that information might be furnished relatives of the dead and that places of burial might be located whenever desired.

Elaborate arrangements were made abroad by Americans and foreigners alike to observe Memorial day.

With the Spirit of '61 and '17

Their duty it will be to uphold in their turn the sacred traditions of Liberty handed down by their sires and grandsires.

HOME TOWN HELPS

NUT TREES FOR ROADWAYS

Walnuts Bring Eight Dollars a Bushel, Says Writer in Making Suggestions for Planting.

Maples, poplars, elms, willows and the ailanthus are seen along roadways and in parks wherever public ambition for shade has been sufficient in degree to induce authorities to put in trees of one sort or another. For the most part our northern highways are unshaded except by such trees as may accidentally spring up by the roadside, and, after competition with various enemies, finally reach above the fences, writes Robert T. Morris, a member of the American Forestry association of Washington, in The American City on "Nut Trees for Roads and Parks." Trees for city roads and parks, particularly in the larger cities, are often enough selected by some nurseryman favored by the political powers that be, and the nurseryman furnishes what he wishes to supply the uncritical purchaser. The time for this sort of procedure is passing, and people are beginning to awaken on the subject.

Progress in civilization along this line will mean that we are gradually to dispose of the kind of trees that furnish nothing but bunches of leaves which in due season litter the ground and when swept up contain nothing more than incidental trash. Now, if these trees were to give place to nut trees and fruit trees, there would be very much besides leaves to be swept up in the autumn. One of my friends in Illinois told me that in 1918 he received $8 per bushel for his black walnuts of a particularly good kind, and that some of the trees bore as many as 14 bushels to the tree.

BESTOW THOUGHT ON GARDEN

Promiscuous Planting of Flowers, Trees, and Shrubs Is Not to Be Recommended.

The main planting of any country place should be of trees and shrubs. Flowers should be used as decorations. They may be thrown in freely about the borders of the place; not in beds in the center of the lawn. They show off better when seen against a background; this background may be foliage, a building, a rock or a fence.

Where to plant flowers is really more important than what to plant. In front of bushes, in the corner by the steps, against the foundation of the residence or hothouse, along a fence or walk—these are the places for flowers. A single petunia plant against a background of foliage is worth a dozen similar plants in the center of the lawn. Too many flowers make a place overgaudy. Too much paint may spoil the effect of a good building. The decoration of a yard, as of a house, should be dainty.

The open-centered yard may be a picture, the promiscuously-planted yard may be a nursery or a forest. A little color scattered in here and there puts the finish to the picture. A dash of color gives spirit and character to the brook or pond, to the ledge of rocks, to the old stump or to the pile of rubbish.

Well-Kept Lawns in East.

Persons traveling through the cities and villages of Connecticut and other New England states often comment on the beautiful lawns there, the Oklahoman remarks. Even out in the country the yards are covered with a fine growth of grass, well watered and neatly trimmed.

It is said New Englanders are so careful with their lawns that they will not use rakes in gathering the cut grass after a mower goes over it. Instead they sweep the cut grass away. They assert that rakes tear the roots of the grass and otherwise damage it.

Famous Pennsylvania City.

In the belfry of the ancient courthouse at York, Pa., hung a bell given by Queen Anne to St. John's Episcopal church. This bell was rung when the Declaration of Independence was signed, when Cornwallis and Burgoyne surrendered and when Washington passed through York. The bell is now on view in the vestibule of St. John's church. In the Presbyterian cemetery in York is buried James Smith, a signer of the Declaration of Independence and captain of the first military company organized in Pennsylvania to fight Great Britain.

Faith Before Doubt.

As a general thing, the reason a man thinks he's having a good time when he is spending a lot of money is because he knows he will doubt it next day.—Dallas News.

An Average Man.

"What is your idea of the average man?" "In a city he's a fellow who's always waiting for the raise that never comes; takes his meals off the arm of a chair until he gets married and after that eats in the kitchen with his coat off; never spends more that 50 cents on amusements in one day until after he's married, and then never spends more than a quarter and whenever there's a street parade downtown he's always somewhere along the line of march."—Birmingham Age-Herald.

DAIRY FACTS

VALUE OF BULL ASSOCIATION

Farmers Enabled to Co-Operate in Purchase and Use of Sire at Lowest Expense.

(By R. W. CLARK, Colorado Agricultural College, Fort Collins, Colo.)

The bull association is strictly a co-operative enterprise. Five, eight, or ten farmers in a neighborhood unite in the purchase and use of a bull. The number of farmers in a community proposition like this depends upon the number of cows each keeps and proximity to each other. A local organization like this is called a "block." There may be other "blocks" in the same township or county, all operating under the same constitution and by-laws. After a bull has been used two years or so in one "block" he is exchanged for another bull in one of the blocks.

Through this kind of an organization, the purchase price of the bull per farmer is low. The cost of the keep of the bull is distributed among a larger number of people, only good bulls are used and in-breeding is avoided.

Farmers should look into this proposition. It means much to them.

DO AWAY WITH SCRUB STOCK

Registered Bull Calf Can Be Obtained at Reasonable Figure—Milk Flow Increased.

(By O. H. HANSEN of the dairy husbandry division, Minnesota College of Agriculture.)

Why should anyone be satisfied with scrub cattle? It is true there are not enough purebreds for all, but the heifers from a scrub herd will be wonderfully improved over their dams if they are sired by a good purebred bull from a productive dam. A registered bull calf can be had at a reasonable price from a dam which has made a creditable record, and the offspring of such a bull proves the wisdom of the investment. It is a known fact that in many cases the milk produced by the heifer of such a bull is more than double that of the dam. Neither these animals nor their offspring will ever be purebred, but the continued use of a first-class registered dairy bull of the same breed will in a few years result in a herd that may equal in production many purebred herds.

INCREASING VALUE OF COWS

Gain of 58 Per Cent in Five Years Is Shown by Reports of Bureau of Crop Estimates.

The farm cow that gives milk for human food stands first, with a total value of $2,022,000,000, as compared with other classes of farm animals for January 1, 1920, by the bureau of crop estimates of the United States department of agriculture. Not even the total value of all other cattle is equal to the value of the dairy cow.

Average Price of Milk Cows Per Head Has Increased From $58.25 in 1915 to $91.95 in 1919.

The average price per head of milk cows in this country has increased from $58.25, since January 1, 1915, to $91.95, the average for 1919, or a gain of 58 per cent in five years, according to the bureau.

PUREBRED SIRE IS VALUABLE

First Cross on Average Herd Increased Income $32 Per Cow in Province of Ontario.

The first cross of a purebred bull on the average dairy herd increased the income $32 per cow. These figures were secured in the province of Ontario in comparison of 140 herds using grade bulls and 31 using purebreds. Mr. Rex E. Willard of the farm management department of the North Dakota Agricultural college, in applying these figures to North Dakota, shows that if one farmer with 20 cows using grade bulls received an income of $1,680, his neighbor with 20 cows but who began using purebred bulls five years ago should receive $2,320, or $640 more.

WASH MILK BOTTLE WELL

If Allowed to Stand It Should Be Filled With Water to Prevent Casein From Hardening.

The milk bottle if not washed as soon as emptied should be filled with cold or lukewarm water till it is washed. The albumen and casein harden and stick fast when they dry as well as when heated. So that if hot water is poured in the bottle or can that has had milk in it the albumen and casein will harden and stick. After washing with lukewarm water use hot water, which removes the fat, and rinse in boiling water or steam to kill the bacteria.—Extension Division, North Dakota Agricultural College.

STOMACH GOOD AS NEW. FOUR DOCTORS GAVE HER UP

Mrs. Hendricks, Bedfast Five Months, Was Able to Work in Two Weeks.

"I was sick last winter for five months with stomach and bowel trouble. Could not turn myself in bed without help. I was under the care of four doctors, and they gave me up. Then Mr. Mills, the druggist, persuaded my husband to try a bottle of Milks Emulsion. I had only taken it two days until I was sitting up in bed, and in two weeks I was doing my own work. When I began taking it I weighed only 70 pounds; now I weigh 190 pounds."—Mrs. Mary Hendricks, 900 Litchfield Road, Owensboro, Ky.

Thousands of people who have suffered for years from stomach and bowel troubles have found relief almost from the first dose of Milks Emulsion. And it is real, lasting benefit.

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. As a builder of flesh and strength Milks Emulsion is strongly recommended to those whom sickness has weakened and is a powerful aid in resisting and repairing the effects of wasting diseases. Chronic stomach trouble and constipation are promptly relieved—usually in one day.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

No matter how severe your case, you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and $1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

Indefinite.

"These poets are so indefinite."

"How now?"

"Why, the poet tells us that Lars Porsena of Clusium sat in his ivory car. Stalled somewhere, of course. But we never learn whether he was hung up on account of tire trouble or lack of gasoline."—Louisville Courier-Journal.

LIFT OFF CORNS!

Doesn't hurt a bit and costs only a few cents

Magic! Just drop a little Freezone on that touchy corn, instantly it stops aching, then you lift the corn off with the fingers! Truly! No humbug!

Try Freezone! Your druggist sells a tiny bottle for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Freezone is the discovery of a noted Cincinnati genius.—Adv.

His Prominent Characteristic.

"You must have seen some trait in me to admire," said Mr. Meekton, "or you wouldn't have married me."

"I did," replied his wife; "your sublime nerve in wanting to be my husband."—Pearson's Weekly.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

Too Short.

"How did you enjoy the sermon?"

"Too short."

"That so? I never heard anyone complain that a sermon was too brief before."

"Well, you see, it was this way: I'd hardly dropped asleep before the thing was over."

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, the antiseptic powder to be shaken into the shoes and sprinkled in the foot-bath. The Plattsburg Camp Manual advises men in training to use Foot-Ease in their shoes each morning. It prevents blisters and sore spots and relieves painful, swollen, smarting feet and takes the sting out of corns and bunions. Always use Allen's Foot-Ease to break in new shoes.—Adv.

"This man is running for office—" "Yes?" "What does he stand for?"

UNDER U.S. GOVERNMENT SUPERVISION

They Did Not Die In Vain

Such heroes, such men, such AMERICANS—that if every one of them could have his choice again of living under a compromised flag or dying for the cause he knew was right—not one would fail to answer "Here" to the roll-call of supreme sacrifice.

A Nation pauses in reverence before the shrine of eternal memories.

Chicken Coops

They are stronly made of galvanized steel and we have them in round and square models---at prices cheaper than than you can make them of wood.

You will also need a few of our
Gold Medal Chicken Waterers
They keep the water cool and fresh and there are no pipes or floats to trouble with

we will take your eggs in trade

Jacobs & Son

Union Service at First M. E. church Sunday at 9:30 A. M.

Fred Bell had a rather severe accident last week Thursday. He was shelling corn for Thos. Nelson . The cob elevator became clogged out and Fred reached in to give the cobs a boost when his hand caught in a chain and went around a cog wheel, before he could jerk it away. His middle fingers on the right hand were badly cut and bruised and it required four stitches to close the wounds on one finger and one stitch did the business on the other. At this time the fingers are healing and he is getting along well.

M. O. Hocum is building some new coal shedst his week west of the elevator so that he will have plenty room to store future shipments of coal. He has also added another feature to his coal business, which is a machine for unloading the coal from the cars into the bins or from the bins into wagons. It is thought this machine will save a lot of the disagreeable work in unloading coal from the cars.

The biggest fish caught this year in Clear Lake, was pulled in Friday by Harry Rice of Garner. The pickerel which he caught weighed exactly thirteen pounds and a quarter. It is very seldom that a fish of this kind is caught, and especially landed with a road and reel as the chances for getting a large fish like the one Harry caught into a boat is very slim. This little bit of good news will no doubt make the Klemme fishermen sit up and take notice—and hike p. d. q for Clear Lake.

Mr. and Mrs. C. F. Keraus came over from Clear Lake Monday evening for a few days' visit with Klemme relatives. Charlie was up in Minnesota a few days ago fishing. He was also accompanied by Tom Mitchell of Swea City, and he says they surely caught all they could carry. Charlie goes to Minnesota for "real" fishing and then for past-time he will fish in Clear Lake.

Charles Stanton, a young Garner man, was driving east of Garner Sunday with other young men in his Ford whe he got into a race with another car. The outcome of the affair was that young Stanton's car struck a deep rut in the road, overturning the car and occupants, but none were severely injured outside of a good shaking and a few minor bruises. The car was practically a new one and was almost smashed to pieces. The body, fenders and windshield were broken and smashed up and the wheels suffered a like treatment. Just another example of too fast driving and a warning to others to keep out of races on rough roads.

We thought we knew the gentleman but when we looked at him closely we did not know who he was, but could have swore we were well acquainted with him. We pondered over the question at the depot Tuesday morning and then walked up town. "Zip" the barber hailed us and we told him of the strange man we saw at the depot. "Zip" laughed and told us the man we saw was none other than August Barz with his beard removed and that he had done the job Monday. Well, if we weren't jiggered! We owe Mr. Barz an apology for passing him up, but he looked thirty years younger since he shows his face to the world, and we thought he was some stranger who had come to town. Now that makes us wonder how John Gruetzmacher, Lew Sampson and a few of the other Klemme gentlemen would look if they had their whiskers removed!

MEMORIAL DAY A BIG SUCCESS

As Memorial Day came on Sunday, May 30th, that was the day on which it was observed in Klemme. The program opened at the city park promptly at three o'clock in the afternoon, with two selections from the Klemme Band. This was the first appearance of the band in public and they did exceptionally well considering the fact that they are all new beginners and have played but a few months. A mixed choir, Messrs. Trafford, Ralph Ludeke, Elmer Ludeke and E. Zidler, and Mesdames Hocum, Trafford, Waterman and Miss Greiwe gave a couple of numbers of well chosen vocal selections in keeping with the day. The address of the day was given by Rev. McKeegan, the evangelist, which was followed by a well read selection, "The Gettysburg Address," by Milvern Ell. The Band played "Star Spanged Banner," after which the peope proceeded to the cemetery where the graves of soldiers were decorated. All told, the celebration was given in a quiet manner befitting the day and the program went off without a hitch. Many from other towns nearby were here to be present at the program as their home towns were to celebrate the following day.

ANNUAL SCHOOL PICNIC

The last Friday of the school year is always considered a special holiday for Klemme and it was not forgotten this year. The Annual School Picnic is always a day to which puipls and parents look forward to at the close of the school year. This year, as in former years, the picnic was held in Koerner's grove and it is needless to say that the good cooks of Klemme had the old plank table groaning with the good things to eat. And of course old and young enjoyed the fine feed and then had great sport the rest of the afternoon playing games and visiting.

TOWN TEAM AND HIGH SCHOOL CLASH

Friday afternoon the town team and the High School team clashed in a game of ball at the diamond with the result that the high school team had an awful fall from their "high horse" where they ad perched since their victory over the town team a few weeks ago. When the dust had cleared away and an adding machine was borrowed to count the scores (not made by the high school) it was found that the high school had met defeat 14 to 1. Both sides played good ball but the high school boys were a bit off feed and could not get started just right or maybe the score would not have resembled so much a goose egg for them.

OBITUARY

Elmer Howard Hartbeck was born at Delaware county, Iowa, February, 21st, 1896.

When a few weeks old he received the Holy Baptism. From his early childhood he was taught and raised by Christian parents. At the age of 15 he was confirmed in the Reformed Church and has been a true and faithful member until his early death. He was very careful to lead a clean life and a noble character. His whole life was upward, not downward. This he showed all the long days of suffering, when he expressed himself over and over again that he was ready to meet his Saviour and expects all to meet him there some day. May his life be an example to many.

On July 24th he answered his country's call and left for Camp Pike, Arkansas. He there resided until September 1, when he left for France, always being healthy and strong until March 13, 1919 when influenza took place which later turned into tuberculosis. Then June 6th he started to sail back to the United States. He then was sent to Denver, Colorado, but as he received no relief and physicians were unable to give any help, he was discharged January 29th, and came back to his parents. The first four weeks he seemed to be feeling better but on February 29th he was again confined to bed with influenza, and all that loving hands could do was done. He put his trust in the Lord and said "The Lord will take care of me."

On the 24th of May, 1920, at 9:40 P. M. he answered his Saviour's call, where his father in 1900 had gone before and was awaiting him. He leaves to mourn his early death, his mother, one brother, four sisters, and many other relatives and friends.

May his memory be blessed.

(Rev. Depping)

CARD OF THANKS

We wish to thank our many friends and neighbors for the kindness and sympathy shown to us in the death of our beloved son and brother, Elmer; and also wish to extend thanks for the beautiful floral offerings.

Mrs. Henry Wille and Children

COUNCIL PROCEEDINGS OF MAY 10th AND 24th, 1920

Ralph Ludke was alolwed $10.85 refund of water tax.

Lillie Korner was allowed $3 for collecting water rent.

L. A. Ridder was allowed $15 for pumping water in April.

C. G. Waterman was allowed $27.75 interest on water bonds.

H. S. Schwarts was allowed $164.50 for hauling gravel.

Council contracted with W. E. Buell of Sioux City, to make the survey for the proposed sewer system in the town of Klemme.

N. L. Palmer, Clerk

VOTE FOR JOHN E. WICHMAN FOR STATE SENATOR

Senator H. I. Foskett of Shenandoah, Iowa, who was chairman of the Senate Committee on Appropriations the last two General Assemblies and will be a Senate member of the next legislature, has the following to say about J. E. Wichman's candidacy for the State Senate in this district:

"I want to wish you all success in your campaign for the senate, for your experience and ability will be greatly needed in the next General Assembly.

"It seems to me that there will be a great many knotty questions of policy in our state government to be decided next winter and it will need men of sane minds and legislative experience to solve them. Your experience as Chairman of the Committee on Appropriations of the house during the last General Assembly will be invaluable in adjusting the appropriations for our state schools and our penal and charitable institutions to the present financial conditions."

(Political Advertising)

LEWIS-COOBS MARRIAGE

Announcements were received in Klemme of the marriage of Verner Lwis and Miss Lena Coobs at McGregor, Iowa, Tuesday, May 25th, at the home of the bride's parents at McGregor. Now there was nothing strange about the anouncement as the younger class have been waiting for some time to hear the good news as the engagement of the happy couple has been known to their many friends here for some time. The announcement further states that they "will be at home June 1st, at Hayfield, Minn.," where they have rented a farm and will go to housekeeping. Both of the contracting parties are well and most favorably known in Klemme. Mr. Lewis is a son of Mr. and Mrs. Lew Lewis of this place and Mrs. Lewis is a sister of Mrs. Pavey and has made Klemme her home for some time. We extend congratulations to the newlyweds and wish them a lot of happiness.

BALL GAME TO BE STAGED SUNDAY

Sunday the Klemme "Rockford Socks" will meet the fast "Liberty Bells" at the Klemme park north of town in what promises to be a speedy game of ball. This will be the first of a series of games to be played by the new Klemme team.

Mr. and Mrs. A. Fischer, of Ackley, Iowa, and Mr. and Mrs. W. Loger of Dumont, came last Thursday for a visit at the L. Newberger home. They returned again some time Friday.

Dedication and Free Dinner

Everybody is invited to attend the dedication of the new Liberty Township Church on Sunday, June 13th. The program wil begin at 10.00 A.M. and a big free dinner will be served to all at noon. Come and bring your friends.

We are in receipt of a copy of the Rockwell City Advocate which tells us that Chas. Nissen, a former Klemme boy, has engaged in the newspaper game on his own hook. He has associated himself with A. R. Hultman of that place, and from the appearance of their paper, they have secured one of the real good newspaper propositions of the state. Chas. is the youngest member of the Nissen family of Klemme, and for the benefit of those who may not be able to recall Charles, we remark that his nickname when a boy was "Spider." Starting in the game years ago, Charles has developed into a real mechanic in the printing game, and we are glad that he has acquired a business of his own.—Garner Democrat.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock. Sunday School at the close of preaching service at 11:00 o'clock. Epworth League Sunday night at 7:30 in Liberty Township church. Preaching service at Liberty township church at 8 o'clock.

Midweke prayer meeting each Thursday evening at 7:30.

Everyone is welcome to all of our services.

A. H. Meyer, Pastor

2 White Horses strayed away from my place last Saturday. If anyone has them in keeping or has seen them pass please telephone at my expenses.
Fred Hoffman, Klemme, Iowa.

Oscar Carlson of Liberty township, was in town Saturday, called at the Democrat office and we had a pleasant half hour with Oscar talking over old times. Eighteen or twenty years ago, "The Big Sweed" and yours truly hobnobbed a great deal. Oscar was then in the livery business in Klemme. He foresaw the inevitable end of the horse livery business so sold out ten or twelve years ago and moved onto a farm. Very few of our farmer friends have made more money in that length of time than has Oscar, and he did it through good management and careful planning, not through the raise in value of his acres.—Garner Democrat.

Vote for J. E. Wichman for State Senator. His experience as chairman of he Appropriation Committee in the last House will be of great value in solving the state's financial problems caused by existing high prices. Adv.

Iowa News

Items of Interest Summarized for Busy Readers.

Fire, caused by lightning, destroyed the Lingo garage in Norwich together with twelve valuable trucks, and tools and other property, causing a loss of $25,000.

Kenneth Kelly, 5-year-old son of Mrs. T. L. Kelly of Atlantic, suffered a skull fracture when, on his way home from school, he darted into the street in front of an automobile.

Traer is to have a semi-professional baseball team this season. Business men have contributed between $400 and $500 toward the support of the team, and the fund will be increased before the canvass is completed.

The Population of Burlington, has decreased 267 in the last 10 years, according to announcement made by the Census Bureau. The 1920 population of Burlington was announced as 24,057. This is a decrease of 1.1 per cent.

Although crops in northern and central Iowa are now about two weeks behind normal, the present wave of warm weather has done much to bring them up and there is little danger of them being injured seriously by the unusually cool spring.

Fourteen Iowa boys will be included in the class of 461 cadets to be admitted to the West Point Military Academy July 1. They enter as the result of high marks in the March competitive examinations and also thru appointment by Senators Cummins and Kenyon and Iowa congressmen.

According to the 1919 county crop report just published locally Johnson county hens laid 5,458,888 eggs, or 1,288,239 dozens last year. With eggs selling at 42 cents a dozen this would mean $541,060.38. If all the eggs were laid end to end they would reach 610 miles or nearly three time across the state of Iowa at the point of its greatest width.

Practically every county in the state will be visited by experts from Iowa State College, working in conjunction with the Iowa State Dairy Council, this month and next in an effort to get over to the people of Iowa the value of milk as a food. In Linn county the campaign will be conducted thru the schools and business interests in Cedar Rapids.

Eb Dickson's suit against 35 West Grove citizens for their alleged conspiracy to force him to salute and kiss the American flag and give $200 to the Red Cross in May, 1918, was lost when a jury returned a verdict of not guilty. Dickson and his brother claim they were attacked and threatened with ropes and yellow paint for alleged disloyal remarks.

The recent edition of the compiled code of Iowa put out by the code commission is now available to the public for $3 per copy. The book contains the laws of Iowa in proper form and will serve as a single edition of Iowa laws until such time as the code is revised by the legislature next year. It originally sold for $7.50 and the secretary of the state has only a limited number of copies available at $3.

The city of Ames and Story county are to be made defendants in a suit for $20,000 damages to be brought in the Story county district court by Frank Coukoulis, driver of the ill-fated car which went thru the railing of the make-shift Squaw Creek bridge on Lincoln Way at noon on Friday, April 2, seriously injuring Coukoulis and killing his companion, Frank H. Niforatos. The body of Niforatos was recovered on Sunday, May 9, thirty seven days after the accident.

Two Iowa milk records were broken recently when Princess, a purebred Holstein cow in the herd of the Holmes Dairy Company produced 119.4 pounds of milk, or nearly 15 gallons on March 1st, breaking the former record of one day's production by over 7 lbs. Recently she again produced 788 pounds of milk which betters the former mark for a week's production by 48 pounds. These records were made under the supervision of the state tester and are therefore official.

At a recent meeting of the trustees of Iowa College at Grinnell two new trustees were elected, Clyde L. Herring, of Des Moines, and George E. Roberts, vice president of the National City Bank of New York. Rev. T. O. Douglas, until within a few years a resident of Grinnell but now of southern California, was made trustee Emeritus because of inability to be present at trustee meetings, and Mr. Roberts fills the vacancy thus created in the active ranks. Mr. Herring fills the vacancy created by

The American Legion post at Lamotte wanted a home which they could use for a meeting place, clubrooms, etc., and they went about securing it in a thoroughly practical and businesslike manner. They bought a building for $6,000 and in order to finance the deal they issued certificates of stock at $100 per share. They stipulated that no member should be allowed to purchase more than five shares and that no shares be sold to anyone outside of the Legion. The result was that all of the stock was quickly absorbed.

the resignation of Samuel A. Merrill.

Alfred Winike and Paul Rettenmeher, both of Carroll, were drowned in Wall lake after having rescued Misses Margaret Deiger and Agnes Halwig, their companions. The four were boating when the craft capsized. The boys swam to the girls and carried them to the upturned boat. The young women held on until help reached them ,but the boys were too exhausted to keep their holds and sank.

A double wedding which was also a doubling up of family relations, through which the older bridgegroom became at once the uncle and the stepfather-in-law of his niece's husband and father-in-law to his niece, while his bride, the mother of the younger bridegroom, became the aunt to her son and at the same time the mother-in-law and aunt to her husband's niece, has been solemnized in Davenport. Will someone please page Solomon.

After serving Black Hawk county as its agricultural expert for a period of eight years consecutively, A. A. Burger has declined to accept the offer of the directors of the county farm bureau to remain in the office another year at a salary of $4,250 and mileage and will retire from the office Oct. 1. No successor has yet been named. Burger is the pioneer county agent in Iowa, Black Hawk county being the first county in the state to maintain such an officer.

Two thousand Iowa State College students, out of a total of 2,295 who voted on the question of proposed memorials for the union building, more than 1,600 voted for a memorial grove in conjunction with the union. The vote for a monument, which was next highest, totaled only [illegible]. Smaller numbers of votes were cast for a fountain, a museum, an arch and an auditorium. Between 85 and 90 per cent of the undergraduate students took part in the balloting.

The Rock Island arsenal will lay off 750 men a week until the peacetime basis of 2,500 men is reached. This will be attained about June 30. The arsenal will discharge 5,800 men following war department orders to discontinue and dismantle certain sections of the plant. The arsenal reached its highest point during the last days of the war, when 15,000 men were employed there. Many of the arsenal employes are from eastern cities and a large portion will return.

What is believed to be the record price paid in Iowa for a hog of the same age, has just been received by George O. Satre, of Stanhope, for a Poland China boar, Giant Wonder, 2 years old last March. McDonald Bros., of Owatonna, Minn., bought the animal for $15,000. The animal has never been exhibited, consequently has no prize winning record to bring him into prominence. However, his full brother Giant Wonder I Am, was the sweep stakes champion at the Iowa state fair last summer.

Iowa counties are taking steps to straighten smaller rivers in order to increase the land areas and to improve the drainage of bottom lands to prevent overflow. The agricultural engineering extension department of Iowa State College has already been working on projects in Crawford, Wayne, Decatur, Ringgold, Allamakee and Keota counties. In most of these cases the rivers were shortened considerably by the new system. The general plan of the work is to dig a new channel for the river, straighten it out and then drain the adjoining land to the ditch. This insures the land for use as the danger of overflow is removed, say the extension men.

The Waterloo Cedar Falls & Northern Railway Company have requested the Waterloo city council to grant the street car company an increase in fare from 5 to 10 cents. The company agrees to furnish twenty-five working persons' tickets for $2 and twenty children's tickets for $1.00. The street car officials also agree to purchase twenty new safety street cars as soon as the increase is granted and will take other steps to improve the service. No increase in fares have been granted the local line since it was established twentyfour years ago. The street car officials submit a list of fifty-nine cities where 10-cent fare is in force. None of the cities are west of the Mississippi river.

Sheep owners of Iowa who are in need of a sheep shearer can be supplied from their county agent's office on application. Many farm bureaus have secured an experienced shearer with a good machine, and the price for shearing is 25 to 30 cents a head, or 25 to 35 cents where flocks are small. It is suggested that owners of small flocks bunch sheep for shearing in their neighborhoods and save money. It has been found that shearers have charged as high as 50 to 60 cents a head, which is 10 to 15 per cent of the value of the fleece. This price is considered exorbitant and the farm bureau has secured the service of a shearer to protect the farmers against excessive charges.

Hamlin Garland and Octave Thanet are Iowans and have written of Iowa. Emerson Hough and Randall Parrish and Edwin L. Sabin came from Iowa. Besides contributing novelists whose books are listed among the six best sellers, Iowa has developed historians and scientific writers, has fostered poets like Arthur Davisno Ficke and Edwin Ford Piper, and added humorists to the mixture. Bob Burdette reached fame thru the columns of the Burlington Hawkeye and Ellis Parker Butler was born and grew up in the state of Iowa.

Poultry demonstrations beginning on the morning of July 6th, will be given in each school district in Black Hawk county. It is expected that all who are interested in the culling of poultry or any other phase of the subject will attend these meetings, as individual diseases, housing and feeding will also be discussed, but the culling will be the main feature. These demonstrations will take from one and one-half to two hours.

Steps to reclaim part of the Clanton valley were taken by the boards of supervisors of Warren and Madison counties. The boards sent engineers into the valley and directed them to make surveys of the project. To reclaim the valley, it will be necessary to straighten Clanton creek from a point north of Clanton to the mouth of the creek in Warren county. Several hundred acres will be made tillable when the project is completed.

Ten-year-old Alberta Williams of Des Moines saved the life of her mother when she smothered with her bare hands the flames which had caught in Mrs. Williams' hair and clothes from a benzine explosion.

Farmers near Cascade are going to fight the sugar trust with a double-edged sword, or in other words, they are going to get the trust's "goat" by raising cane. A larger acreage than ever before will be planted this season in [illegible] vercome as much as possib[illegible]age and scarcity of

Case 15-27 Kerosene Tractor

Pulls 3 or 4 Plows

In fields where plowing is difficult—tough or baked soil, stiff grades, etc.—this Case 15-27 Kerosene Tractor will pull 3 plows easily. Where conditions are favorable, this tractor can pull 4 plows.

So it is a favorite on the average farm. It is neither too large nor too small.

In addition to its field work, it is designed for belt work, having the pulley properly placed. It will drive a Case 26x46 Thresher equipped with feeder and wind stacker or other machines requiring similar power.

The Case 15-27 has abundant reserve power. While rated at 15 horsepower on the drawbar, it can deliver more than 18 horsepower. While rated at 27 on the belt, it can deliver 33 horsepower. It is ever ready for the hardest jobs. It never tires.

All gears are cut steel, enclosed and run in oil. It has a four-cylinder valve-in-head motor, mounted crosswise on a one-piece main frame. This affords the use of all spur gears.

A Case Sylphon Thermostat controls the cooling system and insures complete combustion of kerosene. A Case air washer delivers clean air to the carburetor.

There are dozens of betterments found only in this tractor. You should be familiar with them, so that you may make a careful comparison.

May we have the opportunity soon to point out Case superiorities?

KEROSENE TRACTORS

SEE LOWER PRICES

FEDERAL RESERVE REPORT PREDICTS GENERAL DECLINE.

FOOD PRODUCTS EXCEPTED

Decided Readjustment Looked for by Business World—Shoes to Be Cheaper Next Spring.

Chicago, Ill.—A general revision downward of prices of all commodities except food, a growing tendency toward thrift, and improvement in the labor situation are three factors noted in the report of the seventh federal reserve district, just issued.

A decided readjustment of the economic and social influences governing national life is being anticipated by the business world, the report says, with the situation complicated by the lack of any precedent by which business men might be guided.

"The continued high prices, however, offer great encouragement, particularly the price of clothing and shoes. * * * * * Price of clothing and dry goods generally had reached such heights as to be almost prohibitive and the public quite naturally curtailed purchases very materially."

Shoes to Decline Further.

Washington, D. C.—Lower shoe prices next winter and spring were predicted by Edward Brand, secretary of the Tanners' Council of the United States testifying before a senate committee of inquiry.

Tanners and manufacturers believe prices will fall by that time, Mr. Brand said, because of the recent decline in leather prices. This decline could not sooner be reflected in shoe costs, he said, because shoes are made up far in advance of the season in which they are offered on the market.

WILSON FOR MANDATE.

Asks Congress to Assume Protection of Armenian Nation.

Washington, D. C.—Authority to accept for the United States a mandatory over Armenia was asked of congress by President Wilson. The executive said he was conscious he was "urging a very critical choice," but that he did so "in the earnest belief it will be the wish of the people of the United States that this should be done."

The president's message was read in both houses. Each referred it to the committee on foreign relations.

Some senate republicans predicted that the message would lie in the senate committee indefinitely.

Senator Harding, republican, chairman of the committee which investigated Armenian affairs, said he would never consent to take a mandate over Armenia, and added he did not think the senate would consent.

MAY BE FOOD SCARCITY.

Hoover Foresees U. S. Depending On Europe for Certain Products.

Washington, D. C.—Decrease in agriculture production may result in this country's becoming dependent on overseas food supplies, Herbert Hoover said in a letter to Representative Riddick, republican, Montana, setting forth the former food administrator's views "as to practical measures to insure better returns to the farmer for his labor and investment."

Mr. Hoover suggested the creation of a commission composed of highly trained farmers and skilled economists and financial experts to consider the causes and remedies for the situation.

Montana Has Best Schools.

New York.—Montana has the best all-round public school system in the United States according to the results of a comparative study of state school system made public by the Russell Sage Foundation. The report assigns second place to the schools of California, third place to those of Arizona, fourth place to New Jersey and fifth to the state of Washington.

These findings are contained in a report by the department of education of the foundation. Other findings are that the school system of the United States as a whole has doubled in efficiency during the last 50 years, having an index number rating of 26 in 1870 and one of 52 at the present time.

Army Bill Passed.

Washington, D. C.—The senate has passed the army appropriation bill carrying $415,919,000 and sent it to conference. The bill provides for an increase of approximately $42,000,000 over the house bill, but $353,000,000 less than the appropriation for the present fiscal year. The principal senate increase was $12,745,000 for the army air service, making its total $40,000,000. The house provisions which would give the army air service control of all military aerial operations from land bases, was eliminated by the senate.

Freight Jam Improves.

Washington, D. C.—The freight jam is slowly yielding to the efforts concentrated on the mass of cars which was closing the country's railroad yards. Reports to the American Railroad association's car service committee showed a reduction in car accumulation from 269,000 on April 24 to less than 170,000 on May 21. While the battle by no means has been won, railroad officials said indications of improvement were strong enough to substantiate the belief that the peak of the congestion had passed

POLICE AND CITIZENS FIGHT

Deadly Battle Staged in Virginia Mining Town—Ten Dead and Several Injured.

Mateawan, W. Va.—Ten men, including Mayor Cabell Testerman of Mateawan were killed and three badly injured in a battle here between the police and citizens on one side and private detectives on the other.

Besides the mayor the dead include five private detectives and four miners. Police say the trouble arose when a party of private detectives arrived here from Williamson to evict from company's houses the families of miners who had been dismissed from the company's employ.

Eight families, the police declare, had been turned out when Mayor Testerman approached Albert Felts, the leader of the detectives, and wanted to know by what authority their action was taken and by what authority they had arrested one of the miners.

While they were talking, according to the police, Felts shot the mayor, firing from his coat pocket. Almost instantly Felts was killed himself, the police say, by "Sid" Hadfield, chief of police of Mateawan. Immediately the shooting became general, numbers of persons joining in the fray.

GIRL PROVES HEROINE.

Telephone Operator's Quick Wit Results in Capture of Bank Robbers.

Howe, Neb.—The three unmasked bandits who held up the Bank of Howe last Friday afternoon, and locked two of the institution's officials in the vault and secured cash and Liberty Bonds estimated at between $7,000 and $10,000, were quickly apprehended because of the quick wit of Miss Emma Reimers, telephone operator at the Howe exchange. The exchange is just across the street from the bank, and when Miss Reimers saw the men enter the bank and draw the shades, her suspicions were aroused by this action, and she tried to call the bank. When she received no answer, she called various citizens, who hurried to the bank just as the bandits left, and fired a volley of shots at the robbers.

Later, officials at Atchison, Kan., were notified of the robbery, and a posse of five deputy sheriffs and four police officers took the trail after the bandits had crossed the Missouri river bridge at Atchison. They detoured and met the bandits seven miles southeast of Atchison on the Missouri side of the river. A gun battle ensued in which two of the robbers were mortally wounded, the third escaped and two officers were wounded, one severely. The loot was recovered.

Plenty Sugar Profiteering.

New York.—Herbert Hoover, testyfying here before the joint executive committee investigating profiteering, declared sugar now would be retailing for 12 to 13 cents a pound, had the sugar equalization board been authorized to purchase the Cuban raw sugar supply at 6½ cents.

Mr. Hoover declared there was no question that the amount of speculation and profiteering had been considerable. He declared that the remedy lay in the reduction of credits and inflation, pending a stimulus to production and reduced consumption, or vigorous regulation and intervention of the government in commerce of the war-time variety.

Tornado in Minnesota.

Minneapolis, Minn.—Tornadoes in southeastern Minnesota destroyed towns and caused the death of the 11-week-old daughter of Mr. and Mrs. Godfrey Swanson of Red Wing. Eight persons were reported injured.

The storm struck near Northfield, splintering into five violent gusts, each leaving destruction in its wake.

Castle Rock and Prairieville are reported to have been badly damaged.

Fuel for 7,000 Years.

Chicago, Ill.—The United States is in no danger of exhausting its coal supplies in the near future, for about 7,000 years' supply is available, S. M. Darling of the bureau of mines told the twelfth annual convention of the International Railway Fuel association.

Thirty-Two Hurt in Wreck.

Albuerque, N. M.—Santa Fe passenger train No. 808 was wrecked at La Joya, fifty-two miles south of here, resulting in the death of the engineer and fireman and the injury to thirty passengers. Soft tracks caused the accident.

Presbyterians Stand By Movement

Philadelphia, Pa.—The general assembly of the Presbyterian church in the United States, in session here, voted down a proposal of the executive commission to withdraw support of the Interchurch World Movement.

No Cause for Alarm.

St. Louis, Mo.—There is no cause for financial alarm in the present nation-wide price slashing movement, according to a statement by Richard S. Hawes of this city, president of the American Bankers' association. He referred to persons who professed to foresee hard times as "calamity howlers." Although bankers are discouraging non-essential investments and wild speculation, Mr. Hawes asserted no bank would refuse credit to carry on essential production.

Hit Price Peak, Dealers Think

Refusal of Public to Meet Further Advances Credited With Turning Scale.

DEPARTMENT STORES LEAD

Clothing Stock Surplus, Especially In Women's Wear, Likely to Bring Reductions—Silk Reductions Are to Be Permanent.

New York.—The substantial reductions that have been made recently in the prices of all commodities by department and other stores throughout the country have led the buying public to wonder whether or not these reductions are the forerunners of continued reduction in the high prices that have prevailed since America entered the war. In an effort to ascertain the cause and probable extent of the downward movement, the New York Times has made inquiries among representative merchants in the wholesale and retail lines as well as among financial leaders. Their replies seem to agree that a permanent reduction movement has begun.

In the minds of many, however, there is still much doubt as to the meaning of the reductions that have been announced and made by the department stores and other commercial houses. Even those who are not yet ready to say that a general fall in prices is to be expected are unwilling to predict that present levels will be maintained. A majority of wholesale and retail dealers admit that prices are too high and that a reaction must come before the public will begin free buying.

Surplus of Clothing.

One phase of the reductions made by department stores has been the effort of middlemen to discover how the plan is worked. Dozens of wholesale and retail dealers confessed that they or their agents had made purchases at department stores for comparison with their own prices and qualities.

The representative of a big London department store said he had bought from a department store certain articles much cheaper than prices quoted by manufacturers.

In the wholesale clothing trade it is generally admitted that there is a surplus of goods. By some this surplus is said to be due to unseasonable weather, and by others it is admitted that the public has refused to pay existing prices. A number of representatives of this group said reductions must be made all along the line, from the manufacturers to the retailer. With overstocks already on hand, clothing dealers are said to be canceling orders, while the mills are eager for business and willing to offer price concessions. It is now predicted that fewer sales will be made during the coming season, if the reports of early fall orders, booked by the clothiers, may be taken as a fair indication, but what is lost in volume, the clothing trade hopes, will be made up in a concentration on higher class garments.

In the silk market it is no secret that price reductions which have been made are to be permanent. Huge stocks of raw silks are held in this country by Japanese interests and must be released following the break in the Japanese market, at substantially lower prices than were prevailing during midwinter when top prices were realized for raw materials. Members of this trade do not hesitate to say that prices have been too high, and that the time has come for a readjustment on an entirely new basis.

A disposition to await developments has marked the cotton goods market. There has been only gradual easing off in the prices of printcloths and sheetings which have a wide variety of uses when finished. In the prices of sateens and other fabrics used by the clothing trades the reductions have been more marked.

Belief is expressed in the financial district that commodity prices will continue downward because it is believed that wholesale prices reached their peak in February, and that within a few weeks the reaction will take a stronger hold of the retail markets.

City Doubled Taxes on Profiteering Landlord

A 100 per cent increase in the assessed valuation of his property was the penalty imposed by the Detroit city council on Jacob Shevitz, owner of a nine-family apartment house, who was accused of increasing their rents from $42 to $90 per month.

High Cost of Friendship.

Grafton, W. Va.—With red liquor selling for $28 a quart and "moonshine" for $16, Frank Reed has been fined $100 for giving away a quart of the booze, and must also serve two months in jail because he bestowed his gift an a friend in a public place.

Not Like Mother Used to Make.

Fulton, Ky.—Forty-five pure bred Rhode Island chickens, two fox hounds, and the only family tom cat were found dead at the home of C. H. Gilham as the result of eating biscuits cooked for the Gilham family the day before.

An Intelligent Watch.

Franklin, Ind.—Four years after Rev. William Mullendore lost a gold watch, it was plowed up on his farm by his son-in-law. The watch was in excellent condition and its hands pointed to the correct time of day, though it wasn't running when found.

A life-saving buoy invented in Europe is hammock-shaped and large enough for a man to lie in and propel himself through water with a paddle.

Tells of Fight With Cannibals

Rice Party Has Encounter With Giant White Savages in South America.

NOT AFRAID OF FIREARMS

Professor Rice Says That in All His Experience in Tropical Jungles He Never Saw Such Ferocious Looking Savages.

New York.—The exploring party headed by Dr. Alexander Hamilton Rice, which clashed last February near the banks of the Orinoco with giant cannibals, returned here from Para.

With Doctor Rice came Mrs. Rice, formerly Mrs. George D. Widener of Philadelphia, who accompanied her husband on some of his South American explorations; Chester H. Ober, geographer of the expedition; A. W. Swanson, J. E. Mason and Dr. G. E. Byers.

It was while exploring an unnamed tributary of the Orinoco river that the party was attacked. The discharge of firearms failed to scare off the savages, who were described as large and fierce, and the explorers only escaped by firing into them, killing either two or three. The party then turned back.

Not Previously Seen Since 1763.

"The cannibals were almost white in color," Professor White said. "In all my years in the tropical jungles I have never seen such ferocious looking savages. Nearly all were armed with bows and arrows and carried spears and blowguns. They were more than six feet tall and I recognized them as cannibals of the Guaribos tribe, a mountain legion considered the most ferocious of all the savages in either Venezuela, Colombia, or Brazil."

The professor declared he believed it was the first time these cannibals were met by white men since 1763, when a Spanish expedition discovered them.

Record Trip for White Woman.

Mrs. Rice was not with her husband on the occasion of the attack on the party. However, she traveled with the party as far as Esmeralda, Brazil, penetrating further into the Amazon wilderness than any other white woman, according to the explorer.

The Rio Negro and other outlets of the Amazon were explored and charted, as well as the Casquiare canal and the Upper Orinoco, Doctor Rice said. A number of specimens were brought back for the Peabody museum at Harvard.

BIDDIE GROWS SPURS

Chicago Surgeon Produces He-Hen With Knife.

Transplanted Glands Cause Hen to Develop All Characteristics of Chanticleer.

Chicago.—The experiments of Dr. Victor D. Lespinasse of the Northwestern university in tinkering with the sex of the common hen and his demonstrations before medical experts have aroused the interest of chicken growers.

"It was a simple enough operation," explained Doctor Lespinasse; "just the transplanting of the interstitial glands of a rooster to a hen. But the result was surprising and perhaps no one was more surprised than the hen herself. Within a few weeks she began to develop all the characteristics of a chanticleer.

"She grew a comb and wattles. Saddle feathers appeared next and finally a pair of spurs. She took to strutting pompously about the barnyard, lording it over the other fowls.

"Instead of cackling, our near-rooster would essay a feeble kee-a-kee. A full-sized he-crow is about the only thing that's lacking to complete her—or, I might say, his—roosterhood."

The he-hen is now on a farm in the suburbs of Chicago.

In further experiments with animals, Doctor Lespinasse succeeded recently in producing "Siamese Twin" dogs. These didn't live long, but were perfect specimens.

Gave His Reverence Long Ride.

Lebanon, Ky.—After riding a mile on the pilot of the engine which had smashed his automobile, Rev. Father W. J. Rowlett told the engineer that he thought he never would bring his train to a stop. Father Rowlett was not even scratched.

Wants Cat Wet Nurses To Nurse Baby Foxes

New York.—A call for mother cats to nurse silver foxes was received in New York from an upstate fox farm owner.

H. M. Bacon, president of the New York Fur Auction Sales corporation, to whom the appeal for cats was sent, said the fox farmer was willing to take all the cats he could get. A mother cat can earn $2.50 for six weeks' endeavor, he said. At end of six weeks, a litter of baby foxes becomes sufficiently mature to take solid food.

Negro Girl Rich.

Muskogee, Okla.—The richest negro girl in the United States is Sarah Rector, eighteen, who lives near Muskogee, Okla. Through oil found on the supposedly worthless land she owned she is now worth a million and a half.

Home Town Helps

BEAUTIFY THE FARM YARD

No Reason Why Grounds Surrounding House Should Not Be Made and Kept Attractive.

(Prepared by the United States Department of Agriculture.)

For over a decade the home demonstration agents in the South have been teaching farm women easier and better methods of doing their housework, caring for their families, and conducting home industries. During the past years, they have been teaching, in addition, the beautifying of the farm yard.

The country woman, like every other normal woman, is hungry for beauty, but in the past she has had less of it in her life than her city sister. Too many farm homes inside and out are

In Need of Beautification.

unattractive, yet beauty in a country yard costs little except effort, for the finest effects can be obtained by the use of native trees, shrubs and vines. A demand for information on the beautifying of the home by the Southern women in the rural districts is the reason that it has been taken up definitely as a part of the extension work in the South. The response and results in every state have been more than were looked for.

In Donley county, Texas, an impromptu meeting of this kind recently brought out 38 country women, all intensely anxious to learn what the home demonstration agent could teach them about making the surroundings of their homes more attractive.

The demonstration was given at the home of one of the women who had recently built a new house and who wanted to have the setting for it right.

After Proper Treatment.

The importance of planting and arranging perennial vines as a background on the porches and fences was one point stressed by the extension worker. Instruction was also given in arranging shrubbery so the low-growing kind would be in front of the taller. Where flowering plants were to be used the necessity of planting colors which would harmonize well was emphasized. In fact, an intensive course in landscape gardening on a small scale was given to the women.

Plant Nut Trees.

Suppose that we were to supplant willows and poplars along the roadside with trees which would give us bushels of product worth many dollars per bushel when the leaves were swept up in the fall. It is no more difficult to set out a black walnut than it is to set out a willow or poplar. The first cost is no greater if we set out seedling trees, although, if particularly good kinds of grafted black walnut are set out, the first cost is something more—yet negligible in view of the return. Investment in a nut tree differs from an investment in an industrial enterprise, for the reason that the plant of the industrial enterprise is decreasing in value from wear and tear the moment after it is completed. A nut tree, on the other hand, is increasing in value from the moment it is set out.

Town Planning.

During the war the housing developments undertaken by the government in the United States, as in England, were very frequently based upon a complete physical plan. This was possible because many of the communities were created in places where no previous community had existed. The field was a virgin one, and the opportunity was not lost. This aspect of the work was always referred to as town planning, the name adopted and used in England. Thus, at the present time in the United States one is apt to find both names used, and it is perhaps well to remember that generally they mean the same thing; but it is also true that their meaning is as yet very far from having acquired a concrete definition.

I think we can leave her out of it," ntured Gorman.

That leaves only Wick."

Gorman shook his head positively.

No, Wick didn't do it. He's a bad e all right, and he has done time, t he's only a tool."

Wick has done time!" I exclaimed. How did you find that out? What ve you learned about him?"

Gorman grinned at my eager ques- oning.

I don't know much about him yet, t I'm sure he's an ex-con. While u were in court this morning," he xplained, "I went up to the Grand- eck to take a look at things for my- lf. Wick showed me through the utan apartment, thinking I was from he coroner's office. I spotted him at nce. A crook that has done time always sure to give himself away."

"How?" I asked.

"Well," said Gorman judicially, men's businesses leave their marks n them. A clergyman don't have to e wearing a high vest for you to spot im, and nobody ever took a dancing eacher for a pugilist. A man that has ooked at as many crooks as I have nows them by instinct, and then here's little ways you can tell. As I was going up to the apartment with Wick he just naturally fell into step with me, showing he had been used to marching with other prisoners. He talks, too, without moving his lips. That's a sure sign. They learn that in prison so they can talk without the guards knowing it."

"That's so," I cried. "It struck me that there was something funny about the way Wick talked, but I couldn't have told just what it was."

"Wick's a crook, all right, "but I think he comes from somewhere up- state or maybe out West, but he hasn't intelligence enough to be any- thing more than a runner for the gang."

"Well, what's your theory?" I asked. "If Wick didn't murder Miss Lutan, who did?"

"I don't know yet. Wick ain't big enough. Big jobs take big men to plan them. This whole thing is a big affair, carefully planned out. It takes more brains than Wick ever dreamed of having to plant anony- mous notes and terrify people nearly out of their senses with mysterious whispers and then to steal the Brad- ford papers and the Gaston pearls and then when things get hot to have you already framed as the goat to blame things on."

"Then you think my discharge from the office was part of the plot?"

"Sure it was. You butted in on their blackmail plans, and they want- ed to get square with you, and a young fellow out of work and discharged in disgrace is always an easy mark for suspicion."

"And was it part of the plot to blame Miss Lutan's murder on me?"

"I don't think so. The Lutan mur- der was an accident. Even the big- gest crooks seldom deliberately plan murder. They're all afraid of the chair. She came in and surprised some one of the gang in the apart- ment. He had to shoot her to make his getaway. It was quick thinking on somebody's part after the murder to plant that gun in your rooms. That sort of scheming takes brains, and Wick hasn't got them."

"Who was it, then?"

"We've got to find," said Gorman, speaking slowly and with emphasis, "the big crook that is back of all this —the master-mind."

"The master-mind," I echoed.

"Yes," he said, "there's a big crook ed brain somewhere that has been di- recting the whole plot, and planning the actions of Wick and of the tele- phone girl, and maybe of Claire Brad- ford, too."

"I wonder if it could be her ex-hus- band. She told me, though, a few moments ago, that she had not heard of him for years, and she seemed to me to be telling the truth."

"I don't think it was him," said Gorman. "He was only a chauffeur. If he's in it at all, he's only one of the gang. He's not the master-mind."

"I hope we can keep the Bradfords out of it altogether," I said. "You see, Gorman—"

"I understand," he interrupted. "I know how the land lies. You need not worry about that. If Claire Brad- ford had any part in the plot, you can bet she was forced into it and driven to do what she did. Have you seen her sister?"

"No, and I hope she'll make no ef- fort to see me. She mustn't. You'll see her, won't you?"

"Leave it to me," said the detective. "I'll manage to reach her without even her own family knowing any- thing about it. I'll make her under- stand that if she tries to see you or says anything, she'll only be damag- ing your case. Don't worry about her."

"There's one thing, though," I said, "that I wish you could do."

"What's that?"

"Can you find some way of getting to the Gaston apartment and explor- ing that secret passage and see where it leads?"

He turned savagely on me.

"Say, young fellow," he said, "if I didn't know that you were innocent, I'd swear that you were a dope fiend with this tale of a secret passage.

"We've Got to Find the Crook That Is Back of All This—the Master Mind."

You've been reading too many thrill- ers or going to the movies too much. They don't have secret passages in modern apartment houses. You bet- ter keep quiet about that. You can't get anybody to believe you, and you'll only hurt your case."

"But I know there's a passageway there—along the hall. I found the opening, a panel in my bedroom. There's a place there big enough for a man to walk in. I saw it."

He looked at me pityingly, and I could see that he did not believe a word I was saying.

"All right, there's a passage there and we'll leave it there. A young fel- low in love is apt to imagine all sorts of things."

I saw there was no use in my insist- ing further about the passageway. His mind was stubbornly made up that it could not exist. He was the only friend I had in all the great city, and I must leave it to him to work the thing out in his own way.

"What about a lawyer?" I asked.

"Didn't the court assign you one?"

"Yes, but he took it for granted that I was guilty, so I got rid of him."

"Well, there ain't much a lawyer could do yet. I'll dig up one when we need him. Bail is not possible in a murder case, so there is nothing for you to do but to sit tight and take it as easy as you can. By the way, have you heard anything from old Gaston since you were arrested?"

"Not a word," I answered. "I have not the least idea where he is or how to reach him."

"Humph, that's funny," said Gor- man abstractedly. "Good-by, I'll see you again tomorrow."

He pounded on the cell door, and a guard released him, leaving me alone to ponder over my plight, and espe- cially over his last question. What had he meant by it?

Where was old Rufus Gaston?

Once more suspicion of my aged relative shot through my brain. Was it possible that his was the master mind behind all this plotting? Gor- man had insisted that the arch crim- inal behind Wick and the others must be some man of intellect. My great- uncle Rufus had brains. Out of a clear sky he had summoned me to live in the Granddeck and then had mys- teriously disappeared. Certainly he had had opportunities for knowing Wick and the telephone girl. Bar- bara had recalled once having heard her father speak of him in disparag- ing terms. Had it been he who was plotting against the Bradfords and had brought me into the case as a scapegoat?

Was old Rufus Gaston the master mind? Where was he?

CHAPTER XI.

Fortunately for me, there had re- cently been a wave of public criticism of the courts for the long delays in bringing criminal cases to trial, and the district attorney was moving with all celerity to bring my case to a con- clusion. An indictment against me for the murder of Daisy Lutan had been quickly found and the date had been already set for the trial—one week hence—so that the period of my incarceration and doubt as to my ulti- mate fate seemed likely to be very brief.

Utterly absurd as the situation was, accused of murdering a woman whom I never had seen and hardly had heard of until I saw her lying dead in her apartments, conscious as I was of my entire innocence in the matter, still, as in the solitude of my cell I reviewed the case, I found myself fac- ing the ordeal of a trial for murder with considerable apprehension.

Circumstances certainly looked much against me. There was abso- lutely no way in which I could refute the testimony of the two detectives that they had found the revolver with one chamber discharged in the drawer of my dresser. I myself had seen them find it. While Gorman still held that there was a possibility that they themselves had put it there, I knew that neither of them had been near the dresser after I had admitted them to my rooms. The only person whom I had the slightest ground for sus- pecting was Claire Bradford, yet what motive could she have had?

Wick undoubtedly would testify that he had met me at the door of the Lutan apartment directly after he had heard the shot. He might say that I appeared to be greatly excited. This would be the exact truth. There was even the possibility that he might swear that he had found me coming out of Miss Lutan's apartment. Even if he did not make the statement di- rect, shrewd questioning on the part of the district attorney could easily make it appear that I had just left the Lutan apartment. How could we possibly controvert his testimony?

Then, in addition, there were the damaging statements that would be offered by Nellie Kelly. She would swear that the evening before I had taken her out to dinner and had been questioning her about the other ten- ants in the house. Even though we knew that she was a tool of Wick and was the wife of Lefty Moore, the bur- glar, unless Gorman was able to dis- cover that she herself had a criminal record, it seemed utterly hopeless to attempt to confute her statements.

It would also militate against me that at the time of the murder I was out of a job and almost without funds. They were likely, too, to bring out the fact that I had been discreditably discharged from the only position I had held in New York. The only man who knew anything about the matter, Mr. Wood, the head of the firm, had been suddenly called to France in con- nection with an order for munitions, and was not expected to return for several months. The fact would weigh against me, too, that I would be unable to offer the testimony of any character witnesses. Birge and Roller, my classmates with whom I had roomed ever since I had come to New York, were "somewhere in France" with the American troops and could not possibly aid me.

All of this was pointed out to me by John McGregor, a young attorney whom Gorman had employed for me. While Gorman and I had, I think, suc- ceeded in convincing him of my inno- cence, the fact that he was continu- ally citing the difficulties in the way of our proving it made me realize that he was very dubious as to the outcome.

The trouble was that we were abso- lutely without witnesses. Old Rufus Gaston's whereabouts still remained a mystery. If we could discover him in time, we could at least explain sat- isfactorily my presence in the Grand- deck and could establish that I was not the homeless, penniless vagrant they would try to prove me. The longer old Rufus remained in hiding, the stronger became my suspicion that he might be in some way involved in the plot. His action in keeping his address a secret from me seemed to have been with deliberate intent.

After some discussion Gorman and I had agreed not to mention either of the Bradford girls.

"If one word about either of them slips out in court," said Gorman, "they'll be in for it. The papers will jump to it and print their pictures and all that. We'd better leave them out of it."

With this I heartily concurred. I was determined that Barbara Brad- ford must be in no way involved, come what may. I knew that she her- self would be apt to be restrained from attempting to communicate with me by the fact that her sister's mar- riage was set for the day after to- morrow. Her loyalty to her family was such that she would not risk scan- dal by trying to aid me, at least not until her sister was married and the future for Claire and her mother as- sured.

Two small rays of sunshine light- ened the gloom of my cell—the fact that the newspaper mention of the

Each Time I Read Anew the Penciled Lines My Heart Rejoiced.

tragedy seemed thus far to have es- caped my mother's notice and the fact that Barbara still believed in my innocence and trusted me absolutely. A day or two after my arrest Gorman had managed to see her and had told her that it was my wish that she keep entirely quiet her knowledge of the affair and that she should make no attempt whatever to communicate with me while I was in prison. He had brought back with him a hastily penciled note which often in my cell I read and re-read:

"Dear Mr. Nelson:

"I'm so sorry to hear of your trou- ble and the absurd charges against you. I'll do whatever you wish, of course. I trust you absolutely. If anything I can tell will aid you at any time, I am ready to speak—cost what it may. I know you are innocent and must soon be freed. Hoping to see you,

"With all confidence,

"B. B."

Each time I read anew the penciled lines, my heart rejoiced. Come what may, I felt sure that Barbara's heart was mine. I joyed to know that come out of prison to her though I might, she would be glad to see me. Joyful- ly would I have gone to the electric chair rather than have her fair name in the least smirched by scandal in trying to defend me. She alone could prove an alibi for me, but no one must ever know it.

What would a scandal-loving world say if the fact became public that she had been alone with me in my apartment near midnight? If only by the sacrifice of her good name could I go free, then let me stay in my cell. Let me even go to the electric chair. I would not have my life at the loss of my beloved's reputation.

One other thing I had kept from my lawyer—my discovery of the passage- way between the walls in my great- uncle's apartment. If I could not get Gorman to believe in this secret pass- age, which I was convinced had some connection with the mysteries and the whisperings at the Granddeck, there was little likelihood that McGregor would believe my tale either. Given one single hour in my quarters at the Granddeck and I would have discov- ered whither it led and who used it, but once a man is charged with mur- der, his hands are tied. It was fu- tile for me to mention it again, even to the detective or to my lawyer, until such time as I could show it to them and convince them that I knew what I was talking about.

(TO BE CONTINUED.)

Where He Was Weak.

The other day, my little cousin brought home his report card marked A plus for everything except deport- ment. His father said: "Why, John, how does this happen?" John's reply was: "Well, but daddy, that's my hardest study."—Exchange.

Do You "Hate" Yourself?

For I say, through the grace given unto me, to every man that is among you, not to think of himself more high- ly than he ought to think."—Paul in his letter to the Romans, 12:3.

DAIRY

MAKE WAR ON TUBERCULOSIS

More General Use of Intradermic Test Is Expected to Speed Up Cam- paign Against "TB."

Recognition of the intradermic meth- od of applying the first test prepara- tory to accrediting a herd as free from tuberculosis, has been announced by the bureau of animal industry, Uni- ted States department of agriculture. The more general use of the intrader- mic test is expected to "speed up" the federal and state co-operative cam- paign against TB. In the subcutaneous method, heretofore generally used, the tuberculin is inserted beneath the skin and it is necessary to take three pre- liminary records of the animal and at least seven soon after the test. In the intradermic method insertion is made between the layers of the skin and, while this requires a greater de- gree of skill in the operator, only one later inspection of the animal may be sufficient to indicate the presence or absence of the disease.

The federal recognition of the intra- dermic method provides, however, that herds undergoing it successfully must pass a subcutaneous test within a year before they can be accredited as free

Intradermic Test Has Been Recognized by About Three-Fourths of 45 States of Union.

from tuberculosis. The intradermic test has been recognized also by about three-fourths of the 45 states now co- operating with the federal government in the TB work.

Texas recently became the forty- fifth state engaged in the co-operative campaign. The three states not yet engaged in it are Arizona, Colorado and California. Arizona and Colorado are expected to receive authority to enter the work at the next session of their legislatures.

MILK DIET IS INSUFFICIENT

Calves Cannot Properly Digest and Utilize Milk Unless Accompanied by Roughage.

Recent research work done by the Iowa agricultural experiment station shows whole milk to be a good diet for young calves up to three months old. After this age the two calves experimented on developed symptoms of scant nourishment and went down hill until death finally came at the ages of 176 and 208 days. Failure of the milk as a permanent diet for the ru- minating animals is shown not to be due to quality or improper quantity of the nutrients, but probably to the inability of the animals to properly digest and utilize the milk unless ac- companied by some kind of roughage. Disarrangement of the digestive sys- tem probably follows the abnormal symptoms noted in the experiment.

NECESSARY FEEDS FOR BULL

Aim to Keep Herd Sire From Getting Too Fat—Give Him Access to Field or Paddock.

"Keep the bull thrifty but not fat," is the advice of K. C. Ikeler of the animal husbandry department at Iowa state college. Give him plenty of good nutritious feed. Clover or alfalfa hay with some corn, oats and a little oil- meal are best for keeping him in good breeding condition. Silage makes a very good foundation for the ration but must not be fed in large amounts as it makes the bull potbellied and sluggish.

To keep the herd sire from getting too fat give him access to a small field or paddock where he can get the nec- essary exercise.

DAIRY NOTES

Test out the cows.

* * *

Do your dairy dehorning early.

* * *

Cows cannot produce the best qual- ity of milk from polluted drinking water.

* * *

It is important that the calf pens be placed to avoid too great varia- tions in temperature.

* * *

Good dairy cows will give profitable returns for an additional grain ration, even at present prices of feed.

* * *

Soybean hay makes a good feed for milk cows, and if well cured would not require any other roughage fed with it.

* * *

Good cows and a good separator will make profitable dairying. The cows it intelligently fed, will produce the butterfat and the separator will save it.

PAINS NEARLY DOUBLED ME UP

Nothing Helped Me Until I Took Lydia E. Pinkham's Vegetable Compound.

Wyandotte, Mich.—"For the last four years I have doctored off and on without help. I have had pains every month so bad that I would nearly double up. Some- times I could not sweep a room with- out stopping to rest, and everything I ate upset my stomach. Three years ago I lost a child and suffered so badly that I was out of my head at times. My bowels did not move for days and I could not eat without suffering. The doctor could not help me and one day I told my husband that I could not stand the pain any longer and sent him to the drug-store to get me a bottle of Lydia E. Pink- ham's Vegetable Compound and threw the doctor's medicine away. After taking three bottles of Vegetable Com- pound and using two bottles of Lydia E. Pinkham's Sanative Wash I could do my own housework. If it had not been for your medicine I don't know where I would be today and I am never without a bottle of it in the house. You may publish this if you like that it may help some other woman."—Mrs. MARY STENDER, 120 Orange St., Wyandotte, Mich.

"A potato supper will be held Sat- urday evening."

"Subject for Sunday morning: 'A Night of Agony.'"—Boston Tran- script.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the as- tonishing statement that one reason why so many applicants for insurance are re- jected is because kidney trouble is so common to the American people, and the large majority of those whose applica- tions are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Local News!

Henry Griffen and family of Goodell spent Sunday in Klemme.

Notice—Beter get your dog license for they are past due. Clerk. 1-w.

Ray Nelson of Garner, was a Klemmeme visitor Saturday evening.

Mr. D. Ross of Garner was seen on the streets of Klemme Saturday.

Rev. and Mrs. Koerner returned from their visit at Des Moines Friday.

G. A. Goll went to Garner on business Tuesday afternoon between trains.

Mrs. Ortmeyer and son came from Forest City Tuesday for a visit at the Wellemeyer home.

Miss Lula Wilkins was up from Goodell Monday shopping with Klemme merchants.

Norva Carr, a niece of Ray White, came Monday evening for a short visit at the White home.

Mr. and Mrs. John Gruetzmacher spent Monday at Garner. That town celebrated Memorial Day on Monday.

A fine baby girl arrived at the home of Mr. and Mrs. A. Wellemeyer Tuesday morning.

George Musfelt and a lady friend from Clarion, spent Decoration Day in Klemme.

Attorney W. H. Ramsay of Garner was in Klemme last Thursday on legal business.

The Misses Hallie Kitz and Faye Letch of Goodell, were Klemme callers Thursday.

Mr. and Mrs. C. L. Smith were here from Belmond Thursday visiting Klemme friends.

Mr. and Mrs. Sam Hurley from Britt, were Klemme visitors Thursday.

Mrs. E. P. Hubbard and Mrs. Mat Avery were Klemme shoppers last Wednesday evening.

Mrs. Joe Lawhorn from Garner, was here last Thursday calling on friends.

Mr. and Mrs. A. D. White and Mamie were up from Goodell last Thursday afternoon.

Mr. and Mrs. Gottleib Lauster from Meservey, were Klemme visitors on Friday.

Mr. and Mrs. Marlin Croner and Mrs. Schroeder autoed to Clear Lake Sunday afternoon.

Mildred Smith returned Thursday from a couple of weeks spent at Clear Lake visiting friends.

Miss Lera Wilson came from Titonka Tuesday for a visit with Miss Leafy Wilson before going to Missouri to spend the summer.

Miss Martha Lenz came from Charles City yesterday for a month's visit at the home of her sister, Mrs. A. H. Meyer.

Mr. and Mrs. Henry Lewis and Mr. and Mrs. Lew Lewis drove to Clear Lake Monday evening in "Heinie's" car.

The Misses Geraldine and Caroline Smid left Saturday evening for Illinois, where they will visit with relatives and friends for the summer.

Mr. and Mrs. Joe Wenck and Mrs. Ed Wenck drove over from Garner Saturday evening for a visit with Klemme friends.

Miss Lola Smith returned from Des Moines last Wednesday afternoon, where she has been for a couple of months visiting relatives and friends.

Mr. Kilnenberger and daughter, Mrs. Embrink from Goodell were Klemme visitors Thursday afternoon between trains.

Mr. and Mrs. Hod Lawhorn and daughter, Loretta, were down from Garner Thursday for a visit with Klemme friends.

Klemme and vicinity was visited by a fine rain Monday night and Tuesday morning which was great dope for the corn and other crops.

The sad news was received by Klemme relatives telling of the death of little Robert Suckow Hunting, an only grandson of Rev. W. J. Suckow. Robert was almost seven years old when he died at Denver, Colo.

A couple of men from Sioux City were here the first of the week making the survey for the proposed sewer system in Klemme.

Mrs. R. B. Erwin and children left last Thusday evening for Illinois, where she was called by the death of a brother.

Rev. and Mrs. Ortmeyer from Forest City, were visitors at the Henry Greiwe home last Thursday and Friday.

Mrs. Clara Kirkwood left Saturday evening for Mason City where she will visit for some time with her sister.

Mr. and Mrs. Chris Jacobs and Mrs. Jacobs' mother autoed over from Garner last Friday evening for a visit with friends.

Mr. and Mrs. B. S. Hartbeck from Colesburg, Iowa, were here to attend the funeral of Elmer Hartbeck. Mrs. Tony Hartbeck from the same place accompanied them to Klemme.

A number of the surrounding towns celebrated Memorial Day on Monday. Klemme observed the holiday on Sunday as Memorial came on Sunday this year.

C. C. Tessier of Garner, was here Friday wiring up Reuber & Zinn's new office so that they can install their new electrical machines as soon as the building is completed.

Band Concerts will be given in Klemme every Wednesday evening at eight o'clock, weather permitting. The concerts will be a little shorter than usual this year as the band is composed of all beginners and they are unable to put on a full concert this season. Come early as the concerts start promptly at eight o'clock.

Mr. and Mrs. T. F. Mitchell of Swea City, were here to spend Memorial Day, and also to visit with relatives and friends. They came over from Clear Lake with Mr. and Mrs. C. F. Keraus where they also made a short visit.

A number of young people from here and vicinity went to Garner on Monday evening to attend the Decoration Day dance which was given at the opera house.

Will Schaper, of Charles City, has been quite seriously ill with blood poisoning, but at this time is on the road to recovery. He is a brother of G. I. Schaper.

It was reported to us that Art Upmeyer's barn was struck by lightning Tuesday night and burned to the ground. Upmeyer lives northwest of Klemme several miles. We did not learn if he lost any stock in the fire.

Rev. and Mrs. Frank McKeegan left Monday for Chicago where they will rest up a week following their three weeks' work in Klemme. They will begin an evangelistic campaign at Hayfield next Sunday.

LAND SALE

We will sell on public auction the following land: The North ½ of the Northeast ¼ Section, No. 3, in Twin Lake Township, Hancock County, Iowa; tract of land 73 acres. This land will be sold to the highest responsible bidder. $2,000.00 cash when sale is made, balance to be paid in 60 days thereafter. Sale will take place on farm 2 miles west and 1 mile south of Klemme, Iowa, June 16th, 1920, at 2 p. m.

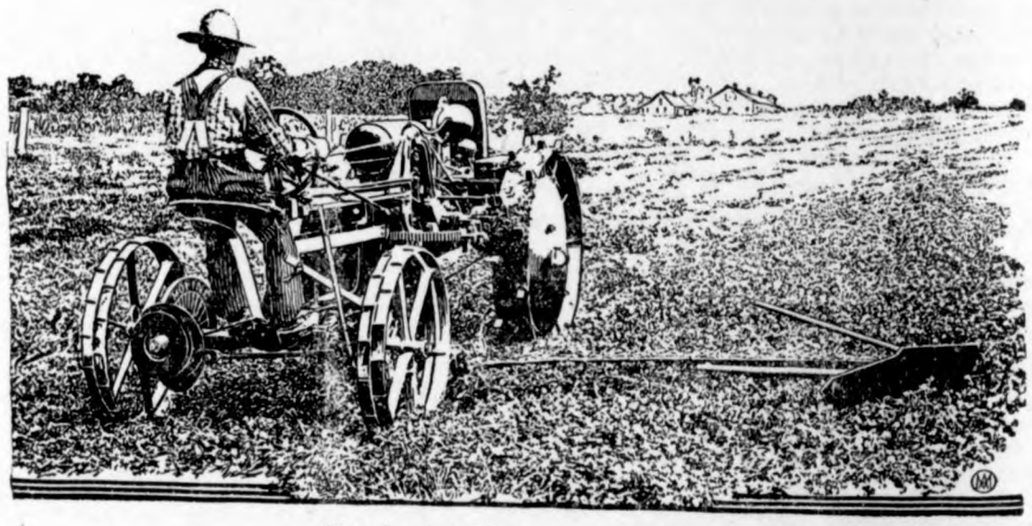
The Times "Devil" Says

The MOLINE Tractor is Universal



Work of 3 Teams and 3 Men

One man with one tractor does all field work from plowing to harvest

Hay harvest is near.

The top speed, short of help, hot sweaty days are near at hand, when the hay crop must be cut and cured.

Are you ready?

You are not completely ready without a Moline Universal Tractor and a Moline Mower No. 4, 6 to 10-foot cut, attached to this tractor, because:—

1. *With this equipment, you can cut 25 to 30 acres per day.*
2. *You require but one operator for Tractor and Mower.*
3. *You can work all day and as late at night as is necessary.*
4. *You can work steadily with no stops.*

Here is what one man and a Moline-Universal Tractor can do in a ten-hour day:—

Plow 7 to 9 acres
Disc 27 acres with a 7' Tandem Disc Harrow
Disc 38 acres with a 10' Disc Harrow
Harrow 76 acres with a 20' Peg Tooth Harrow
Cultivate from 13 to 20 acres with a two-row Cultivator
Drill 35 acres with a 10' Grain Drill
Harvest 40 acres with a 10' Grain Binder
Harvest 10 acres with a Corn Binder
Mow 25 acres with a 8' Mower
Rake 40 acres with a 12' Rake

Immediate deliveries—a satisfactory stock of repair parts always carried; real service guaranteed.

A demonstration on your own farm cheerfully arranged.

If desired you can use the "drag behind" or horse drawn implements you now have with the Moline-Universal the same as with other types of tractors.

PESTS THREATEN GARDEN SUCCESS

Specialists Advise Use of All Preventive Measures Possible as Best Plan.

HAVE SOIL DEEPLY PLOWED

Rotation of Crops Has Been Found by Many Farmers to Be Excellent Means of Controlling Disease and Harmful Insects.

(Prepared by the United States Department of Agriculture.)

From the time the seeds are planted until the crop is harvested a series of insect enemies and diseases may appear that, unless they are controlled, will destroy much of the value of the garden. Garden and truck crop specialists of the United States department of agriculture have worked out a great many specific means for destroying insects or holding them in check. They point out the fact, however, that preventive measures are best.

It is important to have the soil deeply plowed or spaded and made loose and light with plenty of well-rotted manure or compost and to keep the ground cultivated so that the surface will not become hard or weedy. Use the best seed to be had and sow it liberally to get a good stand, but thin out the plants, as overcrowded plants are in much greater danger of becoming diseased than those that receive plenty of air and sunshine.

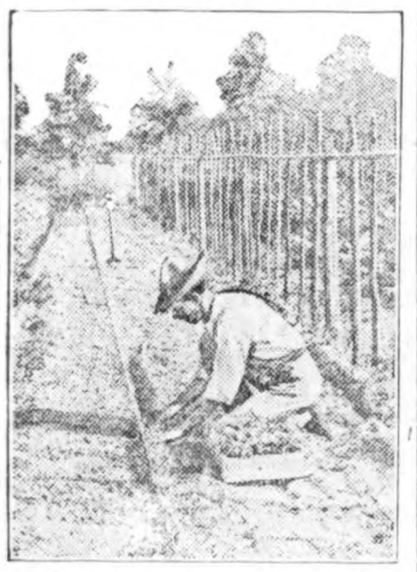
Rotate Crops If Possible.

Farmers have found that by rotating their crops they reduce the injury from plant diseases and insects and also increase the fertility of the soil. This principle applies to the home garden, where, if possible, it will be better to make a new plan each year, placing each vegetable where some other grew the year before—peas on the old tomato ground, beets and carrots after the corn, etc. The details of this rotation must vary in each case according to the climate, soil, and vegetables grown and the diseases and insects to be guarded against.

Avoid introducing insects and diseases on plants obtained for setting out. Practice clean cultivation. Employ fertilizers to stimulate plant growth. Work on the principle that a vigorous growing garden will produce a crop in spite of injurious insects and diseases.

Become familiar with the insects and diseases known to occur in your district on the crops you are growing. Equip yourself in advance with all necessary remedies and the means of applying them. Remember that the timely application of a remedy acts as an insurance against loss.

Watch constantly for the first appearance of a disease or insect. Inspect the garden at least every other day. Determine what is causing injury and apply the proper treatment



A Garden Properly Prepared and Cared For Has Less to Fear From Insect Pests.

promptly. Use combination treatments as often as necessary, keeping in mind the influence of weather conditions as well as the life history of the insect or fungus causing the disease.

Neighborhood Should Co-operate.

Use insecticides and fungicides in the proper dilution to accomplish the object without injuring the plants. Standard remedies are best. Test others experimentally before using them on a large scale.

Use the best sprayers. A thorough application is necessary for the best results. Adjust the sprayer so that all parts of the plant that are exposed to the air will be covered.

Work for co-operation in the neighborhood. One badly infected or infested garden may be the source of disease infection or insect infestation for several near-by gardens. Keep your own garden clean and it will be an object lesson for careless neighbors and will have a tendency to help clean up the neighborhood. This will make control easier and cheaper another year.

For garden insects there are several control methods that do not require the use of insecticides, but too much must not be expected from them. Of these hand picking is useful for large, comparatively inactive insects such as the potato bettle, cutworms and other caterpillars, and the squash bug. Another method is jarring or beating insects from low plants into large pans of water on which a thin scum of kerosene is floating. The water prevents the insects from escaping, and the kerosene, being on the surface, kills the insects with which it comes in contact. Collecting nests are valuable for some pests; for example, the tarnished plant bug. Brushing by different means is used to a considerable extent and consists in beating or brushing insects from the plants with pine boughs or similar brush. This method has proved of great value in combating the pea aphis. Covering with cloth is of use as a preventive for the striped cucumber beetle when the cucumbers are quite small, and for root-maggots. Trapping by different methods with old boards is useful for squash bugs and cutworms. Poisoned baits may be placed under such traps. Plowing, disking, and harrowing all can be done by hand and are of considerable service.

Spraying Methods.

To be successful in the control of insects and diseases, spraying must be done promptly and thoroughly. Spraying with bordeaux mixture should be done before rains rather than after, provided the spray has time to dry on the leaves. Intervals between spraying should depend on the weather. If it is rainy or muggy, with fogs or heavy dews, spray frequently to keep the foliage protected at all times. If dry, a longer time may be allowed.

The ideal spray is a fine mist, and the best work is done when the plant is throughly and evenly covered with fine drops. Stop spraying before the foliage is drenched.

The higher the pressure, the better the spray.

Clean all sprayers each time after using.

For delicate foliage, spray after this gets under shade. Hot sunlight is dangerous with many sprays, such as kerosene emulsion.

Get a copy—free by writing to the United States department of agriculture—of Farmers' Bulletin 856, "Control of Diseases and Insect Enemies of the Home Vegetable Garden." It discusses the whole subject in detail—the various garden insects and diseases, poisons and how to prepare and use them, spraying machinery, and the like.

DEPTH OF CORN CULTIVATION

Shallow Method Is Favored as Result of Many Comparative Experiments by Specialists.

Many comparative experiments of deep and shallow cultivation have been made, and on the whole the results are in favor of shallow cultivation, say specialists of the United States department of agriculture. The occasions when deep cultivation is preferable are few. If excessive rains have packed the soil and kept it water soaked, deep cultivation will help to dry and aerate it. Breaking the roots of the plants must be avoided so far as possible. If roots are broken the plants will rapidly produce other roots, but it will be at the expense of vitality and the food supply. After the plants have reached a height of 2 or 3 feet, the soil even in the middle of the rows should not be cultivated deeper than 4 inches, and usually a shallower cultivation will prove better. A loose soil mulch 2 or 3 inches in thickness should be maintained. It retains soil moisture and facilitates the penetration of rainfall.

"BETTER SIRES" LOCAL COLOR

Farmers Recognize Value of Improved Stock Even Though Living in Remote Sections.

That the value of improved live stock is recognized by farmers even though they are still far from reaching that goal on their farms is shown by correspondence reaching the United States department of agriculture from regions where the live stock industry is undeveloped. "This township," one farmer writes in pencil on a scrap of paper, "is interested in a better grade of cattle. There is a sawmill and a carriage shop and a blacksmith shop right by us, and I think these would be good places for your colored poster about better sires. If you will send me some I will post them up.

"We have several cows in our barn," he continues, "and will improve our cows with a pure-bred Holstein bull, which will soon be ready to head the herd."

LABORING FOR MORE

The more we work
the more there is;
the more there is
the more to divide.

Only as all of us
do our part will we
contribute to this result.

Edwin T. Meredith,
Secretary of Agriculture.

GENERAL FARM NOTES

Humus is the chief source of supply of nitrogen.

* * *

The successful farmer is the business farmer.

* * *

Gardens and small fruit always seem to go together.

* * *

Growing vegetables for winter is a big part of the garden that is too often overlooked.

FARM POULTRY

CLUB GIRL'S HENS PAY WELL

Valerie Henning of Mississippi Is Paying Her Way Through College on Profits From Flock.

"I am a poultry club member, and my records show that this year the net profits from my chickens were $525.35." This is the report of Valerie Henning of Panola county, Mississippi, who at sixteen holds the championship of her state in poultry-club work. She, with six other Mississippi girls and two chaperons, recently visited Washington. The five-day trip was a prize offered by Mississippi bankers and business men to the girl in each district of the state who made the largest profit in her club work.

Miss Henning has been a member for two years of one of the poultry

Prize-Winners of Mississippi Girls' Clubs Witnessing Demonstration in Use of Egg Tester at Beltsville Government Farm.

clubs supervised by the United States department of agriculture and the state colleges.

To obtain her start in club work she borrowed $13.50 from a local bank. With this money a pen of Barred Plymouth Rocks, consisting of four hens and one cockerel, was bought. The profits from her chickens last year, her first in poultry work, were $374, and her flock for 1919 consisted of two cockerels and nineteen hens. By the use of trap nests and leg bands the record as a layer of each hen had been observed, and only the good egg producers were kept. From January 1 to October 16 the 19 biddies laid 2,840 eggs. Miss Henning sells nearly all the eggs for hatching purposes; but the birds she raises, aside from the culls, bring from $15 to $20 a pen.

The money this club girl has made through her poultry work is being used to pay her way through an agricultural high school.

DESIRABLE HENS TO RETAIN

On Most Farms Size of Flock Could Well Be Increased—Range Is Very Important.

The average farmer might find it desirable to increase the size of the flock of hens. While most farmers have little time to devote to poultry raising, yet their families may attend to the fowls and see that they are well cared for and protected.

The usual "advice" to poultry raisers to begin with a few hens is sound. But on most farms the women and girls have had the responsibility of the flock for years and most of them could well afford to increase the number of laying hens.

Range is very important for poultry. But range alone is not enough. The fowls must have feed and shelter when they need them.

When one is about to increase the number of hens it is well to see that those kept are worth keeping. Poor hens are not an asset; they are generally a liability.

POULTRY NOTES

Cull out weak or slow-growing chicks.

* * *

Eggs being taken to market should be protected from the sun's rays.

* * *

If the hen house is damp, it is safe to say fewer eggs will be laid.

* * *

Infertile eggs will withstand marketing conditions much better than fertile eggs.

* * *

A chicken can stand any amount of cold, but very little moisture, when housed.

* * *

Rapid growth and no bowel trouble are essential in developing profitable flocks of chicks.

* * *

Make hens take exercise by feeding their grain in litter, where they will have to scratch for it.

* * *

Begin marketing the cockerels as soon as they weigh 1½ pounds or attain a marketable weight.

* * *

Bran and charcoal are two valuable feeds for young chicks. They can be placed in hoppers before the chicks at all times.

SPOHN'S DISTEMPER COMPOUND

DON'T LET THAT COUGH CONTINUE!
Spohn's Distemper Compound
will knock it in very short time. At the first sign of a cough or cold in your horse, give a few doses of "SPOHN'S." It will act on the glands, eliminate the disease germ and prevent further destruction of body by disease. "SPOHN'S" has been the standard remedy for DISTEMPER, INFLUENZA, PINK EYE, CATARRHAL FEVER, COUGHS and COLDS for a quarter of a century. 60 cents and $1.15 per bottle at all drug stores.
SPOHN MEDICAL COMPANY, Goshen, Ind.

Easily Explained.

Mistress—How did you come to have such a blackened character?

Maid—That's where the last lady I lived with spilt the ink over it.

Cuticura Soap for the Complexion.
Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum and you have the Cuticura Toilet Trio.—Adv.

FIVE-YEAR-OLDS WILL TALK

And Surely This One Came Near to "Spilling the Beans" for Poor Mamma.

After looking at all the rugs in the store, the customer decided that she thought she liked the pink one with the purple roses best.

"But I'd like to see it in my room," she said. "I suppose you'll send it up on approval?"

"Well, madam, it's—er—hardly usual," demurred the proprietor. "But in the circumstances, perhaps—"

The customer's five-year-old daughter," who had stood silent during the long inspection, now tugged violently at her mother's skirt.

"Oh, mamma," she piped in her fatally clear treble, "hadn't you better warn him to be sure and get it there in time? Our party's tomorrow, you know."

In Kamchatka.

Petropavlovsk is the principal city of Kamchatka. Its population is about 1,500. The country offers for sale fish, caviar and furs (especially sable bear furs). In 1913 the peninsula had 700,000 reindeer. Flour, salt, tea and sugar are greatly needed. In midsummer great quantities of salmon are caught.

For Mrs. Benham's Benefit.

Mrs. Benham—What did the doctor tell you?

Benham—He said that I would have appendicitis if I didn't stop irritating my side by constantly putting my hand in my pocket for money.

Think twice before you speak and you can frame an excuse so much better.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

HE KNEW HIS LIMITATIONS

Small Boy Didn't Imagine He Would Amount to Much in the Better Land.

"Spiritualistic mediums in their descriptions of the next world are absurd. The next world, indeed, is a very ticklish subject to handle."

The speaker was Sir Oliver Lodge. He continued:

"A little boy was told by his Sunday school teacher that he would leave his body behind when he died.

"'I don't understand that,' he said in a frightened voice.

"'You see,' explained the teacher, 'you will take all that is good with you to the better land, and leave all that is naughty here on earth.'

"He thought a moment, then he said soberly:

"'I guess I'm going to be pretty thin up there, teacher.'"

Agricultural Missionaries.

To heighten agricultural production the world over and thus increase the world's food supply, with the resultant blows at old H. C. of L., an international association of agricultural missions has been formed. Its members will carry modern agricultural methods into every land.—World Outlook.

Safe Position.

"In this dangerous reform I am going to the front."

"That's right. I'll back you."

Acid Stomach
Makes the Body Sour
Nine Out of Ten People Suffer From It

It sends its harmful acids and gases over the body, instead of health and strength. Day and night this ceaseless damage goes on. No matter how strong, the victim cannot long withstand the health-destroying effects of an acid stomach.

Good news for millions of sufferers. Chemists have found a sure remedy—one that takes the acid up and carries it out of the body; of course, when the cause is removed, the sufferer gets well.

Bloating, indigestion, sour, acid, gas stomach miseries all removed. This is proven by over half a million ailing folk who have taken EATONIC with wonderful benefits. It can be obtained from any druggist, who will cheerfully refund it for trifling cost if not entirely satisfactory. Everyone should enjoy its benefits. Frequently the first tablet gives relief.

Teamster's Life Saved

"Peterson Ointment Co., Inc. I had very severe sore on my leg for years. I am a teamster. I tried all medicines and salves, but without success. I tried doctors, but they failed to cure me. I couldn't sleep for many nights from pain. Doctors said I could not live for more than two years. Finally Peterson's Ointment was recommended to me and by its use the sore was entirely healed. Thankfully yours, William Haase, West Park, Ohio, care P. G. Reitz, Box 199."

Peterson says: "I am proud of the above letter and have hundreds of others that tell of wonderful cures of Eczema, Piles and Skin Diseases."

Peterson's Ointment is 60 cents a box. Mail orders filled by Peterson Ointment Co., Buffalo.

ARSENICALS FOR KILLING WORMS

Annual Loss From Cabbage Pest Conservatively Estimated at $1,300,000.

NOT DIFFICULT TO CONTROL

Arsenate of Lead and Paris Green Are Preferable to Other Poisons—Number of Sprayings Depends on Conditions.

(Prepared by the United States Department of Agriculture.)

Arsenicals are being generally used to control the cabbage worm. There are now few instances of the total destruction of crops of cabbages as was formerly often the case. Nevertheless, a conservative estimate would place the present annual loss from this pest to cabbage alone—not including cauliflower and other related crops—at $1,300,000, or one-tenth the value of the entire crop.

The cabbage worm is not difficult to control, and it should be borne in mind that most other cabbage pests, more often present than not, will be controlled by the same methods.

Poisons Preferred.

Repeated experiments have shown that arsenate of lead and paris green are preferable to other arsenicals in common use. If paris green is used, it may be applied either wet or dry, preferably, however, as a spray, at the rate of one pound to 50 gallons of water. The plants should be free from insect attack when they are set out and should be sprayed a few days later to make sure that the poison reaches the young caterpillars before they have burrowed far into the heads. Other applications should follow as inspection of plants shows that they are necessary.

These applications of arsenicals can be made with absolute safety even after the heads are formed, as the poison disappears from plants almost completely within two to three weeks after application, and even earlier in event of repeated or heavy rainfall.

Increased Cost.

Scarcity of paris green has increased the cost. Arsenate of lead has been rapidly superseding paris green and other arsenicals as an insecticide and has not increased proportionately in price. For many reasons it is preferable.

The Sort of Gardens Which Have Been Planted in Thousands of Communities This Year.

It serves the same purpose as paris green and is applied in the same manner. It is sold both in paste and in dry powder form. Two pounds of dry arsenate to 50 gallons of water or bordeaux mixture will make a solution of sufficient strength to destroy cabbage worms and similar insects. The paste form must be used at double strength, four pounds to 50 gallons of water.

The number of sprayings depends on local and seasonal conditions. Sometimes a single spraying will suffice, but usually two or three are necessary. The adhesiveness of the spray material is promoted by the addition of about the same amount by weight of resin fish oil soap as of the arsenical used.

DIG UP OLD RHUBARB STALKS

Divide Roots Into Pieces of Two or Three Eyes Each and Start Entirely New Patch.

After rhubarb has been planted four or five years the stalks become so thick that they are too small to sell well. It is then best to dig up the roots and divide into pieces of two or three eyes each, which is enough for one hill, and start a new patch. Another good way is to dig up all the hill but a little corner which is left undisturbed, then fill the hole from which the roots were taken with well rotted manure and cover that with earth. The piece of root left in the ground will make a surprising growth the same season.

EXCELLENT CROP INSURANCE

Spraying Must Be Done at Right Time and in Proper Manner for Nice Clean Fruit.

He who does not spray his fruit crop for insects and disease has no right to expect nice clean fruit in the autumn. Spraying at the right time and in the right way is splendid crop insurance.

THINNING IMPROVES VALUABLE WOODLAND

Lack of Proper Treatment Is Cause of Much Loss.

Farmer Should Take Steps to Give Trees Sufficient Light and Soil Moisture for Them to Thrive and Become Profitable.

Lack of proper thinning and cutting is a common cause of woodlands being unprofitable, according to a recent bulletin entitled, "Making Woodlands Profitable in the Southern States," issued by the United States department of agriculture. Nature usually overcrowds trees in a given space, says this publication, and so steps should be taken to give them sufficient light and soil moisture to thrive and become profitable.

By properly controlling the number of trees on a tract it is possible to increase their rate of growth and eventually their size. Except for the production of cordwood, a few large trees on a given area are usually more desirable than many small ones. If possible, valuable kinds of wood should be grown in preference to common woods which bring lower prices. Woodlands

Farm Woodland Marked for Conservative Thinning.

in this country, as a rule, contain many crooked, forked and diseased trees which should be replaced by straight, sound ones. Soon after a cutting trees show an increased growth and the whole woodland rapidly increases in value by the elimination of inferior trees.

With an active market for cordwood and for fence posts, poles and lumber, there is every inducement to clear out the inferior trees—diseased, dying, crooked and less valuable kinds. Right cutting also includes the removal of large, sound trees whose growth is slow because they are nearing or have reached maturity. The cutting should be done only at a time of favorable market conditions or when building or other timber is needed on the farm. Copies of this bulletin may be had by addressing the United States department of agriculture, Washington, D. C.

CONTROL OF SOIL DISEASES

Next to Seed Treatment Rotation Is Best Way to Destroy Wilt and Rot Spores.

With the possible exception of seed treatment, there is no farm practice, which, from the plant disease point of view, gives greater returns on the investment than crop rotation, is the assertion of Prof. J. G. Leach of the Colorado Agricultural college. There are a great many plant diseases such as wilts and root rots for which no specific remedy is known and which can be held in check only by the combined practices of seed selection, seed treatment, and crop rotation. These diseases become worse and worse each year the crop is grown in the same soil, and each one taking their annual toll accounts for considerable loss to the farmer.

A system of crop rotation entails almost no expense other than a little forethought and planning. The returns in disease-free crops pay for this trouble many times over, not to speak of the added gain in soil fertility.

SILOS RAPIDLY INCREASING

Successful Farmers Have Learned That Huge Receptacle Is Big Asset on Any Farm.

Information gathered by the Pennsylvania department of agriculture shows approximately 20 per cent, or 43,657 farmers in the state with silos, while the number a year ago was estimated at 32,900. Wide awake and successful farmers have learned that a silo, when properly used is a valuable asset on any farm. As farm conditions improve, the number of silos naturally increases.

SPACE BETWEEN FRUIT TREES

Apples Should Be Allowed at Least 30 Feet Each—Plums Do Not Require as Much.

Standard apple trees should be allowed at least 30 feet of space each way; plums 20 feet; currants, gooseberries and grapes from ten to 12 feet; red raspberries should be allowed to grow only in hedgerow not over six inches wide and rows ten to 12 feet apart; strawberries set in rows four feet apart and two feet apart in row.

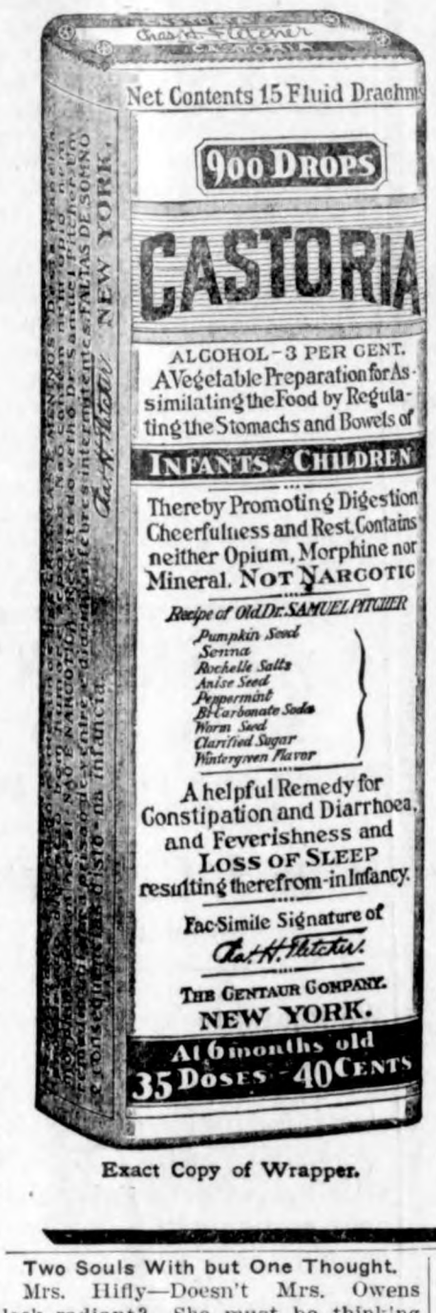
Are You Human?

A little baby. A little child. Don't they appeal to you? Doesn't heart yearn to pick them up, to cuddle them close to you, to shield them from all harm? sure it does else you're not human. Being human you love them. Their very helplessness makes you reach out in all your strength to aid them. In health there's no flower so beautiful. In illness there's no night so black.

Save them then. Use every precaution. Take no chance.

When sickness comes, as sickness will, remember its just a baby, just a child and if the Physician isn't at hand don't try some remedy that you may have around the house for your own use.

Fletcher's Castoria was made especially for babies' ills and you can use it with perfect safety as any doctor will tell you. Keep it in the house.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Do the People Know?

Do you know why you are asked to call for Fletcher's Castoria when you want a child's remedy: why you must insist on Fletcher's?

For years we have been explaining how the popularity of Fletcher's Castoria has brought out innumerable imitations, substitutes and counterfeits.

To protect the babies: to shield the homes and in defense of generations to come we appeal to the better judgment of parents to insist on having Fletcher's Castoria when in need of a child's medicine. And remember above all things that a child's medicine is made for children—a medicine prepared for grown-ups is not interchangeable. A baby's food for a baby. And a baby's medicine is just as essential for the baby.

The Castoria Recipe (it's on every wrapper) has been prepared by the same hands in the same manner for so many years that the signature of Chas. H. Fletcher and perfection in the product are synonymous.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS
Bears the Signature of
Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

Two Souls With but One Thought.

BELL-ANS FOR INDIGESTION

Some Chance for Him.

When Jack Jolly, the golf ball manufacturer, was in town last fall a friend with whom he was playing said:

"Jack, do you think I'll ever learn to play this game?"

"How old are you?" asked Jack.

"Forty-two," was the reply.

"Well," retorted Jack," "I have a friend in Scotland who was 81 years old his last birthday and he says his game is still improving."

Her Object.

"Mayme changed countenance when I saw her at the beauty doctor's."

"Naturally. That is what she went there for."

It is better to work a combination than it is to blow up a safe.

ALLEN'S FOOT-EASE

Gives ease and comfort to feet that are tender and sore.

If shoes pinch or corns and bunions ache this Antiseptic, Healing Powder will give quick relief.

Shake it in your Shoes. Sprinkle it in the Foot-bath. Sold everywhere.

Rheumatism Back on the Job With Its Old-time Fury

No Let-Up In Its Torture.

If you are afflicted with Rheumatism, why waste time with liniments, lotions and other local applications that never did cure Rheumatism, and never will?

Do not try to rub the pain away, for you will never succeed. Try the sensible plan of finding the cause of the pain. Remove the cause, and there can be no pain.

You will never be rid of Rheumatism until you cleanse your blood of the germs that cause the disease. S. S. S. has no equal as a blood purifier, scores of sufferers say that it has cleansed their blood of Rheumatism, and removed all trace of the disease from their system.

Get a bottle of S. S. S. at your drug store and get on the right treatment to-day. If you want special medical advice, address Medical Director, 102 Swift Laboratory, Atlanta, Ga.

Miss Gretchen Blank returned to work at the Kluckhohn store after several days absence on account of an attack of mumps. When interviewed regarding her absence she said that mumps were not to be considered a joke.

A family gathering was held at the Tom Blank home here Sunday when they entertained twenty-three people for dinner. The relatives present included the sons and daughters of Mr. and Mrs. Blank and their children and Mr. Blank's sister, Mrs. Mauss and two boys and girl, of Rake. A big dinner was served and the day was spent in general visiting.

The Times office is without a "printer's devil" as our former boy Chas. Gibbs who occupied that position on the staff has gone to the depot to work as agent's assistant. Charlie began work there Saturday and so far likes the job. Now that leaves a place for some bright fellow to get a job with us and learn how to "sling type."

Peck Hanson for Sheriff 2 to 1.

All other officers renominated.

"ROCKFORD SOCKS" GET TRIMMED BY THE "LIBERTY BELLS"

The ball game between the Klemme Rockford Socks and the Liberty Bells resulted in a serious calamity for the former nine as they were beaten by about twelve to four. As this was the first real game for the Klemme boys we expected to see their score on the wrong side of the board but with a little more practice they will be able to play ball and will not let so many scores sip by. We have dubbed the Kemme boys the "Rockford Socks," but with a purpose in view. As everyone knows the common brand of foot covers are known as "Rockford" and really means rough and unfinished. This gives them something to work for and when they have won their first real game we will call them the "Silk Sox" which will indicate they are a smooth, slick and finished bunch of players. As to the rea fine points of the game Sunday we can sum it up and say that the fine points were considerably conspicuous by their absence. Nevertheless we will bet on the Klemme boys as they have the markings of a good team and a few more games will prove our statement. All we want to say now is that we can poke a little fun at their blunders but just watch their SMOKE when they really tear loose. And as to the "Liberty Bells" we will say they have a pretty good line up and are not to be scoffed at by any means and we venture to say that when the "Rockford Socks" clash with them again they will come out of the wash as the "Klemme Silk Socks."

Yours truly,
"The Times Sport Editor"

"OLD TIMERS" AND "ROCKFORDS" BATTLE

Tuesday some of the "old timers" of the baseball sport gathered the relics of former battle and assembled at the ball park to give fight to the Klemme Rockfords. The game was called for 6:15 P. M. and the smoke of battle was on at once and ended up with the score of 6 to 4 favor of Old Timers—with "hired player."

LIFE SENTENCE!

CLARENCE JOHNSON AND BERNICE GIMER MARRIED SATURDAY

Quiet Home Wedding Closes Love Affair

Saturday, June 5th, goes down in the society history of Klemme as another happy event marking the close of a long love affair of two of our most prominent young people who were brought together by the pranks of little Dan Cupid some time ago. On that day Miss Bernice Gimer was united in marriage to Mr. Clarence Johnson at the home of the Bride's parents, Mr. and Mrs. Arthur D. Gimer. The wedding was a quiet and simple affair but beautifully arranged. At half past eleven the happy couple took the marriage vows and were made man and wife by Dr. A. E. Buriff who officiated. Only immediate relatives were present at the ceremony and Mr. J. A. Peterson, of Seneca, Ill., and Miss Hulda Johnson the groom's sister, acted in the capacity of Bridesmaid and Best Man. The room was beautifully decorated and the Bride, attired in a Copenhagen Blue dress, carried a bouquet of carnations and the Bridesmaid, also attired in blue, carried a bouquet of sweet peas. After the ceremony the guests sat down to the wedding feast consisting of two courses. The happy couple were then given a good send-off with congratulations as they departed in their car for "places unknown," but presumably to Chicago and other points east. They expect to return to Klemme the latter part of his week and will then go to housekeeping on the farm east of town where they have their home all prepared.

Mr. and Mrs. Clarence Johnson need little or no introduction to our readers as they are so well and favorably known to all, both having lived here for a number of years and Clarence was formerly with his father in the farm business and also stock buying. We extend congratulations and wish them a most happy journey through life.

YE EDITOR'S OLD PALL AMONG THOSE FATALLY WOUNDED BY CUPID'S DARTS

Harold Livermore and Ruby Counts Married in "Little Brown Church" At Nashua

A number of our readers, especially among the younger set, will be pleased to hear of the marriage of Harold Livermore, of Garner, to Ruby Counts, of Grimes, Iowa, at the "Little Brown Church in the Vale" at Nashua, Tuesday, June 8th, at 1:00 p. m.

Now this is supposed to be a secret and our old pal begged us not to let the "cat out of the bag" but as we can't keep a secret any more than a woman, we are just itching to tell it on him. Harold or "Lefty" as he is better known, was our best man when we were married nearly a year ago, and as he told on us then we are now seeking revenge and will surely spill the beans, as they say, and see to it that he and his bride get a warm welcome on their return to Garner where they will make their home. Anyway, we wish them some happiness and hope that if he and his wife have a scrap that he gets knocked over with an extra hard rolling pin—we will bet on his wife anyway, as we believe she is Irish.

BAND GIVES FIRST CONCERT

The Klemme Band gave their first concert in the park last Wednesday evening and quite a large crowd was out to hear them play. Considering that the boys have only played a few months and are all beginners, they rendered some excellent music which greatly pleased the people who came to hear the band for the first time.

FARMERS MEETING

NOTICE—There will be a meeting of the farmers of this community at the Idle Hour Theatre, Klemme, Iowa, Thursday, June 17th, at 1:00 P. M., for the purpose of organizing a Farmers Co-Operative Elevator society. All who are interested are requested to be present. Adv.-1wp.

By the Committee

HOLLY LEWIS TO BE MARRIED SOON

Miss Gladys Dreher, of Mason City, the Lady of his Choice

In the society column of the Mason City Globe-Gazette of Thursday, June 3rd, the following announcement appeared which is of interest to our Klemme readers:

Engagement Announced

"The engagement of Miss Gladys Dreher to Holly Lewis of Klemme, Iowa, has been announced. Their marriage will occur in this city, June 19th. Miss Dreher has been associated with the local postoffice for the past two years as clerk. Her resignation will take effect June 15th."

To the above we might add that Holly has also been associated with the postoffice at Mason City as carrier and other duties since his discharge from the army and that doubtless he met the young lady who is to become his wife at that place.

Perhaps Holly was prodded a little by Dan Cupid when his brother Verner took the matrimonial step a short time ago, and Holly thought if Verner has the nerve I guess I am as good a sport too. Anyway Holly's many friends here are glad to hear of the good news and if congratulations are in order we wish Holly and the soon-to-be Mrs. Holly Lewis a most pleasant journey in their matrimonial bark.

Mason City, Iowa.—Great preparations are being made for the Big Western Cowboy Round-Up which will be staged at the North Iowa Fair Grounds, June 16-17-18. Several thousands of dollars in cash prizes have been hung up for the winners of various cowboy stunts, including broncho busting, wild steer riding, fancy roping, steer roping, wild horse races, wild steer bulldogging and othe cowboy sports.

More than two hundred wild horses wild longhorn Mexican steers, and noted outlaw bucking horses will be shipped here from the west for use by the cowboys and cowgirls; more than a hundred of whom have already signed up to enter the contest.

The Round-Up will have both afternoon and evening performance. It is being staged by the North Iowa Fair Board, and a number of people from this section have made plans to attend the event one or more days while it is in session at Mason City.

"ZIP CHASES HIS WHEEL"

"Zip" McCullough autoed to Garner Sunday morning in his sheeny show case and was peacefully gliding up the street at a fair gait when he looked out the window of his car and saw a fully dressed (a-tired) wire car wheel racing up the street on the star board side. "Zip" gave chase with the idea that if he could catch that stray wheel it might do to use on his own wagon in case he should ever need one. The wheel turned a corner and "Zip" after it and finally run i down. He got out and grabbed it by the ear and choked it until it quieted down so he could lug it into his car. He then decided to see if it would fit his car and was about to slip it up to his rear wheel when he discovered that the run-away wheel was none other than his own which perhaps had decided to part company with the Henry and go on life's journey its own self, but we believe that it realized "Zip" had left his lady friend in Klemme and it was going back to get her, Ford or no Ford.

CAIRNS BROS. GIVE FINE SHOW

For the seventh time Cairns Bros, and thei company appeaed in Klemme. This is one of the few good shows on the road and whenever the Seven Cairns Bros. come they are always greeted by a packed house. Their band is better than ever this year and featured Warren Cairns, their trombonist. Young Cains is an artist on this instrument. Their play was first class and as is always the case it was a good clean show all the way thru. We can certainly recommend this company to anyone and also look forward to their next appearance hree next year.

FARMERS PLEASE NOTICE

As I intend to leave for the west to spend the summer, I have temporarily turned over the management of the Shippers' Association to Albert Schmidt. From now on when you have cattle or hogs to ship through the Association, phone No. 4305 and he will take care of your stock.

Yours truly,
Adv.-2-p. WM. BACHMAN

Iowa News

Items of Interest Summarized for Busy Readers.

Benjamin Fish, 9, of Sioux City was instantly killed when his head was run over by an automobile truck.

Ninety-nine students graduated from the Mason City High School June 4. President Flint of Cornell College was the speaker.

Reports indicate that the financial stringency in Iowa is less apparent now than a few weeks ago, and that the tight money condition is improving.

Forty-two head of Angus cattle were sold at the W. H. Cooper sale barn in Hedrick at an average of $3,210. The top cow Elluna E, brought $10,000. All of the cattle came from Mr. Cooper's reserve stock. He lost

Approximately 70 per cent of Iowa's 1920 corn crop is now in the ground. In Carrol, Buena Vista, Pocohontas and some territory in adjacent counties, 90 to 95 per cent of the corn is planted and the first planted is two inches high.

More than $1,000 worth of automobile tires were tolen from the Crawfordsville garage by thieves who loaded the tires on a truck and drove away. The tires were all corded and the most expensive carried by the sales company.

The Iowa state highway commission will not approve any more highway paving contracts than it believes can be completed this year. Neither will it approve any more projects for this year than those that already are under way and are about to be let.

In preparation for the establishing of a free mail delivery system at Belle Plaine on July 1, the announcement is made that a civil service examination will be held in Belle Plaine for two carriers and a substitute carrier.

$250,000 worth of stock in a fire.

Clark Coleman, Hepburn butcher was smothered to death under the car when he drove his Ford into a 10 foot gulley north of Clarinda. He was pinned beneath with his face in mud and water.

Eighteen persons were injured when two street cars loaded with Rock Island arsenal employes figured in a rear end collision at the entrance of the arsenal in Davenport. All of the victims were rushed to hospitals where it was later reported that all would recover.

In several Iowa counties farmers have taken the examination which will authorize them to do their own vaccination of swine. The matter is under the authority of the animal husbandry department at Ames. From Polk county there were fifteen applicants for the examination.

Admitting that he had sold his wife for $1,500 in cash, Raymond Dawes of Davenport bared the details of one of the most shocking violations of law and the rules of society at the coroner's inquest over the dead body of the woman he sold, Mrs. Leota Dawes. The woman died from an overdose of choroform.

A book of poems written by Earle Sloan Smith, former Fort Madison school principal but for the past three years a missionary at Illiolo, Japan, has been issued. The poems, which were written for the Fort Madison Democrat, were obtained for book use by a San Francisco publishing house. All of the poems deal with child and animal life.

Hog production in Iowa will be reduced 50 per cent this year, due to losses this spring. The cold, rainy weather has caused many farmers to lose the greater portion of their pigs before they could get them started. Iowa did not breed as many sows as usual, due to the high cost of corn, so that the pig crop shortage will be greater than ever before.

Steps to reclaim 700 acres now in Lake Peosta for the city of Dubuque have been taken by the city officials. Advocates of the plan say they see no reason why the city's debt of $900,000 may not be paid by the reclaimed land. The city owns the lake by virtue of a deed from the Iowa general assembly. Not only would sale of the land bring the city a big revenue, but would give more land for growth.

At the annual meeting of the Iowa Association of the Blind at Vinton, a movement was started to raise a loan fund to assist blind people, who have mastered a trade, in starting in business. The association discussed the newly adopted uniform type for the blind, as compared with the New York point system, which has been used in Iowa for more than forty years, and unanimously favored the latter system.

During the year ending March 1, 40 county agents of Iowa resigned and of this number 19 have returned to the farm. Others went to county work in neighboring states, two went to farm papers and three went to other organizations as secretaries. This number is on an average with the figures of 1919 since in that year 42 resigned. At present there are two vacancies in the county agent force. Many times an agent will resign his position in one county and go to a nearby county so that he is still in the state but differently located.

The report of the field agent of the Bureau of Crop Estimates, Des Moines, the following estimates of the relative numbers of different breeds of live stock credited to the United States and Iowa, gives figures of much interest and shows the wonderful progress made by Iowa:

	United States Per Cent	Iowa Per Cent
Hogs		
Berkshire	9.3	2.7
Cheshire	.3	.3
Chester White	10.7	15.4
Duroc Jersey	34.2	40.1
Hampshire	3.9	5.6

Tunis	.1	....
Others	3.5	3.0
Nondescript	8.1	4.2

The land boom in Iowa was part of a general increase thruout the United States during the past year, amounting to 21 per cent. The increase was more extreme in Iowa than elsewhere, averaging $63 an acre, or 32 per cent from March, 1919, to March, 1920. While there were a few sales at unusually high prices, less than 5 per cent were at $400 an acre or more. Contrary to general belief, probably less than 10 per cent of all farms changed hands during the boom. About 25 per cent of the farms for which figures were obtained were sold twice during the boom, 4.7 per cent three times, 2.1 per cent four times or more.

For the second time this year, county treaurer of Muscatine county finds a shortage of automobile license plates staring him in the face. After being out of them for more than two months, the treasurer received a consignment of three hundred some time ago. But ten pairs remain, however, and this will only be sufficient to last him the week, as new cars are being registered at the rate of about five a day. The county now has in excess of four thousand autos and motor trucks.

Iowans will pay $80,495,235.92 in city, county and state taxes of all kinds this years on the 1919 levy. This will be $14,913,070.32 more than was collected for state taxes of all kinds in 1919 on the 1918 levy. The taxes to be collected this year for the 1919 levy are nearly three times as large as the 1910 collections. In 1910 the taxes, city, county and state, were $31,959,328.07. The 1919 levy to be collected this year is, therefore, $48,535,907.85 in excess of the 1910 figure.

Members of the Polk County Farm Bureau are experimenting with various kinds of fertilizers. A car of acid phosphate has been received at Mitchellville, bought by several farmers living in that vicinity. Most of this is to be used on corn in order to secure a little earlier maturity and finish. Some interesting data should be the result of the use of the phosphate, as this is the first time it has been used to any extent in this country.

Regardless of how long an army or navy service man's war risk insurance has lapsed, or been cancelled, and regardless of how long he has been discharged from service, a special ruling, just received, permits him to reinstate it at any time bofere July 1, 1920, upon application and payment of only two monthly premiums on the amount of insurance he wishes to reinstate, together with a satisfactory statement of health.

There has been much loss in Iowa this spring from scouring of young pigs on different farms. Muddy wet and filthy pens, with scouring feed is unclean, open troughs, kills many pigs each year. Some of this could be prevented by remembering that the big problem after farrowing is to keep the pigs healthy and strong and to do th... must have plenty of exerci... all, do not let ... with every young

HOMER IN DISTRESS

MAYOR OF FLOODED CITY APPEALS FOR ASSISTANCE.

MANY FAMILIES DESTITUTE

Fear Epidemic of Typhoid Unless Filth Is Cleared Away Soon.—People Lost Everything.

Homer, Neb.—Mayor W. Allen has sent an appeal to Governor McKelvie for funds to aid in clearing the city of the filth deposited by the flood last week and to aid in moving back onto their foundations and making habitable twenty-five homes that were moved by the floods.

Every man and team available here and many from Hubbard and Emerson and other nearby towns are aiding in the work of removing the debris, but they have made little more than a mark. Hundreds of men and teams are needed if an epidemic of typhoid is to be avoided. Scores of dead animals are buried under driftwood and mud, and are already beginning to decay.

The local Red Cross chapter has already expended the $3,300 it had on hand in the purchase of food and clothing. Hot meals are being served three times a day to workers cleaning the streets and to persons rendered destitute by the flood. Additional funds may be called for, but for the present the local chapter is doing all it is possible to do.

More than 450 of the town's 750 citizens lost practically everything they had, according to Mayor Allen.

"We have about fifty families that are practically destitute," said Mayor Allen. "There are twenty-five homes off their foundations, and about fifty in which the mud and water stands four feet deep.

"It is to get these homes put back and refurnished to some degree that we are trying to get help from the governor. I don't know just what he can do."

Food for the residents of Homer is brought in by truck and train from Sioux City. The Burlington is sending a relief train daily and about five trucks of supplies arrive daily.

The food is purchased by the business men of Homer. Those who are able to pay do so, but everybody is being taken care of.

Biggest Fighting Ship Launched.

New York.—The superdreadnought Tennessee, biggest and most formidable fighting ship afloat, was launched at the New York navy yard with appropriate ceremony.

Constructed here at a cost of $20,000,000, the Tennessee represents the last word in battleship architecture. She is 625 feet long, has a beam of 98 feet and a displacement of 32,500 tons. She is the next thing to a pleasure yacht in the comfort of her appointments for officers and men, and it is the first battleship to recruit her entire personnel from the state from which she takes her name.

Non-Partisans Egged.

Topeka, Kan.—Three Non-partisan league officials, their clothing bespattered with eggs, attempted to tell state officials here how they had been driven from Ellinwood by men dressed in soldier's uniforms.

The men, Walter Thomas Mills, national organizer; J. O. Stevic, Topeka state organizer, and M. L. Amos, Ellsworth editor, said that they were attending a farmers' picnic when men in soldier's uniforms escorted them from the ground, later throwing eggs at them and placing them in a stockyards. They were referred to local peace officers.

Wheat Control at An End.

Washington, D. C.—Federal control of wheat and wheat products ended June 1, the wheat director ceasing to function under the limitation of the law creating his office and the food administration control ending by proclamation of President Wilson. This means the passing of the government guarantee of $2.20 a bushel for wheat established during the war as a means of stimulating production. As soon as some remaining contracts are carried out by the United States Grain corporation, that body will turn over its finances to the treasury department.

Japan Can Furnish Sugar.

Seattle, Wash.—Japanese centrifugal sugar can be laid down in Seattle for approximately $17 a hundred pounds, according to information received from Kobe by a Seattle importing company recently. The information said between 80,000 and 90,000 tons are available for export. Another firm announced that 55,000 tons of Japanese, Formosa and Javanese sugar would be shipped direct to New York and about 5,000 tons to San Francisco.

New Typographical Union Head.

Indianapolis, Ind.—John McParland, a member of local No. 6, New York city, was elected president of the International Typographical union, defeating Marsden G. Scott, who sought reelection.

$40,000 For Farm Bureau.

Chicago, Ill.—A bureau of education with a budget of $40,000 to get farmers' problems before the people of the country was authorized here by the executive committee of the American farm bureau federation.

CAN'T REFER LAW TO PEOPLE

Supreme Court Rules Legislatures Have Final Word in Constitutional Prohibition Act.

Washington, D. C.—The federal supreme court held that federal constitutional amendments cannot be submitted for ratification to a referendum vote in the states having referendum provisions in their constitutions.

The court's opinion was rendered in a case appealed from Ohio, in which the Ohio supreme court had held that ratification of the prohibitory amendment was a proper subject for action of the state referendum. The decision affects pending referendums on both the woman suffrage and prohibition amendments in several states.

In Nebraska a case is pending before the state supreme court in which John H. Hopkins of Omaha and other petitioners sought to submit the prohibition ratification to a referendum. Under the new ruling of the federal supreme court, the Nebraska court must either rule against the referendum or face the prospect of reversal on appeal to the federal courts.

The Lancaster county district court upheld the Nebraska referendum on the theory that the voters of the state, under the referendum law, have succeeded the legislature as the final law-making authority. The federal court held that when the federal constitution provided for ratification of federal amendments by the "legislatures" it meant the body commonly known as the legislature, not the people themselves.

The question of whether or not the prohibitory amendment is valid was not decided by the court.

REJECT WILSON'S PLEA.

Senate Turns Down Request for Mandate Over Armenia By 2 to 1 Vote.

Washington, D. C.—President Wilson's plea for an American mandate over Armenia was rejected in the senate by a vote of more than 2 to 1.

Thirteen democrats cast their votes with the united republican membership on the final rollcall and the resolution "respectfully declining" to grant congressional authority for the mandate, was adopted 52 to 23 in the form drafted by the republican leaders.

Democratic leaders counseled delay and tried in vain to put the decision over until the next session of congress. Scarcely a voice was raised in out-and-out advocacy of accepting the mandate and on motion to amend the resolution so that the requested authority be given, only 13 senators, all democrats, voted in the affirmative. Recorded against the motion were 23 democrats and 39 republicans.

Would Buy Bohemia's Sugar.

New York.—The United States should purchase all the sugar available for export in Czecho-Slovakia, to give that country the credit needed to purchase phosphates to fertilize its sugar crops, and at the same time to "break the Cubans' hold on America," Irving Schwartz, an importer, testified here before the joint legislative committee investigating profiteering. Results of the purchase of Czecho-Slovakia's sugar would reduce the price here of the commodity, Mr. Schwartz said.

Cole and Grammer Reprieved.

Lincoln, Neb.—For the thirteenth time, stay of execution has been granted to Anson V. Cole and Allen Grammer, convicted Howard county murderers, by Governor McKelvie, it was announced here, pending hearings in the federal circuit courts.

The latest date set for their execution, the fourteenth date which has been fixed, is Friday, July 9.

Further News Print Advance.

Montreal.—An advance in the export price of news print paper from $90 a ton to $110 for the three months beginning July 1, to be followed by an advance to $130 is shown in the schedule of the Canadian Export Paper company, limited, issued here. The price will be increased one cent a pound July 1 to 5½ cents a pound, mill, and on October 1, to 6½ cents a pound, mill.

Repeal War Legislation.

Washington, D. C.—Before adjourning last Saturday, both branches of congress adopted a joint resolution repealing war legislation with the exception of the Lever food control act and the trading with the enemy act.

Flood in England.

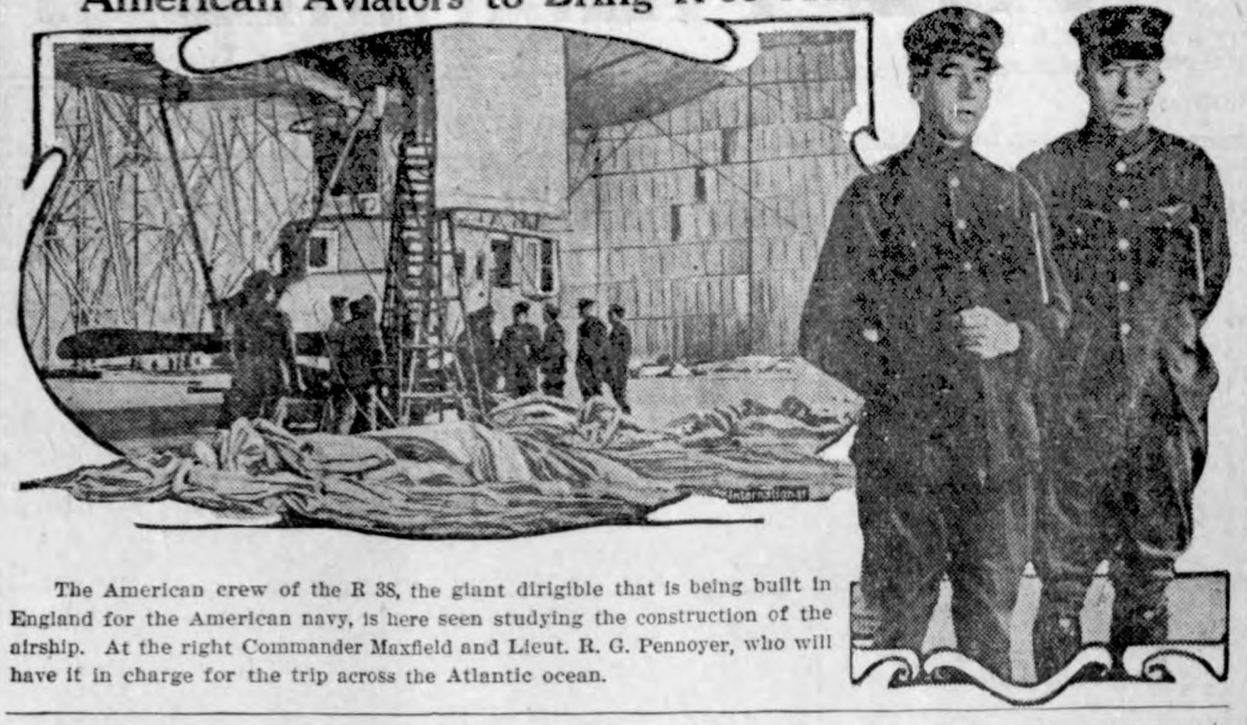
Louth, England. — Twenty-seven bodies of those who lost their lives in the sudden overflow of the River Lud have been recovered, and many persons are missing. Unofficial estimates still place the death roll at about fifty.

At least fifty houses were washed away and 1,000 others damaged. Upward of 1,000 persons have been made homeless. The damage is variously estimated up to $250,000. The waters of the river have subsided.

Wilson Vetoes Budget Bill.

Washington, D. C.—The bill to establish a national budget system was vetoed by President Wilson. The measure was held by the president to be unconstitutional because it took from the chief executive the power to remove the comptroller general and the assistant comptroller general, officers who would be appointed by him with the advice and consent of the senate. The president said he returned the measure without his approval with the "greatest regret," because he was "in entire sympathy with its objects."

American Aviators to Bring R-38 Across the Atlantic



The American crew of the R 38, the giant dirigible that is being built in England for the American navy, is here seen studying the construction of the airship. At the right Commander Maxfield and Lieut. R. G. Pennoyer, who will have it in charge for the trip across the Atlantic ocean.

Woman Seeks Sunken Riches

Salvages Cargoes From Vessels That Have Gone Down in Great Lakes.

DIVER GAVE HER THE IDEA

Mrs. Margaret Campbell Goodman Has Recovered Fortunes From Wrecks on Floors of Inland Seas.

Cleveland.—Mrs. Margaret Campbell Goodman, the only woman salvager in the world, has regained a fortune which went down with the steamer Pewabic, in Lake Huron, 55 years ago. Succeeding where many men had failed, Mrs. Goodman has broadened her scope of work until she now has contracts to raise sunken fortunes in almost every sea.

Mrs. Goodman spent her early life in Mount Pleasant, Mich., and after her school days she went to Toledo, O., her present home. There she became interested in diving suits, after witnessing an exhibition of deep-sea diving in which the diver went down 361 feet, remaining under water for 45 minutes.

Treasure on Sea Bottom.

This feat of deep-sea diving convinced her that scouring the floor of the sea for sunken treasures would be a profitable business. Remembering the loss of the Pewabic, Mrs. Goodman, after much discouragement, formed a stock company. She went to Alpena, Mich., and found Capt. John Persons, who had stood with his father, keeper of the lighthouse in Thunder Bay, and watched the ship founder.

Later, Mrs. Goodman located George P. McKay, the captain of the Pewabic. Captain McKay was living in Cleveland and showed Mrs. Goodman the manifest of the lost vessel. It showed that the Pewabic carried in her hold tons of copper, worth $200,000 or more, and several hundred tons of pig iron. In the ship's express box was $50,000 of "shin plasters."

The work of searching for the Pewabic was begun in 1916. In the first season's work, the divers took out 100 tons of copper and 100 tons of pig iron. Many interesting relics were discovered which, when possible, were forwarded to the relatives of the sailors who had lost their lives a half century ago. When the treasure chest of the ship was brought to the surface, the "shin plasters" were found to be watersoaked and valueless.

Considerable work was done in 1917, until the needs of the government, at war with the central powers, called a halt to all salvaging operations.

To Salvage Cargo of Logs.

Mrs. Goodman's next contract is to salvage a schooner that sank in Lake Erie in 1864. She has a release from the owners and will begin work about July 1. This schooner carried a cargo of black walnut and white oak logs, chained to the deck, and Mrs. Goodman expects no difficulty in salvaging the cargo.

Formerly a newspaperwoman, Mrs. Goodman has made a success of a business which is as interesting as it is dangerous. She dislikes being described as a woman diver, because she has never gone under water herself, and she says she does not expect to do so unless for the purpose of increasing her own scientific knowledge.

"FATHER OF VICTORY"

This bust of Clemenceau has been named "Father of Victory" by the sculptor, Fallez, a famous French artist.

2,000 POLES WEEKLY TO U. S.

Hebrew Sheltering and Immigrant Aid Society Opens Branch Office in Warsaw.

Warsaw, Poland. — Arrangements have been completed for the transportation of 2,000 persons weekly from Poland to the United States by the Hebrew Sheltering and Immigrant Aid Society of America, which recently opened offices in Warsaw. The Polish authorities estimate that 250,000 persons already have applied for passports, about 95 per cent of these being women and children, dependents of persons now in America.

Deserter Lives Long in Cave

Ohio Youth Fears Firing Squad Because of Visit to Family.

GIVES UP AFTER TWO YEARS

Hides in Hills, Feeds on Herbs and Wild Berries and Such Scanty Food as His Wife Got to Him.

Chillicothe, O.—Stories of how a neighbor deserter from the Union army during the Civil war had been brought to bay in a nearby village by a United States marshal and shot, brought visions of a similar fate to Carl Amerine and impelled him to hide in the hills almost two years rather than face a firing squad at Camp Sherman.

Amerine, drafted into the army, left a wife and two-year old babe at home, in the quiet, picturesque hills. He could neither read nor write and the largest village visited in his 24 years had numbered less than a thousand inhabitants. The bustling thousands at the camp, military restraint and customs weighed heavily on him and an impelling desire to see his wife and baby boy led him to quit camp to see them without obtaining permission.

Fears Firing Squad.

At home, his father, a tottering veteran of the Civil war, told him he was a deserter. Visions of the firing squad flashed through his mind. Kissing his wife and baby good-by he took to the rugged hills.

There Amerine found a cave in which he slept most of the time, venturing forth only at night and at times during the day when there was little chance of being seen. His only fare was such scanty food as his wife could get to him, herbs and wild berries gathered from the woods and fields, and such wild game as he could catch. The cave in which he lived is said to be large enough for only one person, and could have been defended against many. So closely did he watch all approaches to his hiding place that until a few days ago he had been seen by no one except his wife and a brother-in-law.

Military authorities had abandoned the search for Amerine. Three weeks ago an attorney friend of the family became interested and implored the wife to have her husband return and give himself up. She steadfastly held that her husband would be shot if captured and refused to have him return.

Clarence Stone of Adelphi managed to get word to the youth last week that his was not a case of desertion, and there was no danger of a firing squad. Amerine cautiously left his hiding place, and visited Stone's home, where they went over the situation. He agreed to give himself up.

Amerine again went to Stone's home. His wife brought his uniform, which she had preserved for him and had neatly pressed for the occasion. With Stone and an attorney, Amerine went to Camp Sherman and surrendered to the adjutant. He made no comment except to express himself as being well pleased that "it is all over."

"SEE AMERICA FIRST"

Conditions in Europe Not Attractive to Tourists.

Poor Hotel Accommodations and Scarcity of Food Keep Americans at Home.

Washington.—Sponsors of "See America First" ideas will find consolation in the stories reaching the United States of conditions in Europe which tend to discourage "going abroad" this year. One of the big obstacles to tourists of foreign lands is the lack of transportation facilities. Throughout the continent rolling stock is at a premium and passenger service is badly crippled.

While conditions in France and England are not pleasant for the tourist, eastern and southern Poland and parts of Germany are even less attractive. Typhoid fever and spotted fever have come over the borders of Soviet Russia into Poland, and the food situation adds to the distress there.

Tourists to Europe this summer will find that they did not leave high prices at home, for the Europeans have boosted the prices of nearly everything which is to be sold to American tourists. This is most noticeable in Germany, where the practice of discriminating against Americans is rampant. Much of the same discrimination exists in England and France, although the governments are doing everything to check it.

For many months Europe has suffered from the effects of the unfavorable rate of foreign exchange in endeavoring to buy commodities in the United States, and the American tourist is now paying some of that deficit.

The use of springs is done away with in a new cord operated device for opening and closing transoms, windows or shutters.

Well, He or the Hen Deserves a Medal

Los Angeles.—Edward Schaffer of Broadway, Venice, has one hen in his flock of eight that has distinguished herself. She is a Plymouth Rock, 2 years old. During the past two weeks she has laid fourteen eggs, not one of which weighed less than six ounces nor measured less than eight and three-quarters inches around. Schaffer says there is no doubt that it has been the same hen in each instance, for each egg bears a trademark which consists of two pronounced elevated rings around one end of the egg.

More Power to the Tractor.

Danville, Ky.—What the tractor has done for transportation was shown here when 46,000 shingles were hauled away in one load. It was probably the largest load of shingles ever shipped except by boat or train.

PALMER IS BLAMED

HOUSE BODY REPORTS ON SUGAR INVESTIGATION.

EXCEEDED POWER OF OFFICE

Asserts Maximum Price Fixed for Louisiana Crop Greater Than Quotations On Open Market.

Washington, D. C.—The sugar investigating committee, in a majority report presented to congress, declared that Attorney General Palmer had used his power as chief prosecuting officer of the government for the purpose of fixing maximum selling prices of sugar in Louisiana, and in so doing acted wholly without authority of law and in violation of his own construction of his official duty.

The report charged that the legalistic method adopted by the attorney general was wholly ineffective as a means of price control, and that it gave apparent governmental sanction to extremely high sugar prices, which excited the cupidity of Cuban producers and caused an advance in the Cuban market.

There were eight findings in the majority report, the resolution introduced by Representative Tinkham, republican, Massachusetts, calling for an investigation, concluding the committee inquiry to Louisiana transactions.

The attorney general was advised in October, 1919, the majority held, that excesive prices were being charged by Louisiana producers, and he directed United States Attorney Mooney to make every effort to reach an agreement with producers and refiners to establish a fair price for the new crop. After conferences with a committee representing producers, the report added, Mr. Mooney obtained an agreement with them not to sell over 17 and 18 cents. At that time, the report set forth, sugar was selling in the open market at New Orleans from 15 to 20 cents.

Declaring that the Louisiana crop was small, with a big demand, the majority charged that "certain producers in Louisiana obtained grossly excessive profits," as evidenced, it said, by the statement of Mr. Mooney that he was satisfied from his investigation that at 15 cents some producers would be making good profit, "and at 17 cents would be making a very large profit."

The majority report declared that while the attorney general considered 17 cents "unreasonable" and "rather high," he concurred "in making maximum prices of 17 and 18 cents," and instructed Mooney "to immediately prosecute any violator of this agreed price."

There were no prosecutions, the majority report said.

AMERICAN CAR VICTOR.

Chevrolet, Driving Automobile Made in This Country, Wins Race.

Indianapolis, Ind.—In the most spectacular finish witnessed on that Indianapolis speedway, Gaston Chevrolet, driving an American designed car, rode to victory in the eight renewal of the 500-mile automobile race May 30, before a record-breaking crowd of 125,000. His time was 5:40:16.14, an average of 88.16 miles an hour, the second best in the history of the event.

In addition to winning $20,000 first prize, Chevrolet also won approximately $5,500 more in lap prize competition and cash prizes offered by accessory firms. Rene Thomas got second place, covering the distance in 5:43:02.20. His average was 87.4 miles an hour. Tommy Milton was third and Jimmy Murphy of the Los Angeles speedway race, four.

All thrills came in the last three miles, when Ralph De Palma, the favorite, with a lead of ten miles, seemed certain of winning. But with victory within grasp, his car burst into flames and he was out of the race for a time, finally finishing fifth. Boyer, who led the first 250 miles, was put out of the race when his car skidded, overturned and crashed into a brick retaining wall. Neither Boyer nor his mechanician was seriously injured. No serious accidents marred the race, said to have been the greatest ever held on this speedway.

Frank L. Polk Resigns.

Washingto, D. C.—Under Secretary of State Frank L. Polk has tendered his resignation, which President Wilson has accepted.

Ditch Saves Nebraska Town.

Pender, Neb.—The heaviest rain in several years occurred here May 31, the total precipitation being 5½ inches. Logan river, the Pender drainage ditch and Rattlesnake creek all overflowed and the low land lying north and east of town were inundated. Considerable damage was done to crops and newly planted corn was badly washed, necessitating replanting. The drainage ditch constructed two years ago has again saved the town from one of the old time floods.

Two Cars Sugar Destroyed.

Cedar Rapids, Ia.—Two carloads of sugar and other merchandise valued at $100,000 were destroyed when an extra Chicago, Milwaukee & St. Paul freight train was derailed at Newhall.

Fearful of Bubonic Plague.

Mexico City.—All traffic by rail and steamship with Vera Cruz, except that over the railway to Jalapa, has been ordered suspended by the department of health of the city because of the presence of bubonic plague, says dispatches of newspapers here.

DAIRY HINTS

L-FED COW MAKES PROFIT

man Should See First of All That imal Has Necessary Material to Make Milk.

ecords of cow-testing associations show that it is the well-fed cow makes the profit. Often the man is keeping ten cows would make profit," says C. H. Eckles, chief e dairy division at University . "If he sold two or three of the st and gave all the feed to the s.

wners should see, first of all," Doctor Eckles, "that the dairy has the necessary raw material which to make milk. It requires g experience for some cattle own- o realize that it pays to feed a well. The fact is that the dairy is a milk factory and, like all fac- s, requires considerable of what illed in connection with business rprises 'overhead charges.'

he cow first takes out enough the ration to maintain her body, this is about the same whether s milking heavy or giving only a pounds. She can produce milk with that part of her ration that receives above what is required upport life. A cow of medium ity uses at least half of a full ra- to support her body, and the d half of her ration is the only she can use to produce milk. If does not receive a full ration, she the only thing possible to do— the milk flow to fit the feed."

ST FEEDS FOR DAIRY COW

d General Guide Is to Give All Roughage Animals Will Eat and Then Some Grain.

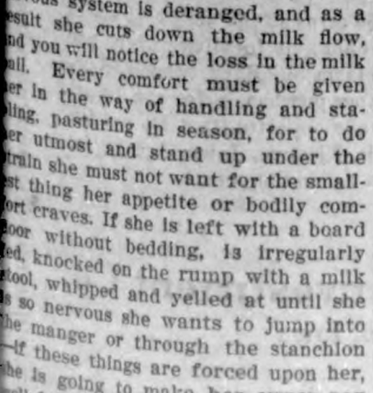
he feeds for dairy cows may be ded into two classes, roughages concentrates, says Prof. A. C. r of the department of dairying of ahoma A. and M. college, Stillwa- Silage and alfalfa hay, cane hay prairie hay are all rough feeds contain, with the exception of al- a hay, only a small amount of pro- . Some grains, and especially se containing a high protein con- t, should be fed. The cheapest pro- feeds are cottonseed meal and neal.

good general rule which can be d as a guide for feeding dairy cows o feed all the roughage the cows l eat and then feed the grain mix- e according to the milk flow, feed- Jersey cows one-third as many nds of grain per day as the cow s milk per day. Holstein cows, if one-fourth as many pounds of in as milk produced per day, will ally keep in full milk flow on this ount of grain.

W-GRADE COWS DON'T PAY

Profit in Raising Scrub Stock of Any Kind, Says Department of Agriculture.

t doesn't pay to grow low-grade or ub stock of any kind. This state- nt is made by the United States de- rtment of agriculture in connection th a series of tests on efficiency in rm management in the South. On 9 dairy farms it was found that 48



Typical "Piney Woods" Cow—Scrub.

rms receiving $50 and less income r cow had labor incomes 45 per cent low the general average. On the her hand, the 28 farms with re- ipts per cow of more than $120 had bor incomes 75 per cent above the erage and were the most profitable the group. The quality of the live ock kept is one of the 16 points out- ned by the department to be tested determining the efficiency of farm anagement. Full information con- rning the tests is embodied in a new rcular of the department.

URNISH COMFORT FOR COWS

nimal Must Be Treated Gently or Nervous System Is Deranged and Milk Flow Lowered.

The making of milk is a complex rocess for the cow, and while she is oing forward with it from day to ay she must be gently treated, or her ervous system is deranged, and as a esult she cuts down the milk flow, nd you will notice the loss in the milk ail. Every comfort must be given er in the way of handling and sta- ling, pasturing in season, for to do er utmost and stand up under the train she must not want for the small- st thing her appetite or bodily com- ort craves. If she is left with a board oor without bedding, is irregularly ed, knocked on the rump with a milk tool, whipped and yelled at until she s so nervous she wants to jump into he manger or through the stanchion —if these things are forced upon her, he is going to make her owner pay ell for the privilege he enjoys.

BETTER CORN YIELDS MAY BE OBTAINED BY CULTIVATING PROMPTLY WHEN NEEDED

This Arrangement Requires the Labor of Two Men.

(Prepared by the United States Department of Agriculture.)

Farm labor is scarce this year, and yields are likely to suffer unless available labor is utilized to the best advantage.

Unnecessary or misdirected cultivation is always a serious waste, but it is particularly so when man power is not adequate to crop requirements.

Make all labor count at full value. In cultivating the corn crop, say specialists, use a two-row cultivator if possible. It consumes only half as much man labor as a one-row cultivator and only one-fourth as much as the half-row cultivator or double shovel.

Cultivate when cultivation is needed, but refrain when it is not needed. Cultivation may be a waste of time or actually injurious under certain conditions. Cultivation by a hard-and-fast rule is likely to do more harm than good. Government corn specialists

The Same Ground Is Covered by This Arrangement and One Man Is Released for Other Work.

give the following general principles as to time and manner of cultivating corn:

Cultivation Has Three Objects.

There are three main purposes of cultivation—to store moisture, to destroy weeds, to warm the soil.

Keep the soil surface loose and open. This will let the rain soak in quickly and reduce waste. In fair weather it will prevent the subsoil from drying out. A properly cultivated surface soil will send moisture, laden with plant food, up through the corn roots and stalks to make ears.

Every weed in a cornfield is an enemy. It drinks up moisture and consumes plant food that should go to make corn kernels instead of weed seed. Destroy weeds when they appear. Attack them, if possible, in fair weather. You will then have the sun as a powerful ally.

Evaporation of moisture lowers temperature. A wet, evaporating soil surface is cold. A dry soil surface is warm. A loose soil surface dries quickly and the blanket of loose, dry soil then checks evaporation, drinks in sunshine, and becomes warm.

Watch your soil—its condition should determine when to cultivate. Do not let cracks form. They are holes through which valuable moisture escapes. Do not cultivate when your ground is dry or wet enough to form large clods. Clods tie up plant food so that the corn roots cannot use it.

Watch Soil and Plants.

Do not waste cultivation. Cultivation may be actually injurious when your soil is so dry and hard as to break into large dry clods.

Failure to cultivate promptly when it is needed to prevent the soil from becoming cracked, hard, or weedy will materially lessen the corn yield.

In addition to watching the soil, watch the plants. Their progress determines how you should cultivate.

While the plants are small, cultivate as deeply as the condition of the soil makes necessary. If your seed bed was not well prepared before planting, deep cultivation when the corn is small is desirable. Get your soil into open condition so that the corn roots can reach out for food.

After the plants become a foot high, shallow cultivation only should be given. The roots have spread out close under the surface of the soil and would be injured by deep cultivation. Never cultivate deeply close to corn plants after they are a foot high. Such cultivation will break feeding roots and cause injury to the plants.

Conserve Labor and Land.

Corn is the main support of the nation. Grown in every state of the Union, it exceeds any other crop in acreage, production, value, and multiplicity of uses.

When land and labor were abundant, production could be increased to meet increasing demands by planting more acres to corn. But the demand for corn is still increasing while available labor is decreasing. The only way to increase production is to make each acre yield more bushels of corn.

The average yield of corn per acre in the United States is about 27 bushels. With good seed, fair soil, and timely, careful cultivation, the yield can be doubled, the specialists say. That may be too much to strive for this year, but proper methods should enable you to obtain, with limited labor, as good yields as you formerly grew—unless, of course, you have always followed the best cultural methods.

MARKET REPORTS BY WIRE HELP FARMERS

Information Given Out by Government at Small Expense.

List of Telegraph Stations, Together With Other Valuable Information Will Be Sent to Those Desiring the Service.

Anyone desiring to secure market information issued by the bureau of markets, United States department of agriculture, more quickly than is possible through the mails may have all or a part of any report sent by telegraph, charges collect, from the nearest stations maintained by the bureau. A list of these stations, together with a blank for entering the details of the desired telegraphic service will be furnished upon application to the United States department of agriculture.

Some of the phrases used in these reports may require explanation.

"Market excited," represents a condition of uncertainty and a decided bullish tendency on the part of the seller.

"Market stronger," represents a condition of increasing confidence on the part of the seller, with the likelihood that the present demand will consume present supplies.

"Market strong." This represents a condition of firm confidence on the part of the seller. There may be a good demand and supplies may be relatively light, so that the seller is likely to stiffen the price at the first opportunity.

"Market active." This represents a condition of quick sale, good demand, and a generally healthy condition. There may be no decided change in prices, although it often indicates an upward trend.

"Market firm." This represents a condition of strong confidence in general conditions, resulting often in the strengthening of a price range, but seldom in actual price advances.

"Market steady." This represents a normal movement, with steady, consistent trading showing no decided price changes one way or the other.

"Market unsettled." This represents a condition of uncertainty on the part of sellers and usually indicates a weaker tendency.

"Market dull." Represents light trading and suggests a condition of uncertainty and possible depression.

"Market weak." This may be used in describing a condition of actual price decline, with the possibility of further decline, and represents a decided lack of confidence on the part of the seller.

"Market demoralized." This term is to be used only in very unusual cases and represents a condition when stock can not be moved at any price.

As used in the official market news reports, "market" represents the views of the seller and "demand" those of the buyer.

GENERAL FARM NOTES

Humus makes soil darker in color.

* * *

A farm is known by the fences it keeps.

* * *

Saving labor is as important as saving money.

* * *

Poultry and eggs make excellent creamery sidelines.

* * *

Cowpeas are a warm-weather crop which does splendidly on sandy soils.

LIVE STOCK

HIGH-CLASS HORSES NEEDED

No Provision Made for Future by Many Farmers Who Are Using Up Their Work Stock.

The thing most needed in the production of work horses for American farms is greater care in the selection of the stallion and the brood mare, say animal husbandry experts of the United States department of agriculture, who have been studying the present situation with respect to horses. Not only was there a net decrease of approximately 373,000 in the number of horses on farms on January 1, compared with a year ago, but the experts are of the opinion that there has been an even more marked decrease in the number of mares bred during 1919. The extent of this decrease cannot be accurately determined until the colt crop of 1920 is estimated. However, if the decline in breeding is as great as conditions now indicate, the country will be confronted with a seriously depleted supply of good horses within the next few years.

General Gates, a Morgan Stallion in Use at the Morgan Farm, Middlebury, Vt.

Many farmers are using up their work stock without making any provision for the future. Such a policy is short-sighted and will have serious results, according to department of agriculture representatives. The present need is to increase the percentage of efficient horses by careful selection of parents. One of the principal factors from which the market is suffering is the breeding of too many low-grade work animals. There is a strong demand for high-class horses, at good prices, the department says.

TUBERCULOSIS RAVAGES BIG

Information Shows That 59,547 Carcasses of Cattle Were Condemned on Inspection.

Tuberculosis was responsible for the condemnation of more cattle, slaughtered under federal meat inspection last year, than all other diseases combined. Information from the bureau of animal industry, United States department of agriculture, shows that 59,547 carcasses of cattle were condemned on post-morten inspection and of that number 37,600 were the result of tuberculosis. In addition 53,652 parts of cattle carcasses were condemned for the same cause.

The bureau points out that tuberculosis in cattle and hog cholera in swine are the two most serious contagious diseases affecting meat animals, and there is evidence that a heavy loss occurs on farms in addition to condemnations at establishments where government inspection is maintained. The department of agriculture is prepared to give information on the best methods of reducing the losses.

MORE HOGS WERE IMMUNIZED

Chief Purpose of Inspection Is to Permit Reshipment to Farms and Feed Yards.

An outstanding feature of federal activities for the control of hog cholera during the last year was the great increase in the number of swine immunized so that they might be distributed from public stockyards for purposes other than slaughter. The last report of the bureau of animal industry, United States department of agriculture, gives the number of feed hogs immunized as 614,673. This is a large increase over the preceding year. The chief purpose of the inspection and inoculation is to permit reshipment to farms and feeding yards for further growth or fattening without danger to herds in which they are introduced.

SHEEP DOGS IN QUARANTINE

Examination Showed Many of Imported Animals Were Infested With Various Parasites.

Because of the danger to live stock, especially sheep, of the gid tapeworm, imported sheep dogs are subjected to federal quarantine. Sheep dogs have been found to harbor that parasite. During the last fiscal year representatives of the United States department of agriculture examined 131 imported sheep dogs for the presence of parasites transmitted to live stock, and 69 were found to be infested with parasites of various kinds. Twenty-two showed the presence of tapeworms, and one of the tapeworms expelled by treatment proved to be of the dangerous gid variety.

LOVE AFFAIRS OF ROYALTY

Monarchs and Princes of Britain Figure Conspicuously in the Annals of Gallantry.

There is a great deal of talk to the effect that the prince of Wales will be allowed to follow the dictates of his heart in the matter of marriage, even if the lady he should choose be not of royal blood, remarks the Montreal Family Herald.

The rule requiring that royalty wed with royalty is not as old as is sometimes thought, for it was only in the time of George III. that the Royal Marriage act was passed. George III. himself made the daughter of a linen draper his wife, though she never was his queen.

In olden times, of course, the king married to cement an alliance with some foreign country, but happily there is no need for that form of diplomacy in these modern times.

Henry VIII.—"bluff King Hal"—once declared, "Where my heart goeth, there shall my hand be bestowed," and followed this up by wooing and eventually winning Anne Boleyn, the daughter of a knight and the descendant of a London apprentice. Very passionate was his wooing of his "own sweetheart."

The day after poor Anne's head fell under the executioner's axe on Tower green, he was standing at the altar with Jane Seymour, another knight's daughter, who became the mother of our sixth Edward.

When he was prince of Wales George IV. fell in love with Mrs. Fitzherbert, a beautiful widow. He was very ardent in his wooing, and the lady led him a pretty dance before she finally yielded and allowed him to make her his wife.

There is a charming frankness in her letters to her royal lover, in one of which she writes, in answer to a request to meet the prince after leaving the ballroom: "'Meet you!' What, you?—the prince of Wales, whose character in the annals of gallantry is too well known for me to suppose that after such a meeting I should have any character at all!"—London Telegraph.

Japanese Arts Being Forgotten.

A Japanese contributor to the Japan Advertiser has the following note on the forgotten arts of his country: "All the polite arts and accomplishments are in a bad way. How many middle school boys of today know how to drink tea in the forms of the tea ceremony? Flower arrangement is being fast forgotten. Versification, which once was one of the commonest acquirments of youths, is a hopeless mystery to the people of Taisho. The word politeness is not to be found in their lexicon. When at home they read cheap story magazines, and when going out they put themselves at the tender mercies of jammed tramcars. So they wax ever more dwarfed and penguin-footed, both physically and mentally. And the love of nature, of art and poetry, which was such a distinguished characteristic of the Yamato race is being quickly replaced by the love of money and accumulation."

Object Lessons in Fuel Saving.

The moving pictures are to be made use of as a means of educating people in the manner of making the most efficient use of fuel. Several 50-minute films have been made, showing good and bad operation in steam boiler plants, methods of testing boilers, and the like. These pictures will be available to each state in connection with its educational propaganda to conserve the fuel supply. A series of official bulletins on engineering phases of steam and fuel economics also is being prepared. They will include boiler and furnace testing, fuel gas analysis, saving steam in heating systems, boiler-room accounting system, saving steam and fuel in industrial plants, burning fine sizes of anthracite, boiler water treatment, oil burning and stoker operation.

Great Game Farm Planned.

When the legislature passes a bill of acceptance, Louisiana will have a veritable empire of the wild, stretching along the gulf of Mexico seventy-five miles and comprising 500 square miles.

The property consists of Marsh island with 78,000 acres of land, purchased by Mrs. Russell Sage and given to the state as a game refuge, and a tract of 85,000 acres in Vermillion and Cameron parishes, given by the Rockefeller foundation.

Adjoining Marsh island is the present state game farm on land belonging to the McIlhenny interests of 60,000 acres. Lying between is what is known as the grand Chenier tract of 85,000 acres, which the state expects to acquire in the near future.

She Knew It.

When a young man in my late 'teens I picked up a little telegraphy from a friend of mine. One evening we attended a club dance and after having danced with a particularly poor dancer, I drummed on the arm of my chair for my friend's benefit, "poor dancer, stepped all over me." To my utter surprise and humiliation the girl sitting next to me turned and said quietly, "You needn't advertise the fact."—Chicago Tribune.

Reducing the Surplus.

"Equal suffrage is a serious matter in England where the number of women entitled to vote far exceeds that of the men."

"Oh, they have removed that danger."

"How so?"

"No woman can vote who will not acknowledge that she is not under thirty."

A LETTER FOR WOMEN

From a Woman Whose Serious Illness Was Overcome by Lydia E. Pinkham's Vegetable Compound.

Garnett, Kas.—"I first took Lydia E. Pinkham's Vegetable Compound for a complete nervous breakdown following the birth of my oldest child. I got up too soon which caused serious female trouble. I was so weak that I was not able to be on my feet but very little and could not do my housework at all. I had a bad pain in my left side and it would pain terribly if I stepped off a curb-stone. One day one of your booklets was thrown in the yard and I read every word in it. There were so many who had been helped by your medicine that I wanted to try it and my husband went to town and got me a bottle. It seemed as though I felt relief after the second dose, so I kept on until I had taken five bottles and by that time I was as well as I could wish. About a year later I gave birth to a ten pound boy, and have had two more children since and my health has been fine. If I ever have trouble of any kind I am going to take your medicine for I give it all the praise for my good health. I always recommend your medicine whenever I can."—Mrs. EVA E. SHAY, Garnett, Kansas.

Few Bricks Came From England.

The late George Alfred Townsend established beyond controvedsy that, while there may have been a few isolated instances of cargoes of bricks from England, not one colonial house in fifty, for which such claim is made, included English bricks in its composition.—From a letter in the Baltimore Sun.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Finger-Prints in Babylon.

A group of valuable historic tablets from the excavations of the city of Babylon, bearing dates as far back as three and a half centuries before the Christian era, was recently secured. Several of the pieces carry the distinct prints of the fingers which molded them over 2,000 years ago.

The Round Up

And Frontier Day Celebration

North Iowa Fair Grounds

Mason City, Iowa

June 16-17-18

The most thrilling, sensational unrehearsed performance ever attempted, more than a hundred cowboys, cowgirls, ranchers and wranglers, direct from the great ranches of the West, competing for thousands of dollars in cash prizes and championship honors, in bronco busting, steer roping, wild steer riding, Cowboy relay races, trick and fancy roping, rifle shooting, bareback bronc riding, Cowgirl bronc riding, trick riding, wild steer bulldogging and other Cowboy sports.

A THRILL A MINUTE!

100 wild horses direct from the open ranges of the west.
75 untamable man-hating unbreakable out-law bucking horses.
120 wild, vicious and dangerous longhorn Mexican steers.
90 roping, saddle and cowhorses trained by master riders.

Not a Wild West Show but a Real Western Contest

You have heard of Pendleton, Ore., and Cheyenne, Wyo. This is your opportunity to see the same kind of a contest that has made these cities famous.

Mr. and Mrs. Jim Trumbels of Goodell, were Klemme visitors on Tuesday.

Chas. Yahnke and Henry Palmby from Minnesota, came Saturday and returned Tuesday after a visit here.

Mrs. Anna Anderson came from Garner last Wednesday noon and returned in the afternoon after a short visit with Klemme friends.

The Davis children of Mason City, are here staying at the Henry Freie home as their mother, Mrs. Fronie Davis, is ill.

Little Ersula Thomas has gone to Ames to spend the summer with her grandparents. Dr. and Mrs. Thomas took her there last week in the car.

Mrs. Clara Kirkwood left for Mason City Monday evening whee she will visit at the home of her sister for some time.

Miss Manilla Carlson left Monday for Ingram, Wis., where her parents now reside. She will spend her summer vacation there.

This vicinity has enjoyed some real summer weather the past few days. Let the good weather go on as the farmers need it to hustle along the crops.

After weeks of preparation all is ready for the fourty-fourth annual commencement at Des Moines west high school. Five days, beginning May 28, will be set apart for the services and ceremonies attendant upon the most important event of the school year. In the graduation roster there are 37 girls and 32 boys, a total of 69, which compares favorably with graduating classes in recent years. The number of boys graduating, however, is larger than in former years, as it seldom occurs that the number of boys almost equals the number of girls as is the case this year.

One of the unique libraries in Iowa is that of the State Historical Society at Iowa City. It is a large library numbering over 52,000 volumes, but its importance lies in the fact that it is so highly specialized. It is the largest collection in existence of materials on Iowa history, supported by thousands of volumes on the history of the Mississippi Valley. Many of these items are books published from fifty to one hundred, or even more, years ago, and are long out of print and very valuable. The library also contains a collection of books by Iowa authors, which fills considerable space on the shelves and is steadily increasing.

With no money and no credit and a commodity and labor market almost prohibitive, public service corporations in electric, gas and telephone lines in all parts of northeastern Iowa, are passing thru the most critical period of their existence. The continued existence or bankruptcy of these corporations will be determined by the financial developments of the next thirty days. With all elements combined against them the necessary relief is not certain. Orders have gone from the federal reserve bank at Chicago to member banks in Iowa to call in all avilable outstanding cash and grant no new loans or extensions.

Officers for the Southwestern Iowa Poultry Raisers Association were elected at Clarinda recently as follows: Pres., J. E. Summers; V. Pres, W. I. Carpenter; Treas. R. Nothwehr; Secy., J. V. Pfander. A boys and girls contest will be put on, the contestants to raise and exhibit 10 birds of the May hatch, all of one breed which they may either hatch or buy as baby chicks. The 10 heaviest birds will receive first prize and Swift & Co. have agreed to buy them at 50c per pound. Local firms will buy the second and third prize birds. Contestants may raise not to exceed 20 birds and select the ten best for exhibition.

Iowa farmers are 150,000 men short of requirements; that as a result of this, many acres of Iowa farm lands are taken out of tillage and put to pasture. These statements are said to have a serious influence with financial institutions which include banks, insurance and loan companies in the loan of money to the Iowa farmers. These excessive figures are not true. There has been a shortage of farm help as indicated by the reports from county farm agents to the state-federal employment service. Every county in the state is thoroly organized, there being one county farm agent for every county. Each of these agents is thoroly familiar with the conditions in his county.

The return of the bodies of Iowa soldiers who died overseas in the world war for burial in their home cemeteries has caused a number of undertakers in various Iowa towns to make inquiry of the state board of health as to the opening of the caskets at the funerals. Dr. G. H. Sumner, secretary of the state board of health has just issued a ruling on this subject. He states that the caskets may be opened at the places of business of the undertakers so that the immediate relatives may identify the body but should be immediately sealed again. If the remains are enclosed in a hermetically sealed casket or box and the casket or box is not opened at the service a public service may be held, Dr. Sumner states. All of the bodies being brought back are in hermetically sealed caskets.

Taintor has been selected by the Farm Bureau as one of the sites for the oats variety tests to be conducted this season. Plots of ground on the C. S. Longacre and C. M. Garner farms have been selected for the experiments. Mr. Longacre will set aside five one-acre plots of his oats field for the work. On one acre he will plant three bushels of Green Russian, on the adjoining acre three bushels of Iowa 103, on the next four bushels of Iowa 105 and on the fifth three bushels of Silver Mine. The test is being made to ascertain a comparison between early and late variety of oats. The plots will also be treated for smut, while the remainder of the field will not. Across the road on the Garner farm Iowa 103 will be grown besides 105, and Kherson varieties. The experiments will be watched with interest.

An immense deposit of road building gravel has been located several miles north of Bellevue and gives wonderful promise for the future. In what was undoubtedly the bed of the Mississippi river during a period in the glacial ages, there appears to be millions of tons of good road building gravel accessible by rail to a considerable group of counties that are known to be lacking in deposits of high class material of their own. These counties are Dubuque, Jackson, Clinton, Buchanan, Jones, Cedar and Linn.

Paul Grange and family left last week for Ruthven, Iowa, where they will spend their vacation visiting with Paul's folks.

Mrs. Wm. Howard and daughter Lois, went to Britt Tuesday for a visit with friends. Britt was formerly Mrs. Howard's home.

The primary election Monday was a rather tame affair as the farmers nd others were too busy to spend much time arguing politics.

Mrs. Elmer Bourne, Mrs. Jake Hegland and Mrs. Geo. Vance, all of Goodell, were Klemme visitors last Friday between trains.

Quite a number of the Klemme Masons went to Garner last Thursday afternoon where work was put on in the third degree and a big supper served.

Donald Nissen arrived from Sioux City Tuesday evening to spend the summer vacation with Klemme relatives and friends. Donald is attending school at Morningside College.

Ever hear of a wash-man?

Of course not! Ever since men have worn clothes the burden of washing them has fallen on women.

Why? Because no man would undertake the nerve-and-muscle-racking job.

Now, at last, a few men have atoned for the thoughtlessness of all the men of the past. They have made possible for the women a washday that is a real pleasure; no drudgery, no fatigue —no aching backs or parboiled hands. They have designed and built

BlueBird
ELECTRIC CLOTHES WASHER

With BlueBird, washday is over in an hour. The clothes have been perfectly cleansed, and because they have been handled so carefully in the large, smooth, copper tub, they will last five times longer than if they had been rubbed on a board. The cost of this washing in money, is two cents an hour for electric current; in human energy —the turning of a switch.

This land will be sold to the highest responsible bidder. $2,000.00 cash when sale is made, balance to be paid in 60 days thereafter. Sale will take place on farm 2 miles west and 1 mile south of Klemme, Iowa, June 16th, 1920, at 2 p. m.

J. A. Young, Auctioneer
F. A. Arnold, Clerk
adv. 4 wks. A. C. Lau and Wm. Grieman, Administrators

The annual meeting of the Story County Farm bureau will be held at Nevada on December 10. New farm bureau officers will be elected at that time and some action will probably be taken regarding the selection of a new county agent to succeed Mr. Espe. Espe is resigning in order to go to Ames to be associated with Wm. Barr in the business of raising blooded stock, hogs in particular.

Great Wonder I Am, the famous Duroc Jersey boar owned by James Vipond & Sons, is dead. He was four and one-half years old and weighed 1,10d pounds. The Viponds say they have a son of Great Wonder I Am that promises to be just as good. He will head their herd. This hog was purchased from J. D. Waltermeyer, Melbourne, Ia., when a year old for $725. The owners have refused offers of $50,000 for him.

Tractor schools of two weeks duration will be opened at Iowa State College, commencing January 12, 1920. The schools is for those who are desirous of gaining greater efficiency in the use of the farm tractor and is open to men and women above 17 years of age who have had at least a common school education. Courses will be open on following dates: January 12, January 26, February 16, March 1, and March 15.

The corn crop in Floyd county has been above the average in both quality and quantity. The average yield has been 40 bushels to the acre, but a few farms have had yields as high as 75, 80 and 100 bushels to the acre. In a few places the corn was badly injured earlier in the year and the yield was very poor. The husking is nearly over. There has been more feeding to hogs than ever before this fall. Fall plowing is practically over in this county.

S. R. Ranshaw, a well known stock farmers of Mahaska county, marketed three cars of cattle on the Chicago market recently which weighed 1433 pounds on an average. He received $19.23 per hundred weight for them. The shipment consisted of Angus, Shorthorn and Herefords. Mr. Ranshaw bought these steers last March when they averaged 1065 pounds. They were fed in a dry lot on a ration of corn, clover, hay, oats and molasses feed.

Atlantic has been selected as the headquarters for southwest Iowa for the work of the bureau of animal industry of the federal department of agriculture. Dr. J. M. Jehle, at Grinnell, has been sent there to take charge of the work. Heretofore veterinarians working under direction of the bureau have been established at Shelby and Red Oak. Under the new arrangement the territory which has been served from these points will hereafter be served from Atlantic. The work of Dr. Jehle will be almost exclusively devoted to fighting hog cholera which has made its appearance in several herds in Iowa.

Sheep raisers in Plymouth county have been losing some sheep through depradations of wolves. W. E. Baker, well known in this county as a sheep raiser, has lost a number in this way. Mr. Baker recently shipped a load of his ewes to Omaha. The ewes had been bred to lamb during the latter part of last February and March. Mr. Baker says that a few sheep if allowed to run with cattle will undoubtedly not be bothered much from wolves and dogs, for cattle as a general thing will keep them out of the pasture. He thinks a few sheep take as much time as a larger group and therefore raises them on a large scale.

A most interesting experiment has been tried out in Wapello county recently with the County Nurse, home demonstration agent and ten volunteer workers in charge. 2,189 children have been weighed and measured. It was found that forty per cent of these children were underweight, as shown by their physical record cards. During September 137 rural children were weighed. Of the 137 only five were normal. As a result of this work two nutrition classes have been started in Ottumwa schools, one at Jefferson and one at the Douglas schools. Lunches are being served in the schools at 10:15 every morning consisting of a dish of well cooked oatmeal and graham crackers.

Fifty spotted Poland China hogs, selected from one of the best herds in the state will be offered for sale at Kalona by Frank Friese. Mr. Friese is widely known as a breeder of Spotted Polands, but has never before held a public auction, always disposing of his surplus stock at private sale and at joint sales. Mr. Friese was a contributor at the sale last month, when an aged sow, owned by R. G. Wykoff sold for $7,000. At the coming sale Mr. Friese will show the junior yearling boar that heads his herd. This boar won the first prize in his class at the Kansas and Nebraska state fairs, first at Iowa and Nebraska state fairs and the West Liberty fair, second at the third at the National Swine Show.

Seven hundred dollars an acre is the price paid for the W. L. Hastings farm, two miles north of Snow's corner, a figure believed to be the highest yet recorded for Poweshiek county farms of the size, eighty acres. Francis Schmitz is the buyer of the famous property and the total sum involved was $56,000—for eighty acres. The farm, of course, is a dandy and Mr. Schmitz feels that he got every dollar's worth, although Mr. Hastings, who has owned the place for only two years, has made about $300 an acre on his investment.

Our customers feel at home in this bank.

They are convinced of its safety, they are satisfied with its service, they have found here a cordial, helpful sympathy with their interests and their ideals.

WANTED IT AS A WARNING

Old Gentleman Had Particular Use for That Peculiarly Atrocious-Looking Beetle.

On the counter of the Christmas bazaar stood all the usual horrors which an unscrupulous world insists on giving the poor kiddies as "toys." There were animals, birds and insects which resembled nothing save the creatures of a particularly fierce nightmare.

The customer steadied himself by a chair and, after a careful selection, picked up one specially terrible beetle.

"I'll take that," he told the assistant. "How much is it?"

"Half a dollar!" replied the girl. "Is it for your little boy?"

"No; I want to take it to a dinner party I have to attend."

"Whatever for?" exclaimed the girl, surprised out of her carefully acquired calm.

"Well, I'm going to stand it in front of me on the table when the drinks are going round and when I see two beetles—well, it's time to go home!"

Open Bribery.

Jane had just commenced school, and the teacher asked her a question in numbers which she was unable to answer. She walked up to the teacher and said in a low voice: "If you won't ask me that I'll give you some of my animal crackers."

Mount McKinley Sinking.

Mount McKinley, the Oregon mountain, is sinking with the weight of ages. Within the last several years, when the peak shrugged its rocky shoulders in earthquakes, the loftiest mountain in North America has subsided at least 500 feet from its original altitude of 20,400 feet. Such was the assertion of Herschel C. Parker, geologist and mining engineer, who first scaled Mount McKinley in 1912.

NOBLE RELICS OF THE PAST

Triumphal Arch of Titus, at Rome, and the Colosseum, Are Splendid in Their Ruin.

The triumphal arch of Titus in Rome was built in 70 A. D., to commemorate the defeat of the Jews, and was dedicated to the Emperor Titus after his death. It is adorned with fine sculptures in relief. On the frieze outside is a sacrificial procession and on the inner side Titus is seen crowned by Victory in a quadriga driven by Roma. On another part of the arch is a triumphal procession of Jews, the Table of Shew Bread and the seven-branched candlestick. In the center of the vaulting the consecrated emperor is seen being carried to heaven by an eagle.

In 1882 the arch was a set of ruins, and some of the medieval additions were removed and it was partly reconstructed. The colosseum, with seats for 50,000 spectators, originally called the Flavian amphitheater, was completed by Titus in the year 80 A. D., and derives its later name, probably, from a colossal statue of Nero. The colosseum is now all in ruins.

Each Has Special Gift.

Degrees infinite of luster there must always be, but the weakest among us has a gift, however seemingly trivial, which is peculiar to him, and which, worthily used, will be a gift, also, to his race forever.—John Ruskin.

CHAPTER XI—Continued.

—14—

While I was debating the situation in my cell, a keeper opened the door.

"You're wanted downstairs," he announced.

"What is it?" I asked, wonderingly.

"You've got a visitor."

"Who?" I questioned eagerly. Could it, I wondered, be Barbara? Had my sternly repressed longing to see her in some way communicated itself to her through the ether and impelled her to throw caution to the winds and come to the prison to see me?

"I don't know," the keeper answered. "It's a man. I don't know who he is."

A man. Who could it be? In all the monotonous time I had been behind the bars, only two men had come to see me, Gorman and McGregor. It could not be either of them, for both were well known to the prison attendants. As I hastened down the long corridor past the dismal row of barred doors, I was revolving in my mind the possibilities of my caller's identity.

Who could it be? Spurred on by my curiosity, I hastened into the counsel room. There sat my great-uncle Rufus.

He looked in much better physical condition than when I had last seen him, more vigorous and healthier. His skin was browned from exposure to the sun and wind, and his eyes were clearer and brighter. As I studied his face I could trace no vestige there of the terrible fear that had seemed to obsess him on the last occasion of our meeting.

For a moment we eyed each other without speaking. I was wondering—and well I think I might—whether the suspicions I had at times in regard to him had been wholly without foundation. Could it be possible that the crafty, miserly old chap was the master mind at the bottom of all the mystery and plotting? As my previous suspicions came up in my mind I determined to be wary in what I said to him. The fires of anger toward him began to kindle within me as I looked at him. I felt that it was his fault that I was locked up here.

Meanwhile he had been studying me. His keen old eyes had surveyed me from head to foot, returning to rest fixedly on my face, as though he was trying to read my thoughts. I wondered what was passing in his mind. Was he inwardly chortling at the plight in which he found me? Was he distressed to see a blood-relative behind the bars? Did he believe that I was guilty of the murder of Daisy Lutan? How had he learned of my arrest? What was his purpose in coming to see me? But his expression was unfathomable, so far as I was concerned.

He was the first to speak.

"So—you didn't do it, did you?"

"Of course not," I retorted indignantly. "Did you suspect that I was a murderer?"

He shook his head disparagingly, smiling an inscrutable smile.

"The evidence against you certainly looks convincing."

"I don't care," I exclaimed with heat. "I'm as innocent of the killing of Daisy Lutan as"—I hesitated—"as you are."

He nodded his head approvingly.

"There, there, boy, don't get excited. Of course I know you are innocent. You're of the Gaston blood, and there never was a Gaston that was a murderer or a lawbreaker. I never suspected you for a single second. I was off in the Maine woods twenty miles from a railroad. I didn't see a newspaper until day before yesterday evening. My eye just happened to catch a paragraph about the Granddeck. It was about your trial for the murder of Miss Lutan being set for next week. That was the first I had heard about it. I traveled all night to get to you."

My feelings toward him underwent a sudden revulsion. There was every evidence of sincerity in his manner. The knowledge that he believed in me was the most welcome news I had heard since my incarceration.

"We'll soon have you out of here," he went on, "now that I am here to help you. I got you into this, and I'll get you out of it if it takes every cent I possess. There's more than one fight left in old Rufus yet. Now start at the very beginning and tell me everything that has happened since I have been away."

What a relief it was to talk freely! With my mind once and for all cleared of all suspicion toward my old great-uncle, I began my story. Somehow the tie of blood is strong in time of trouble. I found it vastly easier to talk with my aged relative than it had been with either Gorman or my lawyer.

I began with my chance meeting with Barbara Bradford in the park as the blackmailers awaited her there. I told everything that had followed with the utmost detail, even to such small matters as my first meeting with Wick and the undue curiosity he had exhibited as to my acquaintance with the Bradfords. I recited the story of my unaccoutable discharge in disgrace from my position and told of Gorman's unavailing efforts to learn the reason.

"The day I was discharged," I went on, "I had drawn out from the savings bank all my money with the purpose of sending it to my mother to whom I was in debt. I still had it with me when I arrived home at the apartment and I decided to put it in the wall safe, to which, you recall, you had given me the combination. Out of mere curiosity"—I made this confession with a blush of shame—"I had inspected the contents of the safe the day of my arrival and had examined the two caskets. The minute I opened the safe this second time I saw that it had been looted."

"What," exclaimed my great-uncle, starting from his seat, "not the pearls!"

I nodded.

"Everything. The casket with the pearls was gone. The other with the trinkets was undisturbed."

"Good heavens!" he exclaimed. "My wife's pearls stolen! Why, boy, I paid a hundred and fifty thousand dollars for that string. Tell me everything about it—everything, at once."

I could only repeat what I had told him already. When I had opened the safe on Sunday the pearls were there. When I had opened it again on the following Saturday the pearls were gone.

"Of course you told the police at once."

I explained to him why I had not done so, and my reason seemed to satisfy him.

"Go on with your story," he calmly directed. He seemed to have himself well in hand again. After the first shock at hearing of the loss of the pearls he showed no sign of emotion or displeasure.

He listened intently as I told him of my second meeting with Barbara Bradford when I had learned that the Bradford wall safe had been looted, too, and the papers abstracted concerning the annulment of Claire's first marriage. He nodded his head slightly when I told him of the anonymous notes found on the floor in both apartments.

"Did you hear the whispers, too?" he questioned.

"Yes," I answered, "I heard them several times. Barbara has heard them, and the laundress, too."

A look of unspeakable relief came over his face.

"I'm glad to know that others have heard them besides myself. When a man gets old his nerves sometimes play him strange pranks. The whispers seemed so unreal and incredible that I feared that I was suffering from the hallucinations of old age. Now that I know that the whispers are real, there is nothing to fear."

"And," I observed, "I believe, I am almost positive, I can explain the origin of the whispers."

"Tell me," he cried, his manner now entirely changed. He seemed elated at discovering that his brain was still dependable. It was as if a burden had suddenly been lifted from him.

Here was my opportunity. Gorman had utterly refused to credit my story of a secret passage and had ridiculed it. There had been no way that I could prove it, nor was it possible for Gorman to have investigated the walls of the Granddeck, even if he had placed any credence in my story. With my great-uncle it was different. As the occupant of the apartment he would have every right and opportunity to explore and verify my statements. I told him how, while speculating as to the origin of the whispers, I had observed the discrepancy in the measurements of the apartment and had verified my deduction that there was space enough for a passageway big enough for a man to traverse in the wall between the room I had occupied and the long hall. He listened intently as I described the plan of the rooms in detail and nodded his approval.

"And what is more," I added triumphantly, "Barbara Bradford and I had just discovered an opening into it by pushing the wall panel in my room back and then sliding it along. We were inspecting it when we heard the shot in the apartment below. I closed the panel and ran downstairs and have had no opportunity since to investigate, but I am sure the passage is there. I am convinced that it was the sound of voices there that made the whispers. I suspect it was used by whoever left the anonymous notes in the room, and that the person or persons who looted the safes entered and escaped by that means. I would not be surprised if it was not by means of this passageway that the murderer of Miss Lutan escaped, after he had left his revolver in the drawer of my dresser."

My great-uncle shook his head perplexedly.

"It sounds improbable—too much like a romance. They do not build modern apartment buildings with secret passageways. Space is far too valuable, and besides, all plans have to be filed with the city's bureau of buildings."

"But it's there," I cried desperately. "I saw it. Barbara Bradford saw it."

"Well," he comforted me, "we will soon find out about it. I have many matters to attend to today, but tomorrow I shall go up to the apartment, and if there is such a passageway I shall find it and see where it leads."

"Then you are not staying in the apartment?"

"No, I shall remain at a hotel until my wife returns."

At this juncture a prison attendant approached and informed him that the time of his visit was up. Imperiously my great-uncle waved the man away. Somehow the possession of great wealth carries with it a manner of expecting obedience from every one that generally is successful. The man withdrew, muttering to himself and left us undisturbed.

"Now tell me about the murder," Mr. Gaston directed.

Concisely I stated the facts as I knew them. It was a shock to him to hear that at least two of the trusted attendants at the Granddeck, Wick and the telephone girl, were of the criminal class.

"Tut, tut, tut," he exclaimed. "Just think of it! That's the worst of living in a big city. You never know what sort of people there are about you. I'll call up Mr. Kent, the owner of the building, this afternoon and have him get rid of them at once."

"Please don't," I cried. "Gorman and I are both convinced that Wick and the girl know something about the murder. Don't do anything to let them know that they are under suspicion. So long as they are employed at the Granddeck we know where to lay hands on them when we want them."

"That's so," he admitted. "I'll say nothing for the present. As I won't be living there until after this is

"You're a Wonderful Liar, You Are," Was His Surly Greeting.

cleared up, it can make no difference. But, look here, young man, why doesn't this Bradford girl come forward and clear you of this charge? She was with you at the time. She knows you didn't do it."

"Because I will not permit her to do so," I replied with heat. "I love Barbara Bradford!"

"That's it, is it?" he commented, giving me a quizzical glance from under his bushy white eyebrows.

"I wouldn't for all the world," I continued, "have her mixed up in this. Her sister is to be married tomorrow, and the scandal might stop the wedding; and besides I'm not going to have it known that she was there alone with me that night in my rooms. I love her too well for that. Some day I am going to ask her to be my wife."

He raised his eyebrows.

"And on what do you expect to marry?" he inquired.

"Of course I have said nothing as yet," I hastened to explain; "I've nothing to offer her."

"No," he agreed, "you've nothing to offer her"—and then with a meaning glance he added a little word that in spite of my predicament made my heart sing with joy and stirred my expectations mightily—"you've nothing to offer her—yet.

"But cheer up," he advised as a parting word of counsel, "I'll get in touch with Gorman and your lawyer as soon as I leave here today, and tomorrow we will find out about that secret passage you think you have discovered."

Compunction that I ever had doubted the integrity of his purpose toward me smote as he departed. I tried to think of something to say to express my gratitude to him, to let him know how much I appreciated his coming at once to my aid, but the only thing I could think of slipped from my lips:

"I am sorry about the pearls."

"So am I," he answered grimly, and went his way.

One thing now I certainly was sure of—his was not the master-mind that had planned all the criminal deeds, but the mystery of the Granddeck was still as much of a mystery as ever.

CHAPTER XII.

—

It was the second day after this—the day set for Claire Bradford's wedding—that in the morning, much earlier than customary, Gorman came to the prison to see m

I met him jubilantly. My uncle's expected return to the city and generous and convincing offers of had filled me with new hope. trusted, too, that old Rufus' keen quickly would discover the secret sageway now that I had indicated him where to look for it. I was confidently expecting that the resulting velopments quickly would free from even the suspicion of being murderer. The minute, however, I laid eyes on Gorman I knew something had gone wrong.

"What is it?" I cried. "What's matter now?"

"You're a wonderful liar, you was his surly greeting, "with your dreams about secret passageways stolen pearls."

"What do you mean?" I replied had not the least idea what he getting at.

"You almost had me believing he said savagely. "If it wasn't knew that Wick and that girl up were crooks I would wash my of the whole affair."

"I don't understand," I answered dignantly. "Every statement I made to you has been the abs truth."

"Yes, it has!" he sneered.

Ordinarily I would have resented anyone talking to me in this manner but I felt that under no circumstances could I afford to quarrel with Gorman. He was the only friend I had in whole city that I could rely on, cepting of course my great-uncle contented myself with merely reasoning:

"I tell you it is all true—every of it."

"The old man's home—old Rufus he responded irrelevantly.

"I know," I replied. "I saw him a few minutes day before yesterday. He promised to do everything in power to free me as speedily as possible. After talking with him I confident that he had nothing ever to do with any part of the Have you seen him?"

"Yes," said Gorman, significantly. "I've seen him. He looked me up terday and we went over the case gether. He suggested that we go to the Granddeck and look over apartment, and we did. The min we got in he went to the wall safe opened it up and—"

Gorman stopped short and looked at me. It seemed to me that there were doubt and distrust in his expression.

"Go on," I cried, "what did find?"

"We found," he said, speaking slowly and putting special emphasis on third word, "two jewel boxes the one with the pearls and the other one."

"What," I cried, aghast at this credible bit of news, "two jewel cases!"

"Sure we did," he announced triumphantly. "And the pearls were there as safe as when the old went away. Now what have you to say to that?"

What could I say?

I knew as positively as I knew that I was alive that on that Saturday when I had opened the wall safe and put away my money there had been but one of the jewel boxes there. I had taken it out and had examined the contents again. With the aid of a lighted match I had explored every corner of the steel-lined receptacle. The box containing the pearls and the rest of the valuables in the Gaston collection was gone. Now the pearls were safely back there again. How could that be explained? The mystery was too much for me.

There was not the slightest reason for me to believe that Gorman was lying to me now. I had found him in all our dealings straightforward and candid. If he said he had seen great uncle Rufus find the pearls there it must be so, but how could they have got there? Could it be possible, I wondered, that subconsciously, burdened with the responsibility of the custody of such costly gems, I might have risen in my sleep and in a somnolent state removed the pearls to some other hiding place. No, I decided, that theory was too preposterous and absurd for even a moment's consideration. If I had done that in my sleep I must also have restored them to the safe again in my sleep. It was far more likely that the thief, becoming alarmed over the publicity brought to the Granddeck by the murder, had been afraid to attempt to dispose of gems so well-known as the Gaston pearls and had restored them in the same mysterious way that he had abstracted them. I suggested this theory to Garman.

(TO BE CONTINUED.)

Lead and Steel.

Lead is said to act like steel at ordinary temperatures in liquid air, will serve as a helical spring, for example. This behavior of soft non-metallic metals is interesting. It shows a very important temperature is. as iron is soft and inelastic at a red color, so lead is dull and soft ordinary temperatures, for it is on its way to be melted.

Home Town Helps

GARDEN CITIES HELP TRAFFIC

Transference of Part of Population Relieves Congestion on Cars in London.

Dense morning fogs have combined with the now chronic congestion of passenger traffic to make Londoners realize too vividly the inconveniences of an over centralized population, remarks the London Times. London is undoubtedly too large for health, for happiness and for economical living and production; and, although the amenities of life in this and other great cities have in some ways been increased by providing dormitories at a distance from the work room, the problem of daily transit has been proportionately intensified.

Much is to be said for the garden suburb, but even more for the garden city. The two are often confused or falsely identified, but from the point of view of transport the difference between is fundamental. Garden suburbs represent an extension of the daily traffic of a great town to a more distant circumference; garden cities, a permanent transference of a section of the population to a less crowded center.

Every inhabitant of a garden suburb who works in the city contributes twice a day his or her share to the ever increasing problem of traffic congestion. The colonist of a garden city, on the other hand, definitely relieves the overcrowded centers of the duty of transporting him to and from his work and catering for him and his. Dwellers in garden suburbs are excursionists; the garden citizen is an emigrant. It is of the nature of the community to which he belongs that he shall not only sup, sleep, breakfast and occasionally play lawn tennis and grow beans or roses there, but shall work there as well; and for his reward as a pioneer he escapes the strains and stretches of the straphanger.

TOWNS' NEED OF WOODLOT

Would Be Paying Proposition in These Days of Railroad Strikes and Coal Shortages.

Is there a little woodlot in your town? Zurich, Switzerland, has had one working for it for six centuries and it is still paying big dividends. There is a great big lesson in this, the American Forestry association of Washington says, in these days of railroad strikes and coal shortages.

Many travelers are familiar with the "town forests" of Europe. One of the best known of these is the communal forest belonging to the city of Zurich, in Switzerland, which has an area of 2,840 acres, yielding on the average an annual income of nearly $20,000, or about $7.00 per acre; and this is the most remarkable because most of this income is derived from the sale of firewood, which is perhaps, the cheapest product of a forest.

This tract of forest land has been under management since the year 1309, and it has been steadily increasing in value during these six centuries, writes Prof. John Bentley, Jr., of Cornell, in the American Forestry Magazine. In this country the number of towns and cities that are practicing forestry is still small, and their efforts have been confined chiefly to the protection of watersheds from which the city's water supply is drawn.

Billboards Versus Beauty.

Thus it comes about that people who ride out into the country, eager for the rest and refreshment which only the open country can give, find every field and every little hill dotted by V-shaped signs, erected in the most approved fashion, and ornamented with the approved moldings and machine-made cornices, while the beautiful vistas that might otherwise make each turn in the road a new delight are cut short by successive examples of the approved "head-on" "showings." One needs but to test his own sensations on such a motor ride to know how completely the billboard men are stifling his power to enjoy "natural scenic beauty spots." All their scruples have not preserved to him his native rights in the open country.—Christian Science Monitor.

Where Did the Colors Go?

John's mother was washing some of his garments. Holding up one of his new wash suits, she exclaimed: "Oh, dear, dear, John, the colors in your pretty new suit ran." John, who was having much trouble in controlling a fiery steed in the form of a broom handle, apparently paid little attention. A little while later, he came to his mother, and said in a much puzzled manner: "Mother, I can't find 'em any place." "Find what, dear?" asked the mother. "Why, the colors," answered John. "You said they ran. Where did they go?"

Long Felt Want.

Bill—I'm going to start a new society right away.

Phil—For what purpose?

Bill—To induce motion picture producers to use only big and difficult words in picture subtitles, so that the ignoramuses who read them aloud will be foiled.—Film Fun.

JOHN'S BOAST

By GRACE E. RILEY.

(©, 1920, by McClure Newspaper Syndicate.)

John and Paul Deane married two sisters, Mary and Elizabeth Paulison, two sisters as different in tastes and disposition as were the two brothers. It was John's boast that from his earliest youth he had known what his wife should be and it was only after long and careful deliberation that he finally married Mary. Paul, on the other hand, gay, laughter-loving Paul, fell in love at first sight with Elizabeth Paulison and their courtship was as brief as was their engagement, for Paul, suddenly transferred to his firm's Boston office, insisted upon taking her with him. She felt that no more glorious lot could befall a girl than life with Paul, and the end of their first year together found her secure in this conviction.

It was at this time that John and Mary wrote that they would spend one night in Boston on their way East, John having been called there on business. In a year of separation Elizabeth had quite forgotten Mary's prophecy that if she married in haste she would repent at leisure—a prophecy that had rankled when spoken; and from Paul's memory had faded John's attitude when he heard of Paul's hurried marriage, and the guests received a warm welcome. Paul called a taxi and soon they were on their way to the unpretentious apartment to which Paul had taken his bride.

"This is my first automobile ride since I married," said Elizabeth, her voice expressing delight, yet not conveying an impression of regret.

"Paul should have waited to marry until he could give you such things, Elizabeth," John said with a smile on his lips which did not reach his eyes. Somehow John's smiles never did reach his eyes.

Elizabeth laughed gayly and turned the conversation adroitly to other things.

"How about it, dear, should we have waited until I had an automobile income?"

"If we had, Paulus, it would have brought the first sorrow into my life."

Paul held her close for a moment. The shadow had fled, and when John and Mary joined them they were laughing at the antics of a diminutive kitten.

"Elizabeth, that cat! How can you keep such a pest?"

"Pest! Why, Paul adores that kitten."

John's voice interrupted.

"You children have a pleasant little home here, but I don't like the idea of Elizabeth doing her own work."

"Well, John, old man, suppose we leave the girls to gossip and take in a show?"

Before John could reply, Mary's crisp, cool tones answered for him.

"John has given up the theater since we married, and I had hoped you had too, Paul."

Elizabeth's laugh saved the situation.

"Go on, save Paul if you can, Mary, I've given up," she said as she disappeared into the kitchen, where Mary soon followed her. In the old days Elizabeth's dexterity in the kitchen had been a negligible quantity and the ease with which she now prepared dinner opened Mary's eyes.

"Oh, I thrive on work, John—just see how fast we will get these dishes done while you boys smoke!" Again Mary's crisp, cool tones informed them that John had given up smoking since he married.

As the evening advanced it became evident that now John was married his pleasures must first be Mary's. The evening was a trying one and the Paul Deanes breathed a sigh of relief when their guests left the next afternoon. It was more than a year before they met again.

Then one day, quite unannounced, John came.

"But where's Mary?" asked Elizabeth, as she welcomed him.

"Mary could not come." Elizabeth felt a sense of strain as he uttered these words.

That evening, at John's suggestion, they attended a theater, and when they arrived home, Elizabeth retired leaving the men smoking and talking business until a late hour.

The day following John's departure. Elizabeth was surprised by Mary's appearance; a white, anxious Mary, whose first question was of John.

"He has been here, but he has gone. What is the matter, Mary?"

"Oh, Elizabeth, I have failed; failed utterly, and I don't know why."

Elizabeth rose to the occasion.

"Mary, when you visited us last year I knew you were doomed to failure. You promised to love, honor and obey when you married John; but it is he that has obeyed. Go back, Mary, make your home a delight to your husband; learn to laugh; learn to play; instead of trying to change John's tastes, make them yours—then you will find happiness for yourself and for him."

Mary sat silent a long time. Then: "You are right, Elizabeth," she said, "and you are wise. I will go back this afternoon."

That night when Elizabeth told Paul of Mary's coming, she saw the dawn of a smile in his eyes.

"Why are you laughing, Paul?"

"Thinking of John's boast that he knew what his wife should do."

"Well?"

"It took you, Miss Frivolity, to mold her into his ideal, but John will never know it."

Prepare for Tomorrow!

IF not your own tomorrow—the tomorrow of those dependent upon you.

On request we will send you descriptive circulars of the $100 and $500 First Mortgage 6% Real Estate Serial Notes we offer for the employment of money for a fixed period of time for the purpose of deriving a fixed income.

The notes are owned by the Mercantile Trust Company, having been purchased by us after a thorough investigation of the security — both physical and moral.

The Mercantile Trust Company is a member of the Federal Reserve System, and by reason of such membership is under the supervision of the United States Government. This means that every loan we make, including "First Mortgage Real Estate Serial Loans," is subject to examination by Government Bank Examiners. These loans are also examined by the St. Louis Clearing House Bank Examiners and the official Bank Examiners of both the State of Missouri and the State of Illinois.

Real Estate Serial Notes secured by a First Deed of Trust have been sold by us to investors in every part of the United States and many foreign countries, *without the loss of one dollar, principal or interest, to the investor.* Send for descriptive Circulars of First Mortgage 6% Real Estate Serial Notes we are now offering.

Address all inquiries or orders for real estate notes to the Real Estate Loan Department.

Ugly, Unsightly Pimples Are Signals of Bad Blood

Give Heed to the Warning.

Pimples on the face and other parts of the body are warnings from Nature that your blood is sluggish and impoverished. Sometimes they foretell eczema, boils, blisters, scaly eruptions and other skin disorders that burn like flames of fire.

They mean that your blood needs S. S. S. to cleanse it of these accumulations that cause unlimited trouble. This remedy is the greatest vegetable blood purifier known, and contains no minerals or chemicals to injure the most delicate skin.

Get a bottle of S. S. S. today, and get rid of those unsightly and disfiguring pimples, and other skin irritations. If you wish special medical advice, you can obtain it without charge by writing to Medical Director, 105 Swift Laboratory, Atlanta, Ga.

LEARNED LESSON OF THRIFT

Boys and Girls of New Jersey Town Have Made Record of Which They Are Proud.

If there has been less talk of the servant problem in Bridgeton, New Jersey, than elsewhere, it is quite explainable. Not to be outdone by their European sisters and brothers in matters of thrift and industry, 25 youngsters in that town have invested $1,000 in United States thrift stamps this year, thanks to their own hard work. Boys and girls alike have welcomed opportunities of doing remunerative dishwashing, sweeping, dusting, store clerking, baby-minding, errand-running, etc., with the goal of economy symbolized by government stamps ahead of them. The more ambitious have undertaken cutting weeds, carrying coal, sifting ashes, selling papers, raising chickens, cleaning pavements, and some have even won prizes to add to their savings. Having found that time can be converted into money it is doubtful whether these boys will again find the street corner a worthwhile place for spending idle hours, or the girls be content to waste periods in porch chatter.

Harnessing the Sun's Rays.

That the rays of the sun can be used for curing many skin diseases, and that sun baths are beneficial to those who are in perfect health, is well known. The problem of utilizing this agency in northern countries where the hours of sunshine are few has been solved, he claims, by a British doctor, M. J. de Thezac.

His invention consists of a revolving cabin, combined with a huge lens for concentrating the rays on any part of the inclosed patient's body. This installation has just been tested in the neighborhood of Quimper, France.—Popular Science Monthly.

The Proper Place.

"I say Pat, did you impress that mustard plaster on your mind?"

"No, sor, on the back of me neck."

WILLING TO STRIKE BARGAIN

Wife Quite Ready to Abandon Style if Her Hubby Would Only Do His Part.

She was one of those dressy women who always wear the latest thing, whether it suits her or not.

One day her hat touched her nose; next week it rested on the back of her neck. Her last frock barely covered her shoe tops, her new ones huddled round her ankles. Oh, she was always "it!"

Her husband was no passive resister. Regularly he raised his voice in protest at each craving after fashion. But the one thing that really annoyed him was when she suddenly scraped her hair straight back from her forehead on top and trained it down like window curtains on each side of her face.

"Look here!" he said in exasperation. "Can't I induce you to stop wearing your hair over your ears?"

"Certainly!" she replied, with a charming smile. "Buy me diamond earrings."

Safe as a Bank.

In examination in bankruptcy proceedings Mrs. Helen Hunt, widow, of Lee Bankroad, Birmingham, England, said she did not keep a banking account.

"Where did you keep your money?"

"In a safe place outside the house, with a faithful friend."

"Who was that?"

"The dog," said Mrs. Hunt. "I used to put the money in a cash-box under the kennel, and nobody dared go near the kennel."

"Nearly £3,000 ($15,000) under a dog's kennel?"

"Yes," said Mrs. Hunt. She did not think a bank was safer.

Both Had Fits.

Wife—I never had a better fit in a dress.

Prayed for Cure Finds it After 10 Years

Food Would Sour and Boil —Teeth Like Chalk

Mr. Herbert M. Gessner writes from his home in Berlin, N. H.:

I had stomach trouble over ten years; kept getting worse. I tried everything for relief but it came back worse than ever. Last fall I got awfully bad; could only eat light loaf bread and tea. In January I got so bad that what I would eat would sour and boil; my teeth would be like chalk. I suffered terribly. I prayed every day for something to cure me. One day I read about EATONIC and told my wife to get me a box at the drug store as I was going to work at 4 p. m. I took one-third of it and began to feel relief; when it was three-fourths gone, I felt fine and when it was used up I had no pains. Wife got me another box but I have felt the pain but twice. I used five tablets out of the new box and I have no more stomach trouble. Now I write to tell you how thankful I am that I heard of EATONIC. I feel like a new man; I eat what I like, drink plenty of water, and it never hurts me at all.

DON'T DESPAIR

If you are troubled with pains or aches; feel tired; have headache, indigestion, insomnia; painful passage of urine, you will find relief in

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles and National Remedy of Holland since 1696. Three sizes, all druggists. Guaranteed.

WESTERN GROCER COMPANY

Mr. A. J. Peterson came from Seneca, Illinois, last Thursday to be present at the wedding of Clarence Johnson and Bernice Gimer, and also to spend a week's vacation visiting with Klemme friends—particularly "a friend."

While playing ball Sunday Walt Schultz slipped and fell on his arm, injuring it to some extent. It was thought at first the arm was fractured bu it is severey sprained or a tissue torn loose from the bone. However, the accident is quite painful and Walt has a very sore arm for a while.

Miss Hilmer, of Cincinnati, Ohio, came Friday and remained in Klemme until Tuesday evening. Miss Hilmer is a deaconess from the college at Cincinnati and while here preached a sermon in the First Methodist Church and also in Liberty Church. She was also here to get students for the school.

C. H. Lenz left his car here when he moved to Wisconsin in March, with the idea of returning later to drive it back. He came last Friday for that purpose and Chris Blumer accompanied him on the trip home. Chris got back to Klemme Monday afternoon and said they made the trip without any trouble.

Alice and Alyth Rodda came last Wednesday from Havelock, Iowa, and spent a couple of days at the Elmer Fuller home and also at the John Goll home in the country. The girls are twins and are as near alike as two peas. It is said that even their parents can not tell them apart so we leave it to our readers if they don't think the girls mde a fine appearance.

Everybody's Doing It.

Said the near-cynic, "When a woman goes shopping these days, although she may be the most sedate little lady in the world, she can't help hitting the high places."

Depends on Circumstances.

"One should always serve from the left side. That's right, I believe." "All depends. In serving subpenas you sneak up from the rear."

Pills for Everything.

"Bredren," said the old colored preacher, "when yo' livah's out of ordah what is good fo' it? Livah pills. When yo' system is run down, what is good fo' it? Tonic pills. Fo' othah bodily ills yo' take othah pills; but my deah bredren, dere's only one kin' of pills for a soul dat's out of ordah, an dat's de goss-pill."

Flying Moth Not Destructive.

When a woman opens a closet and a moth flies out she thinks, as a rule, that the moth has been eating her clothes. As a matter of fact, however, the creature does its eating in the grub stage, and is harmless when it has become a flying thing—save that it will produce a ravenous progeny.

Playing a Deep Game.

Ethel had been shopping with her mother. When they returned home she was tired and hungry, and, prompted by a desire for a good meal, she said: "Mamma, let's play I'm your guest and am going to stay for dinner."

A BETTER LUBRICANT

-FROM THE FORMULA OF A MOTOR COMPANY

When the Cylinders Heat to 350 Degrees

When speeding pistons raise the temperature of the cylinder walls to the utmost degree—when even the most perfect cooling system cannot alone absorb the intense heat—then you appreciate the value of a good lubricant with its protecting film between the swiftly moving metal surfaces.

If you could see within the cylinder of your automobile, truck or tractor with the engine operating at top speed, you would realize that a tremendous heat was generated above the piston head and in the combustion chamber—as high as 2800 degrees. And 350 degrees is only the average working temperature of the cylinder walls.

To withstand these extreme conditions of heat and friction and prevent all possibility of damage to the motor, you should be sure that your motor oil is the best that you can obtain.

There is only one kind of oil that is the best obtainable and that is one made from Pennsylvania crude. Any oil expert will tell you this.

HERMOLINE is made strictly from the best Pennsylvania crude. It retains its body under this terrific heat—it does not break down or become thinned—it preserves its prefect oil seal under conditions which would be destructive to any other kind of a lubricant.

If you want greater safety, greater economy and greater efficiency for your motor car, truck or tractor, let us fill your crank case next time with HERMOLINE. Then watch the performance of the motor and note the increased pep and power. The better way is to buy the can or barrel and keep it in your garage.

Put it to any test you like, HERMOLINE is the lubricant you should insist on.

E. G. ELL, Klemme, Iowa

The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane.

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.
The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove oil value.

edication of Liberty Churcn

G DEDICATION CELEBRATION AT LIBERTY TOWNSHIP CHURCH LAST SUNDAY

The program as printed in the lemme Times last week was carried t in the Dedication Services at the berty Methodist Church, beginning riday evening, with a service Satur- y afternoon and the big day and ogram was Sunday. Dr. Mossman, esident of Morningside College, ve a wonderful address in the orning whch was enjoyed by all. hen came the big dinner at the noon ur when several hundred people had nner in the new church dining room the basement of the church. It was cessary to have several large tables e length of the room to accommo- te the crowd and they were di- ded into groups and when one oup had feasted another immedi- ely took their place and in this way were served in about an hour and half. In the afternoon and evening ere were more addresses, music and nging nd between times general vis- ng with old time friends who came enjoy the dedication.

We would like to give a description the new church as it now is, but we feel unable to describe it in words suitable and can merely say that the building is one of the finest churches —if not the best in this part of the country. It is equipped with its own electric lght and water service, has a modern heating plant, a large dining room, kitchen, rest room in the basement, and a large auditorium on the first floor. The entire church has been remodeled and refinished thru-out, and presents a beautiful appearance, costing over $8,000.00 in the remodeling, all of which was cleared up on the dedication day, of what remained, and the church is fully free from debt and has money in the treasury, and the people of Liberty township can feel justly proud of the feat they have accomplished in the building of their new church home. We also feel that the pastor, Rev. A. H. Meyer, should share in the honor of having this new structure as it was mainly through his energy and ambition that the church was built as he has devoted a great deal of time overseeing the work and getting the money together that it might stand free from debt.

The people have now a church home that should be amply large enough to do for many years to come and they are to be congratulated for the interest they have taken in the project.

SENATOR WARREN G. HARDING OF OHIO, GIVEN NOMINATION FOR PRESIDENCY AT CHICAGO CONVENTION

Gov. Calvin Coolidge, of Mass., Will Be Vice-President

The great Republican convention at Chicago came to a close after ten ballots had been taken with the final wind-up that Senator Harding of Ohio, was given the nominaton for Presidency and Gov. Coolidge, of Mass., named Vice-President.

There was a hard fight all the way through the convention and a neck to neck race was on between Wood and Lowden. When the ninth ballot was taken it became apparent that neither Lowden nor Wood could be nominated and so a land slide brought in Harding ahead of both Wood and Lowden. The tenth ballot named Harding almost unanimous as nominated for the Presidency with the exception of Wisconsin, who held out all the way through the convention with LaFollette. The ninth ballot gave the following: Lowden 121½, Wood 249, Johnson 82, Harding 692½. The tenth ballot read as follows: Wood 156, Lowden 11, Johnson 80 4-5, Harding 692½. Coolidge received 674 votes for the Vice-Presidency. The Lowden delegates were released in the ninth to turn for Harding as likewise were the Wood delegates as is shown above. Wisconsin blocked the move for a unanimous vote or the last ballot would have been a complete landslde for Harding.

It is now a safe bet that Harding of Ohio, will be the next gentleman to reside in the White House chair of honor. It is well.

SUNDAY SCHOOL CLASSES HAVE PICNIC

Last Friday the various classes of the Methodist Episcopal church drove out to the Avery Grove where they staged a big picnic. The doings was the outcome of the Sunday School class contest which was put on some time ago between the adults and the young peoples class.. The "feed" was on the older members who were the losers of the contest. The affair lasted all day and began with games of all kinds and then a fine big "feed" at noon, after which more games and then a fast ball game between the young fellows and the older ones with the result that the older class was badly beaten. The secret of the young people's success in the game was that they ran in a "dark horse pitcher" from somewhere and who fanned out the old bunch as fast as they could get to bat. The day was ideal and all thoroughly enjoyed themselves.

"JACK" WELLEMEYER HOOKS A BIG ONE

"Jack" Wellemeyer should be given all honors for hooking the biggest one so far this year. The one he hooked was exactly as big as himself —right to the ounce. "Jack" was making a swell cast for the scaly tribe and the cast was going out fine, until "Jack's" finger got mixed up with the hooks some way and he found himself hooked to the other end of the line where he expected to hook a fish. The hook ran through "Jack's finger and he had to carry finger, line, hook, sinker and all to the doctor where he had the fishing tackle removed from his anatomy. "Jack" has a rather sore finger where the hook entered one side and the doctor had to cut it out from the other side, but at that "Jack" claims he go the biggest sucker yet caught in the creek this year—himself.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock. Sunday School at the close of preaching service at 11:00 o'clock. There will be no service in the evening. All are requested to meet with us at the Liberty Township M. E. church. This will be the closing service of The Women's Foreign Missionary Society Convention which has its opening service begnnng Thursday evenng and every evening throughout the week. Mrs. Dow will speak at the morning service.

A. H. Meyer, Pastor

Captures Five Wolves

ROSCOE WILES DIGS OUT DEN OF WOLVES

Roscoe Wiles discovered a large hole dug in the side of a ditch last week and at once had a hunch that it was a wolf den. Sunday morning he went to the place with another man and they were about to dig out the hole when they saw a wolf on top of a hill about forty rods away. Roscoe waited until the wolf went over the ridge and then crawled upon it, but as the wolf was some distance away he only succeeded in wounding it and it ran away but he gave chase and fired another shot crippling it further but it got away. The first time he shot he noticed a number of cubs with the old wolf, but they ran away. A little later he went back to the den and dug ou five young cubs. Monday he went to the court house at Garner to collect the bounty on one which he had killed. The other four little wolves he will keep awhiie as there is quite a demand for wolves for parks at different places. Roscoe also has seventeen Red Foxes. Most of the foxes he also dug out and with the ones he now has he intends to raise quite a number as their fur is quite valuable. He had the young wolves with him in Klememe Monday and we had a glimpse of the little fellows and they looked real cute. Mr. Wiles claims they are easily tamed when caught young like the four he had with him.

BALL GAME SUNDAY AT THE PARK

The Klemme Rockford Socks will stage another game at the ball park north of town Sunday afternoon when they meet the fast Liberty Bells for the second time. Both teams have spruced up considerably and it looks as though both teams will put up a big battle to hold the honors. The Klemme boys will make their first appearance that day in their new uniforms. Go out and take a look at the game and watch the "Socks ring out the Liberty Bells."

CAMP MEETING BEGINS NEXT WEEK

The annual camp meeting of the Northwest Iowa Conference will begin at the Camp grounds at Garner next Tuesday, the 22nd of June. It is anticipated that the meeting will be bigger and better than ever this year and already quite a number of Klemme people have planned to attend, some for a day and some for a longer period. The meetings will come to a close Sunday evening, June 27th.

Warning to Car Drivers

That Ordinance No. 35 will be enforced. Automobile and Motorcycle dr vers are warned not to drive over 15 miles per hour and with cut-outs closed, and shall drive according to all the other rules of said Ordinance.

F. GRUETZMACHER,
adv-1-w Mayor.

FARMERS PLEASE NOTICE

As I intend to leave for the west to spend the summer, I have temporarily turned over the management of the Shippers' Association to Albert Schmidt. From now on when you have cattle or hogs to ship through the Association, phone No. 4305 and he will take care of your stock.

Yours truly,
Adv.-2-p. WM. BACHMAN

Raymond White and wife enjoyed quite a lot of company Sunday when they received a visit from his brother, Wilson White and family, and Mrs. White's parents, Mr. and Mrs. C. P. Juhl, all of Miller, who autoed to Klemme Sunday. Raymond White's little boy, Elwood, who had been there visiting his grandparents, came with them. Mrs. Raymond White and Elwood also returned with them to Miller for several weeks' vacation and visiting.

Mr. Wm. Howard and son Sam, and Mrs. Walters, drove to Britt Saturday and remained for Sunday. Mrs. Howard and daughter, Lois, who were visiting at Britt, returned to Klemme with them Sunday evenng.

Local News

Drs. Reuber & Zinn have their building all completed now and will have everything all installed in a few days. They will then have an up-to-date and convenient office.

Mr. and Mrs. Ed Kahrs drove to Nevada, Iowa, Sunday, for a visit with relatives. They did not encounter any rain or mud on their way back until they got a little south of Klemme.

Miss Manilla Carlson left for Granville, Illinois, to visit her grandmother, and to joi nher sister Miss Annabelle. From there they will go to Ingram, Wisconsin, to spend her vacation there.

The band gave their concert on Wellemeyer's vacant lot last Wednesday evening. They intend to have their concerts up on the street in the future.

Dr. Missman is now completely moved into his new rooms over the State Savings Bank. Monday he moved the office safe and the waste basket up there and now you will find him located in his new modern equipped office.

W. E. Buell, of Sioux City, and V. D. Cobb, of Indianola, were here to meet with the council last Thursday evening to help get the sewer project started. Elsewhere in this issue you will find more pertaining to the Klemme Sewer District No. 1.

J. N. Day and family drove to Garner last Thursday evening with Donald Nissen who took the Milwaukee train east from there to Lake Geneva Wis., where he will take a couple of weeks' outing and a study course at the Y. M. C. A. camping grounds.

Mr. and Mrs. Clarence Johnson returned from their honeymoon trip Sunday morning and have now gone to housekeeping on the farm east of town. They went to Elgin and Chicago, Illinois, and also visited other Illinois and Iowa points on their trip.

Mr. and Mrs. W. J. Rodda and twin daughters, Alice and Alyth, autoed from Havelock, Iowa, Sunday, to spend the day at the John Goll home. These are the same twin girls who were visiting in Klemme a short time ago.

COUNTRY ITEMS

Jay Griggs of Goodell, returned last Thursday from a trip to Steele, North Dakota. He reports that everything is looking fine and some things are ahead of ours.

Johnnie Kearney of Williams, Iowa, is visiting at the Ed. Hemingway home.

Mr. Henry Boose is the proud owner of a new Dort car.

Jay Griggs and family autoed over to Clear Lake Sunday.

V. A. Cook is the owner of a new Ford car.

Jay Click of Gowry, Iowa, was a guest at the Jay Griggs home last week.

L. W. Sherwood of Iowa Falls, was visiting at the home of his son, W. L. Sherwood.

Mr. and Mrs. Ben Greiman were callers at the F. R. Chase home Sunday.

Mrs. Jay Griggs is the proud owner of eight nice goslings, the offsprings of a wild gander and a tame goose.

O. D. Church is the owner of a new Overland car.

—A Subscriber

From early morning until midnight, July 3rd, Belmond will entertain visitors with a continual round of fun and patriotic excitement. Patriotic address, music by 25 piece band, street sports, games, baseball game, big free street attractions, big carnival company, Ferris Wheel, Merry—Go-round, bowery dancing, spectacular display of fireworks. It will be one Grand Old Independence Day and Belmond invites all her friends and neighbors to come and join in the big time. Watch this paper next week. adv1c

Everybody's Doing It.

Said the near-cynic, "When a woman goes shopping these days, although she may be the most sedate little lady in the world, she can't help hitting the high places."

Round-Up Extended To Monday Account Of Rain

Due to the fact that proper lighting facilities can not be secured, it has been deemed entirely too dangerous to engage such feats as bronko riding, bulldogging, steer roping, etc., at night and, therefore, the management of the Mason City Round Up has decided to eliminate all evening performances. Realizing, however, that many people desire to witness this marvelous range production they have consented to extend the contest one day, and in place of the former dates the Round Up will be staged every afternoon from 2 to 5 P. M., at the Iowa fair grounds on June 16th, 17th, 18th and 19th. In place of the two days preliminaries the third day will be the semi-finals and Saturday wll be the grand finals.

Over three hundred head of bucking bronkos, long horn Texas steers, bucking mules, high school and educated horses and other stock has been shipped into the city and with approximately two hundred cowboys and cowgirls participating in the numerous events, the people of this country will have the opportunity of witnessing the most stupendous production of range sports ever presented to the American public.

The office of Secretary Barber, is swamped with requests for reservations and from present indications, Mason City will house during Round Up week the greatest gathering of people ever assembled in this section of the country.—Adv. 1-w.

Note—Since setting the above type we were notified that Monday, June 21 would last day of Rouud Up,

King David's Militia.

King David organized a national militia, divided into 12 regiments, under their respective officers, each of which was called out for one month in the year. At the head of the army when in active service he appointed a commander in chief.

The Oldest Joke.

Johnny Hoy claims that the oldest joke is one about the farmer's wife who went to the door and found a agent. "Can I sell you an exterminator for vermin?" asked the agent. "No," said the farmer's wife, who had been pestered to death with agents. "We have all the vermin we need."—Milwaukee Sentinel.

True.

"I understand that once he served a short term in prison. Yet he has redeemed himself and lived it down absolutely." "Well he would have lived it down, if it wasn't for the fools like you and me who continually keep digging it up for conversation purposes."

The Faith Cure.

"Mamma," said little Betty, "my kitty is sick and I have been trying to give her some of my medicine, but she won't take it." "Of course not," replied her mother. "Cats never take medicine when they are ill." "Well, I declare!" exclaimed Betty. "Who'd think a little kitten like that would use the faith cure?"

Agriculture Best.

Agriculture for an honorable and high-minded man is the best of all occupations and arts by which men procure the means of living.—Xenophon.

Importance of Vitamines.

Protein, fat and carbohydrates are the three elements, chemically speaking, that every human being needs. In addition to these there are minute constituents which are not usually considered, but which have a tremendous importance in making diet palatable and beneficial. These constituents are present in most kinds of fresh fruit and green vegetables. They are referred to as vitamines or accessory factors

Not Supernatural at All.

There used to be a belief that rats never went on a ship that was destined to founder at sea. This has a fine supernatural ring; but, as a matter of fact, has a good deal of truth at the bottom. Unseaworthy vessels in the olden days were likely to be leaky and contain much bilge-water. The rats would naturally abandon such damp quarters for a drier berth.

Great Expectations.

A mosquito fleet may be expected to come up to the scratch.—Wall Street Journal.

Proud of His Ignorance.

"Do you know anything about the stock market?" "Not a thing. That's one place where I am sure ignorance is bliss."

The House of Whispers

By WILLIAM JOHNSTON

Copyright by Little, Brown & Co.

CHAPTER XII—Continued.
—15—

"Nothing doing," he sneered. "Any crook daring enough to steal those pearls, once he had got his hands on them, never would return them. Pearls are too easily disposed of. You've got to dig up a better explanation than that."

"What did Mr. Gaston think? What did he say when he found them there?"

"He had nothing to say. He was so tickled at finding them again that he hustled with them right away to the safe deposit vaults and did not rest until he had them safely locked up. He took both jewel cases with him and made me go along with him to protect them."

"Didn't you look at all for the secret passageway I told you about?"

"Still dreaming about that, are you?" scoffed Gorman. "No, we didn't. On the way up to the Granddeck the old man spoke about it and I told him that in my opinion there was nothing to it. After he recovered the pearls he was too excited to think about anything else. It seemed to break him all up, and I took him back to his hotel and left him there. He said he had some writing to do, and that he would meet me at my office at noon today."

"How do you account for the return of the pearls?" I cried desperately. "What's your theory about them?"

"I haven't any," he replied. "It's up to you to explain it. Maybe by the time I come to see you tomorrow you'll have thought up a new yarn to spin."

"Please, please," I called after him as he turned away, "do look tomorrow and see if that secret passage is not where I said it was."

He walked away without answering. Back once more in my cell, I stretched myself despondently on my little iron cot, and closing my eyes, tried to concentrate my thoughts on an attempt to solve this new mystery, which I could plainly see had all but destroyed Gorman's faith in my honesty. I must solve it if I was to retain him in aiding me to get free, yet the whole thing seemed inexplicable. I could hardly blame him for doubting me. The great value of the pearls had been motive enough for their theft, but what possible motive could there have been for the thief returning them?

With a shock it came to me, too, that the restoration of the pearls practically upset the whole theory of my defense. If I could have established the fact of this theft, a jury might be persuaded to believe my tale of anonymous notes, mysterious whispers, and a secret passageway by which the thief had gained access to the apartment, but without the motive of theft, my story, unsupported by witnesses and uncorroborated by other evidence, surely would be incredible of belief.

I had just one hope left. Old Rufus must find that secret passageway and see whither it led. That, with our knowledge of the identity of the telephone girl and the possibility of proving Gorman's belief that Wick was an ex-convict, seemed likely to be my only salvation. Old Rufus must find that passageway. He must! He must!

For hours I lay there racking my brains over the unsolvable problems. My luncheon was brought in, but I waved it away untouched. Wearily I wondered whether the recovery of the pearls had destroyed my aged relative's faith in me, as it seemed to have destroyed Gorman's. I could hardly blame him if he doubted me after finding that my story of the disappearance of the pearls was apparently untrue. In my brief experience as a prisoner I had learned all too well the bitter fact that once a man is discredited, henceforth no one trusts him. If Rufus Gaston failed me at this juncture I did not see how I could possibly extricate myself unscathed from the web that unseeen hands had so skillfully and maliciously woven around me. The only ray of comfort that I could find anywhere in the whole situation was in my firm belief that though old Rufus and Gorman and the whole world doubted me, Barbara Bradford—my Barbara, I ventured to call her in my innermost heart—would continue to believe in me. She would be sure, no matter how much appearances went against me, that I was telling the truth. Barbara and I knew. Even if she had not known that I could not possibly have fired the shot that killed Miss Lutan, I was certain that she still would have trusted me.

Thinking about Barbara I recalled that it was the day of her sister's wedding. I had one of the prison attendants get me the evening papers to see what they had to say about it, for I was fearful lest some breath of scandal at the last moment involving the Bradfords might bring about a postponement. Eagerly I was hoping that nothing had happened to prevent the marriage taking place. With the fortunes of her sister assured and her mother's future safe, I realized that the course of my relations with Barbara would be likely to be much smoother sailing, provided of course that I was acquitted. In the few chats I had had with her, I had realized that wealth and luxury and social position meant nothing to Barbara's happiness. She was the sort of girl who for a man she loved gladly would brave poverty, hardship, everything—a sincere, true-hearted woman with a clear vision of the real values of existence.

My messenger returned with the newspapers, and as I picked them up, everything went black. "Millionaire Gaston Found Murdered," was the startling headline that flashed before me, right there in the column next to the account of the Bradford wedding.

The sinister effect of this terrible news dawned on me instantly. With my great-uncle Rufus dead, without the possibility of his corroborating any part of my story, my case was hopeless, desperate. Unquestionably it would mean that I would be found guilty of murder and sentenced to death in the electric chair. As soon as I could sufficiently compose myself I read every word there was in the newspapers about this new tragedy, smiling grimly at the thought that at least they could not blame this murder on me.

Mr. Gaston, it appeared, had come to the Granddeck about ten o'clock in the morning and had gone at once to his apartment. On his arrival he had been greeted by the telephone girl and had informed her that he was only in the city for a few days and was staying at a hotel. He had added that he would not be occupying the apartment for several weeks until his wife's return to the city. About half-past twelve there had come a telephone call for him. The girl had been unable to get any response from the apartment. Knowing that he had not gone out, and fearing that he might have had a sudden attack of illness, she had become alarmed and notified Mr. Wick, the superintendent.

The superintendent, the account continued, had summoned Mr. Henry Kent, the owner of the Granddeck apartments. Together they had gone to Mr. Gaston's rooms. Being unable to get any reply to repeated rings and knocks they had finally let themselves in with a pass key in possession of the owner of the building.

In his study in the rear of the apartment they were horrified to find old Rufus Gaston, fully clad, lying on the floor, face down, stone dead. A great wound on the back of his head showed that he had been killed, probably instantly, by a terrific blow from some sort of a blunt instrument. A search of the rooms failed to show any sort of a weapon.

The police theory was that the crime was undoubtedly the work of a burglar who had been trapped by the return of Mr. Gaston so unexpectedly to his apartment. How the murderer escaped after attacking Mr. Gaston was a puzzle to the detectives at work on the case. The superintendent of the building expressed the opinion that the murderer had gained access in the guise of a meter inspector. Attendants in the hall recalled that there had been such a man in the building that morning. As he wore the usual uniform and presented the customary credentials, he had been permitted to enter and leave the building unmolested.

There followed a long review of Rufus Gaston's business career and an estimate of some of his extensive holdings in stocks, bonds and real estate,

"Millionaire Gaston Found Murdered," Was the Startling Headline That Flashed Before Me.

from which it appeared that his fortune was likely to run to over ten million dollars. It was with some surprise that I learned that a score or more of years ago the old man apparently had been a powerful figure in the life of the metropolis, active both in its business and social life.

What interested me most was the attention paid to the remarkable coincidence that only a few weeks before a murder had taken place in the apartment just below, under practically the same circumstances. The police, the account stated, were inclined to believe that the murderer was one of the gang to which young Nelson, now in prison charged with the murder of Miss Lutan, undoubtedly belonged. Their theory was that a burglar gang succeeded in planting Nelson in the apartment as a caretaker, and that this enabled them to get their bearings in the building and provide themselves with false keys for ransacking the rooms at their leisure. The guilt of young Nelson, the police say, is established beyond question, and they are hopeful of being able to round up his associates.

There was also a brief interview with Wick, in which he was quoted as saying:

"I was suspicious of Nelson from the start and tried to keep an eye on him. He was very secretive about his comings and goings and was always prying about trying to learn something about the other tenants. How Mr. Gaston came to employ him as caretaker I never learned, but it would be no hard matter for a slick young crook like him to impose on so old a man as Mr. Gaston with a cock and bull story."

I sniffed indignantly as I read this. I knew that Wick was deliberately trying to still further discredit me. I recalled that he himself had told me that Mr. Gaston had mentioned our relationship. It was obvious that he was deliberately withholding this information with a sinister purpose.

That Wick knew well who had killed Rufus Gaston, just as he knew who had shot Daisy Lutan, I was morally certain. I was inclined to agree with Gorman that Wick himself was not the murderer. The fact that he was of a cowardly and cringing nature seemed to argue against associating him actively with crimes of violence. Yet the virulent way in which he was adding to the evidence against me showed plainly that he was industriously engaged in masking the real murderer.

Who could the murderer be? I was confident that the same person who had killed Miss Lutan had killed my great-uncle. I could only conjecture as to the motive. The police theory that it was burglary seemed as logical as any. The more I pondered over the matter the more firmly I became convinced that there was a numerous criminal band at the back of it all. No one man or two men could carry out all the deviltry, even with the help of the telephone girl.

I recalled, too, how I had been skillfully shadowed, work that evidently required organization and employees. I was convinced that Wick and the telephone girl were only two—more than likely two minor members—of a powerful body of criminals. That it was this same sinister force that had caused my discharge from the office I was equally sure. This sort of thing took brains—far bigger brains than Wick gave any evidence of possessing.

A peculiar apathy came over me as I finished reading the account. Never before had I so fully understood how thoroughly an innocent man could be damned by circumstantial evidence. I knew—Barbara knew—that I was absolutely innocent. I doubted much if we could get anyone else to believe it.

The cunning web had been woven with such malicious thoroughness that escape seemed impossible. What was the use of my fighting further?

CHAPTER XIII.

Coming as it did as a dire climax to all my other troubles, the shock of old Rufus Gaston's murder sent me into an apathetic state from which it seemed impossible for me to arouse myself. Without hope and even without interest I dully awaited the approach of my trial for murder.

While there never had been an opportunity for any bond of affection to become established between my aged relative and myself—in fact, I had seen him only three or four times in my whole life, and then only for brief periods—still his unexpected and dreadful end had bereft me of practically every hope of being acquitted of the absurd charge against me. Wick, it was plain, intended to disclaim all knowledge of my relationship to Mr. Gaston, and now there was no one else to explain how I happened to be living in the building at the time of Miss Lutan's murder. Unfortunately I had destroyed both Mr. Gaston's letter to me and the note from my mother which had first told me of the old man's intention. My great-aunt, I learned from the newspapers, had been completely prostrated by the tragedy and had been unable to come to the funeral. The shock of the news of her husband's violent end had left her in a very critical condition. It seemed to have wholly deranged her aged brain, and the physicians summoned to the Maine camp where she was refused to permit her to be removed from there or to let anyone talk with her, declaring that the least excitement of any sort would be apt to have fatal results.

To be sure there was my mother, who could prove my relationship, but I felt there was little use of dragging her into it. On reading of her uncle's death she had hastened on from the West to attend his funeral and had been puzzled and alarmed by not finding me there. All the time I had been in prison I had been writing her my usual weekly letter, affecting a cheerfulness I was far from feeling and telling her nothing of what had happened. Her letters to me, addressed to the Granddeck, had been forwarded by the post office, so that until after she arrived in the city she knew nothing of my plight. It had been my hope that I would be able to conceal everything from her until after I had been triumphantly acquitted. If I were not she would know the worst soon enough.

When she first learned, or from what source, of my predicament I was unaware. I did not even know of her presence in the city until the day after my great-uncle's funeral, when—just twenty-four hours before my trial was to begin—a keeper brought me word that she was waiting downstairs to see me.

I steeled myself for the interview with her. Naturally I expected that she would be terribly horror stricken and shocked at my plight, but what her attitude toward me would be I could not conjecture. I fully expected nothing but reproaches from her. She had been so opposed to my coming to

"Oh, My Boy, My Boy!" She Had Cried as She Saw Me, "I Know You Didn't Do It."

New York that I felt certain that she would insist that my conduct must be responsible for my being where I now was. For years, it seemed to me, the relations between my mother and myself had been nothing but continuous misunderstandings. To my great amazement and bewilderment not an unkind word nor the suggestion of a reproachful thought came from her lips.

"Oh, my boy, my boy," she had cried as she saw me, "I know you didn't do it. I know my boy is innocent! What can I do to help you?"

In that glorious, wonderful moment of reaction all resentment I had felt toward her forever vanished. I had one sacred, unforgettable glimpse of the eternal greatness of the Mother-heart, ever ready to forgive, ever quick to comprehend, ever prompt to aid. For one sweet hour we talked together, more understandingly than ever before in our lives. Freely and fully I told her everything, even to my wonderful but hopeless love for Barbara Bradford. She was willing, anxious, eager to aid me—but what was there that she could do?—what was there that anyone could do?

It was hopeless for a lone woman of limited means, unacquainted with the big city and unused to its ways, to attempt to battle against such powerful and desperate criminals as were concerned in the far-reaching plot to make me the scapegoat of their heinous misdeeds. I could only advise her that she see McGregor and Gorman and be guided by what they suggested.

When the morning of my trial actually arrived I entered the courtroom in a state of dull apathy. The night before I had not slept at all. I had spent all the black hours reviewing my life, especially the last year, thinking with what high hopes and great expectations I had come to the metropolis and how miserably everything had turned out for me. Step by step I had reviewed the events that had brought me, discredited, all but friendless, all but penniless, into this dismal courtroom accused of a horrible, cowardly deed, seeking to see wherein I might have altered my recent actions or changed the course of my life to avoid having arrived at this shameful goal. Yet, strange to say, I found myself after mature reflection convinced that had I this last year to live over again not in one iota would I have done differently—no, not even if I could have foretold what the future had in store for me.

(TO BE CONTINUED.)

"Tempus Fugit."

The teacher gave Margaret some yarn and cardboard, and after showing her how to work a design, told her to finish it at home. When she came to school the next day with the half-finished work, the teacher asked her why she had not finished it; if she had run out of yarn. "Oh, no," answered Margaret; "I just run'd out of time."

For the Poor.

The Revenue Collector—You can't run that tent show and pocket the proceeds without paying the war tax. That's not a benevolence, as you claim.

The Owner Manager—My friend, if you were familiar with my circumstances and my show you'd consider the purchase of every ticket a real charity.

GOOD HIGHWAYS ASSIST FARMER

Vast Road-Building Program Now Under Way Throughout Whole United States.

POOR ROADS ADD BIG TOLL

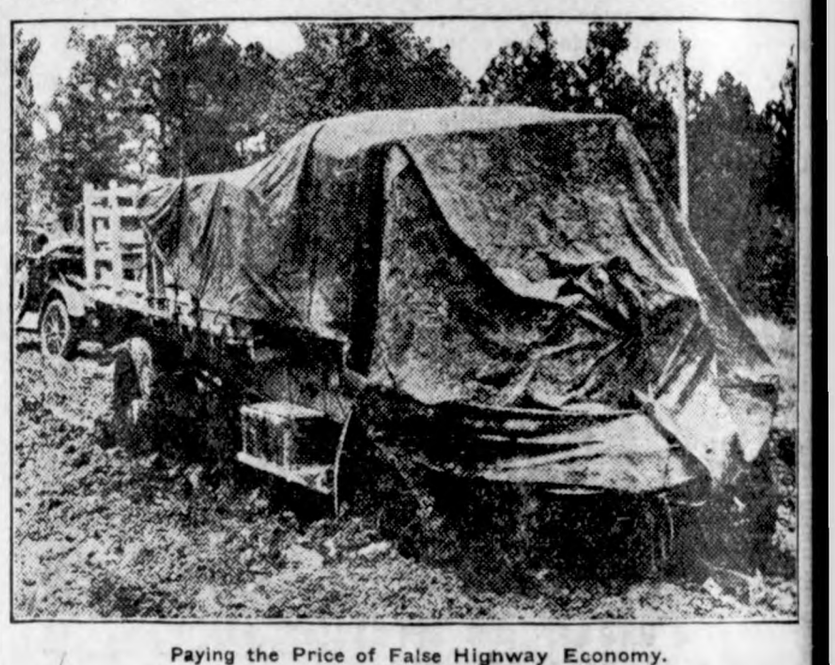
Projects Have Been Approved Calling for Federal Aid to Amount of $110,840,773—Important Factor in Buying and Selling.

(Prepared by the United States Department of Agriculture.)

The highway is coming into its own in America.

Neglected, abused, undervalued, subjected to cheap remedies for decades, at last the country road is being accorded the treatment it deserves. At a cost of hundreds of millions, the United States is rapidly overcoming the economic handicap which highway neglect has so long entailed.

This stupendous movement, the scope of which the public even now does not fully comprehend, is founded on sound business considerations. Good roads pay. If they did not, the nation would not now be constructing and planning them on an unprecedented scale. They pay by promoting the social life of the people, by helping relieve the congestion that is making maelstroms of municipalities. But, more important still, they pay in dollars and cents, for poor roads add a heavy toll to the buying and selling of



Paying the Price of False Highway Economy.

farm products—a toll far in excess of the expense of adequate improvement.

Unprecedented Road Program.

This is a lesson cities as well as rural districts are learning. In the bureau of public roads, United States department of agriculture, which administers the federal aid road act, is centered supervision of all highway construction which federal funds help carry on. At the close of last year, project statements had been approved calling for federal aid to the amount of $110,840,773—a sum which indicates how fully the nation is convinced that better roads mean better business. The total federal funds available to aid the states in their road-building programs up to July 1, 1920, will be $169,750,000—and this total is exceeded by the combined expenditures of state, county, and municipalities.

Better Roads, Better Business.

The business considerations back of these vast investments are not far to seek. Better roads mean cheaper and quicker hauling. It has been estimated, for example, that on a level, muddy earth road the amount which one horse can draw in an ordinary wagon va-

Where Ton-Mile Costs Are Low.

ries from nothing to a maximum of 800 pounds; on a smooth, dry earth road, from 1,000 to 2,000 pounds; on a gravel road in bad condition, from 1,000 to 1,500 pounds; on a gravel road in good condition, about 3,300 pounds; on a macadam road, from 2,000 to 5,000 pounds; on a brick road, from 5,000 to 8,000 pounds.

If the speed of travel is the same on all of these surfaces, the horse will haul on a good macadam road from three to five times as many miles a day as upon a moderately muddy earth road. Assuming that one horse is capable of a certain fixed amount a day, then with a given load, his effective radius of travel from that point on a macadam road is from three to five times the radius of travel from that point on a moderately muddy earth road—and earth roads are moderately muddy many months in the year.

Several years ago information secured by the department of agriculture from 2,800 correspondents indicated that the average cost of hauling on an unimproved country road was 25.7 cents a ton-mile. Today, with prices levels much higher, the cost would be even greater.

While it is difficult to estimate accurately what the saving would be if all highways were improved in the districts represented by these replies, a specific instance makes the benefit plain. A farmer in a southern state had to haul a ton of barbed wire 20 miles, over unimproved roads. He found that with a two-horse team his maximum load was 500 pounds, and that three days were required to make one round trip. To haul one ton, therefore, required 12 days to make one round trip. Allowing $6 a day for man and team, the cost was $72. After the roads in this region were improved, the same team could draw a ton to the load and make one round trip in two days, at a cost of $12. The ton-mile cost under old conditions was $3.18, and this cost was reduced to 52 cents by the improved road.

Roads and Wheat Marketing.

Take the saving in the cost of hauling wheat as another example. If the construction of narrow, single-track roads with improved surface will reduce the hauling cost 5 per cent a ton-mile, and if the average yield of wheat in the vicinity of these roads is 30 bushels to the acre, there results, for an average haul of five miles, an economic advantage of 22.5 cents an acre or $36 a quarter section. This is 4½ per cent on $900. Calculations of this sort have shown thousands of communities the wisdom of borrowing money to the extent of $2,000 a square mile of wheat area, so that roads could be improved to effect a saving on wheat hauling equal to that cited above, and, at the same time, effect a corresponding saving in each of the other crops.

The lowering of distribution costs, it is now recognized, is one of the most important problems in reducing living costs. While business is searching for more economical methods of handling goods, the farmers have not been neglecting other phases of this problem. On the prices at which he sells, all other prices must depend. Good roads, enabling him to get his products to the market at materially reduced cost, are among the big factors in more economical distribution.

RURAL HAULING PROFITABLE

Many Farmers, Whose Trucks Are Not Filled to Capacity, Help Out Their Neighbors.

Many of the motortrucks on farms adjacent to large cities are not loaded to full capacity on their trips to the city. Few farmers have their business so arranged as to permit the use of the truck to its maximum capacity regularly. Many such farmers, according to the United States department of agriculture, have gradually begun to haul a part or all of their neighbors' products to market, and in some cases this practice has led to the establishment of a regular route. Some farmers have been enabled to purchase trucks, because their own business, coupled with that of their neighbors', has been sufficient to warrant such an investment.

GENERAL FARM NOTES

Sweet clover is winning on merit.

* * *

Head lettuce does best in cool, moist weather.

* * *

Humus makes the soil more mellow and granular.

* * *

The shining hoe is the best badge of the good gardener.

* * *

Plant plenty of celery and late cabbage for all season's use.

* * *

Trees grow; they grow in height, in volume, in value, and in quality.

* * *

Cultivation of soy beans as a factor in solving the stock food problem is urged.

* * *

The easiest, cheapest and most satisfactory way to prevent soil drifting is to sow a field every year to tame grass.

Shake Into Your Shoes
Sprinkle in the Foot Bath

ALLEN'S FOOT-EASE

The Antiseptic, Healing Powder for the Feet,

for Tired, Swollen, Tender Feet, Corns, Bunions, Blisters, Callouses. It freshens the feet and makes walking easy. 1,500,000 pounds of powder for the feet were used by our army and navy during the war. Ask for Allen's Foot-Ease. Sold everywhere.

How About Your Catarrh? Do You Want Real Relief?

Then Throw Away Your Sprays and Other Makeshift Treatment.

Why? Simply because you have overlooked the cause of catarrh, and all of your treatment has been misdirected. Remove the cause of the clogged-up accumulations that choke up your air passages, and they will naturally disappear for good. But no matter how many local applications you use to temporarily clear them away, they will promptly re-appear until their cause is removed.

S. S. S. is an antidote to the millions of tiny Catarrh germs with which your blood is infested. A thorough course of this remedy will cleanse and purify your blood, and remove the disease germs which cause Catarrh.

WILLING TO GO HALF WAY

Little Jimmy's Answer to Leading Question Distinctly In Nature of a Compromise.

Aunt Marie was very good, indeed, to her five-year-old nephew, James. She gave him everything his little heart desired. But still she was often inclined to tease him and whenever he showed resentment she teased him still further by threatening to take away something she had given him.

The other night she began her usual teasing, taking for the subject herself and her charms. "Why, Jimmie thinks I'm a wonder," and she turned to little James provokingly and asked: "Don't you think I'm pretty? Don't you think I'm good?"

The little fellow was disturbed. He wanted to tell the truth, and he also wanted to keep auntie's favor. Finally he found his tongue. "Well, I do fink you're pretty good," he said truthfully.

Troubles of the Poor.

It doesn't matter how rich they get the poor still have their troubles. A waitress in a New York restaurant reported to the police that some thief had stolen her $650 fur coat.

Sad Experience.

"Do you believe in love at first sight?" "Well, there isn't much second sight about it, is there?"

A widow always tries to console herself with the belief that she can't do any worse the next time.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

The Real Reason.

When it was proposed to create more public offices, the masses, long suffering though they were, began to growl ominously.

"But," they expostulated, "there is no work for more office holders to do!"

Which proved beyond the peradventure of a doubt that the masses were just as stupid and unreasoning as the politicians believed them to be; for anyone with even a modicum of intelligence should have learned by this time that office holders do not care for work—all they want is the salary. —Kansas City Star.

Getting Back at Hubby.

Bacon—When a woman says that she doesn't care how she looks, it is time to send for the doctor.

Mrs. Bacon—But, if the doctor is a married man, he won't care."

Uncomplimentary.

Gerald—The drink went to my head.

Geraldine—Perhaps it likes unfrequented places.

Egg Eating Birds.

As a robber of birds' eggs the crow is in a class by himself. There is no egg that does not appeal to his appetite.

Farm Live Stock

IMPROVE QUALITY OF STOCK

Tennessee Department of Agriculture Urges Breeders to Join Better Sires Crusade.

"Better sires—better stock.

"A nation-wide crusade to improve the quality of cattle, horses, mules, swine, sheep, goats, and poultry in the United States.

"Every Tennessean who believes in better live stock should join this movement, begun by the United States department of agriculture."

That is the first thing seen by the readers of the current issue of the Monthly Bulletin of the Tennessee department of agriculture.

"It means the passing of the scrub," the Bulletin continues.

"It means greater success in livestock production and consequently greater prosperity for the people.

"Good-bred stock will outsell the scrub every time.

"If you want better stock consult the county agent in your own county or else write to the division of extension, Knoxville, Tenn.

"Now is the time to put Tennessee on the live-stock map.

"If you believe in better live stock and poultry join this movement. Tennessee has natural advantages for wonderful live-stock development, but the 'better sires' crusade will do much to hurry along this development."

BEEF PRODUCED FOR FAMILY

More Is Bought From Village Butcher Than Is Raised on Farm—Little Veal Killed.

The farmer buys more beef than he takes from the farm. Only about 10 per cent of meat furnished by the average farm is beef. In the north and west the average consumption of beef per family is nearly 300 pounds and in the south it is less than 100 pounds, according to the United States department of agriculture.

The beef animal killed for home use may be a beef steer or an unprofitable cow, or a heifer that does not promise to be a good producer and would not bring a good price for beef on the market. Very little veal

A Steer, An Unprofitable Cow or a Poor Looking Heifer May Be Used for the Family Table.

is killed on the farm for home use. Much of the beef bought by farmers is bought in the summer from village butchers who operate meat wagons or cars in the country. On the average farm there are no facilities for keeping fresh meat during warm weather.

PLAN TREATMENT OF LAMBS

Attention Attracted In Many Localities to Value of Docking and Castrating Lambs.

The value of castration and docking of buck lambs destined for market is attracting attention in many localities where the practice has not been generally followed. In Braxton county, W. Va., for example, the farm bureau plans a demonstration of the value of castration and docking by sending to market one carload of buck lambs that have not been thus treated, and at the same time a carload of buck lambs that have been docked and castrated. The prices will be compared, and a forceful object lesson is expected. Farmers in Gilmer county, of the same state, expect to dock and castrate all their buck lambs in the coming year.

Failure to follow this practice generally is regarded by officials of the Bureau of Animal Industry, United States department of agriculture, as a weak point in agriculture, and they recommend the practice to all farmers.

LIVE STOCK NOTES

First-class draft horses are very scarce.

* * *

The pig grows upon what it eats. While it should not be overfed, it must be supplied with all it will eat up clean for best development and growth.

* * *

Docking gives the lambs a neater and more uniform appearance. Long-tailed lambs collect dung, which often causes maggot trouble during hot weather.

* * *

If you have an ambition to make a success as a breeder, to improve the breed and establish a reputation for raising a choice lot of extra pigs, it requires you to acquaint yourself with all of the best feeding experience to be had

INVESTMENTS

In the present period of the adjustment of the country's industrial and commercial affairs it is well for investors to exercise the utmost caution in the selection of investments.

Investors should scan these securities very carefully. Where there is the least doubt, caution will dictate looking a little farther for an investment where safety and peace of mind are absolutely assured. Preferring to sacrifice a part of big income to a greater degree of safety, the conservative investor prospers to a larger extent in the end than the investor whose first thought is income, the quality of the security being a minor consideration.

Write for booklet, "Investment Steps," and for detail circulars describing the First Mortgage 6% Real Estate Serial Notes of $100 and $500 denominations we are offering and recommend as conservative, high-grade, safe investments.

The Mercantile Trust Company is a member of the Federal Reserve System, and by reason of such membership is under the supervision of the United States Government. This means that every loan we make, including "First Mortgage Real Estate Serial Loans," is subject to examination by Government Bank Examiners. These loans are also examined by the St. Louis Clearing House Bank Examiners and the official Bank Examiners of both the State of Missouri and the State of Illinois.

We particularly invite comparison between these loans and the average real estate mortgage loans, with reference to excellence of location, class of construction and actual (not estimated) income.

Delivery of notes purchased by non-residents will be made at our own risk to any bank or post office. Send for Circulars describing the First Mortgage 6% Real Estate Serial Notes we are now offering.

ST. LOUIS MISSOURI

Capital and Surplus $10,000,000

Melancholy Duty.

A visitor observed that the little girl of the house was eating some new kind of cereal food. As she seemed to evince a melancholy interest in the preparation the visitor asked: "Do you like it, Mary?"

"Not 'specially," replied the youngster sadly.

"Then why do you eat it?"

"I have to," was the grave answer. "Our grocer has promised to give a pair of skates for every five packages we buy, and it's got to be eaten every morning."

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callous. Instantly it stops hurting, then shortly you lift that bothersome corn or callous right off, root and all, without one bit of pain or soreness. Truly! No humbug!—Adv.

Safe in Unsuspected Dangers.

Writing of accidents to persons employed in industrial plants, Dr. C. Widmer says in Theraple der Gegenwart (Berlin) that the experience of countless ages enables us to sidestep injury unconsciously, and only when we focus our consciousness on the reaction to the occurrence is injury liable to result.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

The Main Thing.

"How is it you manage to keep a cook so long?"

"Why, we know our place."

The Cuticura Toilet Trio

Having cleared your skin keep it clear by making Cuticura your every-day toilet preparations. The soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them. 25c everywhere.—Adv.

Quick Work.

Fat Lady—So you really think a massage machine will reduce my waist. Where can I get one?

Doctor—I jes' saw a steam roller go down th' street.

His Salutation.

At one of the western camps a rookie had been made the victim of so much guying that he had long since given up the idea of taking any statements seriously. One night while on guard a tall figure loomed out of the darkness,

"Who's there?" challenged the recruit.

"Major Moses," replied the figure.

"Glad to meet you, Mose. Advance and give the Ten Commandments."—American Legion Weekly.

ASPIRIN

Name "Bayer" on Genuine

"Bayer Tablets of Aspirin" is genuine Aspirin proved safe by millions and prescribed by physicians for over twenty years. Accept only an unbroken "Bayer package" which contains proper directions to relieve Headache, Toothache, Earache, Neuralgia, Rheumatism, Colds and Pain. Handy tin boxes of 12 tablets cost few cents. Druggists also sell larger "Bayer packages." Aspirin is trade mark Bayer Manufacture Monoaceticacidester of Salicylicacid.—Adv.

Well Placed.

The Renter—Say, you, you told me the room you rented to me commanded a fine view and I find it opens on a light shaft.

The Agent—That's right. The Scrapleigh couple live across the shaft and they put up some of the best rough battles you ever saw. You gotta ringside seat.

Obvious.

"A New York judge has ruled that love is insanity." "Well, men go crazy over girls, don't they?"

Frantic With Pain

Doan's However Brought Complete Recovery and Trouble Has Never Returned

"My kidneys were weakened by exposure in Alaska," says Hermann Schrader, 328 Park Ave., Hoboken, N. J., "and my misery at times became so great I thought I would lose my mind. I had terrible pains in my back, and a constant desire to urinate. My back felt as if it were in sections with each crushing against the other. Finally I was taken desperately ill. It seemed as if something were crushing out my life. Before long I passed a gravel stone the size of a pea. If the pain had been any more intense I think I would have died. I was having practically no flushing of the kidneys and my weight had reduced from 178 pounds to 125. The doctor told me I had gravel and small stones filling up the passages of the bladder. After all of this I began to use *Doan's Kidney Pills* and soon improved. In a short time I was well and my cure has lasted fifteen years. Today I am in perfect health."

Mr. Schrader

Sworn to before me,
W. P. WEISS, Notary Public.

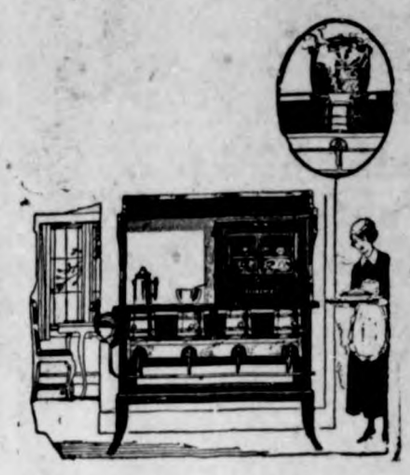
FLORENCE

OIL COOK STOVES



More Heat

Less Care

For kitchen service, comfort and satisfaction in cooking, baking and roasting, use the Florence Oil Cook Stove. Ready for duty day or night.

The Florence burner is the most practical burner made. Just raise the chimney and touch a lighted match to the asbestos kindler—in a few minutes you get an intense, clean, hot, blue flame right under the cooking. Heat is automatically controlled by lever handles. The heat goes into the cooking and not into the kitchen. This means a cool kitchen.

No ashes, no smoke. no dampers. Burns kerosene, the cheapest of fuel. No wicks to trim. Oil supply is always in sight in the glass bull's-eye of the tank.

Yovr dealer will show how easy the Florence Oil Cook Stove is to use and to keep clean, and why it means more heat and less care.

WESTERN GROCER COMPANY

Iowa News

Items of Interest Summarized for Busy Readers .:.

In 1918 Iowa farmers were using 4,000 tractors and 1919 shows over 9,000 in use.

Two new livestock shipping companies have been organized in O'Brien county, one at Primghar and one at Hartley.

The Marshall County Cow Testing association, which passed out of existence during the war, when it became impossible to secure a competent tester, was reorganized on a new basis recently.

General Pershing's tribute to Iowa State college is a high tribute from one in high places, but Iowa State college performed a high service in the war. Nearly 2200 stars on its service flag, more than a hundred now emblazoned in gold. It is a record that should never be forgotten.

L. L. Wherry has sold his farm 1 and 1-2 miles south of Ames and closed out everything at public sale. A total of 48 head of live stock were listed by Mr. Wherry. J. O. Allen, a neighbor, also listed 14 head of live stock which were sold at the same time, making a total of 62 head of live stock offered.

Printed letterheads are a real asset for the farmer who is selling to either wholesale or retail trade. The following form is suggestive:

FAIR VALLEY FARM
Butter, Eggs, Dressed Poultry, by Parcel Post From the Farm to You.

BLANK, IOWA----------19----

The return of the miners to work will greatly relieve the suffering that has been so apparent throughout Iowa, especially during the exceedingly cold weather of a few days ago. In some localities the suffering was intense, among the poorer classes. All curtailed productions will within a short time have resumed to normal

The Allamakee supervisors have recommended to the state highway commission that districts Nos. 5, 11 and 12 be paved this next year. This highway extends from Waukon, three and one-half miles to the county farm and from Postville, north three and one-half miles. The Postville and Decorah roads will be re-located to save a little over three and a quarter miles.

Corn huskers are scarce in Pocahontas county, in fact every effort is being made to assist the farmers of the county in getting their corn taken care of. Most of the help secured is inexperienced. Every effort is being made to supply the demand through sub-employment agencies over the county, in charge of the Farm Bureau to farmers who have been delayed in husking.

Joseph Kordick, a well known and well to do farmer, residing near Greenfield recently purchased nine cars of feeder cattle on the Omaha market, or 234 head, and will fatten them for market. Mr. Kordick has erected three brick silos on his farm and will fatten them on silage. In the work of filling the silos he utilized a tractor and found that it generated power sufficient to handle the silage cutter in good shape.

Miss Vivian Phillips, daughter of Mr. and Mrs. William Phillips, who live north of Perry realized that it pays to buy good farm stock and care for it. For her work in caring for a little calf, she is almost $1,000 gainer in less than a year. Miss Phillips' calf, which was purchased for $175, was sold for $1,250. She won first in a contest and fifty-two calves, entered, sold at an average price of $500.

Frank and Harry Jenson, well known farmer boys, living a few miles from Weston, are highly elated over their first attempt at cattle feeding. They marketed a number of their Whitefaces recently and received $13.50 per 100 pounds. They bought the animals on the same market two months ago for $10.85 and their average weight at that time was 1,102 pounds. The cattle when marketed tipped the scales at 1,253, a gain of 151 pounds.

The value of Iowa's honey crop for the season of 1919 is $2,652,000. Put in ten-pound buckets the crop would cover 191 miles, or from Marshalltown to Council Bluffs. State Apiarist F. B. Paddock found 178,000 colonies of bees producing this crop. They are valued at $10 the colony. Each colony the past season produced an average of seventy-five pounds, which was better by eighteen pounds than the average for the five years previous, which was fifty-seven pounds.

A gentleman in close touch with the fur industry in Iowa says that hundreds of thousands of dollars are represented in the season's catch. In one little town a dealer paid out $20,000 last winter. To this must be added the amount received by those who send their pelts direct to the city dealer. Nobody ever thinks much about trapping as a source of revenue but when once investigation is made it is an industry that contributes a large amount to the circulating medium in the course of a season.

Through the Bank your money will help along prosperity.

HOW WARREN G. HARDING WAS NOMINATED BY THE REPUBLICANS

Story of the National Convention at Chicago, the Struggle to Build a Platform and the Selection of a Ticket.

GOVERNOR COOLIDGE GIVEN SECOND PLACE

Wood, Lowden and Johnson, Leaders in the Early Balloting, Eliminated at the Behest of a Senatorial Coterie and a Dark Horse Wins the Race.

By EDWARD W. PICKARD.

For President—WARREN G. HARDING of Ohio.

For Vice President—CALVIN COOLIDGE of Massachusetts.

There is the ticket with which the Republicans hope and intend to regain possession of the national government next fall.

For president, a man from the home state of many presidents, a statesman of long experience and solid reputation, who has been a member of the United States senate since 1914, a member of the "old guard" who stands well with the Republicans who are in control of the senate.

For vice president, the governor of the Bay state, who was virtually unknown to the nation at large until the strike of Boston policemen and his vigorous course in its suppression gave him a vast amount of publicity and made him the favorite son of Massachusetts in the balloting for first place on the ticket.

These gentlemen now stand before the electors of the country on a platform that is so broad that it embraces nearly every topic and issue of the day, though there are those who assert that in some places the planks are perilously thin. Its builders, however, maintain that there is no danger of the candidates falling through the weak spots, and it may be that, with some judicious straddling and side-stepping, this will prove true.

Struggle Over the Platform.

Seldom, if ever, has the choice of a presidential candidate been so closely connected with the building of the platform—or it might be more exact to say the rejection of a candidate. For if Hiram Johnson and his supporters could have compelled the adoption of just the plank they demanded on the League of Nations issue, the California senator, and he alone, could with consistency have consented to go before the people standing on the platform. As it was, his threat to bolt the party caused a long deadlock in the deliberations of the committee on resolutions and at last forced the adoption of a plank based on the cabled suggestion of Elihu Root. That wise man had gone to Europe, but kept in close touch with the doings in Chicago and at the crucial moment his plan was presented to Johnson, Borah, McCormick and the other "irreconcilables" and accepted by them.

The resolution as finally incorporated in the platform, and swallowed by the convention, almost without a quiver, completely avoids any pledge to ratify the treaty of peace and the league covenant with or without reservations, strongly indorses the action of the Republican senators in that regard and promises that the party will work for some kind of international arrangement for the peaceful adjustment of disputes between nations without the sacrifice of American sovereignty. Thus, as will be seen, the way is left open for an administration elected on this platform to do almost anything it sees fit in this regard, except to ratify a treaty and league covenant such as President Wilson brought home from Paris.

Wilson's Policies Scored.

For the rest, the platform, in brief, scores President Wilson and the Democratic administration for their unpreparedness for war and for the equally unprepared condition of the nation for the reception of peace. Denouncing the autocratic assumption of authority by the president, the platform pledges the restoration of constitutional government. The Republican congress is praised for its efforts to cope with the problems caused by the president's course.

The farmers gained their requested support for extension of farm loans and the right to engage in co-operative marketing and buying.

The industrial plank was the subject of much discussion. Some of the committee members, presumably speaking for big business, favored a plank for the prevention of strikes by law. Governor Allen and others wanted the Kansas industrial court plan indorsed. And President Gompers traveled all the way to Chicago to tell the committee what kind of plank the American Federation of Labor demanded. None of these requests were satisfied, but the plank adopted recognizes the justice of collective bargaining and continues:

"The strike, or the lockout, as a means of settling industrial disputes, inflicts such loss and suffering on the community as to justify government initiative to reduce its frequency and limit its consequences.

"We deny the right to strike against the government; but the rights and interests of all government employees must be safeguarded by impartial laws and tribunals."

On Economy and H. C. of L.

The failure of the administration to retrench during the post-war period and the addition of thousands of swivel chair warmers are derided and the party pledges itself to a policy of economy and a carefully planned readjustment. The need of an executive budget and condemnation of the presidential veto that defeated this financial reform was coupled with caustic characterization of the manner in which the president, according to the Republicans, clings to his war-time powers. Revision of taxation also is demanded.

Coming to the great issue of the high cost of living, the committee drew up a declaration to the effect that the present conditions are the result of an inflation of the currency and of credit which the party pledges itself to correct by deflation, the prevention of unreasonable profits and the stimulation of private thrift by a change in the income tax law. The party reaffirmed its belief in the protective tariff, and pledged the encouragement of an American merchant marine by the application of the workman's compensation act and the exemption from canal tolls of the merchant marine.

Profiteering was condemned, government ownership of railways opposed, waterways encouraged and the regulation of industry and commerce promised in order to prevent monopolies. Resumption of trade relations with every nation with which America is at peace was pledged. No changes were promised in the existing immigration laws, but the bettering of naturalization laws was pledged, and the party went on record as favoring a policy by which American women who marry foreigners shall not lose their citizenship. The government's authority to deport and exclude undesirable aliens was upheld, but asurance was given that the rights of free speech, free press and free assembly will not be abridged.

Mrs. Warren G. Harding.

What They Said of Mexico.

A large number of minor topics were handled in the platform, and then came the plank on Mexico. It dealt very severely with President Wilson's policy and pledged that the party will not recognize any Mexican government unles the lives and property of Americans there are protected. Armenia came next in the list of planks. Deep sympathy was expressed for the Armenians, but the president was condemned for asking for authority to accept an Armenian mandate and it was added that the Republican party was unalterably against the acceptance of a mandte for any country in Europe or Asia.

The men who fought in the great war were assured of the party's deep gratitude and were promised liberal legislation for the care of the disabled, infirm and dependents.

Though William Jennings Bryan was present throughout the entire life of the convention with the avowed purpose of persuading the Republicans to insert a "dry" plank in their platform, he failed—possibly because the timely decision of the Supreme court seemed to render unnecesary any explicit declaration. The convention merely declared that all laws should be enforced, and let it go at that.

Women and Irish Displeased.

Two other elements also were disappointed. These were the suffragists and the friends of the Irish "republic." The former, under the leadership of the heads of the woman's party, were in Chicago in strength and during the entire week maintained around the Coliseum a line of pickets bearing banners that warned the Republicans that the women demanded the franchise and would be satisfied with no less. A plank was inserted in the platform urging Republican legislatures that have not acted to ratify the suffrage amendment, but this did not appease the ladies. In the last few moments of the last session they dropped from a balcony a great yellow banner on which was the statement that they wanted votes, not planks. As for the Irish, they, too, made a big demonstration in Chicago and De Valera, the president of their "republic" was there to deliver a speech before a great gathering. But something went wrong with the plans; and the plank which was tentatively shaped for the platform suited them so little that it was omitted entirely and nothing put in its place. There was a story that this resolution had been drawn up by Justice Cohalan of New York in the hope that it would be unsuitable and that the Democrats in San Francisco would be enabled to take advantage of the circumstance. So, though considerable space has perforce been given to the platform of the Republican party, it is not because it must be considered as a great or a particularly strong pronouncement. Lots of men and women in the party are far from pleased with many parts of it, and it must be confessed that the writer failed to find anyone who was crazed with enthusiasm over it.

The story of this convention would be intensely interesting if one could tell all the truth about the secret influences that governed its actions. On the surface it was not a very exciting affair, and the enthusiastic outbursts that characterized some of its sessions appeared too often to be facetious. For five days the 14,000 delegates, alternates, seat-holders and possessors of tickets that allowed them to stand about the few open places and hamper everyone else gathered faithfully in the Coliseum, prepared to howl with glee over expected contests and triumphs. But most of the time all they could do was to cheer for their favorite on occasion and try to keep up with the strong-lunged cheer and song leader who had been brought up from Camp Devens.

Bossed by Senators.

From the first it was heralded as that most unusual thing, an unbossed convention. All the experts asserted that the delegates were going to do as they pleased and that the old-time leadership was impotent. For a day or two this seemed true, but then the senate coterie got into action, and from that time to the end what was done was generally what it wished done. To start with Senator Lodge was selected as temporary chairman, and was continued permanently in the place, the entire temporary organization being retained. On the all-important committee on resolutions there were numerous senators and ex-senators, and they pretty much dictated the makeup of the platform. In the selection of the ticket their influence was seen and felt in every move and every shift of votes, clear down to the moment when Senator Harding received the ballots that made him the convention's choice. All this time the greatest of the old-time party bosses still alive, Senator Boies Penrose, lay on a sick bed in his Philadelphia home. But a direct telephone wire was run into that room and there was scarcely an hour of the day or night when he was not in communication with his friend, John T. King. He knew all that was going on, and it is fair to assume that in most cases he knew beforehand that it was going to go on. What happened, happened because he willed that it should happen. This is not written exactly in criticism, for it may be that what Penrose decreed will suit the party and result in its victory in November. But the fact cannot be blinked that some eminent Democrats who attended the convention went away with grins of satisfaction decorating their faces.

WARREN G. HARDING — CALVIN COOLIDGE

Lodge Was Too Scholarly.

To go back to the beginning again, something must be said of the keynote address by Chairman Lodge. It was one of the most scholarly efforts of its kind, and the great mass of the delegates, to say nothing of the audience, utterly failed to comprehend it. The senator did not once descend to the level of most of his hearers, and consequently he failed to arouse any great measure of enthusiasm.

It was noticeable that this address, as well as every other speech and the platform as well, devoted its denunciatory passages not to the Democratic party, as is usually the case, but to President Wilson. It was always his acts and his policies that were condemned—and the language used in dealing with him was scorching. Of course, the reason for this is that, from the viewpoint of the Republicans, Mr. Wilson has been the Democratic party for the last seven years.

The first day found three candidates in the forefront of the race for the nomination, and while the preliminaries were completed their workers were straining every nerve to have them make the best possible show on the first ballot. These men were Governor Lowden of Illinois, General Leonard Wood, and Senator Hiram Johnson of California. From their elaborate headquarters in the hotels swarms of men and women flocked to the Coliseum with banners and buttons and literature. Each of them was certain of victory—for public consumption—but each of them knew in his heart that he could not win if the senatorial bosses had their way. All the rest of the possible candidates really ranked as dark horses. They included Herbert Hoover, Dr. Nicholas Murray Butler of Columbia university, Gov. Calvin Coolidge of Massachusetts, Senator Poindexter of Washington, Senator Howard Sutherland of West Virginia, Governor Sproul of Pennsylvania, Senator Philander Knox of Pennsylvania and Senator La Follette of Wisconsin. A long enough list in all conscience. From these dark horses, it was predicted, would emerge the winner, and the prophecy was fulfilled.

Routine Work, Then Oratory.

It required three days to get through wtih the preliminary work of the gathering and to have the platform built, read and adopted. The latter took place on Thursday. As has been said, the resolutions met with almost unanimous approval. A young man from Milwaukee was the only dissenting member of the committee and he presented a minority report that embodied many of the policies advocated by La Follette. The audience did not want to hear him and he took advantage of their impatience to try to place himself in the position of a martyr, but Chairman Lodge cleverly forestalled this, and the minortiy report was speedily dumped into the waste basket.

Friday was the day of oratory. Men who thought themselves eloquent and others who really were eloquent mounted the speaker's platform in procession throughout most of the day to place before the convention the names and qualifications of the candidates. In many cases women were among those who seconded the nominations, and usually they acquitted themselves much more to the satisfaction of their hearers than did the men, for they were brief, snappy and graceful of address.

On the roll call of states Arizona yielded to Kansas, and Governor Henry J. Allen stepped up to nominate General Wood. Though obviously nervous and not quite adequate of voice, he did his excellent subject full ustice, setting forth specially the fine record the general had made in Cuba and the Philippines, and his preparedness for war when the great conflict broke out.

"We heard from him no platitudes about a million men springing to arms over night," cried Allen, and everyone strained for a look at Mr. Bryan, who sat in the press stand close to the speaker.

The governor went on to describe Wood's skillful training of an army and his unselfish and uncomplaining devotion to duty when he was kept from going to Europe in command of the boys whom he had taught how to fight and conquer. He also recounted the general's success in quelling labor and race disturbances within the last year or so, and dwelt on his popularity with the very men whom he had been sent to quiet.

Wood's Feathery Ovation.

As the governor ceased speaking a storm of applause broke out, and another storm of red and green feathers fell from the rafters all over the house. The Wood delegates marched through the aisles, led by Beveridge of Indiana and Frank Hitchcock, and the tumult continued for half an hour. "If Wood drops feathers, I suppose Johnson will drop light wines and beers from the rafters," laughed Mr. Bryan, and someone said: "Get your cup ready then, William."

The demonstration was calmed at last—really it did not seem very spontaneous—and after Frank Knox of New Hampshire had made a seconding speech, the first of the convention's woman orators appeared. She was Mrs. Corinne Roosevelt Robinson of New York, sister of the late Colonel Roosevelt. With much of the colonel's fire and vim, she told why Leonard Wood should be the next president, and she told it so well that prolonged applause rewarded her efforts.

Governor Lowden's turn came next, and the honor of presenting his name was entrusted to Congressman Rodenberg of Illinois, a big man with a big voice who made an old-fashioned speech that hit the audience in the right way. He, too, had an excellent subject, whose cause was handicapped only by the revelations of excessive expenditures brought out by the senate committee at the instigation of Johnson and his friends.

Lowden's ovation outlasted that for Wood, but was no more enthusiastic. It was featured by a display of banners and portraits of the candidate and by a pretty girl in a cerise sweater who was carried on men's shoulders at the head of the paraders. Lowden, too, had a woman among his seconders, Mrs. Fletcher Dobyns of Chicago, a clever politician and good speaker. Then Governor Morrow of Kentucky told why the Republicans of his state loved Lowden and wanted him for president.

Johnson's Sponser a Failure.

Charles S. Wheeler of San Francisco had been deputed to place Senator Johnson in nomination, and much was expected of him, because a reputation for fiery eloquence had preceded him. But, though his address was smooth and his voice pleasing, he scored the worst failure of the entire convention. He evoked some cheering from the galleries by a denunciation of the League of Nations, but soon after made the gross mistake of twitting the reservationists on having been worsted by Johnson in the committee on resolutions. The delegates did not relish that, nor did most of the others in the hall. Then he made an unfortunate allusion to the campaign expenditure revelations, and as those had hit most of the candidates, their friends resented it with boos and hisses. Mr. Wheeler smilingly waited for the row to cease, and proceeded to finish an address that was fully twice as long as it should have been. His poor performance cast a wet blanket on the planned demonstration, and the California delegates, accompanied by a few others, marched rather sadly through the aisles, listlessly waving flags.

Far better than Wheeler's was the speech for Johnson by Thomas D. Schall, the blind congressman from Minneapolis, and better, also, were the brief talks by Richard Doherty of Jersey, Charles P. O'Neil of M... and Mrs. Katherine Phillips R... California.

Now began the parade of horses. They were led forth as follows: Calvin Coolidge, by S... Gillette of the house of represent... and Mrs. Alexander Peiffer; But... Ogden Mills of New York; Pritc... by Marion Butler of North Car... Hoover by Judge Nathan L. Mi... New York; Harding, by Frank ... of Ohio; Sproul, by William L. ... fer; Poindexter, by George H. W... and Sutherland, by Joseph M. S... When Wisconsin was reached ... roll call the clerk paused expe... ly, but no one appeared to nom... La Follette, and the crowd ... grateful.

Balloting Is Begun.

The powers that were decreed several ballots should be taken ... day before adjournment, and in ... cited hush the call of the states ... begun. The hush did not last, ... ever, for every considerable vot... any one aspirant was greeted wi... cheers of his friends.

As had been foretold, Wood ... on the first ballot with 287½ ... Lowden was second with 211½, ... Johnson gathered in 133¾. The ... ers in general wereaccorded the ... of their home states and a few ... Of the Wisconsin delegation 24 ... for La Follette; and it may as ... be recorded here that those 24 ... gates kept voting for La Follett... to the bitter end. And every tim... announcement was greeted with ... and hisses from the galleries.

In the following three ballots ... climbed to 314½, which the wise ... said was about his maximum stre... Lowden also increased his vote, ... up to 289, while Johnson rea... 140½. The votes for the ... horses did not vary to any great ... tent though Butler lost steadily ... Pritchard soon dropped out enti... By this time everyone was ready ... a rest and the convention adjou... to Saturday morning.

The Break to Harding.

The crowd filled the Coliseum ... suffocation on what was destined ... be the final day of the convention, ... it was felt that the conference ... the preceding night would be fru... The senatorial coterie had been in ... sion many hours and the word ... passed around that they had pl... on Harding as the nominee. In ... early ballots of Saturday theOh... did not gain rapidly, and all ... waiting for the moment when the ... delegations from New York, Penn... vania and Massachusetts would ... the time ripe for a break. The ... from the Keystone state had ... voting almost solidly for Sproul, ... the bosses were not decided betw... him and Harding. And the N... Yorkers really did not know to w... to throw their strength.

Johnson's vote dwindled gradu... and then the Lowden column sudd... began to go to pieces. He was ... the victim of the shift, for the W... delegations stood by the general al... to the last moment. On the ... ballot it was seen that Hard... could be "put across," so the ... tain ones climbed into the band ... on on the tenth and gave the ... senator a grand total of 674½, wh... was 181½ more than necessary to n... inate.

The hubbub was deafening and ... Pennsylvania put 60 votes in the H... ing column the clerks could scar... complete the roll call. At its f... the usual motion to make the ch... unanimous was made, but those ... La Follette men from Wisconsin vo... in the negative and marred the ... feast.

Coolidge Gets Second Place.

There still remained the task ... selecting a vice presidential can... date. Senator Lenroot of Wiscons... Governor Allen of Kansas, Gover... Coolidge of Massachusetts and ... Harry Anderson of Virginia w... placed in nomination and the roll ... the states was called. Lenroot re... ceived a good vote, but Coolidge ... the evident favorite and long bef... the roll was completed his nomina... was assured. The 24 La Follette ... voted for Senator Gronna.

With some difficulty Chairman Lo... whose voice was gone, managed to ... the delegates together long enough ... pass the usual resolutions of tha... to the officials of the convention ... to the city of Chicago, and then ... republican convention of 1920 ca... to an end.

Convention Well Handled.

The management of the convent... hall really deserved thanks, for ... seating, the policing and the ot... arrangements were the best ever s... in such gatherings. Agriculture.

A large and contented body of farm proprietors is the backbone of the nation. National greatness and economic independence demand a population distributed between industry and the farm, and sharing on equal terms the prosperity which is wholly dependent on the efforts of both. Neither can prosper at the expense of the other without inviting joint disaster.

The crux of the present agricultural condition lies in price, labor, and credit.

The Republican party believes that this condition can be improved and agricultural production encouraged by the right to form co-operative associations for marketing their products subject to regulation by federal authority; the scientific study of agricultural prices, with a view to reducing the frequency of abnormal fluctuations; the authorization of associations for the extension of personal credit; a national inquiry on the co-ordination of rail, water, and motor transportation with adequate facilities for receiving, handling, and marketing food; the encouragement of our export trade, and the encouragement of the production and importation of fertilizing material and of its extensive use.

The federal farm loan act should be so administered as to facilitate the acquisition of farm land by those desiring to become owners and proprietors, and thus minimize the evils of farm tenantry.

Industrial Relations.

There are two different conceptions of the relations of capital and labor. The one is contractual, and emphasizes the diversity of interests of employer and employee. The other is that co-partnership in a common task.

We recognize the justice of collective bargaining as a means of promoting good will, establishing closer and more harmonious relations between employers and employees, and realizing the true ends of industrial justice.

The strike or the lockout, as a means of settling industrial disputes, inflicts such loss and suffering on the community as to justify government initiative to reduce its frequency and limit its consequences.

We deny the right to strike against the government; but the rights and interests of all government employees must be safeguarded by impartial laws and tribunals.

Public Utilities.

In public utilities we favor the establishment of an impartial tribunal to make an investigation of the facts and to render a decison to the end that there may be no organized interruption of service necessary to the lives and health and welfare of the people. The decisions of the tribunals should be morally but not legally binding, and an informed public sentiment be relied on to secure their acceptance. The tribunals, however, should refuse to accept jurisdiction except for the purpose of investigation, as long as the public service be interrupted. For public utilities we favor the type of tribunal provided for in the transportation act of 1920.

In private industries we do not advocate the principle of compulsory arbitration, but we favor impartial commissions and better facilities for voluntary mediation, conciliation, and arbitration, supplemented by that full publicity which will enlist the influence of an aroused public opinion. The government should take the initiative in inviting the establishment of tribunals or commissions for the purpose of voluntary arbitration and of investigation of disputed issues.

We demand the exclusion from interstate commerce of the products of convict labor.

National Economy.

A Republican congress reduced the estimates submitted by the administration for the fiscal year 1920 almost three billion dollars, and for the fiscal year 1921 over a billion and a quarter dollars. Greater economies could have been effected had it not been for the stubborn refusal of the administration to co-operate with congress in an economy program. The universal demand for an executive budget is a recognition of the incontrovertible fact that leadership and sincere assistance on the part of the executive department are essential to effective economy and constructive retrenchment.

The Overman act invested the president of the United States with all the authority and power necessary to restore the federal government to a normal peace basis and to reorganize, retrench, and demobilize. The dominant fact is that eighteen months after the armistice the United States government is still on a wartime basis, and the expenditure program of the executive reflects wartime extravagance rather than rigid peace time economy.

Failure to Retrench.

As an example of the failure to retrench which has characterized the post-war policy of the administration, we cite the fact that, not including the war and navy departments, the executive departments and other establishments at Washington actually record an increase subsequent to the armistice of 2,184 employees. The net decrease in pay roll costs contained in the 1921 demands submitted by the administration is only 1 per cent under that of 1920. The annual expenses of federal operation can be reduced hundreds of millions of dollars without impairing the efficiency of the public service.

We pledge ourselves to a carefully planned readjustment to a peace-time basis and to a policy of rigid economy, to the better co-ordination of departmental activities, to the elimination of unnecessary officials and employees, and to the raising of the standard of individual efficiency.

An Executive Budget.

We congratulate the Republican congress on the enactment of a law providing for the establishment of an executive budget as a necessary instrument for a sound and business-like administration of the national finances, and we condemn the veto of the president which defeated this great financial reform.

Reorganization of Federal Departments and Bureaus.

We advocate a thorough investigation of the present organization of the federal departments and bureaus, with a view to securing consolidation, a more businesslike distribution of functions, the elimination of duplication, delays, and overlapping of work, and the establishing of an up to date and efficient administrative organization.

War Powers of the President.

The president clings tenaciously to his autocratic war-time powers. His veto of the resolution declaring peace and his refusal to sign the bill repealing war-time legislation, no longer necessary, evidence his determination not to restore to the nation and to the states the form of government provided for by the Constitution. This usurpation is intolerable and deserves the severest condemnation.

Taxation.

The burden of taxation imposed upon the American people is staggering; but in presenting a true statement of the situation we must face the fact that while the character of the taxes can and should be changed, an early reduction of the amount of revenue to be raised is not to be expected. The next Republican administration will inherit from its Democratic predecessor a floating indebtedness of over 3,000,000,000, the prompt liquidation of which is demanded by sound financial considerations.

Reduction in Tax.

Moreover, the whole fiscal policy of the government must be deeply influenced by the necessity of meeting obligations in excess of $5,000,000,000 which mature in 1923. But sound policy equally demands the early accomplishment of that real reduction of the tax burden which may be achieved by substituting simple for complex tax laws and procedure, prompt and certain determination of the tax liability for delay and uncertainty, tax laws which do not for tax laws which do excessively muict the consumer or needlessly repress enterprise and thrift.

We advocate the issuance of a simplified form of income return; authorizing the treasury department to make changes in regulations effective only from the date of their approval; empowering the commissioner of internal revenue, with the consent of the taxpayer, to make final and conclusive settlements of tax claims and assessments, barring fraud, and the creation of a tax board consisting of at least three representatives of the taxpaying public and the heads of the principal divisions of the bureau of internal revenue to act as a standing committee on the simplification of forms, procedure and law, and to make recommendations to the congress.

Banking and Currency.

The fact is that the war, to a great extent, was financed by a policy of inflation through certificate borrowing from the banks, and bonds issued at artificial rates sustained by the low discount rates established by the federal reserve board. The continuance of this policy since the armistice lays the administration open to severe criticism. Almost up to the present time the practices of the federal reserve board as to credit control have been frankly dominated by the convenience of the treasury.

The results have been a greatly increased war cost, a serious loss to the millions of people who in good faith bought Liberty bonds and Victory notes at par, and extensive post-war speculation, followed today by a restricted credit for legitimate industrial expansion. As a matter of public policy we urge all banks to give credit preference to essential industries.

The federal reserve system should be free from political influence, which is quite as important as its independence of domination by financial combinations.

The High Cost of Living.

The prime cause of the "high cost of living" has been, first and foremost, a 50 per cent depreciation in the purchasing power of the dollar, due to a gross expansion of our currency and credit. Reduced production, burdensome taxation, swollen profits, and the increased demand for goods arising from a fictitious but enlarged buying power have been contributing causes to a greater or less degree.

We condemn the unsound fiscal policies of the Democratic administration which have brought these things to pass, and their attempts to impute the consequences to minor and secondary causes. Much of the injury wrought is irreparable. There is no short way out and we decline to deceive the people with vain promises or quack remedies.

But as the political party that throughout its history has stood for honest money and sound finance, we pledge ourselves to earnest and consistent attack upon the high cost of living by vigorous avoidance of further inflation in our government borrowing, by courageous but intelligent deflation of overexpanded credit and currency, by encouragement and heightened production of goods and services, by prevention of unreasonable profits, by exercise of public economy and stimulation of private thrift, and by revision of war imposed taxes unsuited to peace-time economy.

Profiteering.

We condemn the Democratic administration for failure impartially to enforce the anti-profiteering laws enacted by the Republican congress.

Railroads.

We are opposed to government ownership and operation or employee operation of the railroads. In view of the conditions prevailing in this country, the experience of the last two years, and the conclusions which may fairly be drawn from an observation of the transportation systems of other countries, it is clear that adequate transportation service both for the present and future can be furnished more certainly, economically, and efficiently through private ownership and operation under proper regulation and control.

There should be no speculative profit in rendering the service of transportation, but in order to do justice to the capital already invested in railway enterprises, to restore railway credit, to induce future investments at a reasonable rate, and to furnish enlarged facilities to meet the requirements of the constantly increasing development and distribution, a fair return upon actual value of the railway property used in transportation should be made reasonably sure, and at the same time to provide constant employment to those engaged in transportation service, with fair hours and favorable working conditions at wages or compensation at least equal to those prevailing in similar lines of industry. We indorse the transportation act of 1920 enacted by the Republican congress as a most constructive legislative achievement.

Waterways.

We declare it to be our policy to encourage and develop water transportation service and facilities in connection with the commerce of the United States.

Regulation of Industry and Commerce.

We approve in general the existing federal legislation against monopoly and combinations in restraint of trade, but since the known certainty of a law is the safety of all, we advocate such amendment as will provide American business men with better means of determining in advance whether a proposed combination is or is not unlawful. The federal trade commission, under a Democratic administration, has not accomplished the purpose for which it was created. This commission properly organized and its duties efficiently administered should afford protection to the public and legitimate business interests.

International Trade and Tariff.

The uncertain and unsettled condition of international balances, the abnormal economic and trade situation of the world, and the impossibility of forecasting accurately even the near future, preclude the formulation of a definite program to meet conditions a year hence. But the Republican party reaffirms its belief in the protective principle and pledges itself to a revision of the tariff as soon as conditions shall make it necessary for the preservation of the home market for American labor, agriculture, and industry.

Merchant Marine.

The national defense and our foreign commerce require a merchant marine of the best type of modern ship flying the American flag and manned by American seamen, owned by private capital, and operated by private energy.

We indorse the sound legislation recently enacted by the Republican congress that will insure the promotion and maintenance of the American merchant marine.

We favor the application of the workmen's compensation acts to the merchant marine.

We recommend that all ships engaged in coastwise trade and all vessels of the American merchant marine shall pass through the Panama canal without payment of tolls.

Immigration.

The standard of living and the standard of citizenship of a nation are its most precious possessions, and the preservation and elevation of those standards is the first duty of our government.

The immigration policy of the United States should be such as to insure that the number of foreigners in the country at any one time shall not exceed that which can be assimilated with reasonable rapidity, and to favor immigrants whose standard are similar to ours.

The selective tests that are at present applied should be improved by requiring a higher physical standard, a more complete exclusion of mental defectives and criminals, and a more effective inspection applied as near the source of immigration as possible, as well as the port of entry. Justice to the foreigner and to ourselves demands provision for the guidance, protection and better economic distribution of our alien population. To facilitate government supervision, all aliens should be required to register annually until they become naturalized.

The existing policy of the United States for the practical exclusion of Asiatic immigrants is sound, and should be maintained.

Naturalization.

There is urgent need of improvement in our naturalization law. No alien should become a citizen until he has become genuinely American, and adequate tests for determining the alien's fitness for American citizenship should be provided for by law.

We advocate, in addition, the independent naturalization of married women. An American woman should not lose her citizenship by marriage to an alien resident in the United States.

Free Speech and Alien Agitation.

We demand that every American citizen shall enjoy the ancient and constitutional right of free speech, free press, and free assembly, and the no less sacred right of the qualified voter to be represented by his duly chosen representatives, but no man may advocate resistance to the law, and no man may advocate violent overthrow of the government.

Aliens within the jurisdiction of the United States are not entitled of right to liberty of agitation directed against the government or American institutions.

Every government has the power to exclude and deport those aliens who constitute a real menace to its peaceful existence. But in view of the large numbers of people affected by the immigration acts and in view of the vicrous malpractice of the departments of justice and labor, an adequate public hearing before a competent administrative tribunal should be assured to all.

Lynching.

We urge congress to consider the most effective means to end lynching in this country, which continues to be a terrible blot on our American civilization.

Law and Order.

The equality of all citizens under the law has always been a policy of the Republican party. Without obedience to law and maintenance of order our American institutions must perish. Our laws must be impartially enforced and speedy justice should be secured.

With regard to the sale and maufacture of intoxicating beverages, the Republican party will stand for the enforcement of the constitution of the United States as it shall be declared by the Supreme court.

Public Roads and Highways.

We favor liberal appropriations in cooperation with the states for the construction of highways, which will bring about a reduction of transportation costs, better marketing of farm products, improvement in rural postal delivery, as well as meet the needs of military defense.

In determining the proportion of federal aid for road construction among the states the sums lost in taxation to the respective states by the setting apart of large portions of their area as forest reservations, shall be considered as a controlling factor.

Conservation.

Conservation is a Republican policy. It began with the passage of the reclamation act signed by President Roosevelt. The recent passage of the coal, oil, and phosphate leasing bill by a Republican congress, and the enactment of the water power bill, fashioned in accordance with the same principle, are consistent landmarks in the development of the conservation of our national resources. We denounce the refusal of the president to sign the water power bill passed after ten years of controversy. The Republican party has taken an especially honorable part in saving our national forests and in the effort to establish a national forest policy. Our most pressing conservation question relates to our forests. We are using our forest resources faster than they are being renewed. The result is to raise unduly the cost of forest products to consumers and especially farmers, who use more than half the lumber produced in America, and in the end to create a timber famine. The federal government, the states and private interests must unite in devising means to meet the menace.

The Service Men.

We hold in imperishable remembrance the valor and the patriotism of the soldiers and sailors of America who fought in the great war for human liberty, and we pledge ourselves to discharge to the fullest the obligations which a grateful nation justly should fulfill, in appreciation of the services rendered by its defenders on sea and on land.

Republicans are not ungrateful. Throughout their history they have shown their gratitude toward the nation's defenders on land and sea. Liberal legislation for the care of the disabled and infirm and their dependents has ever marked Republican policy toward the soldier and sailor of all the wars in which our country has participated. The present congress has appropriated generously for the disabled of the world war. The amounts already applied and authorized for the fiscal year 1920-21 for this purpose reached the stupendous sum of $1,180,571,893. This legislation is significant of the party's purpose in generously caring for the maimed and disabled men of the recent war.

Civil Service.

We renew our repeated declaration that the civil service law shall be thoroughly and honestly enforced and extended wherever practicable. The recent action of congress in enacting a comprehensive civil service retirement law and in working out a comprehensive employment and wage policy that will guarantee equal and just treatment to the army of government workers, and in centralizing the administration of the new and progressive employment policy in the hands of the civil service commission is worthy of all praise.

Postal Service.

We condemn the present administration for its destruction of the efficiency of the postal service when controlled by the government, and for its failure to properly compensate employees whose expert knowledge is essential to the proper conduct of the affairs of the postal system. We commend the Republican congress for the enactment of legislation increasing the pay of postal employees, who up to that time were the poorest paid in the government service.

Woman Suffrage.

We welcome women into full participation in the affairs of government and the activities of the Republican party. We urge Republican governors whose states have not yet acted upon the suffrage amendment to immediately call special sessions of their legislatures for the purpose of ratifying said amendment, to the end that all of the women of the nation of voting age may participate in the election which is so important to the welfare of our country.

Social Progress.

The supreme duty of the nation is the conservation of human resources through an enlightened measure of social and industrial justice. Although the federal jurisdiction over social problems is limited, they affect the welfare and interests of the nation as a whole. We pledge the Republican party to the solution of these problems through national and state legislation in accordance with the best progressive thought of the country.

Women in Industry.

Women have special problems of employment which make necessary special study. We commend congress for the permanent establishment of the women's bureau in the United States department of labor to serve as a source of information to the states and to congress.

The principle of equal pay for equal service should be applied throughout all branches of the federal government in which women are employed.

We demand federal legislation to limit the hours of employment of women engaged in intensive industry, the product of which enters into interstate commerce.

The League of Nations.

We favor a liberal and generous foreign policy founded upon definite moral and political principles, characterized by clear understanding of and firm adherence to our rights, and unfailing respect for the rights of others. We should afford full and adequate protection for the life, liberty and property, and all international rights of every American citizen, and should require a proper respect for the American flag; but we should be equally careful to manifest a just regard for the rights of other nations. A scrupulous observance of our international engagements, when lawfully asumed, is essential to our own honor and self-respect and the respect of other nations. Subject to a due regard for international obligations, we should leave our country free to develop its civilization along lines most conducive to the welfare and happiness of the people, and to cast its influence on the side of justice and right should occasion require.

The Republican party stands for agreement among the nations who preserve the peace of the world. We believe that such an international association must be based upon international justice and must provide methods which shall maintain the rule of public right by the development of law and the decision of impartial courts, and which shall secure instant and general international conference whenever peace shall be threatened, so that the nations pledged to do and insist upon what is just and fair may exercise their influence and power for the prevention of the war. We believe that all this can be done without the compromise of national independence, without depriving the people of the United States in advance of the right to determine for themselves what is just and fair when the occasion arises, and without involving them as participants, and not as peacemakers in a multitude of quarrels, the merits of which they are unable to judge.

Mexico.

The ineffective policy of the present administration in Mexican matters has been largely responsible for the continued loss of American lives in that country and upon our border; for the enormous loss of American and foreign property; for the lowering of American standards of morality and social relations with Mexicans, and for the bringing of American ideals of justice and national honor and political integrity into contempt and ridicule in Mexico and throughout the world.

Written Protests Decried.

The policy of wordy, futile, written protests against the acts of Mexican officials, explained the following day by the president himself as being meaningless and not intended to be considered seriously or in force, has but added in degree to that contempt, and has earned for us the sneers and jeers of Mexican bandits, and added insult upon insult against our national honor and dignity.

We should not recognize any Mexican government unless it be a responsible government willing and able to give sufficient guarantees that the lives and rights of American citizens are respected and protected; that wrongs will be promptly corrected and just compensation will be made for injury sustained. The Republican party pledges itself to a consistent, firm and effective policy toward Mexico that shall enforce respect for the American flag and that shall protect the rights of American citizens lawfully in Mexico to security of life and enjoyment of property in accordance with established principles of international law and our treaty rights.

The Republican party is the sincere friend of the Mexican people. In its insistence upon the maintenance of order for the protection of American citizens within its borders a great service will be rendered the Mexican people themselves, for the continuation of present conditions means disaster to their interests and patriotic aspirations.

Mandate for Armenia.

We condemn President Wilson for asking congress to empower him to accept a mandate for Armenia. We commend the Republican senate for refusing the president's request to empower him to accept a mandate for Armenia. The acceptance of such mandate would throw the United States into the very maelstrom of European quarrels. According to the estimate of the Harbord commission organized by authority of President Wilson, we would be called upon to send 59,000 American boys to police Armenia and to expend $276,000,000 in the first year and $756,000,000 in five years. This estimate is made upon the basis that we would have only roving bands to fight, but in case of serious trouble with the Turks or with Russia, a force exceeding 200,000 would be necessary.

Disregard of Life Claimed.

No more striking illustration can be found of President Wilson's disregard of the lives of American boys or of American interests.

We deeply sympathize with the people of Armenia and stand ready to help them in all proper ways, but the Republican party will oppose now and hereafter the acceptance of a mandate for any country in Europe or Asia.

For Association of Nations.

The Republican party stands for agreement among the nations to preserve the peace of the world. We believe that such an international association must be based upon international justice and provide methods which shall maintain the rule of public right by the development of law and the decision of impartial courts, and which shall secure instant and general international conference whenever peace shall be threatened, so that the nations pledged to do and insist upon what is just and fair may exercise their influence and power for the prevention of war.

We believe that all this can be done without the compromise of national independence, without depriving the people of the United States in advance of the right to determine for themselves what is just and fair when the occasion arises and without involving them as participants and not as peacemakers in a multitude of quarrels the merits of which they are unable to judge.

The covenant signed by the president at Paris failed signally to accomplish this great purpose and contains stipulations not only intolerable for independent people but certain to produce the injustice, hostility and controversy among nations which it proposed to prevent.

Praises Senators' Actions.

That covenant repudiated to a degree wholly unnecessary and unjustifiable the time-honored policy in favor of peace declared by Washington and Jefferson and Monroe and pursued by all American administrators for more than a century, and it ignored the universal sentiment of America for generations past in favor of international law and arbitration and it rested the hope of the future upon mere expedients and negotiations.

The unfortunate insistence of the president upon having his own way without any change and without any regard to the opinions of the majority of the senate, which shares with him the treaty-making power, and the president's demand that the treaty should be ratified without any modification, created a situation in which senators were required to vote upon their consciences and their oaths according to their judgment against the treaty as it was presented or submit to the command of a dictator in a matter where the authority and responsibility under the Constitution were theirs and not his.

The senators performed their duties faithfully. We approve their conduct and honor their courage and fidelity, and we pledge the coming Republican administration to such agreement with the other nations of the world as shall meet the full duties of America to civilization and humanity in accordance with American ideals, and without surrendering the right of the American people to exercise its judgment and its power in favor of justice and peace.

Will Reform Taxes.

Pointing to its history and relying on its fundamental principles, we declare the Republican party has the genius, courage, and constructive ability to end executive usurpation and restore constitutional government to fulfill our world obligations without sacrificing our national independence; to raise the national standards of education and general welfare; to re-establish a peacetime administration and to substitute economy and efficiency for extravagance and chaos; to restore and maintain the national credit; to reform unequal and burdensome taxes; to free business from arbitrary and unnecessary official control; to suppress disloyalty without denial of justice; to repeal the arrogant challenge of any class, and to maintain a government of all the people as contrasted with government for some of the people, and finally, to allay unrest, suspicion, and strife and to secure the co-operation and unity of all citizens in the solution of the complex problems of the day, to the end that our country, happy and prosperous, proud of its past, sure of itself and of its institutions, may look forward with confidence to the future.

NERVOUS PROSTRATION

Mrs. J. Christman Proved That Lydia E. Pinkham's Vegetable Compound is a Remedy for this Trouble.

Binghamton, N. Y.—"I was in a very nervous condition for over a year, my mind was gloomy, could see no light on anything, could not work and could not have anyone to see me. Doctor's medicine did not help me and Lydia E. Pinkham's Vegetable Compound was recommended. I took it and am now well. I recommend it to all afflicted with nervous prostration."—Mrs. J. CHRISTMAN, 193 Oak Street, Binghamton, New York.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

If there are any complications about which you need advice write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

True to Form.

The demobilized army doctor closed the bedroom door reverently, and faced his colleague with a sober nod of the head.

"He's gone," he said. "Nothing more to be done except paint him with embalming fluid and mark him heaven."—Home Sector.

OFFICIAL PUBLICATION

ORDINANCE NO. 37

Ordinance creating and establishing a Sanitary Sewer District in the Incorporated Town of Klemme, Iowa.

Section 1. Be it ordained by the Town Council of the Incorporated Town of Klemme, Iowa, that there be and the same is hereby created, a Sewer District in the Town of Klemme, Iowa, to be known as Sanitary Sewer District No. 1, the limits and boundaries of which shall be the present limits and boundaries of the Town of Klemme, Iowa.

Section 2: This Ordinance to take affect and to be in force from and after its publication in The Klemme Times, a newspaper published in the Town of Klemme, Iowa.

Passed at a Special meeting of the Town Council of Klemme, Iowa, this 10th day of June, 1920.

Frank Gruetzmacher,
Mayor.
N. L. Palmer,
Town Clerk.

Notice of a Proposed Resolution of Necessity for the Construction of Sewers, Etc.

Notice is hereby given that at a meeting of the Town Council of the Town of Klemme, Iowa, held on the 10th day of June, 1920, there was introduced and placed on file, the Resolution hereinafter set forth, which Resolution will be considered for passage by the said Town Council at a meeting to be held in the Council Chamber in the said Town, on the 13th day of July, 1920, at 7:30 P. M., at which time and place, the owners of property subject to assessment for the cost of the improvement contemplated by said Resolution, may appear and make objections, if any they have, to the contemplated improvement, and to the passage of said Resolution, at which time said Resolution may be amended and passed, or passed as proposed, said Resolution being as follows, to-wit:

RESOLUTION OF NECESSITY

Be it Resolved by the Town Council of the Town of Klemme, Iowa:

Section 1: That it is deemed advisable and necessary to pass this resolution and make the following described improvement, on its own motion, within and for the said town of Klemme, Iowa.

Section 2: That whereas there has been created in the town of Klemme, Iowa, a sewer district known as Sewer District No. 1, the limits and boundaries of which are fully described by Ordinance No. 37, on file in the office of the Town Clerk.

Section 3: That there be constructed in and for the said Sewer District a system of Sanitary Sewers with Sewage Disposal Plant, Main and Lateral Sewers, located as follows, to-wit:

DISPOSAL PLANT

The Disposal Plant shall be located on a plot of ground approximately 600 feet west and 1500 feet south of the intersection of Iowa and Front Streets and shall consist of septic tank, dosing chamber, filter and sludge beds and connecting pipes there to.

MAIN SEWER

Shall start near above described Disposal Plant Site thence North 650 feet, thence Northeast across outlot 7 approximately 1150 feet to intersection of Iowa and Front Streets, thence on Iowa Street from Front to 3rd Streets using 12-inch Vitrified Sewer Pipe.

LATERAL SEWERS

On 3rd Street from Iowa Street to Jerusalem Street using 10-inch Sewer Pipe.

On Dakota Street from 3rd Street to East Corporation Line.

On State Street from 3rd Street to East Corporation Line.

On Jerusalem Street from 4th Street to 5th Street and from 3rd Street west 1500 feet.

On Elder Street from 3rd Street West 200 feet and from 2nd Street west 250 feet. On Day Street from 1st Street East 730 feet. On Main Street from 3rd Street West 1000 feet and from 4th Street East 800 feet. In alley of block 9 from 3rd Street east 200 feet, on Iowa Street from 3rd Street to 4th Street, on Greutmacher Street from 3rd Street east 100 feet and west 100 feet. Across outlot 5, on Center Line of Hansen Street produced from the Center Line of 4th Street produced, west 500 feet. On Front Street from Hancock Street south 600 feet, on 1st Street from Iowa Street south 600 feet and North 450 feet. On 2nd Street from Jerusalem Street south 170 feet and from Elder Street south 300 feet and from Iowa Street north 450 feet and south 900 feet. On 3rd Street from Dakota Street to Jerusalem Street and from Iowa Street to Greutmacher Street. On 4th Street from Jerusalem Street south 2400 feet. Morningside Road from 4th Street east 250 feet thence south 600 feet, On Paul's Drive from its intersection with Morningside Road east 500 feet. On Arthur's Lane from its intersection with Morningside Road east 400 feet using 8-inch Sewer Pipe.

All of said sewers to be built with tight joints, suitable "Y's" for house connections and to be laid to line and

OFFICIAL PUBLICATION

grade.

Section 4: And be it further resolved that the disposal plant shall be known and established as a Sewage Disposal Plant, and the cost of same and all cost in connection therewith shall be paid out of a fund to be created by the levy of a special tax on all taxable property in the Town of Klemme, Iowa, or if insufficient to pay the cost of same out of any funds of the Town of Klemme, Iowa, available by law for such purposes, or by a special assessment against all the real property in said Town in accordance with the law, or by a combination of any or all of these methods.

Section 5: And be it further resolved that the sewers above described as Main Sewers shall be known and established as Main Sewers, and the cost of same shall be assessed against all the real property in Sanitary Sewer District No. 1 of the Town of Klemme, Iowa, as adjacent property.

Section 6: And be it further resolved that all the sewers herein described as lateral sewers, shall be known and established as lateral sewers, and the cost of said lateral sewers shall be assessed against the privately owned ground abutting upon the streets, avenues, alleys or privately owned ground upon which said sewers are built, and against the adjacent property, which shall be such property as does not abutt any street, avenue, alley or privately owned ground upon which sewers are built, but which lies wholly or in part within 300 feet of the nearest line of any street, avenue, alley or privately owned ground upon which sewers are built, and against the real estate and personal property of any railway company whose property is abutting or adjacent to said streets, avenues, alleys or privately owned ground upon which sewers are built within the above described limit.

Section 7: All assessments to be made in proportion to the benefits conferred upon each lot, piece or parcel of ground, and any discrepancies between the cost of said sewers and the amount assessable against such property by law, and one-half of the cost of sewers opposite property owned by the Town of Klemme, Iowa, or by the United States Government shall be paid out of a fund to be created by a special tax to be levied upon all property in the Town of Klemme, Iowa, or if insufficient to pay the cost of same, out of any funds of the Town of Klemme, Iowa. available by law for this purpose.

Section 8: All of the above sewers, disposal plant, etc., to be built in accordance with the plans and specifications for same to be filed with the Town Clerk and approved by this council and the Iowa State Board of Health, which plans and specifications are by reference made a part hereof. The kind of material to be used shall be salt-glazed vitrified sewer pipe, hard burned building brick or concrete manholes and flush-tanks, cast iron pipe, etc. Said pipe to have sealed joints and to be laid to line and grade, all as shown by said plans and specifications and the method of construction shall be by contract, and the contractor shall be paid for the disposal plant in Bonds at par drawing 6 per cent interest and for the sewers in Special Assessment Bonds at par drawing 6 per cent interest.

Section 9: And be it further resolved that the Town Council of the Town of Klemme, Iowa, meet at 7:30 o'clock p. m. on the 13th day of July, 1920, in the Council Chamber of said Council for the purpose of considering objections to the passage of this resolution and the making of this improvement, at which meeting this resolution may be amended and passed, or passed as proposed.

Section 10: And be it further resolved that the Town Clerk be and he is hereby instructed to cause notice of the pendency of this resolution and the time at which said resolution will be considered for passage and objections heard thereto, to be published in a newspaper of general circulation published in the Town of Klemme, Iowa, in accordance with the law.

Proposed by the Town Council of Klemme, Iowa, at a meeting held on the 10th day of June, 1920.

Frank Gruetzmacher,
Mayor

Dan Cupid's Arrows

JOSTEN-BECKER

Yesterday afternoon (Wednesday- three o'clock in the afternoon, oc- rred the marriage of Miss Elsie E. sten to Mr. Fred C. Becker, both of is city. Rev. Depping read the dding ceremony which united the ung couple as man and wife. Only mediate relatives of the contracting rties were present at the wedding.

The couple need very little intro- ction to our readers as they are well own to everyone in the community d both come from the best families Klemme. The bride is a daughter Mr. and Mrs. Valentine Josten d is ndeed a very charming young dy who will make an excellent help- te and home keeper. Mr. Becker a son of Mr. and Mrs. Wm. Becker d is a young man of ambition and unquestioned character. He is st that sort of man who will make himself a high mark in the world d is worthy of the young lady whom has taken unto himself as a wife.

After a brief wedding trip the ung married couple will come back Klemme and will live on the farm st of Klemme where the groom has ected a new set of farm buildings d has made a beautiful home for his ide. They will be at home to their any friends after July first.

The Times extends congratulations d wishes them a most pleasant urney thru life.

HOLLY LEWIS NOW MARRIED

We found the following clipping in e Mason City Globe-Gazette of onday, June 21st, and it is self ex- anatory. We will add that the imes joins the many friends of Mr. d Mrs. Holly Lewis in wishing them uch joy and happiness.

Dreher-Lewis

The marriageo f Miss Gladys Dre- r and Holly Lewis took place this orning at 10 o'clock at the Y. W. C. . Rev. Wilkinson read the ring rvice. After the ceremony a lunch- on was served to about twenty riends and relatives of the bride and room.

The couple were attended by Miss uth Martin, of Cedar Falls, Iowa, as ridesmaid, and Mr. Richard Lecht- ond, of Mason Cty, Iowa, as best an.

The bride was attired in a dress of ale pink georgette with bonnet hat of me material and wore a corsage ouquet.

The bride was graduated from the ora Springs high school and later ttended school at Cedar Falls. For he past two years she has been em- loyed as stenographer and clerk in he postoffice here and it was here she et her husband, who was employed as city letter carrier.

The groom is now connected with the C. M. & St. P. railway.

The groom saw active service in France with the 27th division during the world war.

The young couple left at noon for Madison, Wis., for a short honeymoon trip, after which they will be at home t their friends and relatives at San- born, Iowa.

SURPRISE ON NEWLY-WEDS

Last Thursday evening about fifty members of the Win One class, the young people's class of the Method- ist Episcopal church, descended unan- nounced on the newly married mem- bers of that class, Mr. and Mrs. Clarence Johnson at their country home east of town. The young peo- ple took with them a big freezer of ice cream and a multitude of cakes, all of which disappeared during the course of the evening, and also a set of sherbet cups which they left with the happy couple as a memento of the occasion, the presentation speech be- ing made by the president of the class, Mr. Sylvan Johnson.

The evening was spent with games and such merry making as is custom- ary when young folks get together, and was further utilized for the hold- ing of a business meeting and the election of officers for the ensuing year. Howard Wiles was chosen pres- ident; Miss Mabel Waterman, secre- tary, and Charles Gibbs, treasurer. At a late hour (or early) hour the com- pany separated, leaving their best wishes with their hosts and taking with them the remembrance of a very delightful evening.

REV. BURIFF WINS REGISTER PRIZE

Rev. Buriff, of this city, won the "dollar-a-word" contest in the Des Moines Register for the best answer to the question, "Why is the Associ- ated Press the backbone of a Good Sunday Newspaper?" His answer is as follows:

"Though special features many in- struct, amuse,
The Sunday newspaper's backbone is news;
Without A. P. reports, however great
In other things, it sprawls inverte- brate."
—By A. E. Buriff, Klemme, Ia.

Drs. Reuber & Zinn have their new X-ray installed now, as a Mr. Wells, of Des Moines, was here last week putting thet hing together. Joe Mill- er is finishing up he painting and var- nishing in the new addition and the carpenters are also thru, so the doc- tors will soon be settled in their mod- ern office. They have also built a sort of "whatchumacallit" over their front step and we were kidding Dr. Zinn about the canary bird house, but he said t was a porch—well, we will let him have his way.

The Times "Devil" Says

"ZIP" LOSES ANOTHER WHEEL

"Zip" McCullough started for Ma- son City last Friday shortly after noon with the intention of taking in the Round-Up and his intention was perfectly laudable until about eleven mles out of Klemme when the hind wheel of his car remembered that "Zip" had left a lady friend in Klemme and so parted company with the rest of the outfit and proceeded to roll back. "Zip" straightened out his long propellers and overtook the wheel before it got very far. The gar- age man was called up who brought a wooden wheel along to graft onto Lizzy and as the hour was getting late for the show "Zip" came back to Klemme. "Zip's" sheeny show-case is now ornamented with a wooden hind leg until the other gets back from the hospital. "Zip" should have taken the wild flivver to the round-up and perhaps Wild Bill Lynch could have broken her of the awful shock- ing habit of losng a leg everytime "Zip" wanted to go some place.

DELEGATES TO COUNTY CON- VENTION

The following Klemme gentlemen are delegates to the county convention which will be held at Garner, Saturday, July 3rd: John Gruetz- macher, Frank Gruetzmacher, H. L. Suckow, N. L. Palmer, Wm. Becker, A. H. Meyer and F. A. Arnold, Com- mitteeman.

FOURTH OF JULY IN KLEMME

Since the glorious Fourth comes on Sunday this year the people of the Methodist Episcopal church have planned to put on a celebration in keeping with both the civil and religi- ous significance of the day. Our neighboring towns will stage cele- brations in the old fashioned, noise- making, enthusiastic way, using eith- er Saturday or Monday for that pur- pose. This is all right, for it would hardly seem proper to have the day pass without the traditional celebra- tion. But why should not Klemme have a fitting observance of the day itself?

It is therefore planned to hold such a meeting, to which the whole community is invited, on Sunday af- ternoon, July 4th, at 2:30 p. m. in the city park. Appropriate music by male voices and mixed choruses is being prepared and Dr. Buriff will give an address on "God's Country."

Did you ever hear of a fellow losing a gasoline tank on his car and not know it? Well, G. W. Kluckhohn is the man who performed that feat. George was coming from Garner the other evening when he heard a racket back of his car, but drove a little far- ther but finally decided to investi- gate. He found hat he had lost his gas tank and found it back down the road. The gasoline in the vacuum tank kept the car going and if he hadn't discovered the tank was gone he could have driven about four miles before running out entirely.

Liberty Bells Win Game

THE KLEMME BALL TEAM WILL HAVE TO WEAR HALF-SOCKS

Last Sunday afternoon a fast game of ball was played between the Klem- me Rockfords and the Liberty Bells. The playing opened up fast and furi- ous and the large crowd present were kept on their toes in the exctiement. Everythng looked beautiful for Klem- me as up to the ninth inning they lead the Liberty Bells by the score of seven to three. But when the Liberty Bells opened up their batting in the ninth inning they rang up five more runs and thus defeated the Klemme Rockfords by one score. Klemme had the game but perhaps got a little too over confident in their ability as play- ers and let the Bells get too much of a lead. Anyway it was a fine game and if these two teams ever get to- gether again we are sure that they will play a very close game as they are both right up on the other fellows' toes all the time.

We promised the Klemme boys that if they won this game we would honor them by the name of Klemme Silk Sox, but as they lost this game we will have to wait awhile and call them the Half-Socks or no socks at all. We bet they will win the next one when they play the Bells or in the near fu- ture they have a game with Goodell.

MALE QUARTETTE COMING

The evening of July 3rd promises a treat for the music loving people of Klemme and the countryside about On that evening the Morningside male quartette, representing Morningside college of Sioux City will appear in a full program at the Methodist Episco- pal church. This company is making a tour of the northwest part of the state, appearing nightly in a circuit of some sixy or seventy towns. A male quartette is one of the most pleasing of musical combinations and these young men are the equals of most of the quartettes appearing in chautauqua or lyceum work. No ad- mission fee is charged for this con- cert, but a silver offering to help in defraying expenses will be taken. Make a note of the date, Saturday evening, July 3, and plan to hear this concert.

Ye Scribe and wife accompanied Mr. and Mrs. Marlin Croner to Mason City last Friday where we took in the Round-Up. We also observed a large number of Klemme people who also went to see the western performance. The show was good and some stunts were thrilling but they named it wrong; instead of calling it the Round-Up we would suggest that they call it the "Hold-Up" as that is what it was as far as the price was concerned—$1.10 per each to get into the ground and fifty cents to see the show from the grandstand when you got in, as there was no other place from which to watch the dongs and then another two bits to set on a sawdust stuffed sack that passed as a cushion on which to sit. Yes, we were at the Hold-Up all right and aside from that it would pass the censor.

Sylvan Johnson lost a valuable four year old Percheron stallion Sat- urday night. Sylvan went to town about nine o'clock and when he re- turned about eleven the animal was found dead. The veterinarian said that the horse had eaten poison of some kind but where or how he got it is a mystery to Sylvan.

Miss Hulda Johnson returned to Mason City last week after spending about a week's vacation visiting with Klemme folks. Miss Johnson is em- ployed with the Damon-Igou Co. in the silk department and has recently been appointed at the head of this de- partment with a substantial increase in salary.

Mrs. Lena Schroeder was a passen- ger to Garner Tuesday morning.

Mr. and Mrs. R. A. Jorgenson spent Sunday with Garner relatives.

Miss Doris Buriff came last Thurs- day morning from Chicago where she has been attending Northwestern Uni- versity taking a musical course. Miss Buriff will finish the course next year. She is here spending her summer va- cation.

Iowa News

Items of Interest Summarized for Busy Readers

Gordon Clark or Forest Mills sold 52 geese for $136.84.

Rev. E. A. Kiser, visiting friends at Malvern, husked 102 bushels of corn in a day.

Spencer is to have a new $185,- 000 hotel. The contract for archi- tectural work was let to Byrd & Moore, of Des Moines.

A double deck of 75-pound lambs which have been on feed for two months and a half on the J. McPher- rin farm, near Glenwood, were ship- ped to the market recently and Mr. McPherrin received a top price for them, $14.85. The lambs were in good condition.

The Iowa state highway commis- sion is not in favor of truck tours over mud roads in Iowa. While the tours demonstrated the ability of the truck to travel on muddy highways, the recent tour left the roads over which the trucks traveled in such bad condition as to make it difficult to repair them before next summer.

Formation of the Tri-county asso- ciation which plans to stage the an- nual fair in Perry next fall, is under way. The association has secured an option on a site for the fairgrounds and plans for buildings are being drawn up. Construction on the build- ings is not expected to get under way before early next spring.

Assessments for the benefits, in- cluding the cost of construction, fo Iowa River Drainage District No. 1, totaling $177,546.16 are made agains land in the district, in the report filed by the commissioners appointed by the board of supervisors. The as- sessments against large land owners total in many cases, thousands of dollars.

Woods Brothers of Lincoln, Neb., with M. A. McNeal, Wert Reid, Will Rageth and Dr. E. E. Richards, Fre- mont county land owners, have be- gun the construction of a ditch which will be two miles in length and reclaim $1,000,000 worth of land. The county has also just let the contract for a ditch and dike to cost over $100,000, which will eliminate five bends in a small river and shorten its course five miles.

In the past six months farm land in seventy Iowa counties have ad- vanced in price about 60 per cent. That statement is based on many hundreds of farm sale prices gath- ered in those seventy counties dur- ing the past six months by O. G. Lloyd of the farm management de- partment of the Iowa State College. In more than fifty of the counties land has sold for $300 and more per acre. The advance in price for the six months' period has averaged $100 per acre, or nearly 60 per cent.

Iowa has a new automobile law that is expected to put a material crimp in automobile thievery. It provides that when an automobile is purchased, the owner must sign a registration blank. When he sells or trades the car he must fill out a statement telling all the facts con- cerning the purchase of the machine and furnish it to the purchaser, giv- ing the latter a clear title. Severest penalties are provided for defacing the numbers on a machine or other- wise disguising it to make identi- fication difficult or impossible. The law became effective Nov. 1.

Corn husking is being rapidly push- ed and many of the farmers of Butler county are through. The average yield is from 25 to 40 bushels per acre. The windstorm that swept all of this section, blew it down badly and damaged the crop about one- third, and has made husking very difficult. Fred Smith, one of the champion corn growers, has just com- pleted gathering his 110-acre crop. One field of 60 acres went 40 bushels per acre and a 50-acre field yielded 35 bushels. He paid 7 cents per bushel to the huskers on 60 acres and 8 cents for 50 acres, and used the el- evators.

If sugar production increases in other states in like proportion to the promised increase in Iowa next year, the sugar shortage problem will be solved. Two new beet sugar factor- ies will open in Iowa next year, one at Belmond in Wright county and one at Waverly. At present there is just one sugar beet factory in Iowa, the one at Mason City, operated by the Northern Sugar corporation. This factory has proved a valuable asset to Iowa's food producing plants and its success in the growing of sugar beets and the manufacture of sugar, coupled with the big demand for this article, is responsible for the enlarge- ment of the industry in Iowa.

What Men Do.

We owe thanks to Machiavelli and all other [illegible] what men do, not what [illegible] to.—Bacon.

We have only two more

Moline 2-Row CULTIVATORS

--left from our large stock. Buy a 2-row cultivator now and save money--they will cost a lot more next year.

Remember that we now have on hand a big supply of Moline hay rakes, mowers, loaders, etc. Get yours now.

WESTERN GROCER COMPANY

M'ADOO OUT OF RACE

STATES HE WILL NOT BE NOMINEE FOR PRESIDENCY.

LOOKS FOR DEMOCRATS TO WIN

Eleven Candidates Including Nebraska Senator, Still in Field.—No Surprise at Washington.

New York.—William G. McAdoo, in a telegram to Jouett Shouse of Washington made public here, announced that he cannot permit his name to come before the democratic national convention at San Francisco next week and adds that "this decision is irrevocable, as the path of duty to me seems clear and unmistakable."

Mr. McAdoo declared he must have a reasonable opportunity to rehabilitate his fortune and, having been out of office less than eighteen months he has not yet been able to accomplish this.

A presidential campaign, Mr. McAdoo explained imposes upon the candidate unavoidable expenses, which, he said, he was unable to assume and which he did not want his friends to assume.

Mr. McAdoo in his telegram expressed the opinion that the republican convention and platform assured a democratic victory if the latter party adopts "a straight forward, unequivocal, unevasive, honest and liberal platform, and puts forward candidates who will command public confidence." Reports from Washington say Mr. McAdoo's action did not surprise administration officials.

The elimination of Mr. McAdoo narrows the field to eleven contestants, so far as is now known. They are: Attorney General Palmer, Governor James M. Cox of Ohio, Governor Edward I. Edwards of New Jersey, Senator G. M. Hitchcock of Nebraska, Secretary Meredith of the Agricultural Department, Senator R. L. Owens of Oklahoma, James Gerard, former ambassador, Senator F. M. Simmons of North Carolina, J. W. Davis of West Virginia, ambassador to Great Britain, Hon. S. Cummins of Connecticut, chairman of the democratic national committee, and Senator Carter Glass of Virginia.

AFTER COAL BARONS.

Palmer Orders Round Up of Those Profiteering in Fuel.

Washington, D. C.—A drive on profiteers in bituminous coal has been ordered by Attorney General Palmer. Orders were issued to all federal district attorneys to give special attention to charges of such profiteering and to seek indictment where investigation warranted.

"The Department of Justice," said Mr. Palmer's instructions, "is receiving a number of letters in which complaint is made that bituminous coal prices at the mines now range from $7 to $11 a ton, with a further increase imminent. Production cost figures gathered by the Federal Trade commission from 1,589 bituminous coal operators show that during January, 1920, their cost per ton averaged $2.32 at the mines. Since then there has been an increase in the cost of labor, enhancing the production cost to $2.79 per ton."

Death From Plague in Texas.

Galveston, Texas.—The death of a 17-year-old youth here after a brief illness "probably was due to bubonic plague," according to a diagnosis made public by Dr. M. F. Boyd, professor of bacteriology at the State Medical college. At a conference that diagnosis was concurred in by federal, state, county and city health officers. An immediate effort for the extermination of rats and mice was decided upon. Surgeon General Cummings at Washington has been asked to dispatch health service experts here to help prevent possible spread of the disease.

Convicts to Harvest Wheat Crop.

Topeka, Kas.—State officials have announced that plans have been made for harvest parole of state convicts. They will be sent direct to farmers upon request and their employer will be required to repot daily. The money earned by convicts is to be turned over directly to their dependents. Life termers will not be exempted from the list, it was said, but only men of approved behavior records will be paroled.

Probe Egging Non-Partisans.

Topeka, Kans.—Governor Henry J. Allen directed Attorney General R. J. Hopkins to investigate charges made by J. O. Stevis, state manager of the Nonpartisan league, and Walter M. Mills of North Dakota, as lecturer for the league, that they were not afforded proper protection two weeks ago when they were said to have been prevented by a crowd from speaking in Elinwood, Kan., and later egged and otherwise insulted and escorted from town.

Predicts Farmers Strike.

Chicago, Ill.—A "strike" of farmers that will astound the world" is predicted by E. H. Grubb, internationally known as a "potato king" of Colorado, and perhaps the final word on potato culture.

He is consulting agriculturists of a Sacramento valley irrigation company in California, a breeder of blooded stock and recognized the world over as an expert in agriculture. His warning comes in a letter to A. C. Thomas, member of the Chicago Press club.

REPUBLICANS TO START EARLY

No Time to Be Lost in Getting Campaign Under Way—Women to Serve On Executive Committee.

Chicago, Ill.—Campaign managers for Senator Warren G. Harding of Ohio, who was made the presidential nominee by the republican national convention, declared no time would be lost in getting things under way. Harry M. Daugherty, director of Senator Harding's pre-convention campaign, requested the national committee to take "prompt, snappy and energetic action" in placing the merits of the republican issues before the voters of the country. Party managers plan to start the campaign soon after the democratic convention is held.

Will H. Hays, re-elected chairman by the new national committee, will at once name members of the new executive committee, of whom seven will be women. A vice chairman of the executive committee, who will be a woman, will be selected at the time the committee is announced.

About the time party managers begin their real activities, the senate committee investigating campaign funds will resume hearings, holding its first sessions in Chicago, July 7. While the committee has been authorized to extend its investigations, Senator Kenyon, its chairman, said no plans had yet been made to inquire into campaign funds up to election day.

The republican presidential nominee will become the center of the campaign of the National Woman's party to bring about ratification of the suffrage constitutional amendment, according to a statement issued by suffrage leaders. A large delegation of women from many states, it was announced, will wait upon Senator Harding and ask him to insist upon republican action to secure the 36th state for ratification.

SET SAIL IN FRAIL ROW BOAT.

Four Youngsters Picked Up Thirty Miles from Lake Erie Shore.

Detroit, Mich.—Four youthful explorers, aged 3, 6 9 and 12 years, who set sail from Lakeside, Mich., in a frail rowboat to search for Treasure Island in Lake Erie, were picked up thirty miles off shore after having been adrift for twenty-five hours. The children, three boys and a girl, all of Toledo, were rescued by a passenger steamer. A prayer of thanks was offered by 1,500 passengers when they had been transferred safely from their frail craft.

The children, Merwin Da So, 9; Richard Da So, 6; Robert Da So, 3, and Virginia Hilger, 12, drifted out from Lakeside, Mich., while playing at the docks.

In telling the story of the trip across the lake Merwin said that his 6-year-old brother fell overboard at one time and later the girl did likewise. He rescued them both with a rope. Then to make sure of no more trouble he tied little Robert to the bottom of the boat. He was still in that position when rescued. Two fish, which he had caught for his turtle at home, were grasped in his hands.

WOOD REFUTES CHARGES.

Utterances Made by Murray Butler Branded as Malicious Lies.

Chicago, Ill.—Major General Leonard Wood, in a signed statement characterized as "a vicious and malicious falsehood," a declaration by Dr. Nicholas Murray Butler of New York that a "motley group of stock gamblers, oil and mining promoters, munition makers and other like persons" backed the general's campaign for the republican presidential nomination.

General Wood said that he regretted to make the statement, but it was necessary to "brand a fakir and to denounce a lie.' Declaring that the men who managed his campaign were of "extraordinary high character," the general said that the attack upon them "is infamous," and that Mr. Butler's action was an "attempt to ingratiate himself with certain elements which exercised a determining influence at the convention."

Charges Against Dempsey Dismissed.

San Francisco, Cal.—An indictment charging William Harrison ("Jack") Dempsey, world's champion heavyweight pugilist, and Jack Kearns, his manager, with conspiracy to evade the selective draft act, was dismissed in the federal court here.

Unite to Form Third Party.

Chicago, Ill.—Amalgamation of the "Committee of 48," labor party, Nonpartisan league and Single-tax league is in prospect at the convention called here July 10 to form a third party, it has been announced.

Leaders of the Committee of 48 and the labor party are to confer on a candidate.

A questionnaire sent to members of the committee showed a majority in favor of the candidacy of Senator Robert M. LaFollette.

Cancer Toll 100,000 Yearly.

New York.—Cancer caused 100,000 deaths in 1919 in the United States, and 500,000 Americans are afflicted with the disease, Dr. Frederick Dugale of Boston declared in an address to the convention of the Allied Medical Association of America here. Dugale said it had been decided that cancer is due to certain constitutional or blood conditions that are developed by exciting causes, and that cure depends upon removal of the exciting causes and treatment of the basic blood condition.

Germans Shipping Lambs Into Devastated France

These Germans are sending a shipment of lambs into the devastated regions of France in accord with the terms of the peace treaty.

Seeks Missing Link in Ether

Holyoke Professor Meeting Some Success in Investigation of Waves.

TRYING TO BRIDGE THE GAP

Bunch of Waves in the Ether Is Lost and No One Knows Whither They Go or What They Do.

South Hadley, Mass.—The scientist has another missing link for which to search. This time, however, it is not the biologist who seeks the link but the physicist. A bunch of waves in the ether is lost and no one knows whither they go or what they do. Some of their associates were long ago found, a few others were investigated more recently, but others are still missing. Wireless waves, heat waves, light waves and the waves of the X-rays have been made clear to us. Yet there is an unabridged gap, a gap that is nearer being filled today than it ever has been in the past.

Trying to Bridge the Gap.

A Mount Holyoke college professor, Elizabeth R. Laird, is finding some success at one end of the gap and investigations at the other end were completed some time ago. At the one end are the ultra violet rays and at the other are Entladungsstrahlen and soft X-rays. It is with this latter class that Miss Laird has had considerable success.

The first of the waves of radiation to be studied were those of visible light. The spectrum received the attention of the physicist, who found that the interval from the red to the violet was, in the language of the physics of sound, less than an octave, the violet rays having less than twice the frequency of the red ones. Naturally the question arose as to exactly what was outside this brief space of waves capable of affecting the sense of vision.

Where the Link Is Missing.

And so outside were found infra-red waves of heat and above these, beyond another gap, were found Hertzian waves used in wireless, while at the lower end of the spectrum appeared the celebrated ultra-violet ray. Then came the long gap, the missing link for which the physicist is searching, and after that the Entladungsstrahlen, joined to the X-rays. Last on the scale are the gamma-rays, probably in the neighborhood of two five-billionths of an inch in length. From the waves of wireless which are often ten miles long to the minute waves of the gamma-ray, the visible and the invisible spectrum is continuous save for the two harrowing gaps on opposite sides of the visible section.

Armed with a diffraction grating graduated to the ten-thousandths of an inch, a vacuum of high order and apparatus for the production of slow moving electrons, the scientist is on the trail of a wave so small that almost 10,000,000 of them measure but an inch in length. And the physicist gives promise of finding his missing link before his brother scientist, the biologist.

ASKS SWAMP BE PRESERVED

Government Survey in Plea for Aid for Okefinokee Tract in Southeastern Georgia.

Washington.—Preservation as a permanent government reservation of Okefinokee swamp, which covers 700 square miles in southeastern Georgia, is recommended in a biological survey of the department of agriculture, made public here.

Commercial interests, bent on removing timber from the swamp—the last of the three great swamps on the Atlantic seaboard—will destroy its primeval conditions unless action is taken, the survey stated.

The swamp is said to have no counterpart anywhere in the world, and still is in a primeval state. Among the fresh water swamps east of the Mississippi it is exceeded in size only by the Everglades.

Plowing by Spotlight.

Cincinnati. — Farmers throughout this section are working hard to overcome the handicap of a late spring and are plowing with tractors at night by the aid of spotlights. In Kentucky courts are being adjourned and farmers excused from jury service so that they can stick close to farm work.

REAL CHIVALRY AMONG HOBOES

Girls, in Continental Hike, Never Insulted Except by Rich Motorists.

TRAMP COUNTRY 18 MONTHS

Co-eds Set Out to Learn of Life in Open West and Find Modern Sir Galahad in Knight of the Road.

Indianapolis.—The modern Sir Galahad stews his evening meal in a tomato can suspended over a fire built of chips from railroad ties, according to two girl "knights of the road," who enjoyed a year and a half of hobo life in a dozen western states and "bummed" their way across the continent. The girls who found present-day chivalry flourishing in a box car are Miss Hazel Gage of La Grange, Ind., and Miss Virna Haskins of Orland, Ind. Both are graduates of the Tri-State college at Angola, Ind.

They set out in 1917 to learn of the life in the open West. Hobos doffed their caps and courtesied, lonely fishermen placed their cabins at the disposal of the girl pals, and rugged cowpunchers shared their meals on the prairie.

Treated With Respect.

Everywhere the girls were treated with the utmost respect. It was only when the girls accepted automobile rides from the modernized tourists of the East that the dreams of knightly chivalry burst like soap bubbles. The tourists would insist on holding the girls' hands.

Although the girls became expert revolver shots, they never once were in danger from the rugged westerners they met. A few months ago, minus everything but a ray of hope, they tumbled out of a box car on a mining camp side track near Tonopah, Nev. In the succeeding weeks they saved their pay checks, and, with a bank account of $400 felt secure.

Then came the idea to walk across half the continent to their homes, dressed as men. Their experiences were varied and thrilling. A Mexican sheep herder found them exhausted on a hillside. He shared his meal of bread and mutton with them, managed to get them aboard a freight train and bade them good-by.

A tramp on the train peeled off his coat for them to sit on, and the three swapped stories until the train pulled on to a siding.

"Everywhere," said Miss Gage, "we found the spirit of fellowship, backed up by the unwritten law of man and woman. Not even in those old saloon-hotels was there any improper familiarity. It was a new life which we discovered—the life of universal understanding in the great outdoors."

Held Eggs for a Raise, Got Chickens Instead

A woman, living near Rio Vista, Cal., recently set a box of eggs in a corner of her room, beneath which was a water pipe kept constantly warm by a fire in the cook stove.

She planned to keep the eggs until the price would go up, then reap a nice profit.

Instead, she heard the chirping of chicks, and on investigation found that 42 of 48 eggs had hatched.

Giant Elm, 600 Years Old, Has Quit Leaving

London.—For the first time in 600 years a giant elm standing outside the Croyden parish church, near London, has failed to leaf this year. This elm is famous because under its branches parish meetings had been held annually for more than three centuries.

Lion a Guest in a New York Hotel

Thomas R. Zann, registered from Leavenworth, Wash., brought a tame lion into a New York hotel in a canvas-covered cage, the discovery that there was a lion in the hotel created a sensation, and the department of health ordered "Jim," as he is called, removed. He is on his way with "Jim" to South Africa.

First Hundred Years the Hardest.

Jackson, O.—When Mrs. Peggy McDaniel, who is entering her one hundred and sixth year, celebrated her birthday, among the 200 guests was Mrs. Winnie Carter, one hundred and seven years, who lives just ten miles from the McDaniel home.

FORMER KAISER TURNS TAILOR

William Unfortunate to Have Missed Vocation, Says Holland Dispatch.

London.—William of Hohenzollern, former emperor of Germany, is trying his hand as a tailor, according to a Central News dispatch from Amsterdam.

He is cutting out patterns for many new suits with which he is going to stock his wardrobe, and the dispatch quotes a trade paper as declaring he is "excelling at the job."

"How unfortunate it is," says this paper, "that William missed his vocation. After all the notoriety he achieved as an emperor, one can imagine what would have been his fame as a tailor."

Death Invades a Crap Game.

Elkins, W. Va.—A half-dozen men jumped out of a second-story window when the police raided a crap game. John Coleman was impaled on the picket of an iron fence dying almost instantly.

VOTE U.S. RUN ROAD

GOVERNMENT OWNERSHIP ... DORSED BY LABOR.

FIRST DEFEAT FOR GOMPE...

Call Upon Congress to Curb Profiteering, Favor Irish Republic, Declares War On Industrial Court.

Montreal—The American Federation of Labor's endorsement of government ownership of the railroads at its annual convention here was declared by labor leaders to have been the first genuine defeat Samuel Gompers, the veteran president, has suffered in years. The final vote was 29,050 for government ownership and 8... against.

Mr. Gompers fought hard against the convention's action, declaring it was a step toward the "enslavement of the workers as government employes," who, he said, had been denied many political and economic rights under past administrations. He received only a mild ovation.

The federation called upon congress to curb profiteering, endorsed President Samuel Gompers' nonpartisan political program, approved the Irish republic and requested withdrawal of armed forces from Ireland, defeated the beer- and wine proposal, declared war on the Kansas court of industrial relations and anti-strike legislation now before the legislature in Colorado and Nebraska.

The recent railroad strike was condemned by the federation as a "secessionist movement" to discredit the recognized organizations in the railway service.

The convention by unanimous vote elected Samuel Gompers president for the thirty-ninth time and the aged official accepted the honor. Gompers' wife, father and daughter died in the last year, and he is in his seventy-fifth year.

MOB LYNCHES THREE.

Negroes Charged With Assault Hanged at Duluth.

Duluth, Minn.—Three negroes were lynched here by a mob estimated at 5,000 persons, which overpowered the police, took possession of police headquarters and seized the prisoners, who were held in connection with an attack on a young white girl.

Not a shot was fired in the attack on the police station, the members of the mob using bricks and other missiles and in the final stages of the fight streams of water from fire hose taken from the police themselves.

A mock trial was held by the mob in the station and three negroes were found guilty and three others held in connection with the assault were acquitted and turned back to the police.

Following the disorder two companies of the Sixth infantry, Minnesota National guards, were sent here from St. Paul.

The negroes were roustabouts with a circus that appeared here, and the alleged attack on the 17-year-old white girl took place on the circus grounds. The negroes hanged were Isaac McGhie, Elmer Jackson and Nate Green, all about 22 years old. All professed their innocence.

Scores Nebraska Delegation.

Lincoln, Neb. — "Downright treachery, which Hi Johnson will not soon forget or forgive the Nebraska delegation," is the term applied to the movement that broke the Johnson ranks by Frank A. Harrison, manager of Johnson's Nebraska campaign.

"It was treachery and desertion by delegates from the instructed state that broke the heart of the Johnson movement," Harrison declared on his return from Chicago.

Accepts Wilson's Challenge.

Washington, D. C.—President Wilson's challenge to submit the peace treaty to a referendum of the American people was accepted by Senator Harding, the republican presidential candidate. "I am sure," said Senator Harding, "the republican party will gladly welcome the referendum on the question of the foreign relationship of this republic and the republican attitude of preserved nationality will be overwhelmingly endorsed."

Fear Acute Coal Shortage.

Washington, D. C.—A coal shortage next winter which may curtail production of iron and steel and seriously affect other industries is foreseen by the federal reserve board in its review of business, industrial and financial conditions of the month of May. The situation already is acute in some districts, according to the board, and production in many lines is being held down. Production of coal is being curtailed chiefly as a result of car shortage, the reserve board reports.

Life for Robbing Church.

St. Louis, Mo.—Wenzel A. Kre... was sentenced by a jury in circuit court to life imprisonment for the theft of motion picture instruments from the King's Highway Presbyterian church here.

Three Aviators Killed.

Fort Bragg, Cal.—Three men were instantly killed when an airplane in which they were riding, collided with another machine at an altitude of 1,000 feet and crashed to the earth in flames here.

EAT SCRAP IS EGG-LAYING AID

sult of Recent Experiments Conducted by the Department of Agriculture.

RMAL CONDITIONS GIVEN

erage Farmer Feeds Very Little Animal Protein Feed of Any Kind —Milk Products or Fish Also Are Favored.

Hens given meat, fish, or milk products in their diet will lay from 38 to per cent more eggs than those which ve only grain food and what bugs d worms they can pick up on free nge, recent experiments made by United States department of agriture show.

The birds used in the experiments re given conditions as nearly like ose on a normal farm as possible. e experiments were repeated under fferent conditions and in different ars to avoid, as far as possible, any ror due to the varied characteristics the birds.

Little Animal Protein Feed.

The average farmer feeds very lit- meat, fish, or animal protein feed any kind to his poultry, and conquently gets few eggs during the te fall and winter when eggs are lling at the highest prices.

In the experiments conducted on e government poultry farm, pens of llets on free range were fed a mash corn meal, bran, and middlings and scratch mixture of wheat, oats, and rn. This is greater variety of grains an is used by many farmers. In adtion the birds had absolutely free nge on land where bugs, green feed, d worms were plentiful. Other ens were given the same ration, with pound of commercial meat scrap dded to every 4 pounds of mash.

Results Obtained.

The pullets without the meat scrap id only 90 eggs apiece (which is ore eggs per hen than the average

Fowls Given Free Range.

arm flock lays), while those receiving meat scrap averaged from 125 to 50 eggs apiece.

Meat scrap is not produced on most farms, and has to be bought at a higher price than grain. It produces eggs, though, several cents a dozen cheaper than where no meat scrap is used. Milk products or fish give as good results as meat in increasing egg production.

REDUCE COST IN MARKETING

Price Margin Between Producer and Consumer Can Be Cut by Working Together.

A. D. Wilson, chief of the agricultural extension division of the University of Minnesota, holds that the price margin between the producer and consumer can be cut down if the producers in every community will work together sufficiently to produce a standard product of good quality and in quantities large enough to let it be marketed in car lots. "Improvement in marketing," he says, "must be along the line of reducing the labor and expense required in getting the products from the farm to the consumer. One of the things which tends to reduce this cost is to have produced in a community a large quantity of a uniform product." The marketing of co-operative creamery butter is cited by Mr. Wilson as an illuminating illustration of the truth of his premises.

CEESE ARE QUITE PECULIAR

Fowls Are Partial to Their Mates and It Is Not Best to Separate Them Each Year.

Unlike other farm poultry, geese are partial to their mates and it is best not to try to separate them each year. An old gander is not a good breeder and he ought not to be kept more than three or four years. On the other hand, the older females lay more eggs than do young ones and as a rule the eggs are more fertile. Females may be kept for eight or ten years or even longer.

FEED FOR FINISHING SHOATS

Whey Fed With Barley or Corn Is Excellent—Pigs on Trial Made Big Gains.

Whey fed with barley or corn makes an excellent feed for finishing well grown shoats. Pigs fed on trial made a gain of 100 pounds on only 35.3 pounds of barley and 854 pounds of whey.

PUREBRED PIGS ARE HIGHLY PROFITABLE

Virginia Farmer Gives His Experience With Scrubs.

Used to Raise Scrubs, but Made Very Little Money—Purebreds Go to Market Much Earlier While Prices Are High.

(Prepared by the United States Department of Agriculture.)

How a Virginia farmer marketed pigs heavier and more profitable than he had raised in the past is told in a circular, "Better Sires for Virginia," recently issued by the extension division of the Virginia Agricultural and Mechanical college.

"I used to raise scrub pigs," the farmer declares. "I didn't think there was much money in the hog business because I didn't make much. Since using purebreds sires I have changed my mind. As a result of using purebreds sires my pigs weighed 215 pounds

Purebred Poland Chinas.

last fall, when the average scrub pig would hardly weigh 150 pounds. Consequently my pigs went to market early, while prices were high, while the man with scrub pigs had to keep his longer and feed them high-priced grain while prices kept going down."

The account is accompanied by a picture of purebred boars which are described as having "a good father, a good mother, and no poor relations."

IMMUTABLE BREEDING LAWS

Use of Good Sires, Care, and Management Are Essential in Building Up Herds.

There is no disputing the absolute fact that the laws of breeding are just as immutable as they have ever been. The use of good sires is necessary in breeding up good herds and this alone will not do; good care, feed and management must be given calves, heifers and cows and where these rules are followed, men usually succeed and prosper with greater certainty than though they depend too largely upon the cooperation of the butcher.

PUREBRED

A purebred animal is one of pure breeding representing a definite, recognized breed and both of whose parents were purebred animals of the same breed. To be considered purebred, live stock must be either registered, eligible to registration, or (in the absence of public registry for that class) have such lineage that its pure breeding can be definitely proved. To be of good type and quality, the animal must be healthy, vigorous, and a creditable specimen of its breed.

MANURE ON CONCRETE FLOOR

That From Steer Valued at $24.85, While on Earth Floor It Is $4.51 Less.

The manure produced by a 1,000 pound steer in six months on a concrete floor has a value of $24.85, while on the earth floor the manure is worth only $20.34, a difference of $4.51 in favor of concrete. In eight months' time this saving is sufficient to pay the animal's share of the cost of a concrete floor. All further saving is clear profit, which amounts to $9 a year for a 1,000 pound steer.

CONTROL OF WEEDS IN CORN

Good Harrowing at Proper Time Is Most Effective Way of Checking Growth of Plants.

A good harrowing at the proper time is often the cheapest and most efficient way of controlling weeds during the first stages of growth of the corn. The harrow or the weeder also can be used to advantage in breaking up a crust caused by a heavy, dashing rain.

PLANT SOY BEANS ANY TIME

For Hay, Pasture, Green Manure or Soiling Crop Sow Any Time Up to August 1.

Soy beans may be planted any time from early spring until midsummer. For a grain crop they should be planted early, but for a hay, pasture, green manure or soiling crop they may be planted as late as August 1. The choice of a variety must be made by the farmer himself

CAREFULLY-MADE PLANS WILL PREVENT WASTE OF MANUAL LABOR IN HAYMAKING

This Is the Best Way to Haul Hay If the Distance Is Not Too Great.

The hay crop, even when the labor supply is normal, causes more worry, anxiety, and disappointment than any other crop. The time for harvesting is comparatively short. Other crops require attention at the same time. And the weather is to be reckoned with. This year, when farm labor all over the country is very scarce, the difficulties of haymaking will be much greater, and larger quantities of hay will be lost than usual—unless labor-saving methods are more generally employed.

A great deal of labor is wasted every year during hay harvest, say specialists of the United States department of agriculture, not because of actual idleness on the part of the workers, but because labor is expended unnecessarily on operations that do not utilize it to the best advantage. If an old method can be superseded by a new one that will enable the same number of men to accomplish more work in the same length of time, or fewer men to accomplish the same work in the same length of time, it will mean more hay saved, more profit to the farmer and a better condition for the country.

Shift Burden From Man to Horse.

Although there is a scarcity of man labor, there are still plenty of horses on most farms, and herein largely lies the solution of the problem. On farms where considerable hay is grown methods must be adopted by which the greater part of the heavy labor is done by horses. This will necessitate the general use of certain types of labor-saving machinery, some of them not so common in the East, which have been thoroughly tested and proved satisfactory in the western part of the United States. The small hay grower, however, need not make a very heavy investment in new haying apparatus, for by rearranging the working of his crew and using a little more horse labor for the hard work he can add considerably to the efficiency of his crew.

Here are some suggestions made by the specialists for avoiding waste of labor in haymaking:

Do not run two or more mowers close together. If the front mower has any trouble that causes it to stop, all of the mowers usually wait while repairs are made on one. There is a tendency, also, for drivers to waste too much time talking when they stop occasionally to let the teams rest. A good practice when two or more machines are used is for each driver to lay off a "land" for himself and work independently, so there will be no interference from other machines.

Side Delivery Rake Is Best.

Do not turn hay by hand. It is too costly. The cheapest and most efficient way of stirring hay in the windrow is with a two-horse tedder. One man will do more work than 12 men stirring with hand forks. It is not even necessary to have a man to run the tedder. A boy big enough to drive a team will do just as much work.

A one-horse rake operated by a man makes raking very costly. A two-horse sulky rake is better, but the side-delivery rake is best. When curing is done in the swath and a hay loader is used, the crew can start taking the hay from the windrow as soon as the side delivery has made one double windrow across the field. If the sulky rake is used, the crew will have to wait until the rake has gone several times across the field. In this matter the extent of the haying operations has to be considered, of course. On very small farms the use of the side-delivery rake might not be economy.

If the weather is clear and the hay is in proper condition, there will be no necessity for hay-caps or for further labor till the hay is thoroughly cured and ready to be hauled. But hay-caps will pay for themselves in one year when the weather is bad. They are more especially needed with clover, alfalfa and pea vines, all of which cure slowly.

If hay is to be bunched, the hand method is too expensive. A two-horse sulky rake can bunch 30 acres or more a day and a boy can drive it just as well as a man. Even more labor can be saved, however, by using the push rake to bunch hay after it has been raked into the windrow. It is a good plan to have two men working together to round up the bunches, since more can be accomplished than when each works alone.

It is a waste of time to pitch hay onto a small hayrack on a high-wheeled wagon. Use a large hayrack on a low-wheeled wagon.

Loading hay with pitchforks is the hardest, slowest and most expensive way. The men are working constantly, but the horses are doing nothing most of the time. If a loader is used, the hardest part of the work is done by the horses and the men can handle about 30 per cent more hay.

Save Labor on the Stack.

The push rake furnishes the most economical method of hauling hay to the stack, barn, or hay press if the distance is not much more than one-fourth of a mile. One man, or a boy, with a good push rake and a team used to the work will handle three times as much hay as two men with a small rack on a high-wheeled wagon.

Stacking hay with a push rake and an overshot stacker mounted on wheels eliminates nearly all of the back-breaking work of the old pitchfork method. With a yield of one to one and a half tons to the acre, two men on the stack can easily handle all the hay brought in by three push rakes, accomplishing a vast saving in labor and hay over the pitchfork method. Another method not so good but still vastly better than the pitchfork method is a stacker equipment with a double harpoon fork. The outfit can be made at home and will cost very little compared with the labor it saves, but harder work is necessary to get the hay on the stack than with the overshot stacker.

When hay is to be baled from the field, one man by working in the afternoon, can round up enough hay which has been bunched by push rakes to keep the press going next morning until the dew is gone from the hay in the windrow. When the hay is not thus rounded up the crew will lose two hours or more on mornings when there is a heavy dew.

Carelessness in setting the press may result in loss of labor. When the press is properly set two men can get plenty of hay to it from the stack.

COMMERCIAL ACREAGE OF VEGETABLE CROPS

Compared With Last Year Marked Reduction Is Shown.

Estimates Based on Reports Received From Seed Growers—Increase Is Indicated for Sugar Beet and Garden Peas.

(Prepared by the United States Department of Agriculture.)

The prospective commercial acreage of vegetable-seed crops for 1920, compared with last year, shows marked reductions in the acreage reported for dwarf snap beans, all beet, carrot, lettuce, onion seed, radish, spinach, sweet corn, and tomato seed, while a slightly increased acreage is reported for garden pole beans, cucumber, muskmelon, watermelon, parsley, pepper, pumpkin, and Swede turnip seed.

These estimates are based on reports received by the bureau of markets, early in April from commercial vegetable-seed growers and are as accurate and complete as it was possible to obtain at that time.

The estimated prospective production for 1920 (computed on the basis of the acreage reported and the average yield per acre for the four-year period 1916-1919), compared with that for 1919, is about 35 per cent less for sweet corn and English turnip; 50 per cent less for dwarf snap beans, celery, parsnip, and squash; 60 per cent less for cabbage and radish; and about 80 per cent less for garden and mangel beet, carrot, onion seed, and spinach; while an increase is indicated of 20 per cent for sugar beet and garden peas and 50 per cent for onion sets.

The estimated acreage and prospective production for 1920 are more comparable with those for 1917, and the reductions in acreage and production as noted should not be taken as an indication that the vegetable-seed growing industry in this country is on the decline from that of prewar years.

GENERAL FARM NOTES

Plan your work and work your plan.

* * *

The application of acid phosphate has paid well on many alfalfa fields.

* * *

Humus, when decaying, makes available plant food from the store of unavailable plant food in the soil.

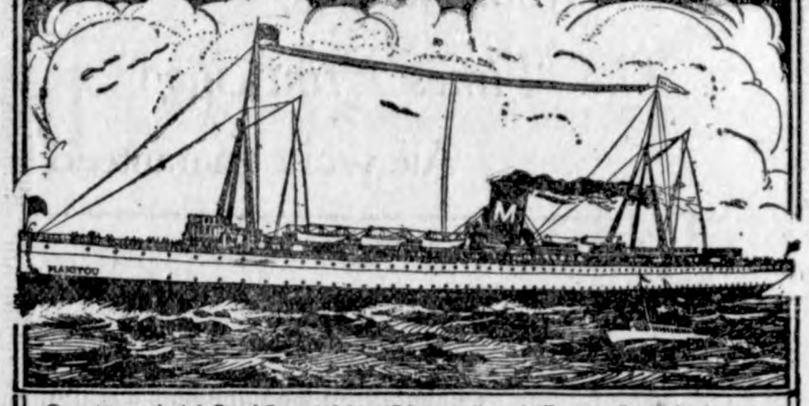
* * *

Humus acts as a sponge and increases the water-holding capacity of the soil.

* * *

For extra good melons, plant on hills of rotted manure and thin the vines to not over three plants to the hill.

Enjoyable Lake Trips to Northern Michigan



Our two palatial Steel Steamships "Manitou" and "Puritan" will be in constant service during this season, supplying frequent and attractive sailings between Chicago and Northern Michigan points. Tourists and owners of summer cottages will find this the quickest and most direct route to reach Northern Michigan resorts or connect with all eastern points. Dining service and food the very best. Accommodations for automobiles on S.S. "Puritan." Effective June 25th, S. S. "Missouri" and S.S. "Illinois" will operate between Chicago, Milwaukee and Detroit in Passenger and Express Freight Service.

The Palatial Steel S.S. "MANITOU"
TRI-WEEKLY SAILINGS
Between Chicago and Charlevoix, Petoskey, (Bay View), Harbor Springs and Mackinac Island—Mondays, 11:30 a. m.; Wednesdays, 2 p.m.; Fridays, 6:30 p. m. First trip Friday June 25th.

The Palatial Steel S. S. "PURITAN"
Regular Summer Schedule
Effective June 28th. Leaves Chicago Mondays at 7 p. m. for Ludington, Manistee, Onekama, (Portage Park), Frankfort, Glen Haven, Charlevoix and all Grand Traverse Bay ports. Leaves Chicago Thursdays and Saturdays at 7 p. m. for Ludington, Manistee, Onekama, (Portage Park), and Frankfort.

While the popularity of our steamers secures for them liberal patronage, there is usually room for additional passengers on every trip.

S. S. "MISSOURI"
Special Spring Schedule
Effective June 5th to June 26th inclusive, S. S. "Missouri" will leave Chicago every Saturday at 7 p. m. for all ports as far as Mackinac Island inclusive, and every Thursday at 7 p. m. for Ludington, Manistee, Onekama, (Portage Park) and Frankfort.

TIME MAKES LITTLE CHANGE

Booth Tarkington Relates Anecdote to Show How Characteristics Prevail to the End.

Novelist Booth Tarkington was talking about the cowardly attack that a gang of Germans had made on a solitary French officer in the restaurant of the Hotel Adlon in Berlin.

"The Germans," he said, "were unspeakable in the beginning, and they will be unspeakable to the end."

He shoook his head thoughtfully.

"People can't change," he said. "Henry Labouchere was born a fearless wit, and a fearless wit he died. A few hours before his death, you know, Labouchere's nephew upset a tiny spirit lamp that was burning by the bedside. The dying man awoke out of a fitful doze and saw the miniature conflagration.

"'Flames?' he said. 'Not yet, I think.'

"And he laughed quizzically and dozed again."

The Terrible Future.

"What's the matter?"

"I'm terribly worried about the future."

"Why fret about the future?"

"It's this way: I'm not making very much money. I'm just going along the ordinary way without piling up anything that looks like a fortune."

"Well, why worry? You're happy, aren't you?"

"Yes, I'm happy enough now, but twenty or thirty years from now, when the record of this age is written what shall I say to my children when they ask me what I was doing when everybody else was getting rich?"

A Difference.

"I understood there were scandalous goings on at the party last night."

"Oh, no, grandma; the young folks merely indulged in some osculatory diversions."

"Well, that was all right, but that rascally Jimmy told me you were all playing kissing games."

BREAK IN TRAIN'S SCHEDULE

Fair Driver of Auto Had a Hunch, and the Sequel Proved She Was Correct.

Let me recommend a ride in a new car with a woman driver as the best prescription for a thrill that will last a lifetime, writes a correspondent. Mine came when, after reluctantly accepting an invitation to ride from a friend who had just received her new machine, we mounted the incline to a grade crossing in a suburb and started across the tracks. In the exact middle the engine stopped and nothing we could do had the slightest effect on it. While working we were approached by an excited flagman.

"A limited is due here in two minutes," he said, "and it never has stopped at this station."

"It will today," calmly replied my friend. And it did, but not before it had been flagged and the train crew helped boost us from the rails.

Color to Show Denominations.

The treasury department at Washington is now working on a proposition to mark bills of various denominations with a standardized colored seal, so that anyone can recognize notes of different denominations at a glance. The plan, suggested by a Philadelphia druggist, is to have a colored seal in one corner of the bill, for instance, a green seal for a one, a pink seal for a two, a blue seal for a five, and so on. Treasury officials, however, dislike the idea of using different dyes.

John Smith Named New England.

The name of New England was coined by Capt. John Smith of Pocahontas fame, one of the founders of the Virginia colony. In 1614 he explored and mapped the northern coast, then called North Virginia, and renamed it New England. The charter granted the Mayflower Pilgrims adopted the name used in Smith's map several years before.

Two well known Union county farmers have marketed steers on the Chicago market. They are O. F. and Jesse Erickson. The former had 17 head of cattle, weighing on an average of 1300 pounds and which brought $18.25, and the latter 19 head, averaging 1247 pounds and selling for $17.00

The matter of accurate farm business records has taken a strong hold of Hardin county farmers. Eleven farmers in this county kept records and a summary was recently made of them. It showed that on the eleven farms the average income was $1,318.02. The average of the five highest was $2,838.47. The average for the five lowest was $363.11. The average capital invested was $41,097.11.

County Agent O. W. Beeler of Boone county, is an enthusiastic supporter of the club work idea in county agent work. Various agricultural clubs for boys and girls have been encouraged in Boone county. In pure bred calf club considerable time has been devoted to securing 52 heifers of Angus, Shorthorn, and Polled Hereford breeding. The calves were distributed the past summer and the sale will be held the last of December.

The Short course, preparations for which have been going on for many weeks, is now in session in Covington. The program, an extensive one, and the exhibits, are limited to Clinton township and to members of clubs in Clinton township, but the professional corn class is open to Linn county entries. In the 10-year contest a silver cup has been given by Wm. Galloway. Other prizes are being offered by the merchants of Cedar Rapids. Grains, grasses, livestock, fruits, etc., are being entered for prizes. Prizes are also being offered for women's and children's work.

Cutting down the prices of farm products below the cost of production has already resulted in a loss of over one hundred million dollars to the farmers of Iowa without bringing any relief to the consumer. This vast sum has gone into the pockets of profiteers, but might have been saved if farmers had been organized to defend their interests. The cost of living would be high if the farmers received nothing for their products. Careful investigation shows that not more than nineteen cents of the wage earner's dollar goes to the farmer. Farmers are not profiteers; they act on the principle of "live and let live."

Most Sacred Thing.

Everything that is mine even to my life, I may give to one I love, but the secret of my friend is not mine to give.—Philip Sidney.

CHAPTER XXIII—Continued.

—16—

No sense of shame nor of guilt possessed me. I was aware of having done wrong to no one. A clear conscience kept assuring me that it was misfortune and not error on my part that had brought me here. At every point in the strange chain of circumstances I felt that I had acted as a man of honor should have acted. My sense of innocence upheld me even though the deliberate malicious plotting of evil men might make it appear to the judge, to the jurors, to the whole world that I was a murderer. Even though I should be sentenced to death for killing a woman I never had seen the knowledge that at every point I had done what I still believed to have been right, brought me strong comfort and filled me with new courage.

Yet it was with lack of interest that I listened to the monotonous questioning that formed a part of the selection of a jury.

"So far as I am concerned," I had said to my counsel in our last chat, "any sort of a jury will do. Unless we succeed in upsetting the evidence against me with a crash that all the world can hear it makes no difference."

"I guess you are right," he answered, despondently, it seemed to me, "and if the worst happens, we always can take an appeal."

His reply convinced me that he, too, was anticipating the result, which I long ago had decided to be the only outcome, unless something unforeseen happened—a verdict against me of murder in the first degree.

I heard, almost with amusement, the district attorney, with eloquent oratory, tell the jury the crimes he expected to prove against me, even smiling a little at the picture he painted of a gangster seeking employment in an apartment occupied by families of wealth that he might find opportunities for plundering them, and when he was surprised in the midst of his burglarizing, brutally choking the unprotected woman whose home he was despoiling and then as she lay there, helpless and insensible, shooting her through the heart.

In fact, I quite agreed with all he said, even to his most strenuous adjectives—except for the one fact—that I knew I was not the man he was talking about. It had been a brutal, cowardly murder, and I was fully as anxious as the district attorney could possibly be to see the miscreant who had killed Miss Lutan brought to book.

The testimony that was to come, I devoutly hoped, would give some clue that would lead to the unmasking of the real murderer. The first witness called was one of the detectives who had arrested me. He told concisely, as though repeating a well rehearsed story, of having been summoned to the Granddeck and finding there the body of Daisy Lutan. He said that she had been shot through the heart.

"Was there anyone in the apartment when you arrived?"

"Yes, a doctor."

"Anyone else?"

"Yes, Mr. Wick, the superintendent of the apartment, and the prisoner."

"What did they say? How did they explain their presence there?"

"They said they had heard a shot and had come in to investigate."

He told of examining the body, questioning the physician and of making a search of the apartment for the murderer, but finding no one else there.

"What did you do then?"

"My partner and I followed the prisoner to his apartment and placed him under arrest. We searched his room and in the dresser I found a revolver with one chamber recently discharged."

"What made you suspect Nelson? Why did you arrest him?"

"My partner and I talked it over, and we both were of the opinion that it was an inside job. A burglar would have no chance to get into a building like the Granddeck and make his getaway. It was between the superintendent of the building, who was a man of responsibility, and this young fellow—who was only a caretaker."

"Had anything in Nelson's actions made you suspicious of him?"

"I noticed that he was greatly excited."

"Anything else?"

"After Nelson had gone upstairs to his own apartment, I questioned Mr. Wick. He said he had been in the elevator when he heard the shot. He had gotten out at the fifth floor, where it seemed to have come from. At the door of Miss Lutan's apartment he had found the prisoner."

"That's all," said the district attorney triumphantly.

My attorney waived cross-examination. The second detective was put on the stand and corroborated his partner's evidence in every respect. Both of them told of finding blood on my coat. The physician whom Wick had summoned gave a somewhat technical description of the bullet wound, and the prosecution put in evidence the bullet extracted from the body and the revolver the detectives had found, pointing out that they were of the same caliber.

"Call Mr. Wick," said the district attorney.

I leaned forward to listen to every word of Wick's testimony. In fact from the moment he was brought in I never took my eyes from him. It would be black enough for me if he merely stated the facts as they actually had happened, but I doubted if he would be content with that. If, as I felt certain, Wick was in the employ of the conspirators, it was more than likely that they would seek to clinch the case against me with his testimony.

He gave his name, James Wick, and his occupation as superintendent of the Granddeck.

"How long have you been employed there?"

"Ever since the building was opened."

"Where were you employed previously?"

Wick hesitated. I wondered if Gorman's surmise that he had been in prison were true, what he would say.

"Before that," he stammered, "I was in the employ of Mr. Kent in the West."

"Who is Mr. Kent?"

"He owns the Granddeck. He had known me for years. He brought me on when he built this building."

While his answer seemed to satisfy the district attorney, I was convinced from Wick's nervousness that he was concealing something, that further questioning into his past might lead to unexpected developments.

"Are you acquainted with the defendant?"

"Very slightly."

"How long have you known him?"

I was listening intently. Would he admit knowing that I was a relative of old Rufus Gaston?

"I don't really know him," Wick explained. "I've seen him two or three times. Mr. Gaston, one of my tenants, told me that he was going away and that he had given the key of his apartment to a young man named Nelson whom he had employed as caretaker. He said that the caretaker would arrive at ten o'clock on the Sunday morning that the Gastons went away."

"And did the defendant arrive at that time—at the time he was expected?"

"He did not. What first attracted my attention to him was that he sneaked into the building earlier than he was expected."

"You say he sneaked in," the district attorney's voice expressed a proper horror of such conduct. "Please explain to the jury what you mean by that."

"Instead of announcing his arrival, he watched his chance and waited till one of the tenants was coming in. He slipped in beside her and went

I Leaned Forward to Listen to Every Word of Wick's Testimony.

up in the elevator without being announced. Naturally the elevator man thought he was a friend of the young lady tenant."

"How do you know he was not a friend of the young woman with whom he entered the building?"

"I asked him if he was acquainted with her, and he said he was. Later that same day she passed him in the hall of the building. I noticed that she did not speak to him or recognize him in any way."

The prosecutor waved his hand to the jury as if to say, "You see, gentlemen," and followed on with another question.

"Was the defendant's conduct in the building in any other way such as to arouse your suspicion?"

"He'd hardly got located before he began buzzing the telephone girl, asking her all kinds of questions about the other tenants in the building. He kept trying to get her to go out to dinner with him."

"Did she go?"

"Yes, she did. She reported his actions to me, and I suggested that she go with him and try to find out what his name was."

"What else do you know about the defendant?"

"That's all—except—"

"Except what?"

"What I saw on the night Miss Lutan was murdered."

"Tell the circumstances."

"I was in the elevator coming down from the top floor. I heard the sound of a shot. It seemed to come from the fifth floor. I got off there to investigate. As the door of the Lutan apartment stood Mr. Nelson."

"What was he doing there?"

"Just standing there. It looked to me as if he had just been coming out and that when he saw me he had stopped suddenly."

"What was his manner? Describe the position in which he was standing to the jury." Again there was in the district attorney's voice a triumphant ring.

"He was all excited and tremblylike," Mr. Wick went on, "and his eyes seemed to be bulging out of his head."

"What did he say?"

"I asked him if he had heard a shot and he said that he had. I asked if it had not come from the Lutan apartment and he said that it had seemed so to him. I wanted to keep my eye on him, so I took out my pass-key and suggested that we investigate together. He did not seem at all anx-

"Is That Your Real Name?"

ious to go back into the apartment with me, but the elevator man was standing there, so he came along and was with me when I found the body. I kept him there until the police came."

I had expected that my counsel would offer objections to Wick's testimony, especially to his having said that I did not appear anxious to "go back" into the apartment, but McGregor contented himself with two questions.

"Do you not know that Mr. Spalding Nelson is a grand-nephew of Mr. Rufus Gaston? Did not Mr. Gaston tell you of this relationship?"

"He did not," lied Wick calmly.

"How was Mr. Nelson first standing—when you got out of the elevator—when you first saw him?"

I recalled my attitude distinctly. I had been standing facing the door, straining my ears to catch any sound in the apartment. When I heard the elevator stopping, I had looked around over my shoulder as Wick emerged.

"He was standing," said Wick, of his own accord, speaking direct to the jurors, "with his back against the door. One hand—his right hand—was behind him. I thought at first he might have a revolver in it and drew one I always carry, but he had not. It looked as if he had just slipped out of the door and was reaching behind him to close it when I discovered him."

"That will be all," said my counsel, to my great disappointment. Throughout the mixed medley of truth and lies that Wick had been telling, there had been manifest to me his deliberate purpose to discredit me and cast suspicion on me. I felt certain that an abler lawyer could quickly have riddled his testimony, but McGregor showed no disposition to take advantage of his opportunity.

Nellie Kelly was called. Briefly she told of her job—switchboard operator at the Granddeck. She corroborated Wick's story of my first arrival at the Granddeck and bore out his statements about my having chatted with her and also told of having gone to dinner with me. When I had begun questioning her about other tenants, she said, she excused herself and went to the telephone and called up the Granddeck for advice as to how she should answer. For some reason, she said, when she returned after phoning, the defendant had not questioned her further but had seemed anxious to get away from the restaurant.

"You say," said McGregor, as he began her cross-examination, "that your name is Nellie Kelly. Is that your real name?"

My counsel's unexpected question came as a thunderbolt to the opposition. The whole courtroom seemed to sense that something crucial was about to be brought out. The jurors to a man leaned forward to listen for her answer. The district attorney, plainly puzzled, half rose in his seat and then subsided. Wick's face went white, and the girl herself started and her eyes turned helplessly to Wick, as if seeking instructions as to how to answer.

"Is that your real name?" McGregor repeated, this time a little more emphatically.

"It is—that is—it was," she stammered.

"It was your name," said McGregor sarcastically, "and what might be your name now?"

"My name," the girl hesitated, as if struggling with herself, and then casting a defiant look in Wick's direction, she answered with pride rather than with boldness, "my name is Mrs. Edward Moore."

"The wife of Lefty Moore, the burglar in Sing Sing, you mean, do you not?" sneered McGregor.

"I am," she replied with a proud lifting of her chin and a flash in her eye. "I'm Lefty Moore's wife, and I'm proud that I am—his lawfully wedded wife and I don't care who knows it. I love Lefty Moore."

There was instant consternation in the district attorney's camp. With visions of discredited testimony confronting him, he was on his feet roaring objections. Throughout the whole courtroom there was a sibilant stir, and the judge began rapping for order.

Close behind my counsel my mother had been sitting, accompanied by some woman wearing a heavy veil. I had paid little attention to her hitherto, supposing that it was some hotel maid whom my mother had hired to accompany her to court, for so far as I knew my mother had no women acquaintances in New York. This woman now, to my amazement, reached forward and plucked McGregor by the sleeve. As she pushed back her veil to whisper to him, to my utter surprise and consternation I saw that it was Barbara Bradford.

How had Barbara come to be sitting there in court at my mother's side? Delighted as I was at seeing her, I was puzzled and perplexed. I had sternly forbidden both Gorman and McGregor from making any plans to call her as a witness. I had urged her to keep silent and not become involved in any way in the case. My eyes sought hers for an explanation, but after that one whispered word, that I was unable to hear, she had quickly drawn her veil over her face.

"Your honor," said McGregor, rising, "in view of this unexpected testimony, I should like to request a recess."

"Granted," said the judge. "Adjourned until two o'clock."

CHAPTER XIV.

Impatiently I waited for the recess to be over. I could not understand what was happening. Neither Gorman nor my counsel came near me. Even my mother made no attempt, so far as I could learn, to see me. The one glimpse I had had of Barbara there in the courtroom had fired me again with wild desires to see her. My feelings were equally divided between hoping she would and hoping she would not make any effort to reach me—at least not until my trial was over.

That something was happening to keep them all away—something perhaps vital to my freedom—I was certain. On no other ground could I explain the fact of none of them seeking me for consultation. Yet what it might be I could not possibly conjecture. Eagerly I hurried into the courtroom again as soon as the recess was over, at once turning my eyes to see if the girl I loved was there.

Quickly I located her still sitting beside my mother. Her veil now was boldly thrown back, and as she gazed at me with sparkling eyes and a confident smile, I felt sure that across the distance she was trying to send some message of good tidings. My mother's face, too, I observed, now wore a happier look, and about Gorman and McGregor both was an air of greater confidence than either had manifested before.

What had happened? What had they found out? Eagerly I waited developments.

The telephone girl was recalled to the stand and her cross-examination resumed.

"Mrs. Moore," began McGregor—and I observed curiously that his voice in addressing her no longer was harsh and sarcastic but merely suave and impelling—"you have testified here as a witness against Mr. Spalding Nelson, accused of having murdered Daisy Lutan, have you not?"

(TO BE CONTINUED.)

Chautauqua or Circus.

The manager was strolling about the big Chautauqua tent, which had just been set up in a small Missouri town, and the boys were laying the plank seats, when the whir of engines was heard, and two automobiles appeared, racing furiously toward the Chautauqua grounds. They stopped side by side in the dust and smoke of heavily set brakes, and the drivers leaped from their seats and ran at top speed toward the astonished Chautauqua manager.

"I'm a butcher!" gasped the first.

"I'm a butcher!" cried the second.

Then both together they shouted, "I want the contract to furnish meat for the animals!"—Youth's Companion.

Short Story About Shellac.

Shellac is the joint product of insects and plants and comes from India. The lac insects are about 1.25 of an inch long, a bright red in color. They suck the juices of plants, digest them and exude them in the form of resin, which soon encases the whole insect. When the young insects have swarmed out, the resin is scraped from the branches, ground, washed, mixed with colophony and orpiment, cooked slowly and drawn out into the thin sheets we know as shellac.

I Owe My Life to PE-RU-NA

Mr. McKinley's letter brings cheer to all who may be sufferers as he was. Read it:

"I can honestly say that **I owe my life to Peruna.** After some of the best doctors in the country gave me up and told me I could not live another month, **Peruna saved me.** Travelling from town to town, throughout the country and having to go into all kinds of badly heated stores and buildings, sometimes standing up for hours at a time while plying my trade as auctioneer, it is only natural that **I had colds frequently;** so when this would occur I paid little attention to it, until last December when I contracted a severe case, which, through neglect on my part settled on my lungs. **When almost too late, I began doctoring, but, without avail, until I heard of Peruna. It cured me;** so I cannot praise it too highly."

It Cured Me

Mr. Samuel McKinley, 2504 E. 22nd St., Kansas City, Mo., Member of the Society of U. S. Jewelry Auctioneers.

SHOWED SIGNS OF TIPPLING

Hens' Behavior Caused English Youngster to Be Doubtful of Good Character of Vicinity.

Johnny recently paid his first visit to his aunt's farm in England. The little boy had not been there long before he came running to her in great excitement.

"Aunty," he exclaimed, with the air of one imparting grave news, "I don't think this is a very nice place!"

"Why, what makes you think that, Johnny?" was her amused reply.

"Well, aunty, the public houses (saloons) open very early," was the startling rejoinder. "Nearly all you hens have the hiccoughs already this morning."

Stale Goods.

"This sword is very old," said the curio dealer. "In fact, it is over a hundred years old."

"Indeed!" said the customer.

"Aye. It came from the battle of Waterloo—that was in the year 1815, sir—and there's an anecdote goes with it."

The customer listened patiently while the old man recounted the story. Then, at the conclusion, he returned the sword to its owner.

"Thank you! That was very interesting, and I quite enjoyed it," he replied kindly. "But, unfortunately, I bought that same anecdote once before with an old musket!"

Admiration Goes Out to Him.

We may say a fellow shows bad taste in devoting his life to painting or sculpturing, but at the same time most of us have a sneaking admiration for the one who can naturally do things we can't.

Some people get credit for being patient when in reality they are too cowardly to start something.

Too many people spend their time in trying to be miserable.

MAN IS AFTER INFORMATION

After Listening to Much Sage Advice Bill Jones Wants One Matter Cleared Up.

Our friend Bill Jones is a traveling man and needs rest, but unfortunately he doesn't sleep well. He has consulted a number of doctors in the various towns he visits, and being a systematic person has made a sort of digest of the advice he has received. It sums up as follows:

Don't sleep on your left side, as that creates a pressure on the heart.

Don't sleep on your right side, as it interferes with the action of the right lung.

Don't sleep on your back, as that is bad for the nervous system.

Don't sleep on your stomach, as that causes a pressure bad for the digestion.

"Don't sleep in a chair, as the body cannot properly relax.

Bill wants to know if anyone can tell him how to keep from falling over when he sleeps standing up.

Beetles' Blood for Warts.

Dr. E. Escomel describes in Anales de la Facultad de Medicina (Lima, Peru) certain psuedo beetles the blood of which has from time immemorial been used by the natives for curing warts. Under it these growths turn white, as if cauterized by acid.

This time of year

it's a good idea to combine fresh fruit or berries with your morning dish of

Grape-Nuts

The blend of flavor proves delightful and is in tune with June.

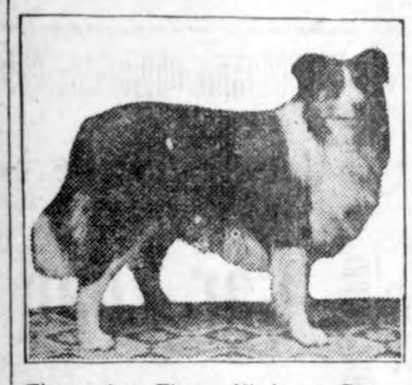
FARM STOCK

DISEASES CARRIED BY DOGS

Animal Should Be Handled in Such Way as Best to Further Welfare of the Community.

Many diseases of man and domestic animals are carried by dogs. Everybody, of course, knows that the dog is responsible for rabies, but it is not so generally known that the dog is equally responsible for other fatal diseases. Among them may be mentioned hydatid and gid in man and stock, tapeworm in man and especially in children, tongue worm in man and stock, "measles" in sheep, cysticercosis of the liver in stock. Some of these parasites depend so absolutely on dogs as carriers that they would become extinct if dogs were not available as hosts. Dogs probably play a part, also, in the spread of diseases due to fungi, such as ringworm and favus, and they certainly play a part in the spread of diseases that may be carried by fleas and ticks.

The United States department of agriculture, while recognizing the dog as a useful domestic animal, insists



There Are Three Kinds of Dogs—The Ownerless Dog, the Other Person's Dog and Your Own Dog.

that care must be taken to minimize the danger of diseases spread by them. In a general way, say the specialists of the department, there are three kinds of dogs—the ownerless dog, the other person's dog, and your own dog.

The stray dog which recognizes no owner, they say, does not fit into the modern scheme of civilization and must be eliminated. A dog that is allowed by the owner to wander at large will have substantially the same habits of life, the same sort of food, and be practically as dangerous as the ownerless dog. You have the right to insist, they point out, that such dogs keep off your premises.

Your own dog should be handled in such a way as best to further the welfare of the dog and the community. He should be kept in restraint and not allowed the full freedom of the house or even of the outside premises. He should not be allowed to be familiar with people, and especially with children. The dog should be kept free from external parasites by frequent baths and, if necessary, other appropriate measures, and should be freed from internal parasites by suitable measures and kept free by adequate attention to his food. He should only be allowed to leave the yard or the kernels in company with some person, and wherever conditions call for it should be kept in leash. When away from home the dog should be muzzled with a reliable metal muzzle, not with a strap muzzle that would be cruel to the dog if tight enough to be effective and which is usually so loose as merely to give a false sense of security, since it permits the dog to bite.

PURE-BRED SIRES SAVE CASH

Texas Breeder Finds Best Is Cheapest Whether With Cattle, Hogs or Other Animals.

"We have been in the cattle business for more than 35 years and have always kept the best pure-bred sires we could buy."

With this remark in a letter to the federal bureau of animal industry, C. H. Faires, a Texan, applied for enrollment in the "Better Sires—Better Stock" campaign.

"We have always tried to teach the people to use pure-bred sires of all kinds of stock," he added. "Our motto is the 'best is the cheapest' of anything we raise whether it be cattle, horses, mules, sheep, poultry or dogs. We have found this paid as well with dogs as with everything else."—United States Department of Agriculture.

CATTLE SHRINK IN TRANSIT

Owner Loses Considerable by Not Taking Proper Precautions in Shipping Live Stock.

Investigations by the Colorado agricultural college are beginning to show that shrinkage of live stock when shipped to market can be greatly reduced. The most important thing is a comfortable car and not much crowding. The next thing is to have the animals well fed and contented when they are loaded and until they are sold at the terminal market. In other words, plenty of feed and water and comfortable quarters are most important.

"Some farmers," says R. W. Clark, live stock specialist for that institution, "ship regularly with little or no shrinkage, while others at all times have enormous shrinkage

LIFT OFF CORNS!

Freezone is magic! Corns lift off with fingers without pain

Hurt? No, not one bit! Just drop a little Freezone on that touchy corn, instantly it stops aching, then you lift that bothersome corn right off. Yes, magic! Costs only a few cents.

Try Freezone! Your druggist sells a tiny bottle, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Freezone is the mysterious ether discovery of a Cincinnati genius. —Adv.

Had Many Sleeping Places.

The average man probably sleeps in 100 beds or so during long lifetime. A veteran commercial traveler, whose home is in New York, can afford to smile at this record, for, he says, "I calculate that I have slept in at least 8,000 beds during my forty-odd years on the road, and I have slept well in them all."

WHY CRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Giving Her Fair Warning.

John had just been reprimanded by his mother for something he had done, when he went into the bedroom where his new little baby sister was lying in her crib. His mother overheard him say: "Sister, you ought to go back where you came from; you can't do anything you want to do here."

ALLEN'S FOOT-EASE DOES IT.

When your shoes pinch or your corns and bunions ache so that you are tired all over, get Allen's Foot-Ease, the antiseptic powder to be shaken into the shoes and sprinkled in the foot-bath. It will take the sting out of corns and bunions and give instant relief to Smarting, Aching, Swollen, Tender feet. 1,500,000 pounds of powder for the feet were used by our Army and Navy during the war. Sold everywhere.—Adv.

Couldn't Escape Them.

"Hello, George. I hear you can't meet your creditors." "You're all wrong! I meet one every five minutes."

Most of the movements to right the wrongs of the people stop after the first parade disperses.

Investments Combining the Highest Standards of Safety and Desirability

THE First Mortgage $100 and $500 Real Estate Serial Notes offered by the Mercantile Trust Company of St. Louis are based on service and backed by knowledge, experience and judgment of specialists, each skilled in his own particular line. They represent a rare combination of strong security, attractive yield, utmost convenience, and the good faith of an institution which, during the twenty years of its existence, has handled many millions of dollars of investments of this kind without the loss of one dollar of principal or interest to any of its clients.

Our large capital and surplus, together with our vast banking connections, enable us to transact business on a very extensive scale. This, with the fact that we have a broad field from which to select our loans and that we maintain at all times a trained organization of salaried experts, makes it possible for us to offer securities which meet the requirements of the most cautious investors and at the same time yield an excellent rate of interest.

The Mercantile Trust Company is a member of the Federal Reserve System, and by reason of such membership is under the supervision of the United States Government. This means that every loan we make, including "First Mortgage Real Estate Serial Loans," is subject to examination by Government Bank Examiners. These loans are also examined by the St. Louis Clearing House Bank Examiners and the official Bank Examiners of both the State of Missouri and the State of Illinois.

Write for booklet, "Investment Steps," and for detail circular describing the First Mortgage 6% Real Estate Serial Notes of $100 and $500 denominations we are offering and recommend as conservative, high-grade, safe investments.

Taking After Mother.

Bert just came home from college, and he had a "shadow" on his upper lip. He stopped to say "Hello" to his grandfather.

His grandfather looked him over and said, "Why, son, you look more like your mother every day."

"What makes you think so?" asked Bert.

"Why, because your father had a mustache that came down to his chin. Just look at that one of yours; you must take after your mother."

Auto's Stomach.

Little Ruth, who was just four years old, watched with great interest. The man at the gasoline filling station was removing the cushion and filling the gas tank.

After the cushion was put back and Ruth had made herself comfortable, she said: "I know that you ride on a horse's back, but I never knew that I was riding on the automobile's stomach."

Shave, Bathe and Shampoo with one Soap.—Cuticura

Cuticura Soap is the favorite for safety razor shaving.

Acid Stomach

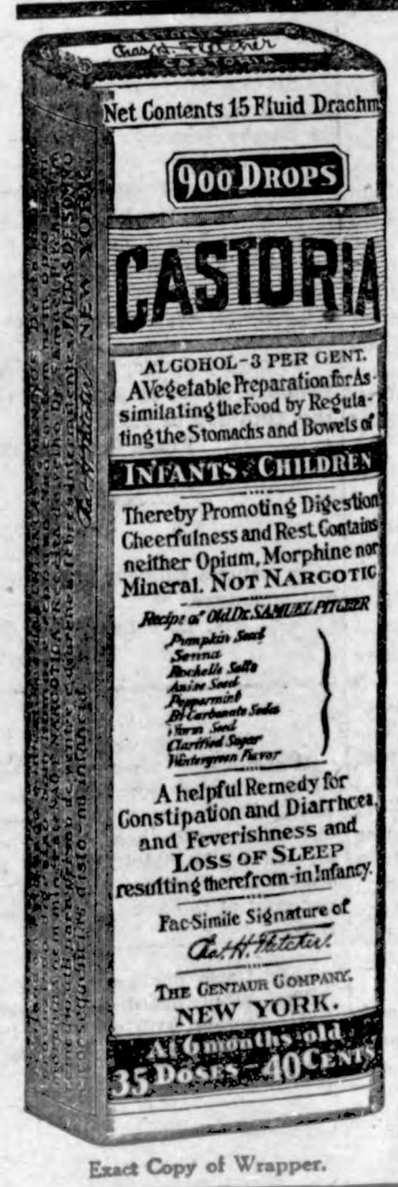
Makes the Body Sour

Nine Out of Ten People Suffer From It

It sends its harmful acids and gases all over the body, instead of health and strength. Day and night this ceaseless damage goes on. No matter how strong, its victim cannot long withstand the health-destroying effects of an acid stomach.

Good news for millions of sufferers. Chemists have found a sure remedy—one that takes the acid up and carries it out of the body; of course, when the cause is removed, the sufferer gets well.

Bloating, indigestion, sour, acid, gassy stomach miseries all removed. This is proven by over half a million ailing folks who have taken EATONIC with wonderful benefits. It can be obtained from any druggist, who will cheerfully refund its trifling cost if not entirely satisfactory. Everyone should enjoy its benefits. Frequently the first tablet gives relief.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

OFFICIAL PUBLICATION

ORDINANCE NO. 37

Ordinance creating and establishing a Sanitary Sewer District in the Incorporated Town of Klemme, Iowa.

Section 1. Be it ordained by the Town Council of the Incorporated Town of Klemme, Iowa, that there be and the same is hereby created, a Sewer District in the Town of Klemme, Iowa, to be known as Sanitary Sewer District No. 1, the limits and boundaries of which shall be the present limits and boundaries of the Town of Klemme, Iowa.

Section 2: This Ordinance to take affect and to be in force from and after its publication in The Klemme Times, a newspaper published in the Town of Klemme, Iowa.

Passed at a Special meeting of the Town Council of Klemme, Iowa, this 10th day of June, 1920.

Frank Gruetzmacher,
Mayor.
N. L. Palmer,
Town Clerk.

Notice of a Proposed Resolution of Necessity for the Construction of Sewers, Etc.

Notice is hereby given that at a meeting of the Town Council of the Town of Klemme, Iowa, held on the 10th day of June, 1920, there was introduced and placed on file, the Resolution hereinafter set forth, which Resolution will be considered for passage by the said Town Council at a meeting to be held in the Council Chamber in the said Town, on the 13th day of July, 1920, at 7:30 P. M., at which time and place, the owners of property subject to assessment for the cost of the improvement contemplated by said Resolution, may appear and make objections, if any they have, to the contemplated improvement, and to the passage of said Resolution, at which time said Resolution may be amended and passed, or passed as proposed, said Resolution being as follows, to-wit:

RESOLUTION OF NECESSITY

Be it Resolved by the Town Council of the Town of Klemme, Iowa:

Section 1: That it is deemed advisable and necessary to pass this resolution and make the following described improvement, on its own motion, within and for the said town of Klemme, Iowa.

Section 2: That whereas there has been created in the town of Klemme, Iowa, a sewer district known as Sewer District No. 1, the limits and boundaries of which are fully described by Ordinance No. 37, on file in the office of the Town Clerk.

Section 3: That there be constructed in and for the said Sewer District a system of Sanitary Sewers with Sewage Disposal Plant, Main and Lateral Sewers, located as follows, to-wit:

DISPOSAL PLANT

The Disposal Plant shall be located on a plot of ground approximately 600 feet west and 1500 feet south of the intersection of Iowa and Front Streets and shall consist of septic tank, dosing chamber, filter and sludge beds and connecting pipes there to.

MAIN SEWER

Shall start near above described Disposal Plant Site thence North 650 feet, thence Northeast across outlot 7 approximately 1150 feet to intersection of Iowa and Front Streets, thence on Iowa Street from Front to 3rd Streets using 12-inch Vitrified Sewer Pipe.

LATERAL SEWERS

On 3rd Street from Iowa Street to Jerusalem Street using 10-inch Sewer Pipe.

On Dakota Street from 3rd Street to East Corporation Line.

On State Street from 3rd Street to East Corporation Line.

On Jerusalem Street from 4th Street to 5th Street and from 3rd Street west 1500 feet.

On Elder Street from 3rd Street West 200 feet and from 2nd Street west 250 feet. On Day Street from 1st Street East 730 feet. On Main Street from 3rd Street West 1000 feet and from 4th Street East 800 feet. In alley of block 9 from 3rd Street east 200 feet, on Iowa Street from 3rd Street to 4th Street, on Greutmacher Street from 3rd Street east 100 feet and west 100 feet. Across outlot 5, on Center Line of Hansen Street produced from the Center Line of 4th Street produced, west 500 feet. On Front Street from Hancock Street south 600 feet, on 1st Street from Iowa Street south 600 feet and North 450 feet. On 2nd Street from Jerusalem Street south 170 feet and from Elder Street south 300 feet and from Iowa Street north 450 feet and south 900 feet. On 3rd Street from Dakota Street to Jerusalem Street and from Iowa Street to Greutmacher Street. On 4th Street from Jerusalem Street south 2400 feet. Morningside Road from 4th Street east 250 feet thence south 600 feet, On Paul's Drive from its intersection with Morningside Road east 500 feet. On Arthur's Lane from its intersection with Morningside Road east 400 feet using 8-inch Sewer Pipe.

All of said sewers to be built with tight joints, suitable "Y's" for house connections and to be laid to line and grade.

Section 4: And be it further resolved that the disposal plant shall be known and established as a Sewage Disposal Plant, and the cost of same and all cost in connection therewith shall be paid out of a fund to be created by the levy of a special tax on all taxable property in the Town of Klemme, Iowa, or if insufficient to pay the cost of same out of any funds of the Town of Klemme, Iowa, available by law for such purposes, or by a special assessment against all the real property in said Town in accordance with the law, or by a combination of any or all of these methods.

Section 5: And be it further resolved that the sewers above described as Main Sewers shall be known and established as Main Sewers, and the cost of same shall be assessed against all the real property in Sanitary Sewer District No. 1 of the Town of Klemme, Iowa, as adjacent property.

Section 6: And be it further resolved that all the sewers herein described as lateral sewers, shall be known and established as lateral sewers, and the cost of said lateral sewers shall be assessed against the privately owned ground abutting upon the streets, avenues, alleys or privately owned ground upon which said sewers are built, and against the adjacent property, which shall be such property as does not abutt any street, avenue, alley or privately owned ground upon which sewers are built, but which lies wholly or in part within 300 feet of the nearest line of any street, avenue, alley or privately owned ground upon which sewers are built, and against the real estate and personal property of any railway company whose property is abutting or adjacent to said streets, avenues, alleys or privately owned ground upon which sewers are built within the above described limit.

Section 7: All assessments to be made in proportion to the benefits conferred upon each lot, piece or parcel of ground, and any discrepancies between the cost of said sewers and the amount assessable against such property by law, and one-half of the cost of sewers opposite property owned by the Town of Klemme, Iowa, or by the United States Government shall be paid out of a fund to be created by a special tax to be levied upon all property in the Town of Klemme, Iowa, or if insufficient to pay the cost of same, out of any funds of the Town of Klemme, Iowa available by law for this purpose.

Section 8: All of the above sewers, disposal plant, etc., to be built in accordance with the plans and specifications for same to be filed with the Town Clerk and approved by this council and the Iowa State Board of Health, which plans and specifications are by reference made a part hereof. The kind of material to be used shall be salt-glazed vitrified sewer pipe, hard burned building brick or concrete manholes and flush-tanks, cast iron pipe, etc. Said pipe to have sealed joints and to be laid to line and grade, all as shown by said plans and specifications and the method of construction shall be by contract, and the contractor shall be paid for the disposal plant in Bonds at par drawing 6 per cent interest and for the sewers in Special Assessment Bonds at par drawing 6 per cent interest.

Section 9: And be it further resolved that the Town Council of the Town of Klemme, Iowa, meet at 7:30 o'clock p. m. on the 13th day of July, 1920, in the Council Chamber of said Council for the purpose of considering objections to the passage of this resolution and the making of this improvement, at which meeting this resolution may be amended and passed, or passed as proposed.

Section 10: And be it further resolved that the Town Clerk be and he is hereby instructed to cause notice of the pendency of this resolution and the time at which said resolution will be considered for passage and objections heard thereto, to be published in a newspaper of general circulation published in the Town of Klemme, Iowa, in accordance with the law.

Proposed by the Town Council of Klemme, Iowa, at a meeting held on the 10th day of June, 1920.

Frank Gruetzmacher,
Mayor
Attest:
N. L. Palmer,
Town Clerk.

In witness whereof I hereunto affix my signature.

N. L. Palmer,
Town Clerk.

Water-Loving Trees.

Water-loving trees along streams often consume more water than they save. Estimates are that a beech forest will transpire nearly 50 per cent of an annual precipitation of 20 inches, while a coniferous forest but eight per cent of the same or like precipitation.

Uncle Pennywise Says:

I've often heard a man offer to whip another with one hand tied behind him—but I've never seen it tried. —Kansas City Journal.

Twenty-fourth Year Number 43 Klemme, Iowa, Thurssday, July 1 1920 $2.00 In Advance. $2.50 Outside of County

onday to be Holiday In Klemme

LEMME BUSINESS MEN WILL LOSE SHOP MONDAY, JULY 5th

The business men of Klemme have ecided to close their places of busi- ss on next Monday, July 5th. As ly comes comes on Sunday this year was decided that Monday should be served as the legal holiday here. he business men and clerks are en- tled to a holiday and have agreed to ose shop at 9:30 A. M. and are keep- g open in the morning until that our so that they may accommodate ustomers who want goods before ey close. Clear Lake celebrates on onday and no doubt we will see any Klemme folks there that day. ll right, let's go and have a big time verybody quit work Monday and ave a good time.

The "No Socks" Loose

GOODELL BALL TEAM TRIMS KLEMME

The Goodell ball team came to Klemme Sunday where they met the fast (?) Klemme club at the local ball park. There is not a great deal to say about the game only that Goodell was too fast for the Klemme players who lost the game by 1 to 15.

The Klemme Sox have lost every game they have entered so far and seem to have a streak of hard luck and cant' get started on the right leg for some reason or other. Klemme needs a good pitcher especially and they also need some good batting men and then maybe they will be able to play some ball. So far they have not played any real ball, but we hope to see them land into the game and pile up a few scores and make a noise like a winning team.

FARMERS HOLD METTING SATURDAY

Saturday afternoon the farmers of this vicinity met to further consider organizing a co-operative elevator company in Klemme. A prominent farmer who is interested in the project reports to us that new subscribers have come in since the first meeting and also that some who took out the first stock have also subscrbed for more and the outlook he says is favorable for organizing the concern. A meeting will be held on Tuesday, July 6th, for the purpose of electing officers and appointing committees. All farmers are urged to come out for the meeting on Tuesday.

4th to be Observed In Klemme Sunday

INDEPENDENCE DAY

As noted in these columns last week a meeting to which the whole community is invited, will be held next Sunday afternoon at 2:30 o'clock in the city park. Special music is in preparation and Dr. Buriff will give an address on "God's Country." After the noise and enthusiasm of the celebrations in our neighboring towns, or in lieu of them, this will give the opportunity for the people of Klemme to have part in a stirring, appropriate observance of the Fourth, but in accordance with the nature of the day as a religious as well as patriotic festival; and after all, to the true American religion and patriotism are closely akin.

YOU LIVE IN "GOD'S COUNTRY"

During the next few months there will be much deploring done by the political wiseacres. No doubt there are lots of things in this country that are not as they should be and lots more are not what we would like them to be.

But while you listen to the deplorings—some of which you may deplore yourself—don't let them beguile you from the fact that we have a great country, with great resources great prospects and that every man in America gets benefits out of the said fact whether he is poor or rich.

Although the United States has only about 6 per cent of the world's population and 7 per cent of its land, this God's country of ours produces 20 per cent of the world's supply of gold, 25 per cent of the world's supply of wheat, 40 per cent of the world's supply of iron and steel, 40 per cent of the world's supply of lead, 40 percent of the world's supply of silver, 50 per cent of the world's supply of zinc, 52 per cent of the world's supply of coal, 60 per cent of the world's supply of cotton, 60 percent of the world's supply of aluminum, 60 per cent of the world's supply of copper, 60 per cent of the world's supply of oil, 75 per cent of the world's supply of corn, 85 per cent of the world's supply of automobiles.

BUT, BROTHER, WHAT DID YOU DO WITH THE CONTENTS?

Garner Signal: We have been having a basement dug at this office and the men doing the work discovered a relic of the old days. Under the rear of the building a well-preserved 4-gallon keg. You know the kind of a keg we mean. One of those pony sizes. We called in several of the old boys who said they could remember when they had many just such kegs, but none of them could identify this particular keg.

The Times "Devil" Says

MRS. SARAH DILLER DEAD

Mrs. Sarah Diller, who has made her home with S. A. Anderson and family, who recently moved to Klemme from Corwith, and are living in the Mrs. Meinderts house, passed away early Sunday morning.

Mrs. Diller has been suffering for some time of cancer, but we understand that heart trouble was the cause of her death. Deceased was about sixy-four years old. Monday morning her body was taken to Corwitht and from there it will be shipped to Alta, Iowa, for burial in the family lot.

Mr. Anderson and family have lived in Klemme but a couple of weeks, coming here from Corwith, and so almost total strangers to the people of Klemme. Mrs. Diller is the mother of Mrs. Anderson. The family have the sympathy of the community in their sorrow.

Syrus Griewe of Rudd, Iowa, came last Wednesday for a visit with Klemme relatives and friends. Syrus is attending college at Morningside, and is now spending his summer vacation.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock. It being the 4th of July the sermon will be in keeping with the day. Sunday School at the close of the morning service at 11 o'clock. Epworth League at 7:30 o'clock. Preaching service at 8 o'clock. Midweek prayer service on Thursday evening at 7:30.

The Sunday Schools of Garner, Liberty Township and Klemme will celebrate the 4th of July with a Sunday School picnic at the Garner campgrounds on Monday, July 5th. Rev. J. H. Klaus, district superintendent of the Charles City District, will be the speaker of the day. All are invited to attend, whether you belong to the Sunday School or not. **You are invited!**

Hancock county has received another Packard truck from the government for use on the roads. This makes five of these large army trucks that are now in the county and open to the service of the county under supervision of the couny board.

Who Says Iowa is Dry?

MAMMOTH STILL CAPTURED NEAR MASON CITY BY SHERIFF'S FORCES

Officers Get 52 Cases Of Raisns and Locate 17 Barrels of Mash

Perhaps the biggest still in the state was captured near Mason City Saturday evening by Sheriff Marsh and Chief of Police Lock and their deputies, when they raided the farm occupied by Harry Cananaugh just north of the county farm.

The famous moonshiners of Kentucky have nothng on this Iowa farmer as the police got four large gasoline stoves, hree copper containers, two five gallon gas cans, two barrels of "Dago Red Whiskey," ten gallons of raisin wine, a cot, a rifle and a shot gun.

They also found fifty-two cases of raisins and seventeen barrels of mash. It is also alleged that Cavanaugh has been makng the celebrated corn whiskey—two drinks of which would make a man cucoo and think he was seeing pretty flowers and hearing the birds sing. The evidence found by the officers was to the effect that the man has been distilling on a large scale for many months.

The officers have been watching the still for some time, which was located near the house and guarded by hired men day and night, armed with a rifle and shot gun. The officers raided the place when all had left the farm but Cavanaugh. The federal officers will probably take charge of this case.

COUNCIL PLANS TO EXTEND WATER MAINS

The Klemme Council are planning to put in about fifteen blocks of four-inch water mains in the very near future and we consder that it is a necessary improvement that will be a benefit to the majority of the town who do not have the water service now. The present system is good as far as it goes, but needs to be extended to take in more residences who are without city water. It is also necessary to have the water mains extended before sewerage can be operated so by extending the mains a double purpose is accomplished. Let the good work go on.

METHODIST EPISCOPAL CHURCH

Morning services at the usual hours, public worship at 10:00 a. m., and Sunday School at 11:00 a. m.

At 2:30 p. m. in the city park a celebration of Independence Day. Music by men's glee club and chorus of mixed voces. Address, "God's Country." It seems fitting that since July 4, falls on Sunday this year there should be an observance of the day as a religious and patriotic red letter day. All citizens are invited to have part in this service.

No evening service will be held.

A. E. Buriff, Minister

CHICKENS MISSING

A chicken thief is one of the most contemptible night maurauders we have. For the women folks around the farm homes usually work hard to raise the chicks and depend largely on their poultry money for themselves and children. A farmer south of town reports about 75 springs taken Tuesday night. And other poultry thieving is known to be going on from time to time. Farmers should load up their guns and have them handy for such night visitors and should shoot to make it count, too, if opportunity comes. The law is very strict against chicken stealing, but the trouble is, very few thieves are ever caught.—Meservey Register.

FREE SHOWS

The business men of Meservey have arranged with an outside party to give free moving pictures here one night each week. The pictures will be shown on a screen on the street and will be up-to-date and pleasing in every way. If weather permits, they will be shown tomorrow (Friday) night, this week. Come in and see them.—Meservey Register.

Ends Life by Shooting

DOWS MAN BLOWS OFF HEAD WITH SHOTGUN

Dows Advocate:—Harold Jones, who has been working for Henry Glade this spring, commieted suicide ths mornng (Thursday) by placing a shotgun against the wall while in bed and used a stick to pull the trigger, blowing off the top of his head. He had old the Glades that his parents were dead, but that he had an uncle living at Green Mountain, Iowa, and two sisters at Nevada, who were notified by Sheriff Schwieger of Hampton. Jones was about 21 years of age. The remains were taken to Halvorson undertaking parlors, where they will be held until further instructions have been received.

PAVING OPENED SUNDAY

"The better the day, the better the deed," is an old adage, and for that reason we feel that the Garner paving is off on the right foot, for on Sunday last, just before the noon hour, the strip of paving east of the Rock Island tracks was opened for traffic. We have every reason to believe that the job of hard surfacting the streets of Garner is a first-class one in every particular. One of the reasons is that the job looks well and another is that we have all confidence in the gentlemen who are installing it.—Garner Democrat.

Mrs. Putnam of Belmond was a Klemme visitor last Wednesday.

Ben and Edna Kaster from Charles City, and Louis Kaster from Minneapolis, were visiting at the Wilbur McGee home last week for a few days.

Mrs. Dewey Rice and baby, of Clarion, were visiting at the Fred Musfelt home here last week.

Chris Jacobs and family autoed over from Garner Tuesday evening for a visit with Edwin.

Mr. and Mrs. Hod Lawhorn drove over from Garner last Wednesday evening for a visit with friends and to enjoy the band concert.

Marlin Croner, Paul Griesemer and Lew Lewis started for the camp meetng at Garner last Wednesday but somehow they changed their mind for later they were seen at Clear Lake fishing and had enough fish for a couple of good messes.

Iowa's strawberry crop is now beginning to ripen, and will be 90 per cent of a full crop, according to present indications. The cherry crop is 81 per cent, red raspberries, 82, and black raspberries, 87. Apple crop prospects indivate an 85 per cent crop. blackberries, 83; gooseberries, 80; currants, 82; grapes, 85 and American plums, 78. Three unimportant fruit crops in Iowa, peaches, domestic plums and Japanese plums cut down the aver age of all crops since the peach crop will be only about 4 Oper cent of a full crop, domestic plums, 69, and Japanese plums, 62. These bring down the average for all fruit to 76 per cent, which is 14 per cent higher, than the May report.

It is definitely announced that work on 81 new building at the government proving grounds opposite Bellevue will be started July 15. Congress and the war department have placed the stamp of approval on the plan to establish there a giant magazine dump for reserve ammunition. The following buildings will be erected: Forty-four ammunition magazines, 30 hig hexplosive magazines, combination barracks, post-office and exchange buildings, remodeling of present headquarters into a double set of officers' quarters, erection of a new double set of officers' quarters, addition to hospital, two double sets of commissioned officers' quarters; three 100-man capacity barracks buildings.

The Fourth division of the regular army, now stationed at Camp Dodge, will put on an elaborate display of the machinery of war at the Iowa state fair this year. The exhibit will occupy more than half a block and will include demonstrations of practically every piece of fighting machinery now being used by the United States army. War trophies and special equipment not of regular issue will also be included in the show. Arrangements fo. the military display were completed recently. The division's class in agriculture will camp at the fair grounds in August. Other large space reservations for this year's fair just announced are 4,000 feet for the U. S. department of agriculture under the grandstand and 4,000 feet for the Iowa State college under the grandstand. The cow testing exhibit will be in the new cattle b[illegible]s been announced.

Crow Farmer's Friend and Foe

"Twice as Good as He Is Bad," Writer Says of Persecuted Bird.

IS BACKED BY UNCLE SAM

Kills Young Chickens and Destroys Eggs of Other Birds, But on Other Hand He Kills Field Mice and Insects.

Washington.—The United States biological survey sends out a bulletin about the crow. It says that the big, black fellow is the farmer's friend and should not be exterminated, and it goes on to assert that many crows recently examined were found to eat 38 per cent grain and 62 per cent May beetles, tussock moths, grasshoppers, gypsy moths, army worms, chinchbugs and brown moths. So he is about twice as good as he is bad.

But the crow also kills young chickens and destroys the eggs of other birds, George F. Burba writes in the Columbus Dispatch. Charge that up against him along with the 38 per cent grain which he eats. Then on the other hand, set down a large number of field mice and cutworms which he also gets away with and there is still a balance in his favor. Besides, much of the grain the crow eats would be wasted anyway, since he picks up the scattered kernels in the field and eats a lot of very poor corn and wheat that wouldn't be any account to anybody else.

Hunted Become Intelligent.

The government bulletin isn't going to have much effect, one way or another, however. Everybody takes a shot at a crow whenever he gets a chance, but the crows persist. They have been warred upon so much that they have become very intelligent.

Take note of that—anything that is warred upon or hunted becomes intelligent. The hunted birds and animals acquire knowledge and cunning, or whatever you want to call it. Otherwise they would disappear.

If crows were stupid and sat around on fences when they see a man in the field with a gun; if they built their nests where the nests could be easily broken up; if they did not help each other by giving warning of approaching danger, there would be no crows. But everyone seems to be an enemy of the glossy fellow, and he knows that he must keep at a safe distance.

He learns that he must build his nest high up in a tree, away from human habitation, and watch out every moment for somebody or something that would kill him. All of this has made him what we call one of the most intelligent of birds.

The Crow as a Pet.

And still the crow is a sociable bird. He likes human beings, when they treat him right. He makes a splendid pet, although a naughty one, in that he is always getting into trouble. If you will take a crow when it is young and raise it it becomes as gentle as a chicken.

He likes to be around the house, where there are a lot of boys, but at every opportunity he will fly upon the table and snatch the food, or carry scissors or thimbles or spools of thread or jewelry away and hide them. He is a mischief maker with the hens and chickens and fusses and quarrels and wrangles with the dog that sleeps upon the porch.

But he will not desert the family; he will remain with the boy that feeds him and attends to him, although he may take a trip occasionally to the fields and talk to the other crows, coming back at night to his regular roost.

Girls Beat Boys Spelling.

Tiffin O.—Girls in the Seneca county schools are better spellers than the boys. Honors at the county school spelling and speaking contest held here went chiefly to the girls. Miss Gertrude Bertsch of Thompson won the seventh and eighth grade spelling contest. Harry Sperow of Hopewell the fifth and sixth and Irene Hatton of Attica the third and fourth. Rosamond Showalter of Attica and Thomas Watson of Old Fort won in the two divisions of the speaking contest.

Audience Applauded as Snake Crushed Trainer

Applause from a large audience resounded in the little theater at Serbruck, Switzerland, while a gigantic python slowly crushed its trainer to death.

The trainer, a Hungarian girl named Ciro, realized her peril and shrieked for help as the coils of the serpent closed about her, but the audience believed her cries were part of the entertainment and cheered loudly.

Fraulein Ciro's manager rushed on the stage and shot the snake, but not until the young woman was beyond help. It was not until after the performance was over that the people were apprised of the fact they had witnessed a grewsome tragedy.

Now Crows Over the Doctors.

Huntington, W. Va.—Marguerite, the twenty-month-old daughter of E. W. Stoller anld wife, was slowly wasting away. Physicians saw no hope of her recovery. She was seized with a fit of coughing and a watermelon seed she had swallowed last September was disgorged. Now she will get well.

Met Death on Duty.

Lawrenceburg, Ind.—Capt. Wesley L. Moore, aged seventy-eight, river pilot, often said he hoped he might die on the Ohio river. Death came to him as he wished. He was found lifeless in his cabin on the Ivory Wood, a vessel he operated between Cincinnati and New Orleans.

1—Catherine Levering, the first visitor to Zion National park, signing the register on official opening day. 2—American and Russian vessels leaving Novorossisk harbor under bolshevik attack. 3—Funeral of George W. Perkins, celebrated financier, leaving Presbyterian church in Riverdale-on-Hudson.

Tell Ships of Ocean Noises

Secret Ears to Be Placed on Merchant Ships by the Government.

TEST PROVES IT A SUCCESS

Hydrophone, Government Controlled Invention, Can Explain Many Sea Mysteries—Tried Out on Destroyer.

New York.—In olden times when Chinese shipbuilders designed and constructed their lateen-rigged craft for war or commercial purposes, prominent and ofttimes ferocious "eyes" were located on either side of the bow.

Today modern America, now the leading nation in ship construction, is proposing to equip her merchant vessels with "ears," the location of which, like the eyes on the Chinese junk, are on the ship's bows, but under instead of over the water. While superstition induced the Chinaman to equip his ship so it could "see" its enemies and work its way into a safe port through shoal water, hidden rocks and through crowded waterways, science has designed the "ears" for the same purpose.

Test Is Made.

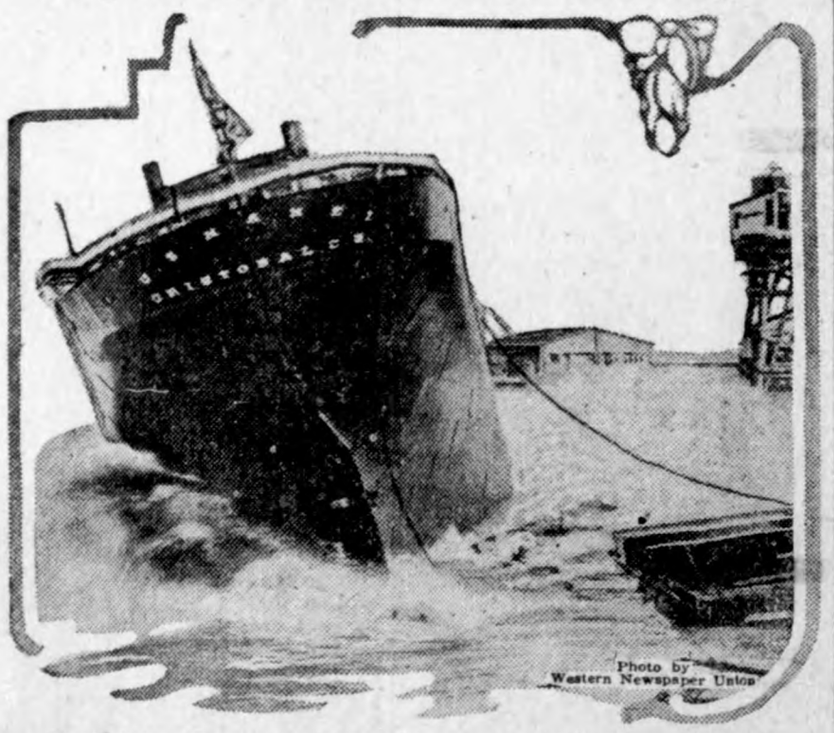
With the destroyer Breckenridge equipped as a demonstration ship, 40 or more representatives of leading steamship lines have just had an opportunity to see and test the efficacy of the listening device. It is now a government-controlled invention, used on fighting ships during the war as a protection against submarines and officially designated by the navy as "the M. V. type, hydrophone." Its object is to disclose in surrounding waters the presence of other craft, to foretell the approach to shoal waters, apprise the navigator of the vicinity of lightships equipped with submarine bell signaling devices. It is expected also to disclose with a remarkable degree of accuracy the depth of water wherein the ship so equipped is floating.

Tells Depth of Water.

The apparatus includes 48 hydrophone receivers located in a tank of water in the bow of the vessel so that an equal number is on either side. In the test the sound of the propellers of a steamer five miles distant was heard. The depth of the water is ascertained by listening to the noise made by the propellers of the vessel carrying the hydrophone as it is echoed back from the bottom of the sea. In depths beyond 100 fathoms, however, the hydrophone refuses to record, it was explained, but as a majority of collisions occur near a coast line and at congested harbor entrances, the inventors and officers of the navy predict that its adoption will remove many of the hazards of navigation now caused by fog.

Dr. H. C. Hayes, formerly of Swarthmore college, said the device had been installed on one transport, Von Steuben, and on one occasion probably saved the ship from running aground on the Long Island shore during a heavy fog. Doctor Hayes also claims that the invention will enable a mariner to locate icebergs, through the reflecting back to the operator from the submerged portion of a dangerous berg the sound of the operating ship's own propellers.

Big Freighter Launched Sideways



View of the sideways launching of the steel freighter Mamei, built for the Panama canal commission. The vessel has a capacity of 10,000 tons.

Man Fell Into Bear Pit; Arm and Leg Torn Away

August Kabler, a medical student at Berne, Switzerland, was terribly mauled by bears into whose pit at the zoological gardens he had fallen while he was throwing carrots to them. He was taken to the hospital in a serious condition, his left leg and left arm being entirely torn away.

None Dies in This Town.

Cranmore, Cal.—This town asserts itself as the healthiest community in the state, basing its claim upon the fact that the local cemetery has not had a grave dug since 1863, the date of the last funeral in Cranmore. Since that time several residents of the community have died in other sections of the state, but it is a remarkable fact that not a single death has occurred in the community since 1863.

NEW REVOLT LOOMS

Outbreak of Junker Army in Pomerania Feared.

Kapp Supporters Scattered Among Big Estates Obviously as Farm Laborers.

Stettin.—Everyone in this section of Pomerania will tell you something is going to happen, but they do not know what.

Former Minister of War Reinhardt, who is trying to find the answer and to devise a lid for threatening outbreaks, feels the same way, but apparently he is satisfied there is no immediate danger. Under his direction the headquarters of two junker outfits have been raided and closed, and the militarized police force has been strengthened. There are no outward signs, except that general unrest indicates a tensity in the situation.

Everybody is sleeping on his arms, one eye open. No confidence is felt in the Reichswehr, which still retains most of the officers who supported the Kapp forces, and these still have their arms and are scattered among the big estates, obviously as farm laborers, but in reality more like small bands of mercenaries as bodyguards for the junker barons.

The opposing forces are the actual workmen. On the estates there nominally are two organizations, but it needs only the first hint of a monarchist coup when they will be under one leadership ready for battle.

Let the Defense Hang Itself.

Noblesville, Ind.—Mrs. Rosa Davis, administratrix, suing the Central Indiana Railroad company for the death of her husband, Charles E. Davis, didn't have any witnesses, but on the evidence of the railroad's witnesses she was awarded a verdict of $3,000. All testimony for Mrs. Davis was brought out on cross-examination.

NEWS REVIEW OF CURRENT EVENTS

Much Guessing As to Action of the Democratic National Convention.

TWO BIG QUESTION MARKS

Attitude of Wilson and McAdoo a Puzzle—Platform Issues Promise Fight—Side Parties Interesting—Irish Situation Is Grave—France and England to War on Turk.

By E. F. CLIPSON.

Political wiseacres are at this time as busy in naming the nominee of the Democratic convention at San Francisco as they were a short time ago in making wrong predictions about the Republican affair at Chicago. Indications are that most of them are guessing. In fact, it looks like a good old-fashioned guessing contest. If you are lucky you win the barrel of flour or the ladies' watch. Straws are no guide to the direction of the political wind for they are pointing in all directions, especially straw ballots. Possibly President Wilson, Mr. Bryan or one of the other party powers knows who will be the standard bearer, but he is not telling.

The big interrogation point which has been planted in the public mind concerns chiefly William G. McAdoo and also President Wilson himself. The former secretary had for some weeks been boomed so persistently that many political forecasters believed he was going to make a runaway race of it. But just at a critical time came his announcement that he was not seeking the nomination and preferred that his name should not be placed before the convention. Ardent supporters point out that he has not definitely refused the honor and are proceeding on the theory that he will accept if it comes to him unsolicited. Several state delegations which have been for McAdoo announce their refusal to take his declination as unalterable and their intention of voting for him in the convention.

President Wilson is the great enigma just as he has been all through the months since his early illness and the ambiguous bulletins and interviews issued by his physicians. The first interpretation of Mr. McAdoo's voluntary withdrawal from the race was that the Republican platform having largely made Mr. Wilson the issue in the campaign, it was fitting that the president should meet it by becoming the opposition candidate. This view was considerably strengthened by an interview which the president gave to a representative of a prominent New York newspaper, in which Mr. Wilson discussed issues but not candidates and stated that he appeared to be the principal issue. The interviewer stressed the point not of the president's complete recovery, but of his improved physical condition. Newspapers throughout the country have been flooded with recent photographs of the president which indicate a fair degree of vigor. Sources close to the White House, notably Senator Glass, scout the third term idea, but the inference gained in many quarters from the interview, the photographs and a few minor straws, is that the president, if not an active aspirant for the honor, proposes to be the power behind the office. Those upholding this view believe that Mr. McAdoo sought to eliminate himself in order to give his father-in-law a clear field. Others modify the view and incline to the belief that there is a divergence between the president and Mr. McAdoo on the League of Nations question.

The fight in the resolutions committee will be on the question of endorsing the administration's peace treaty and League of Nations policy, on the liquor issue and on Ireland. A large share of opinion is to the effect that the committee will back the administration in its league plan, possibly insert a mild declaration for personal liberty without mentioning either light wines or beer, also a declaration of sympathy for subject nations desiring independence, without any specific mention of Ireland. Inasmuch as the Wilson league covenant will be opposed by the Bryan faction, the Democratic senators who voted for the Lodge reservations and by other anti-administration elements; and as strong forces are working for a modification of the Volstead prohibition enforcement act, either of these questions is regarded as sufficient to force a fight on the floor of the convention itself. While there are many friends of Irish independence in the convention, it is not a domestic question, and may go through in any manner in which the resolutions committee decides to treat it.

Both Republican and Democratic candidates for the presidency will have the usual amount of company in the way of side parties. These are very interesting this year. Certain elements among the suffragists are threatening an independent party on account of failure of Democrats and Republicans to force a sufficient number of states to adopt the suffrage amendment. Certain drys threaten a party because Republicans and Democrats are too wet or neutral. The wets threaten a party because the other parties are too dry. Some negroes threaten a party of their own and propose to substitute William Hale Thompson, mayor of Chicago, as their patron saint, instead of Abraham Lincoln. Radicals, each one of whom is a party to himself, are going to try and unite under the banner of the "Committee of 48" with much enthusiasm for Senator LaFollette of Wisconsin for president; notwithstanding the fact that the senator in all his past periods of disgruntlement over the actions of his party, has overcome his disappointment and remained "regular."

Editor Hearst, who failed to dictate the nominee of the Republican party and whose counsels seem to have lost some of their weight in the Democratic party, is trumpeting loudly for the formation of a new party. Mayor Thompson, who was a Republican until defeated for national committeeman and until the supreme court of his state heaped an indignity upon him by knocking out a primary law under which his machine had been successful, is said to be building a springboard to make some kind of a flop. Editor Alexander Moore of Pittsburgh, a rampant Progressive, has come out for Harding. Senator Poindexter, who was regarded by many as the only real "Bull Moose" in the senate, has announced his intention to support the Republican ticket. Neither the Harding-Coolidge forces nor those who will nominate a candidate at San Francisco, manifest much perturbation over the various independent parties threatened. Their attitude seems to be serenely that of "the more, the merrier."

The more conservative branch of organized workmen, as represented in the American Federation of Labor, closed a two-weeks' annual convention at Montreal, Canada, June 19. Samuel Gompers, the re-elected president of the organization, succeeded after a stormy opposition from the friends of Ireland in securing an indorsement of the League of Nations without reservations. The opposition was against the covenant because of the view that it guarantees the integrity of the British empire.

Labor's program as formulated by the convention demands follows:

Ratification of the peace treaty.

Government ownership with democratic operation of the railroads.

Curb on profiteering and high cost of living with jail sentences for profiteers.

Right to strike and abolition of compulsory arbitration and anti-strike legislation.

Hands off in Mexico by the United States government.

Indorsement of the Irish republic.

Right of collective bargaining.

Advances in wages wherever necessary to maintain the American standard of living.

Shorter workday if necessary to prevent unemployment.

These recommendations will be launched against the Democratic convention at San Francisco, with a strong effort by President Gompers and other leaders to secure their incorporation in the platform. The executive council of the federation also was instructed to consider a plan for procuring control of a number of daily newspapers to represent the cause of labor.

If no strikes occur and present conditions of production continue, there is less prospect of a famine in soft coal next winter. The United States geological survey announces that production so far in 1920 is about 38,000,000 tons ahead of the same period last year. The action of the interstate commerce commission in providing more cars at the mines and in granting preference and priority orders for the transportation of soft coal have had a favorable result. Nevertheless, forehanded people warned by the experience of last winter, are laying in coal wherever possible. Coal prices show no inclination to drop.

Although a condition very much resembling civil war has existed for more than a week at Londonderry, Ireland, with rioting, street barricades and casualties mounting into the hundreds, it is not believed that it is the match which will touch off the great conflagration involving Unionists, Nationalists and Sinn Feiners. While conditions have also been bad in Belfast and a few other places and the general situation is regarded as grave, it is pointed out that the disturbed areas are the centers of violent partisanship and frequently subject to turbulence. The government statement says that such outbreaks are to be expected and do not indicate that a state of war throughout Ireland is immediately impending. The railroad situation, wherein the employees refuse to operate trains carrying soldiers or military supplies is the most serious with which the government has to deal. The authorities have made two threats against the strikers, one to operate the trains with troops, and the other to stop rail traffic entirely. The course of near events appears to hinge upon the government's ability to handle the transportation crisis.

With the ending of the armistice between the French in Cilicia and Mustapha Kemal Pasha, leader of the Turk Nationalists, came the announcement of a conference between Marshal Foch of France and Sir Henry Wilson, British chief of staff, at which it was decided to wage a strong campaign against the Turks. Neither France nor England being willing to send more soldiers, it is reported that Greece will furinsh the troops and the two allied countries most of the officers. As a reward Greece is to have Smyrna. The Turkish situation is regarded as a serious one. The peace treaty practically abolished the Turkish empire, parceling the richest portions among the allies and confining the Turks to a small district in Asia Minor without a port, which leaves them ringed by Greeks, Armenians and other hostile nationalities. A realization that this would occur was responsible for the revolt under Kemal. The total French casualties during the temporary occupation of Cilicia were 6,000 men, including Armenian troops, and 124 officers. Already the British have suffered heavily from Turk attacks, although their casualties have not been announced. Troops are on the way to meet Kemal's forces, which are said to have advanced beyond Ismid in the direction of Constantinople. Last week British ships were reported bombarding the approaches to Ismid.

American Red Cross units are engaged in handling refugee work for southern Russia from Constantinople and general relief work in Poland, the Baltic states, Montenegro, Albania, Serbia, Czecho-Slovakia, Greece and Italy, but activities of the United States in foreign countries are rapidly being curtailed. Outside of Germany, the only military mission of the United States is that headed by Col. W. N. Haskell, which was assigned by President Wilson in November, 1919, to assist the near East relief committee in its work in Asia Minor. In Germany 30 United States officers are serving on the inter-allied high commission, being included among the 771 officers who, with 16,631 enlisted men, constitute the United States army of occupation.

REVENT SPREAD OF ALL DISEASE

eaning and Disinfection of All Railroad Stock Cars Is of Utmost Importance.

THER VEHICLES INCLUDED

Carriers Which Have Contained Animals Affected With Communicable Diseases Must Be Cleaned and Disinfected.

repared by the United States Department of Agriculture.)

The cleaning and disinfection of ilroad stock cars is an important eans of preventing the spread of inctions diseases of live stock. In conection with federal control over the terstate transportation of live stock, dministered by the bureau of animal dustry, it is required that all such rs or other vehicles which have conined animals affected with a communicable disease, such as tick fever, abies of sheep and cattle, hog chola, etc., be cleaned and disinfected der bureau supervision before being ain used in interstate commerce.

Federal Inspection.

All live stock received at public ckyards or at official slaughtering tablishments are inspected at the me they are received by employees the bureau of animal industry. If y animals are found to be affected ith a communicable disease the car- er which brought them to their desnation is at once notified to have the r or other vehicle set aside and oroughly cleaned. After that has en accomplished it is disinfected der the personal supervision of a deral employee.

Cars Must Be Cleaned.

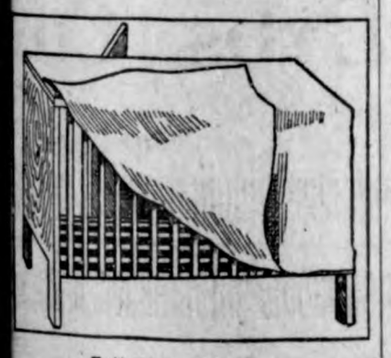
Various states also have regulations equiring that cars must be cleaned nd disinfected before being used in he transportation of certain classes f live stock. The bureau of animal ndustry co-operates with such states y having its employees at central arkets supervise the cleaning and isinfection of cars in compliance with he requirements of the state to which ny stock may be destined.

An idea of the magnitude of this ork may be gathered from the fact hat during the fiscal year ended June 0, 1919, bureau employees personally upervised the disinfection of 44,843 ars. In addition a large number of otor trucks were handled in the ame manner.

SUCCESSFUL FATTENING PEN

ides of Coop Are Slatted So That Fowls May Obtain Plenty of Fresh Air.

A successful fattening coop is herewith illustrated. The sides are slatted o the birds may have plenty of fresh ir. After each meal is eaten a muslin



Fattening Coop.

urtain should be thrown over the oop, which will place the stock in emi-darkness and at the same time dmit sufficient fresh air. If the floor e also slatted the coops will remain n a cleaner condition, as the manure as a chance to drop through between he slats—Farm Journal.

DIFFERENT CROPS FOR SILO

Canadian Peas Are in Right Condition When Pods Become Yellow—Same With Soy Bean.

Canada peas and oats are in condiion to go into the silo when a stage f maturity is reached where the pea ods are becoming yellow and the oat ads are showing the first indications f ripening. Clover will contain the roper amount of dry matter if alowed to stand until somewhat more han one-half of the blossoms are rown. Soy beans are in the proper tage of maturity for silage when the lant shows signs of approaching maturity. The beans should be well deeloped and the pods beginning to turn ellow.

Cow peas should show the same conitions as described for soy beans.

OBTAIN LARGER CORN YIELD

Field Selection of Seed Ears Is Best, According to Reports From Ohio Station.

The Ohio station reports that seecting seed ears from the standing orn increased yields three and a uarter bushels to the acre. One reaon why field selection is best, the tation points out, is that it gets the ars which excel because of inborn erit, rather than those favored by rowing on a rich spot in the field or roduced from a one-stalk hill. The uperior ear that comes from a three-talk hill on the average soil of the ld is better for seed purposes.

CONTROL OF GARDEN PESTS AND DISEASE

Insects May Be Poisoned by Spraying With Solution.

Plant Lice May Be Repelled With Soap Suds, Kerosene Emulsion or Tobacco Decoction—Dust Surface Mulch Is Good.

Insects which attack vegetables may be divided into two groups—those which eat or chew the leaves or fruit, and those which suck the plant juice. Biting insects may be poisoned by spraying the plants with poisonous solutions or by dusting them with poison powders. Potato beetles, flea beetles, cabbage worms, striped cucumber beetles and similar biting insects may be held in check by spraying the plants with arsenate of lead paste at the rate of two pounds to 50 gallons of water. The spray sticks better, especially on smooth plants like cabbage, if a little soap or molasses is dissolved in the spray. The arsenate of lead may be obtained as a dry powder, mixed in a quantity of flour or air-slaked lime and dusted on the plants.

Sucking insects like plant lice may be held in check by spraying with soap suds, kerosene emulsion or tobac-

The Colorado Potato Beetle and "Slugs" or Larvae at Work.

co decoction. Most insects are also repelled to a greater or less degree by the presence of fine dust, which tends to close their breathing pores. For that reason, it is best to keep the surface soil well tilled to maintain a dry, surface dust mulch. Wood ashes, air-slaked lime, insect powder or tobacco dust sprinkled on and about the plants also help to keep down insects.

Most fungous diseases such as celery rust and potato blight, may be held in check by spraying with bordeaux mixture; four pounds copper sulphate; four pounds lime; 50 gallons water.

Where both insects and fungi are present, it is well to add two pounds of arsenate of lead paste to the 50 gallons of bordeaux mixture. This combination spray is to be recommended especially for potatoes to control the potato beetle and potato blight. Detailed information on the control of garden insects will be found in extension service circular 15, of the University of Missouri college of agriculture.

PAINTING INTERIOR OF SILO

Not Advisable to Use Lead and Oil on Wooden Structures—Carbolineum Is Favored.

In painting the interior walls of the wood silo do not use lead and oil paint; use carbolineum or some other creosote wood preservative. One of our subscribers advised us that he painted the interior of his silo with lead paint and the paint came off in small scale, says Hoard's Dairyman. After feeding silage for some time the cows showed signs of poisoning and seven died. A chemical analysis of the contents of the stomachs showed that lead poisoning was the cause of death.

EGG CIRCLE BENEFITS

The object of a community egg circle is to secure and improve better strains of poultry; to produce more eggs of good color and size; to handle eggs more carefully in order to avoid waste; to pack a uniform grade of clean, fresh eggs, in order to be able to guarantee them and thus create a reputation; to market same more directly to the consumers; to purchase supplies in a co-operative way; and to do such other things as may prove of benefit to the members and the community.—United States Department of Agriculture.

DISPOSE OF ALL OLD FOWLS

Hens Not Wanted for Next Year's Breeding Should Be Culled Out After Breeding Season.

All the old hens that are not needed or wanted for next year's breeding should be culled out and disposed of after the breeding season is over. Before selling these old hens, they should be confined in a small space and fed all they will eat for two or three weeks. They can be fattened at a good profit in this time even though grain prices are high.

LABOR IS SCARCE AND TWINE IS CHEAPER AS HARVEST TIME NEARS

Doctors, Lawyers, Merchants and Fair Folk of the Cities Donned Old Clothes and Overalls to Help in the Harvest Fields During the War—the Famous "Shock Troops," to Whom the Secretary of Agriculture Has Issued an Appeal for Similar Aid This Year.

(Prepared by the United States Department of Agriculture.)

Labor and binder twine.

On the eve of the harvesting season the wheat-growers' thoughts turn to these two necessary items, particularly the former, which caused him much worry during the years of the war. Of course, labor is the chief problem, but binder twine is something that must be reckoned with as well, and in its own way is a very important feature in the harvesting operations.

The wheat-grower need have no apprehension as to the supply of binder twine this season. Reports coming to the bureau of plant industry indicate that there will be a plentiful supply of this commodity available for the American farmer. Not only will it be plentiful, but it is likely to be cheaper this year than for some years past.

Yucatan—the chief and cheapest source of henequen, from which the twine is made—produced a large crop this year, which, coupled with the termination of control of prices by the commission regulators, was responsible for a drop in the price of fiber from 15 to 10 cents a pound early in March. The price is now re-

Not Afraid to Don Overalls and Do Their "Bit."

ported to be 8 cents a pound. This reduction should be reflected in the price of twine this season.

Supply Not Affected by Revolution.

Thus far the recent revolution in Mexico has not affected the henequen industry of Yucatan and Campeche, the two important fiber-growing states of that country. It is too late now for any disruption of this industry to affect seriously the supplies of twine for this year's harvest, as practically all the fiber necessary for the present needs have already been imported to the United States.

Although there is no danger for this year's twine supply, officials of the department of agriculture are somewhat apprehensive over the effect that the low prices for fiber prevailing now will have upon the production of henequen during the next few years. Low prices, according to reports to the department, are leading the growers in Yucatan to reduce their planting, with the result that a real shortage of the fiber five or six years hence is a very likely possibility.

The labor outlook is not so cheerful. The supply of hired farm labor is about 72 per cent of the normal.

Although no appropriation was made by congress this year for carrying on the department of agriculture's wartime activities in aiding the farmers to get laborers, the department is doing what it can to assist farmers with this problem. The state directors of extension and the county agents are aiding in bringing together farmers and men who want jobs on farms.

Calls for "Shock Troops."

Results are expected from the appeal of Secretary of Agriculture Meredith to city men, college students, and others to spend their vacations working on farms, particularly as helpers in harvest fields. Frequent inquiries are being received by the department from university and college students as to where their services could best be used. The need for the now famous "shock troops"—volunteer helpers from the city who shocked wheat—that gave such a good account of themselves in the harvest fields during the war is believed to be as urgent this year as in those trying days. The mobilization of these forces is what Secretary Meredith is seeking to accomplish.

According to reports of the department, Kansas leads all other wheat-growing states in its demands for labor—50,000 outside men is its estimated need. Nebraska requires 6,000 additional men for its harvest, and Oklahoma, 4,000 or 5,000. No figures have been received as to the requirement for the Dakotas. It is expected, though, that the labor shortage there will be largely met by the workers in the other wheat states which have earlier harvest seasons. The central employment office established by the department of labor in Kansas City is undertaking the task of gathering the laborers and distributing them in the various localities.

ECONOMICAL METHOD IN THRASHING WHEAT

Task Should Be Performed Directly From Shock.

Grain That Is Handled When Damp Will Sweat Too Much and Become Hot and Burned—Community Plan Most Desirable.

When thrashing can be done early, the most economical method is to thrash directly from the shock. Thrash when the grain is dry, either before or after it has gone through the sweat. If the grain is too dry, it will crack in thrashing.

Wheat thrashed before sweating in the shock will go through the sweat in the bins, giving the grain a darker and richer color. Grain that is thrashed when damp will sweat too much and become hot and bin burnt. When grain is stacked it should be allowed to go through the sweat before thrashing.

Community thrashing is desirable where the farms are not large. The individual farmer will get his thrashing done more rapidly and economically where a group of farmers can own and operate a thrashing outfit together.

See that the separator is well cleaned before the thrashing is started, in order to prevent the mixture of grain and the scattering of weed seed from the neighboring farms.

Watch carefully the working of the machine to see that the grain is entirely removed from the straw and that the chaff is blown out.

Stack the straw, use it as feed or bedding for live stock, and so convert it into manure.

Write to United States department of agriculture, Washington, D. C., for a copy of Farmers' Bulletin No. 678, "Growing Hard Spring Wheat."

Buy Labor-Saving Tools.

If labor is scarce and high priced, buy labor-saving machinery and implements.

COULD DOUBLE CORN YIELDS

Desirable to Produce Enough to Meet All Demands on a Smaller Number of Acres.

Corn yields per acre in the United States could be doubled within a few years, and this could be accomplished without increase in work or expense. It is not to be understood that it is desirable to double the present corn crop, but that it is desirable to produce enough to meet all needs on a smaller number of acres and with less labor, says the United States department of agriculture. If 60 bushels are raised on one acre instead of on two acres, the labor of plowing, harrowing, planting, cultivating, and harvesting is greatly reduced.

FEED FOR STOCKER CALVES

In Addition to Pasture Young Animals Should Be Given Cottonseed or Cake Oil.

In the range sections of the United States stocker calves and yearlings should be fed from one to three pounds of some concentrate, in cottonseed or oil cake, in addition to pasture, except in severe weather, when they should also have roughage.

GENERAL FARM NOTES

Drainage improves soils.

* * *

Sudan grass is winning on merit.

* * *

Locate your farm buildings to save steps.

* * *

Encourage the song birds; they are friends of the farmer.

* * *

The richest land is usually the cheapest measured by net profits.

* * *

The loco weed does not grow abundantly except in seasons when there is an abundance of moisture.

POULTRY FLOCKS

HOW OFTEN TO FEED FLOCK?

Much Depends on Whether They Are Confined or on Free Range—Good Plan Outlined.

Just how frequently chickens should be fed depends on whether they are confined or on the range. Some poultrymen feed their flocks twice a day, while others feed them three times a day. The best plan is to feed fowls in confinement three times a day and

Plan to Keep Fowls Busy When Confined.

those having free range in summer twice a day. When there is a very long interval between feeds it is difficult to keep fowls busy which are kept in confinement. Idle fowls often contract bad habits, such as feather pulling and egg eating, besides going out of condition from lack of exercise.

In case it is not convenient to feed three times a day, the moistened mash may be fed in the morning, and at the same time the noon feed of grain may be scattered in the litter, which will keep the fowls busy a great part of the day.

For those who cannot conveniently feed their fowls early in the morning a good plan is to scatter grain plentifully in the litter after the birds have gone to roost. This grain will furnish feed for the early morning, say poultry specialists in the United States department of agriculture.

Some poultry keepers can look after their fowls only once a day. If this is in the morning, moistened mash may be fed, followed by throwing grain in the litter to furnish feed for the remainder of the day. If it is in the evening, before dark, a moistened mash may be given, and either after the fowls go to roost or in the morning before daylight, grain may be scattered in the litter for eating during the day.

PLANS FOR BROODING DUCKS

Mother Duck or Hen Is Quite Satisfactory Where Small Numbers Are Being Reared.

Those rearing ducklings in small numbers usually accept the services of the mother duck or mother hen, according to which is used to do the hatching, for the purpose of brooding, and when only a few are reared this is a satisfactory method. Where ducks are raised in large numbers, however, artificial methods are always employed and the brooding is done by individual brooders or by long, hot water pipe systems heated by coal-burning boilers.

PROVIDE FOWLS PURE WATER

No Excuse for Permitting Them to Drink Impurities From Puddles—Cause of Diseases.

Fowls are not very discriminating in regard to water, and appear to enjoy drinking from puddles of foul water just as much as from pure and wholesome sources. That is no excuse for permitting them to do so, however, and the impurities in such water often cause serious losses. Either drain the stagnant pools or

POULTRY NOTES

Hatch the chicks early.

* * *

Provide plenty of shade.

* * *

Many people feed baby chicks too much.

* * *

Keep the house clean and well ventilated.

* * *

Raise young chicks on clean ground away from the general flock. Cull the flock.

* * *

A good feed for little chicks is ordinary johnnycake baked hard, crumbled and fed dry.

* * *

If milk is available, chicks should have all they can consume from the time of the first feeding until mature.

* * *

Where there is a tendency to boycott the perch and occupy the lower regions, the young birds should be taught to roost.

* * *

The owner of a small flock of ducks will find it profitable to force the growth of his ducklings for placing on the market at the age of two months.

Live Stock News

BRAND TUBERCULOUS CATTLE

New York Commissioner of Agriculture Orders Letter "T" Put on Affected Animals.

By a recent order of the New York commissioner of agriculture, all practicing veterinarians in that state are required to brand cattle found by them to be affected with tuberculosis. The order specifies that the brand shall be the letter "T" not less than 2 or more than 3 inches high and on the left jaw.

The new regulation, which became effective in March, was issued by Commissioner Charles S. Wilson under authority of the agricultural law. The order applies to all bovine animals within the limits of the state. Veterinary experts of the United States department of agriculture consider it will be of great value to live-stock breeders of New York and also an important step for any state to take in the progress of tuberculosis eradication. Reactors are permanently marked by the branding process and in cases where they are not slaughtered the possibility of their being disposed of or losing their identity is greatly lessened, if not entirely eliminated.

RAISING SHEEP FOR MUTTON

There Are Many Areas, Especially in Hilly Regions, Where Few Animals Could Be Kept.

Sheep are not very generally kept on farms for supplying the home family with meat. There are many areas, especially in hilly or mountainous regions, where nearly every farm could keep a few mutton sheep to advantage, says the United States department of agriculture. Boys' and girls' clubs in some parts of the country have done much to foster home production of mutton.

"Sheep naturally graze over rather wide areas and seek a variety of plants. This habit particularly adapts them to being kept in large numbers on lands of sparse vegetation or furnishing a variety of grasses or other plants. They do better on short and fine grasses than on coarse or high feed. They will eat a good deal of

Sheep Do Best on Fine and Short Grasses.

brush and, if confined to small areas, will do a fair job at cleaning up land. When used in this way, or on land producing brush only, they can not be expected to prove very satisfactory in the production of good lambs or good wool."—Farmers' Bulletin 840.

HOW HOG MANGE IS SPREAD

Disease Is Contracted More Rapidly Among Animals of Low Vitality—Cure by Dipping.

Hog mange is spread mainly by direct bodily contact, according to investigations recently conducted by the United States department of agriculture. The disease is contracted most rapidly among hogs of low vitality, especially those kept in small inclosures. It spreads more slowly among vigorous animals kept in pastures or in clean, well-lighted roomy pens or buildings. Failure by swine owners to control hog mange results in heavy losses from shrinkage as well as from a high death rate. The department states that the disease can be eradicated by four dippings in a lime-sulphur or arsenical solution with intervals of 6 to 7 days between dippings.

LIVE STOCK NOTES

Each pregnant mare deserves a stall to herself.

* * *

Farrowing time often determines profit or loss to the hog grower.

* * *

Hurdles mean more sheep to the acre. Hurdles are light, movable panels of fence used for making temporary enclosures.

* * *

Indigestion in young lambs is shown by great distress and frothing at the mouth. A tablespoonful of castor oil is a good remedy.

* * *

Health, vigor and rapidity of growth are valued by experienced swine raisers as much as the saving in feed cost. They mean an efficient herd and one in which disease is not liable to gain a foothold.

Gardite

Guards Gardens

Raise your Garden right—Use Gardite on melon, cucumber and pumpkin vines, cabbage, rosebushes and some other plants and flowers.

Don't neglect your Garden. The bugs are here, use gardite. Bugs or worms will sooner or later attack your garden unless you act to prevent there coming.

PARIS GREEN

The only sure death for the Potato Bug. Buy a package and have it on hand.

Iowa News

Items of Interest Summarized for Busy Readers.

E. L. Spear, a printer, brought back to Garner from Oklahoma to face charges of bigamy has confessed.

While trimming trees at his home in Waterloo, Iowa, John F. Boynson, aged 64, yas stricken with heart disease and fell to the ground dead.

A youthful quartet from Greenfield, Iowa, was arrested near Moulton while asleep in a Hudson Super-Six car they are alleged to have stolen.

Buena Vista county boasts the honor of having the first woman county clerk in the state. She is Miss Blanche Womak, who was appointed to succeed C. C. Colwell, when he moved to California. Miss Womak has been a deputy under Colwell for the last two years.

The youngest pair of elopers recorded on the police blotter are being sought by detectives. The two are from Ottumwa, and they ran away from their together, according to advices from Ottumwa police, who say the two started for Des Moines. The "woman in the case" is 12 years of age, while the boy has 16 summers to his credit. Detectives have found no trace of the newlyweds.

Three persons met death at Dubuque when a gasoline stove exploded in their residence, trapping them in the structure. Wedged against the front door, Mrs. Charles Thurston, 35 years old, with her six months' old baby, clasped in her arms, was found by firemen. Isabelle Thurston, age 3, rescued from the second story by firemen, died at a hospital after suffering two hours agony from burns and near suffocation.

The Mashall County Cow Test Association again has taken first place in average production of ten high cows, for the month of April. Marshall county took a big lead during the month ,the ten high cows producing an average of 1,727 pounds of milk and 62.72 pounds of butter fat. The nearest competitor, the Dallas county association, scored an average of 1,441 pounds of milk and 57,-07 pounds of butter fat.

Success has come in unmeasured portions to Ernest Melburg, a Benton county farmer and breeder of Poland China hogs, who has in two years' time cleaned up $85,000. Some time ago Mr. Melberg sold his fine herd of Poland Chinas to Gus Tow of Norway, Iowa, for $105,000. Melburg made his first herd purchase two years ago when he bought three brood sows for $950. In nine months timè he made a profit of $2,000 on their pigs.

Rev. D. W. Cassatt of Corning, who is one of eighteen living members of the class of 1870 which graduated from Penn college, now Gettysburg college, at Gettysburg, Pa., has gone back to visit his alma mater on the fiftieth anniversary of his graduation. Rev. Mr. Cassatt, a man of 76 years old, with forty-seven years of ministerial work behind him, listened to the dedicatory address of Abraham Lincoln at the national cemetery at Gettysburg Nov. 19, 1863.

After being without an annual county fair for thirty years the time now seems ripe for such an annual gathering at Denison beginning with 1921. The last fair will be held at Arion this fall, and then steps taken by the farmers and stock breeders to make a strong fair at the county seat. The farm bureau will make a canvass of every township to raise the funds. Citizens of Denison have offered to raise here as much as the outside townships will subscribe.

Iowa has at present 1,370,000 dairy cows producing on the average of 150 pounds of butter fat per year. It is estimated that each person consumes three gallons of 20 per cent cream, worth 30 cents per gallon. Milk is consumed at the rate of 1.1 pint per person. This consumption is increasing at present, due to the campaign being waged in the state for the greater use of milk for children. If Iowa's cows produced 200 pounds butter fat annually, they would require no more outlay for housing and labor and little more feed than now. The cow testing associations are making the fight for better cows and greater production per capita. Ice cream is steadily increasing in its value as a dairy product. Last year $27,000,000 worth was consumed in the state. Cheese is the least of the dairy products, only having a value of $330,000, It is produced mainly in the northeastern part of the state where the hilly sections provide good pasture but poor markets for milk.

First patients for psychopathic treatment will be received at the general hospital of the University of Iowa about July 1, according to Dr. Samuel T. Orton, director of the psychopathic hospital.

The body of a day-old male child, badly decomposed, found at Davenport, leads authorities to believe the babe was a victim of foul play. An inquest is to be held. The body was nude, but showed no signs of violence. Dr. F. H. Lamb said the baby had breathed, and that death was no doubt due to drowning.

The Farm Bureau drive for members in Carroll county was a decided success and the final count shows that 1169 new members were added to the Bureau and $4651 was taken in for use of the State Federation. Glidden township proved the banner township in the county as regards number of new members, 108 being secured there. R. W. Halford, a well known Poland China breeder of Manning gave a pure bred gilt, the animal to be sold at auction and the proceeds to go to the fund. The most liberal donators to the state federation fund were found in Jasper township, where $495 was secured.

Creameries over the country are being continually confronted with the question of the quality of the cream which they receive. This has been a very difficult problem to handle, due to the fact that there have always been creameries that would take the cream from the farmers in any condition—good or bad. The different extension departments of the corn belt state universities have been working with the creameries in order to educate their patrons to the importance of bringing in sweet cream. The grading of cream has proven to be one of the most satisfactory methods the creamery can use in bringing up its quality. In addition it has been demonstrated that grading is a paying proposition, both for the farmers and for the creameries.

Among the many Iowa stockmen who exhibited one or more animals at the Chicago International November 29 to December 6, are the following: Herefords—Marion Armentrout, Bonita, 7; E. M. Cassady, Whiting, 3; Ford Hereford Farm, Bonita, 3; Iowa State college, 4; Peter Mouw, Orange City, 9; Henry Schnoor & Son, Perry, 2; C. A. Tow, Norway, 2; H. P. Tonefeldt, LeMars, 3. Shorthorns—Bert Brown, Adel, 1; Cahill Bros., Rockford, 4; Gallmeyer Bros., Mechanicsville, 5; William Herkelmann, Elwood, 8; Iowa State college, 6; Kroeger Brothers, Princeton, 2; Loveland Stock Farms, Mt. Pleasant, 11; Miller Bros., Britt, 1; M. C. Matton, Corwith, 2; W. E. Pritchard, Walnut, 9; Rockwood farm, Ames, 3; E. R. Silliman, Colo, 2; D. Tietjen, Bellevue, 3; Upperhill farm, Wapello, 4; Howard Vaughan, Marion, 4. Poland Chinas—Iowa State college, 5; William Kimpke, Avoca, 1; Peter Mouw, Orange City, 2. Duroc Jerseys—Alden Anderson, Story City, 6; H. S. Fain, Emmetsburg, 2; Iowa State college, 9; C. H. Summers, Malvern, 3.

E. A. Hall, stock dealer of Marshall county shows the magnitude of the hog feeding industry in that part of the state, and while this was not a record breaker in the matter of grains or prices received, there are indications of profits in the figures. Mr. Hall bought 150 head of 101 pound hogs in a northern market, paying $18.75 per hundred for them. He fed them for a period of 105 days and sold them for $20 a hundred. They averaged 252 pounds at time of marketing, receiving $7,500 for the lot.

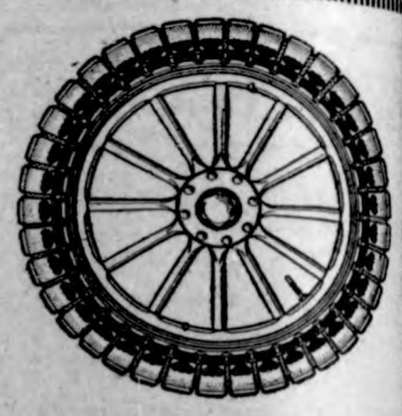
An Evil Genius.

Asmodeus is an evil genius or demon. In the apochryphal book of Tobit he is represented as slaying the seven husbands of Sara. In the Talmud he is described as the prince of demons and is said to have driven Solomon from his kingdom.

Troubles of a Lazy Man.

"A lazy man ain't likely to be happy," said Uncle Eben. "He generally gits a bad disposition tryin' to scare other people into doin' de work."

Highway Tire Protectors



20,000 miles from tires guaranteed.

A Perfect Tire Protecting Device Made on a Tested Principle

Easy to put on and cannot possibly injure your tire. Prevents cuts, bruises, punctures and blowouts. A perfect tire protecting device that goes on without deflating your tires, is noiseless and NON-SKID under every condition of road or weather.

Cost is but a trifle

They cost only half as much as new caseings. New tires guaranteed to give 20,000 miles service when constantly equipped with the Highways. Will fit any make, style or size of tire.

With the freight car shortage apparently more acute than it was even a few weeks ago, bankers, farmers, manufacturers, merchants and grain dealers throughout Iowa started movements to combine in a vigorous appeal to the government. While conditions seemed for several weeks to be getting better an extereme relapse has been noted and those interested are admittedly worried. The Iowa State Bankers' association sent out letters to the Iowa Farm federation and to the Iowa State Manufacurers' association requesting them to join in appointing a delegation to go to Washington. The delegation would have instructions not to request relief, not to seek advice, but to demand that immediate and drastic action be taken to overcome the present car shortage, a shortage that, if sustained, bankers claim will result in the worst financial difficulty yet encountered.

It took two years of political struggle to elect the first United States senators from the state of Iowa. A volume on the "History of Senatorial Elections in Iowa," published by the State Historical society, tells the story of this contest. In the first session in December, 1846, the general assembly met in joint convenvention and a ballot showed neither party with sufficient votes to elect. Indications however seemed to favor the Whigs. Whereupon the Democratas moved an adjournment and for the rest of the session the Democratic senate refused to come to a joint convention. At the next session, in January, 1848, the Democratic prospects were favorable and the Whig house of representatives turned the tables by refusing to go into joint convention. In December of that year, however, a new general assembly convened, this time clearly Democratic, and the state which had been for two years without representation in the United States senate finally elected two longtime Democrats—Augustus Caesar Dodge and George Wallace Jones.

When C. M. Vanhorn, 19, of Sioux City, was arrested on a charge of housebreaking, he confessed to scores of robberies all within the last two months. He is a former resident of Boone.

Cedar Rapids may become a gasless city July 1, if the city council does not adopt an ordinance increasing the rates. The local utilities company has notified the council that gas can not be produced today for less than $1.15, and that if the prewar rate of 90 cents is enforced the service will have to be discontinued.

Mrs. F. Wellemeyer from Charles City came Thursday for a visit with her son, Arthur Wellemeyer and family, and other relatives and friends. She also attended the camp meeting at Garner a few days last week.

Local News

The Misses Leota and Edna Smith returned from Belmond Saturday afternoon where they had been visiting relatives and friends.

Rev. F. C. Greiwe and family of Rudd, Iowa, were attending the camp meeting at Garner last week but managed to come to Klemme to say hello to relatives and friends.

The J. N. Day famly, Mable Smith, Mr. and Mrs. Wm. Smith and Donald Nissen autoed to Garner Sunday to attend the camp meeting. John sure had a car full for once.

Bob Henschen, Kimmall Terhufen and Ole Brynteson were all seen strutting around at Clear Lake Sunday afternoon.

Mrs. Tiernan from Belmond, was a Klemme shopper Monday.

Quite a number of Odd Fellows and their wives from here went to Garner las Thursday evening to attend work in the Rebecca Lodge there. Including the Klemme people there were sixteen initiated into the order.

Dr. Zinn drove to Mason City Sunday morning to bring Mrs. John Bock home who has been at the hospital there for some tme. She is improved to quite an extent and her many rfiends hope for her speedy recovery.

Mrs. C. A. Kimball of Delavan, Wis., was a vistor at the N. L. Palmer home from last Tuesday until Thursday. Mrs. Kimball is the wife of Mrs. Palmer's brother.

Mr. and Mrs. Holly Lewis came last Saturday for a short visit at the home of his parents. This is the first appearance of Holly and his Bride in Klemme since their marriage.

This vicinity was visited by a heavy rain Monday evening which was a great benefit to the crops. It is also reported that between here and Garner hat a heavy wind tore down large trees and done some damage to small buildings.

Harold Livermore of Garner was a business caller here last Thursday.

Frank Zeiger and Will Bemis, of Garner, were business callers here last Thursday afternoon.

Mr. and Mrs. Rundberg of Des Moines, were visiting at the M. O. Hocum home from last Thursday until Saturday. Mrs. Rundberg is a sister of Mr. Hocum.

Remember the free concert Saturday night at the M. E. church. The Morningside College Male Quartet in full program, bright and snappy with a breath of college life. Free, but a silver offering for expense.

Mrs. J. Jorgenson, of Garner, was a Klemme visitor last Friday.

Mike Haskins, of Garner, was in town several days the past week on electrical work.

Ellen and Opal Kinden of Thompson, Iowa, came last week Tuesday and remained until Friday visiting their cousins Blanche Liljenberg and Mrs. Frank Kluckhohn.

Miss Clella McCullough was here several days of the past week assisting her sister Mildred at the Wellemeyer store.

Qute a number of Klemme people were at the Garner camp meeting Sunday and Sunday evening, which came to a close then.

Henry Suckow has moved his house from the lot south of the F. J. Wenck residence to the lot between Waterman's and Fred Musfelt's. The house will be all fixed up in fine shape and when finished will be occupied by Mrs. Suckow's parents who now live at Garner.

The young folks of the vicinity had a regular "shiveree" last Wednesday evening when they gathered pots, pans, bells and horns and gave Mr. and Mrs. Fred Becker, newlyweds, some real choice music. Valentine Josten was right on hand with plenty of cigars which satisfied the noise makers.

CHAPTER XIV—Continued.

—17—

"I have," she answered, looking at him steadily in the eye, but speaking with a slight tremor in her tones. I wondered to what it might be due. Was it because she feared the consequences of the revelation as to her identity, or was it that she feared she might be trapped by his questions?

"Now tell me, Mrs. Moore," he shot at her explosively, "who really murdered Daisy Lutan?"

"Henry Kent," she answered quickly, before the district attorney had time to stop her.

"What's this?" exclaimed the judge. "What did you say?"

"Object! object!" vociferated the district attorney, striving in vain to catch the attention of the judge presiding. McGregor, apparently well satisfied with the results of his question, stood there, smiling assurance at me.

"Young woman," directed the judge, "will you kindly repeat your last statement—louder. Who did you say killed Daisy Lutan?"

The girl turned to face the judge. Her lips were set as if she had determined to carry out some fixed plan, cost what it might.

"Daisy Lutan," she repeated, "was murdered by Henry Kent, who owns the Granddeck. He's really Orville Granders, the bank president who got away with eight hundred thousand dollars and was sent up for seventeen years."

There was a commotion in the rear of the courtroom. A dapper little old gentleman with neatly trimmed white whiskers rose hastily and made a dash for the door. Gorman, who had been sitting behind him, sprang after him and pinioned him by the arms:

"Nothing doing, Granders. I've got you."

Wick, sitting up near the counsel table, at the same time showed evidence that he, too, was contemplating hasty flight, but a husky chap whom I suspected of being one of Gorman's aides, seized him, too.

"Your honor," cried my counsel, "I demand the issuance of warrants at once for Orville Granders, alias Henry Kent, and his confederate, James Wilson, alias James Wick and 'Stuffy Jim,' on the charge of having murdered Daisy Lutan and Rufus Gaston. I further urge the immediate release of my client, Mr. Spalding Nelson, in my custody. Testimony that we already have obtained will establish that he was an innocent victim of the dastardly plots of these two ex-convicts."

The reaction that came from this sudden clearing of my name left me in a puzzled daze from which I hardly recovered until late that evening, when, once more free, I found myself in the Gaston apartment. Granders, his tool, Wick, and practically every employee of the Granddeck were under arrest, and warrants were out for other members of the band whose identity had been revealed by the former telephone girl.

And there in the apartment with me were my mother, Gorman, McGregor—and to my surprise and delight, Barbara Bradford. After her sister's wedding, it appeared, Barbara's mother had gone away for a brief rest, leaving her alone in the apartment with the servants. She had welcomed the opportunity to work undisturbed on the mystery that had landed me behind the bars. Thinking that at Rufus Gaston's funeral she might pick up some clue that would be of service in unraveling the tangled skein that held her and me together, she had gone thither, and seeing my mother there, and suspecting at once who she might be, had introduced herself. Quickly they had become good friends and she it was who had informed my mother of my plight.

Present also with us, despite the lateness of the hour, was the district attorney and two of his aides, and Nellie Kelly, or as she much preferred to be called, Mrs. Moore. The girl was technically a prisoner, but her services in bringing the real criminals to book had been so exceptional that she had been released on her own recognizance. Hither she had been brought that the district attorney might check up with her the marvelous tale of criminal conspiracy that she had unfolded to my counsel in the brief recess of the court that day.

Orville Granders, it appeared, had been the master-mind that had directed all the plotting. A score of years before he had been president of one of the metropolis' biggest banks. He had been discovered to have embezzled nearly a million dollars. He had been tried and sentenced to seventeen years' imprisonment, but no one ever had been able to find what he had done with the money, so safely had he hidden it away.

In his long years in prison, associating daily with criminals of the worst sort, and listening to their plans for further crime on their release, his own criminal instincts, already developed, had grown stronger, and he had spent his time planning a new system of crime of which he was to be the head, using as his confederates certain evildoers with whom he had become acquainted in prison. When he had been released he had slipped quietly away to the West and lived in close retirement until he had been forgotten. The white whiskers he had grown so changed his appearance, too, that he had little fear of being recognized. Recovering such part of the stolen money as was left to him, he had come to New York in the guise of a prosperous Western investor and, purchasing a plot of land, had erected the Granddeck apartments, designed for the occupancy of the wealthiest class of tenants.

In this building, sitting like a little white spider in his web, he planned to prey secretly on all who came to live there. Every attendant in the building was either a criminal or an associate of criminals, reporting to him daily all that went on, and obeying his orders implicitly. A special switchboard in his apartment enabled him to listen in at will on all telephone conversations that went on. Every letter delivered at the Granddeck went through his hands before reaching the tenants. For every wall safe in the building he held a master combination and his pass-key would unlock every door there was. And in addition to all this—

HE HAD BUILT A SECRET PASSAGEWAY.

We found it that night and explored it, familiarizing ourselves with all its exits, greatly to the amazement and confounding of Gorman. Connecting with the service elevator by a masked opening, it ran along the hall of each apartment, with entrances concealed in wall panels. It enabled Granders to wander at will through the apartments at night, leaving mysterious notes to terrify his tenants, prying into the secrets hidden in their wall safes, listening when he chose to their most private conversations, examining the contents of their pockets. As he had planned from the beginning, he gained in this way much information that he was able to utilize to his financial profit without arousing suspicion. He had discovered, Mrs. Moore said, secret stock market movements one of his tenants was planning and had made a small fortune out of the advance information. Several injudicious women he had successfully blackmailed, turning over to agents who never came near the Granddeck the secrets he learned from letters he opened and telephone conversations he had listened to.

In the case of Rufus Gaston, he had plotted to steal the Gaston pearls, Mrs. Moore explained, first terrifying the old couple into leaving the apartment, the whispers that had been heard coming of course from the secret passageway.

"But I can't understand," I said, "why, after he had once got hold of the pearls in Mr. Gaston's absence, he should have restored them to their hiding place."

"He had a duplicate made of phony pearls," explained Mrs. Moore. "It was part of his plan not to have any of the tenants discover the thefts for a long time after they occurred."

"If he was so cautious," said the district attorney, "I am puzzled as to why he killed Miss Lutan and Mr. Gaston. He must have realized that both murders would be thoroughly investigated."

"Both were accidents, so to speak," the girl explained. "Each of them surprised him in their apartment, and

He Had Built a Secret Passageway.

he had to kill them to make his getaway. I suppose he had been roaming around so much he had got careless."

"How about the revolver?" asked Gorman. "How did he come to plant it in Nelson's room?"

"He was puzzled by Mr. Nelson butting in on the Bradford case, and it made him sore. I heard him and Wick talking about it one day, and he said that he'd teach Mr. Nelson not to interfere. 'How?' asked Wick. 'I'll frame him for the goat if anything happens.'"

"And was it he who had me discharged from my office?" I asked, eagerly.

"Sure it was. He wrote a note on Mr. Gaston's stationery saying that you had forged a check after he had befriended you. He wrote in the letter that he was not going to prosecute you because of your mother, but that he felt that you were unworthy of employment anywhere."

"I believe," said the district attorney, "that that clears everything up, except for one thing—why, Mrs. Moore, did you aid him and Wick in all these crimes?"

"He promised that if I would help him he would get Eddie out," she cried. "I was desperate. I'd do anything to get my husband back."

Gorman and the district attorney exchanged meaning glances. While nothing more was said, I felt sure as they departed that both were thinking that this brave young woman who had solved the mystery for them certainly deserved some reward, and I think we all realized that the only reward life ever could hold for her was the freedom of her husband.

Presently they went and left us alone, Gorman, my mother, Barbara, and I.

"There are still two things I cannot understand," I said, as we sat talking it over. "The first is"—and I turned to Barbara—"what was your sister doing in this apartment on the night of the first murder? When I came up from the Lutan apartment I caught her just coming out of my door. I could not help wondering if they had made her plant the revolver."

Barbara started up, blushing.

"Oh, no," she cried, "it was nothing like that. You remember a few moments before you and I had been in your room, looking at the secret pas-

"If Only I Had Something to Offer You Besides My Love!"

sageway. Claire just then had come into my room looking for me. She was puzzled by my absence, and the only solution that came to her was that I must be in your rooms. Alarmed at what she considered my imprudence, she had slipped out into the hall, and seeing your door open, had investigated. Of course she did not find me, for I had returned by way of the window ledge. She told me about it the night before she was married. I don't wonder, though, that you suspected her."

"I didn't suspect her," I cried. "I just wondered what she had been doing there."

"That's right," said Gorman. "He wouldn't believe for a minute that she had had anything to do with it."

"But what puzzles me most," I went on, "is how you ever persuaded the telephone girl to give Granders away. It must have been done after she had given her first testimony. How did it happen that she changed so suddenly over to our side?"

As I looked from one to the other for an explanation, Gorman burst out laughing.

"You'll have to ask Miss Bradford about that," he said. "She did it all."

I turned again to look at Barbara, expecting her to speak, but she merely blushed and was silent.

"Go on, tell me," I urged her.

"Well," she said hesitatingly, "as I heard her testifying, I had an inspiration. I heard her say that she loved her husband, and that she did not care who knew it—and—and—and—all at once I realized that love was the strongest influence in the world, so I had Mr. McGregor ask for an adjournment, and then—"

She stopped in confusion, the rosy blushes once more mantling her cheeks.

"Go on," I insisted.

"I can't tell it," she cried.

"You must tell," I urged. "I have a right to know it. What did you do?"

"I managed to see her alone."

Again she hesitated.

"What did you say to her?" I demanded.

"I just told her," she faltered, lowering her eyes as she spoke, "that—that I loved you just as much as she loved her husband, and I begged her for love's sake not to help send you to the chair, and she broke down and told everything."

"Oh, Barbara, my Barbara!" I cried, springing up and clasping her in my arms. "If only I had something to offer you besides my love—"

"I wouldn't worry about that just now, Spalding," interrupted my mother's voice. "They found your great-uncle's will today. He made you his sole heir."

But Barbara and I hardly heeded her good news. We were too busy telling each other the world-old story.

[THE END.]

Formation of Asbestos.

Asbestos is found in fissures of rock and it is believed that, when the rock was forming and still hot, water penetrated the fissures, widened them and dissolved some of the silica and magnesia. On drying, these crystallized as a hydrated silicate of magnesia, forming threadlike crystals building up from opposite walls of the fissure and meeting in the middle.

Words That Made Men Free

IN CONGRESS. JULY 4, 1776.

The unanimous Declaration of the thirteen united States of America

OUR COUNTRY

DATE OF INDEPENDENCE DEMANDS FITTING CELEBRATION.

We are told by historians that Bjorne Hergulfson, an adventurous Icelander, was the first to see this continent. This was in the year 986 and the land he saw was believed to be Nantucket, Nova Scotia and Newfoundland.

Lief Erickson, in the year 1000, in Bjorne's ship, set sail for Greenland, landed in Newfoundland and later in Nova Scotia and still later on the shores of Massachusetts bay. The claim is made that he was the first paleface to set foot on the American continent.

Descendants of Columbus strenuously deprecated the importance of the discoveries of "Eric the Red," but the Americanist society declares that Columbus himself knew of the voyages and settlements of the Norsemen, having informed himself thereof when he visited Iceland in 1477.

Be that as it may, Columbus has the advantage of tradition, of familiarity, of the facility with which an at least apparent connection is established between the man and what came after him.

On June 24, 1497, John Cabot, an Englishman, saw the dismal cliffs of Labrador. That was 14 months before Columbus, on his third voyage, came in sight of the mainland of South America.

Amalric was the name which compacted the old ideal of heroism and leadership. It meant "the man who ruled because he labored for all." This name the Norman French shortened to Amaury. In Italy the name suffered euphonic changes and it became Amelrico, but the juxtaposition of the two consonants "l" and "r" presented a difficulty in pronunciation and the "lr" was changed to "rr" and finally to one "r." Down the centuries the name remained, and from Amerrico Vespuci came the name of the new world.

The Mayflower cast anchor in the waters off Cape Cod on November 21, 1621. The Pilgrims finally decided on Plymouth as the spot for settlement. The first settlement had been established, however, at Jamestown since 1607. Its early record was one of continuous misfortune—from an oppressive government to famine and Indian massacre. The first legislative assembly convened July 30, 1619.

On July 4, 1776, the Declaration of Independence was agreed to and Matthew Thornton affixed his signature to the engrossed copy. On January 18, 1777, an authentic copy with the names of the members of congress was ordered and a copy was sent to each of the United States to be placed on record."

This great state paper, "unequaled in eloquence and dignity," was the product, largely, of Thomas Jefferson and Benjamin Franklin, and it is said Thomas Paine, Franklin's friend, wrote the first draft presented to congress.

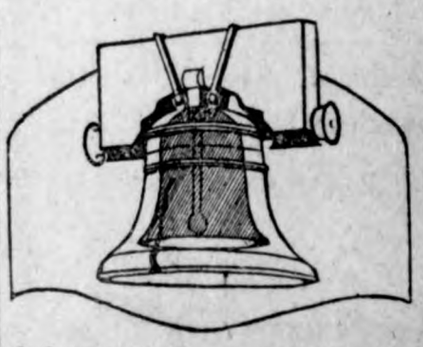
From that time to this the people of the United States of America have celebrated the anniversary of their independence. Emerging, with colors triumphant, from participation in the World war, the Stars and Stripes have taken on added luster and today they float over the happiest and most prosperous people on the earth.

LET OLD BELL PEAL AGAIN

Suggestion for the Rejuvenation of the Historic Tocsin That Rang Out Liberty's Triumph.

Shall the Liberty bell ring out once more? Ever since 1843 it has remained mute—and for good reason. When it was being rung on Februrary 22, 1843, the crack in it, which had appeared some eight years before, so increased as nearly to destroy its sound. Ever since that time it has silently held its post at the head of the stairway in Independence hall in Philadelphia, where it has received the reverential inspection of thousands of Americans.

The original bell was cast in England in 1752, and was cracked soon after it was brought to America. It



A Smaller Bell Inside of the Liberty Bell Could Be Rung.

was recast in Philadelphia, more copper being put into the composition. But it cracked again while being tolled in memory of Chief Justice John Marshall in 1835; and the crack extended, as has been said, in 1843.

Here is a suggestion. Why not place within the Liberty bell a second smaller bell which can be rung? The proportions of the original bell permit of this, and it will be, in fact, a cover or jacket for the sound-giving bell.

Surely this generation ought to see the historic bell swinging once more as joyous peals "Proclaim Liberty Throughout All the Land Unto All the Inhabitants Thereof," as the inscription on the bell reads.—Popular Science Monthly.

Kosciuszko Doubly Welcome.

At those times, when the United States fought for its independence, any experienced soldier who had come to this land to fight for its freedom was cordially welcomed, and the more so Kosciuszko, one of the best students of the highest military institution, acquainted with modern strategic sciences, was especially desirable.

Home Town Helps

"MAKING OVER" OLD HOUSES

Architects Have Shown That They Can Do Wonders With Present Unsightly Structures.

There never was a time when the services, taste and special knowledge of the trained architect were more needed or more in demand. The carpenter and builder have for years been the consulting experts in the building of thousands of suburban homes and farmhouses, and let us give them credit, at least, before the jigsaw era, for many beautiful and charming old houses.

Following the building shortage in these latter years has come an appreciation of the fact that any old house, or new, be it as hopelessly ugly as it may be, has possibilities. Architecture has shown many instances of "before and after" of old ramshackle, barnlike structures, altered into most delightful homes. Old barns have been made over into charming studios and living quarters, woodsheds incorporated into the redesigning of an old farmhouse. Everywhere is shown a wider appreciation that nothing is impossible to the architect of taste and skill.

The old and hopelessly ugly city brown-stone house and the little two or three-story brick house or stable on a side street have been made into artistic and attractive apartments or studio buildings.

It is to the architect that we owe this renaissance and we have only made a beginning toward the development of the city beautiful from old and unsightly and out-of-date structures. Lest some should say that we are dealing with merely idealistic matters, with our own desire for better things artistically, we remark that in every instance these "artistic" improvements have proved the very best of business in increased rents and more desirable tenants.

If the cost of new buildings has deterred many from carrying out their long-cherished dream of owning their own home, there is abundant opportunity almost everywhere for the alteration of old places at very moderate cost. And old houses nearly always offer the nucleus of a more substantial structure than many hurriedly built modern houses put up in quantities for speculative purposes.—From Architecture.

CITY'S BILLBOARDS MUST GO

Cincinnati Commissioner Prepares for the Removal of Signs, Under a Court Order.

Orders for the removal of all billboards from the residential sections of Cincinnati are being prepared by George E. Hauser, city building commissioner, according to the Christian Science Monitor. Commissioner Hauser's action is based on a recent decision by a judge of the Common Pleas court, that the municipal ordinance restricting billboards is retroactive. This ordinance requires a petition containing the consent of 51 per cent of the property owners in any residential block before a permit for the erection of a billboard may be granted. The judge held that this regulation applied to billboards erected before the passage of the ordinance. Commissioner Hauser points out that under this interpretation the residents of each block have it in their power to rid themselves of objectionable billboards by refusing to sign the consent petitions which the billboard interests are hurriedly circulating.

Importance of Trees.

When we have once had our interest in trees awakened and have considered their various uses and helpfulness to man, we are glad to learn something of their ways and how their troubles may be remedied. Trees help to keep the soil in place on hillsides. They hold to its course the wayward brook. They furnish shelter, shade and cozy nesting-places for the birds; we should have few little feathered friends if it were not for trees. They are companionable, and like to grow where they can rub branches with their fellows; they give a refreshing shade in the summer and protection in the winter, and they have character and individuality. It is well worth our while to save them from destruction, as well as to help restore the forests which have been ruthlessly cut down.

Good Advice.

An aged Scot told his minister that he was about to make a pilgrimage to the Holy land. "And when I'm there," said the pilgrim complacently, "I'll read the Ten Commandments aloud frae the top o' Mt. Sinai." The minister looked at him with an eye of pity, and said: "Sandy, tak' my advice: Bide at hame and keep them."

Traced Source of Seaweed.

When the Sargasso sea was first discovered it was thought that the seaweed grew on the bottom of the ocean right on the spot. We know better now. The algae, whose scientific name by the way is fucus natans, has its origin on the rocks of South America and Bahama islands. Vast forests of the algae grow on these tropic coasts.

THE FAIRY GODSON

By MARY ISABEL BOYNTONE

(©, 1920, by McClure Newspaper Syndicate.)

For years Jane Judson had lived "on the tail-end of nothin'," as one of her neighbors expressed it, and might still have contrived to keep her old home if, on her seventieth birthday she had not fallen down the cellar stairs and broken her leg. Then, with no money and nobody to take care of her, it was generally agreed to be the sensible thing for her to go to the Old Ladies' home in Dixville.

The interest on the mortgage on her home being considerably in arrears, Deacon Small promptly foreclosed, donating fifty of the one hundred dollars necessary for her admittance to the institution, the neighbors contributing the other fifty, and in September Jane became an inmate of the home.

Of course it was the "sensible" thing to do; nobody realized that more than Jane herself; only for the kindness of her old neighbors she must have gone to the poorhouse. But oh! how her old heart ached for the weather-beaten old house where she had gone as a bride; where Billy, her only baby, had been born and died; where, later, her husband had died; the spot where all her memories had once had life.

Two graves there were just outside the "south pasture lot," under a huge maple tree, where a dozen times a day as she went about her work she could see them. As she sat in her little room—they gave her a small room, she was so little and fragile she could fit in anywhere—she saw in imagination the leaves turning to gold and red and russet, and then falling—falling gently as tender thoughts on the dust of the two who had lain there so many years.

Everyone was kind to Jane, but it was such an impersonal, sort of professional kindness it left an ache in her lonely heart; but she never complained, and Miss Boggs, her tablemate, often reminded her of how thankful they all should feel to be in "the place where Providence had seen fit to place them." Miss Boggs spent many miserable hours in being thankfully resigned.

When spring came Jane spent long hours gazing in the direction where, sixteen miles away, she knew her beloved home was. In imagination she saw the buds swelling on the maple above the roof; saw the lilac bushes turn from brown to green; saw the tulips and daffodils pushing their tiny heads out of the brown earth by the kitchen door. She was fortunate to have food and clothes, and a roof over her head, but these things alone never made a home.

Then came the event, so great an event that it shook the home to its very foundations. The great limousine rolled majestically up the modest drive and, coming to a stop before the front door, disgorged a big man with flaming red hair showing from beneath his glossy silk hat, and with merry Irish blue eyes, and under whose tread the steps fairly trembled. He asked in a booming voice for Mrs. Jane Judson, and Jane, big eyed and wondering and a little trembly, came.

"Don't you know me?" the big man boomed. "Timmie Duanne, the little red-headed devil (Mrs. Boggs, listening behind the door, gasped) who lived on the poor farm, and you helped out of many a scrape? The boy who never knew home nor father or mother, only what you gave him? I run away and I've lived in wild times and wild places, but the memory of you kept me clean and decent. I struck it rich—in oil—and I come back to let you know the black sheep had grown some white wool, and I find you here!"

"Timmie Duanne!" the old woman cried. She tottered and he caught her in his arms, kissing the silvery hair as he swung her clear from the floor in his strong arms.

"Timmie Duanne himself!" he cried. "I came back a week ago, and I've bought the old place back and it's ready and waitin' for ye. Even the old cat is there. Nobody could catch him. He's thin—but alive. Got down to his ninth life, I guess, but we'll feed him up! There's salmon and cream in the larder for him. Hurry, get your belongin's, Mother Jane, and we'll go home. When I come home for my vacation every year, you've got to squeeze me in somewhere, for sure we belong together!"

It was like a dream riding along in the swiftly purring car, with one fragile hand held close in the big fist of Timmie Duanne, and when at last the old gray house came in sight it was through a mist of happy tears that she saw it. It was quite unchanged, as she wished it, only fresh and sweet from recent scrubbing.

Jane sat before the open fire—for there was a chill in the air—in the old rocking chair with its patchwork cover that she had made herself, and the cat, thin but contented, purred on her lap, Timmie came in softly and knelt beside her chair.

"This is the happiest day of my life!" he said, and his big voice was soft and tender. Mother Jane reached out her hand and let it fall gently on his head.

"Heaven can hold little better for me," she said happily. Then with a sobbing little laugh: "I've heard often of the fairy godmother, but, Timmie Duanne, you're the first fairy godson I've ever heard of!"

Size of Humming Bird.

When a humming bird is stripped of its feathers it is no larger than a bumble bee

Some Logical Reasons Why *the*

First Mortgage Real Estate Notes

We Offer *are* Stable Investments

They are safe at all times, during financial and business depressions, as well as in prosperous times. Our serial method of making a specified number of the notes payable annually or semi-annually reduces the outstanding indebtedness without releasing *any* of the security. The reduction of the loan is more than sufficient to cover any reasonable depreciation in the property mortgaged.

You will receive an unchanging income payable semi-annually. This income will be paid promptly and with no more trouble to you than cashing a check, regardless of where you reside.

Your investment will run for a certain number of years and then mature. The date when the note matures will depend on your selection when investing.

The genuineness of each note is certified thereon by the Mercantile Trust Company, thus preventing forgery or over-issue. The Legal Department of this Company has examined and approved the title to the property securing the notes.

The property mortgaged has been personally inspected and appraised by experts in our employ. The loan in each case has been closely investigated and judgment passed upon the same by the officers and directors of the Mercantile Trust Company. **If the loan is approved, we buy the entire issue of notes and then offer them for sale so as to be in a position to make other loans. Our profit is the commission charged the borrower.**

You can invest $100, $500 or multiples thereof and are not required to confine your entire investment to any one issue.

As Trustee in the mortgages securing these notes we require that insurance of a specified amount and character be kept in force for the protection of the note holders, all policies being held by us.

In many instances the ground alone is valued at more than the total loan. We have sold these Real Estate Serial Notes to discriminating investors throughout the United States and foreign countries, including many banks and bankers.

Write for detailed circular describing the First Mortgage Six Per Cent Real Estate Serial Notes of $100 and $500 denomination that we are offering and recommend as conservative, high-grade investments.

We particularly invite comparison between these loans and the average real estate mortgage loan, with reference to excellence of location, class of construction, and actual (not estimated) income.

Reservations made for immediate delivery or delivery within sixty days. Delivery of notes to any bank or post office made at our risk.

"What did you do?"

"Tried on a new pair of shoes."

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Adv.

Resisting temptation is another thing that "you never know whether it will work.

Things don't turn up in this world until somebody turns them up.—Daniel Webster.

CUSTOMS FIFTY YEARS AGO.

Who among us would say to-day, "I never use a Dentifrice; I never have to?"

Yet Fifty years ago, odd as it may seem, not one person in 1,000 used a Dentifrice—or even a tooth brush.

So to-day, after more than 30 years of persistent publicity of Allen's Foot-Ease, the Antiseptic Powder for the Feet, not many well-turned-out people care to confess, "You know I never have to use a Powder for the Feet!"

More than One Million five hundred thousand pounds of Powder for the Feet were used by our Army and Navy during the war.

The reason is this: Confining the feet in Leather or Canvas Shoes is bound to create friction more or less. Allen's Foot-Ease removes the friction from the shoes. It is this friction which causes callouses, corns and bunions. You know what friction does to your motor-car axle. Why not remove it from your footwear by Shaking into your Shoes *to-day*, Allen's Foot-Ease, the cleanly, wholesome, healing, Antiseptic powder? Get the habit, as millions now have it, who inhabit our, as yet, imperfect world.—Adv.

In a man's life the greatest necessity is more money.

Case Seemed Hopeless

Use of Doan's, However, Brought Complete Recovery and the Results Have Been Lasting.

"I used to think my back would surely break," says Mrs. H. S. Fix, prominent lodge woman, 340 Carpenter Street, Reading, Pa. "My back pained me constantly. I was as helpless as a baby and a nurse had to stay with me all the time. The kidney secretions burned and passed as often as every ten minutes. Sometimes my eyes were almost closed by the swollen sacs beneath them and my limbs, too, swelled twice their normal size. For almost a year I was practically helpless and never expected to get downstairs again. I had been told that nothing could be done for me, and had given up all hope of ever getting better. My condition was critical when I was told about Doan's Kidney Pills. I began using them and the results made me hopeful of getting well again. The pain in my back eased up and my swollen limbs started to look more natural. I kept on using Doan's and became entirely well. I owe my life to Doan's."

Mrs Fix

The Itching and Sting of Blazing, Fiery Eczema

Seems Like the Skin Is on Fire.

There is a harassing discomfort caused by Eczema that becomes a torture. The itching is almost unbearable and the skin seems on fire with the burning irritation. A cure from local applications of salves and ointments is impossible, because such treatment can only allay the pain temporarily. The disease can only be reached by going deep down to its source.

The source of Eczema is in the blood, the disease being caused by an infection which breaks out through the skin. That is why the most satisfactory treatment for all so-called skin diseases is S. S. S., for this remedy so thoroughly cleanses the blood that no impurities can remain. Get a bottle today, and you will see results from the right treatment. Write for advice. Address Medical Director, 110 Swift Laboratory, Atlanta, Ga.

HEALS RUNNING SORES

"I feel it my duty to write you a letter of thanks for your wonderful Peterson's Ointment. I had a running sore on my left leg for one year. I began to use Peterson's Ointment three weeks ago and now it is healed."—A. C. Gilbrath, 703 Reed St., Erie, Pa.

For years I have been selling through druggists a large box of PETERSON'S OINTMENT for 60 cents. The healing power in this ointment is marvelous. Eczema goes in a few days. Old sores heal up like magic; piles that other remedies do not seem to even relieve are speedily conquered. Pimples and nasty blackheads disappear in a week and the distress of chafing goes in a few minutes. Mail orders filled. Peterson Ointment Co., Inc., Buffalo, N. Y.

Prayed for Cure Finds it After 10 Years

Food Would Sour and Boil —Teeth Like Chalk

Mr. Herbert M. Gessner writes from his home in Berlin, N. H.:

I had stomach trouble over ten years; kept getting worse. I tried everything for relief but it came back worse than ever. Last fall I got awfully bad; could only eat light loaf bread and tea. In January I got so bad that what I would eat would sour and boil; my teeth would be like chalk. I suffered terribly. I prayed every day for something to cure me. One day I read about EATONIC and told my wife to get me a box at the drug store as I was going to work at 4 p. m. I took one-third of it and began to feel relief; when it was three-fourths gone, I felt fine and when it was used up I had no pains. Wife got me another box but I have felt the pain but twice. I used five tablets out of the new box and I have no more stomach trouble. Now I write to tell you how thankful I am that I heard of EATONIC. I feel like a new man; I eat what I like, drink plenty of water, and it never hurts me at all.

Tub has all the big automatic features—Solid Sycamore Dolly—Galvanized Outlet—Brass Faucet, etc.

Iowa News

Items of Interest Summarized for Busy Readers.

Six hundred and ninety-six have enrolled for the Iowa State College summer school.

The Iowa State Association of Mail Carriers will hold their annual convention in Clinton July 4 to 6.

Clarence Friedley of Centerville, was killed when a tire on an automobile in which he was riding blew out and the machine turned over near Jerome.

Fire, originating in the backfire from a gasoline engine, totally destroyed the barn and other property belonging to W. J. Benjamin near Iowa City. The loss is estimated at $8000, with only $3000 insurance.

The dates for the Big Four fair at Nashua which were originally planned for the first week in September have been changed to August 23-27 to avoid conflicting with the Cedar Valley District Fair.

Half a million dollars in pennies is what the children of twelve public schools in Clinton have saved during the school year, 1919-1920, according to figures compiled at the end of the year. The saving was made a penny at a time for which every child was issued a saving stamp and the money invested in the City National bank to his credit.

More than 90 national and state conventions have been held in Des Moines in the first six months of the year ,according to a report issued by the convention bureau of the Chamber of Commerce. July will be a slack month in convention business, but the suceeding months will be lively. The state convention of county officers will number 1500 to 2000 delegates Aug. 17-19.

Enough black hair was removed from the craw of an old hen, by W. L. Boyce of Clinton, to make a woman's switch. The hair was rolled up in a solid ball. The hen has had a great growth on the side of her neck for several weeks and Mr. Boyce, seeking to know the cause, took a safety razor blade and cut into the growth. After he had removed the hair, he took a needle and thread and sewed up the incision. The hen cackled her thanks and began eating heartily.

The great need for liquidation in Iowa can only be attainable thru the securing of sufficient cars to move the live stock and grain now held all thru the middle west, Iowa bankers, farmers and business men declared in resolutions adopted at a conference attended by representative men from various parts of the state held in Des Moines recently. The conference voted a committee of seven be chosen with power to act with relation to car supply and transportation. The plan is to send this committee to Washington to personally confer with the interstate commerce commission and use every means possible to secure cars.

Pure bred hog breeders, boys and girls, citizens and club leaders, had a great time at Storm Lake, when they met to start club work in five prominent breeds, Poland Chinas, Duroc Jerseys, Hampshires, Chester Whites and Spotted Poland Chinas. All the pigs were sold to boys and girls at a uniform price of $50. They signed a note for the amount with one of the banks of the county. The Duroc Jerseys numbered 18 in all. One breeder of Durocs offered $75 to the club leader for all the pigs he could buy like those distributed to the members of the red hog club. The Hampshires were represented by 10 pigs. The majority of the members came from the territory around Alta and Linn Grove. The Spotted Polands drew much attention, as the breed is only getting a start in Iowa.

Iowa can claim another honor. Iowa is in advance of all other states in the number of persons who actually sleep in the open air. Hundreds of homes have open sleeping rooms or screened porches and their occupants take their rest at night in the open air. The state department on tuberculosis of the Board of Control has for many years promoted the doctrine of open air sleeping. As a result, the people have become educated to its value. There is no single factor, according to the state department, of greater health value than sleeping in the open air. Farmers, in particular ,have adopted this plan and find that they are better able to do the arduous work of the farm when they rest well at night. During the oppressive heat of summer, the bedroom has been practically abandoned."

Bank robbers blew the safe in the Farmers Savings Bank at Wallingford and escaped with $3000 in currency and $15,000 in Liberty Bonds. They severed telephone and telegraph wires before beginning the job.

At a special election held at Pocahontas to vote bonds to build a new high school building to replace the one burned down last January, the proposition carried by a big majority, there being only eight votes against. Of the forty-three women's votes two ballots were spoiled but were against the proposition.

Mr. and Mrs. Paul Grange have enjoyed a weeks' visit from his nephew and niece from Ruthven. They rturned to their home the latter part of the week.

Dr. Missman was a business caller at Belmond last Wednesday.

Mr. and Mrs. Dick Bamman from Garner, were Klemme visitors last Wednesday.

HERE THEY CELEBRATED THE GLORIOUS FOURTH

As the "Glorious Fourth" came on nday of this year it left a big loop- le and a variety of choices as to ere and when to celebrate the day. Belmond put on a big celebration turday there were a large number Klemme people who went there. ost of the Klemme folks at Belmond turday were farmers and their help the business people of Klemme uld not get away that day. Bel- ond gave a good celebration and had they advertised and everybody emed satisfied with their trip to elmond, and as the day was ideal, all d a good time. Then Sunday after- oon a religious celebration was put in the park at Klemme, and a rge crowd was in attendance, a num- er coming from near by towns. Rev. uriff gave the address of the day, nd we can say that he gave a won- erful talk which was interesting to ll. Vocal music was part of the pro- ram and greatly enjoyed. As Mon- ay, the fifth, was the day set for the usiness houses of Klemme to close nd give he business men a chance to elebrate, quite a large aggregation utoed to Clear Lake to observe the ay with that city and as usual there as a big crowd there and little in the ine of entertainment from the ordi- ary run of Sunday entertainment at he lake. The day was cold and damp nd later followed by a rain which re- ulted in about ninety per cent of he cars being stuck fast in the mud oming home. Then there were pic- ics galore Monday. The Reform Church of Klemme and the Reform hurch between here and Garner unit- d in a big dinner and afternoon cel- ebration in the grove near the church north of Klemme. Games and sports of all kinds were in progress and trap shooting was the main feature of the afternoon sports. Likewise the Meth- odist Church of Klemme, Liberty township and Garner united in a grand picnic dinner and an afternoon of sports at the camp meeting grounds at Concord. Those few who remained in Klemme had family picnics or big dnners at home and spent the re- mainder of the day visiting. But as we said the day was far from being ideal for a celebration here and those who celebrated out of town were late getting home, due to the heavy roads and many cars were stuck fast in the mud betwen here and Clear Lake and other points. Some did not reach Klemme until late Tuesday morning and all looked pretty tired after their strenuous journey home in the rain. Never-the-less they celebrated the Grand and Glorious Fourth and what does a little mud, soaked clothing and muddy shoes make after it is all over? It's sure a great life if you don't weaken.

LARGE CROWDS HERE WEDNESDAYS AND SATURDAYS

Band Concerts On Wednesdays Attract Visitors To Klemme

Last Wednesday night was a big night in Klemme as that is band concert night and many people came to Klemme to trade. This little city is getting to be quite a trade center and people come from far and near to trade with Klemme merchants for they can buy goods in Klemme much cheaper than in larger towns and get better quality for less money. Another thing that brings them to Klemme is the band concert. Klemme's band is one of the largest bands in this part of the country and although all are just beginners they are giving some good music. The concerts are supposed to start about eight o'clock but have been a little later than that as the farmers seldom get to town until a little after eight. We have been asked to request people who drive cars through the streets to please wait until the band has finished he selection they are playing as those who want to hear the band are interrupted when a noisy car goes whizzing by and it is also disturbing to the band boys to have a noisy car popping along when they are trying to play. So please be quiet while the boys play and if it is necessary to drive your car past please wait until the band has finished the piece they are playing and then you will have plenty of time to move. It will be appreciated by those who are listening to the band and also those who are giving the music.

RAINBOW BAND AT BRITT

The 168th Infantry Band, Rainbow Division, will appear at Britt, Sunday, July 11th, at 2:30 p. m., anda 8 p. m. at the fair grounds.

This is one of the best musical organizations in the country and their appearance at Britt will give our people a splendid opportunity to hear them.

LIGHTENING CAUSES DAMAGE HERE

Three Places Struck In Storm

Last Thursday evening this vicinity was visited by a severe electrical storm which done damage to three Klemme buildings. The home of Mart Bachman was struck by a heavy bolt of lightening damaging the corner of his house and breaking out some windows but luckliy the occupants were not touched. A few minutes afterwards two other bolts struck the corner of the Northern Lumber Company's shed ripping up a few shingles and tearing loose a few boards and likewise the other bolt struck Charlie Velau's barn and tearing up a few shingles but no other damage was done. Shortly before the severe electrcal storm a cyclone was seen to form southeast of Klemme a short distance and was watched by several people. It twisted around quite a bit but did not come to the ground so done no damage. It is reported that a number of farmsrs southeast of Klemme sought their cellars for protection when the storm was observed.

Wes Heifner Looses Horse

A horse running in the pasture on the Wes Heifner farm was struck and instantly killed by lghtning Sunday night. The animal was found the next morning lying dead in the pasture and was undoubtedly killed by a bolt of lightning striking it.

REFORM CHURCH OF KLEMME TO CELEBRATE 25th ANNIVERSARY

Big Picnic Dinner And Celebration Monday

Beginnng Sunday the Reform Church of Klemme will have their 25th Anniversary celebration of the founding of the church in Klemme. The services will begin Sunday morning, a big dinner at noon at the church with a service in the afternoon and evening, when the Ell township and the Garner church will unite with them. Then Monday the three churches will have a grand celebration and a big picnic dinner on the church lawn. This will be a great event for the Reform church and no doubt there will be a large gathering there the two days in which they celebrate. Next week we hope to give further details of the celebration.

FORMER KLEMME GIRL MARRIED

Edna Howdeshell Weds Mr. Earl Mixwell

Last Wednesday afternoon, June 30th, occured the marriage of Miss Edna Howdeshell to Mr. Earl Mixwell, of Olivia, Minnesota, at the home of Rev. and Mrs. Howdeshell at Armstrong, Iowa.

The Howdeshell family resided in Klemme a few years ago and moved to Armstrong from here, Rev. Howdeshell being the pastor of the Methodist Episcopal church here then. The family have many friends here who are glad to hear the good news of Miss Edna's marriage.

Mr. and Mrs. Tommy Nelson and son, Harvey left on the morning train Wednesday to be present at the ceremony.

The young couple will move to Olivia, Minnesota, where they will go to housekeeping after a honeymoon trip. Their many Klemme frends wish them a most joyful future.

AND THERE WAS LIGHT

Juice Turned on the Southwest Rural Line Out of Garner, Wednesday Evening

The rural electric line running southeast of Garner carried its first electric current, Wednesday evening. This is the line generally known as the Quintus line, and serves a large number of patrons in the territory south and east of here. This is the second rural line out of Garner to have service. Work on the line north and east of here is progressing rapidly. This is by far the longest of any of the lines, and has forty-eight patrons.—Garner Democrat.

MARRIED 100 COUPLES

Rev. S. M. McConnell, Garner's U. P. Pastor 12 Years June 30th.

Rev. S. M. McConnell performed a marriage ceremony last evening. This made his 100th wedding since coming to Garner 12 years ago, July 1st, 1920. With each succeeding year Rev. McConnell has grown in popularity and in the twelve years that have passed no man in Garner or vicinity has scattered more sunshine than has he. Especially well fitted for his work, always being able to see the bright side of affairs, deeply interested in public matters, he is quite as much a favorite outside his church as he is in it.—H[illegible]nty Democrat.

The Times "Devil" Says

Farmers Organize

The farmers of this vicinity held another meeting Tuesday afternoon at which they subscribed stock to the amount of $20,500, organized and elected the following kirectors for a Farmers Co-Operative Grain Co., H. J. Stille, Val Josten, Herman Stromer, C. A. Arnold, E. J. Arnold, John Larsen and Dr. Geo. Zinn.

Jewell Lutheran college will remain definitely and permanently in Jewell. The resolution adopted at the recent Lutheran church meeting held in Jewell favoring consolidation of the Jewell college with Waldorf college, and leaving the matter of location to a vote of delegates from the Lutheran churches of the three circuits, was made subject to the approval of consolidation by the board of education of the Norwegian Lutheran Church of America.

Four applications of Iowa boys have been approved for the six weeks summer school at the naval training station at the Great Lakes. Over a score more applications are on file. The allotment of fiftythree boys for Iowa will be filled very soon. There will be a total attendance at the summer school of 1,000 boys. They will receive pay at the rate of $33 a month for the six weeks they are in school and will be put to practically no expense. The work will include physical development, discipline, education of character, and the cultivation of naval traditions. Religious education will not be neglected.

Members of the Iowa State Veterinary association met in Des Moines recently to discuss matters of importance to the live stock interests of the state. E. H. Cunningham, secretary of the Iowa Farm Bureau federation, presenting the side of the farmers, and expressed a hope that the deliberations would result in a closer and more confidential relationship in the future between the farmer and the veterinarian. Mr. Cunningham pointed out, in his address, that serum is now being sold by the manufacturers at 1c per cubic centimeter. The farmer is able to purchase this serum at the state biological laboratories at cost. The veterinarians, in an executive session after Mr. Cunningham's address, voluntarily recommended that the charge for serum to the farmers in the future should carry a profit not exceeding 25 per cent of the manufacturer's cost, or 1¼c per c. c., exclusive of professional services.

It has been years since Iowa has had as many plank roads as she has now. Probably very few counties have gotten this far through the year without having mud holes which it has been utterly impossible to make passable without laying board paths for the car wheels. In the immediate vicinity of Ames on two of the main roads where drainage has been taken care of in the ordinary fashion with side ditches and which for several seasons have given no trouble, it has been necessary to bridge over the spots with plank pathways. Sleepers were laid upon the mud and upon these two lines of 2x12 boards, two planks wide, making a path two feet wide for each side, were laid. The most extensive road of this kind so far reported comes from Marshall county, where the stretch of bottom road south and west of Lamoille was planked for several hundred feet. Planking road in Iowa seems like a rather primitive way of road maintenance but it was probably the only method possible for making some stretches of road passable for cars.

All sorts of things of more than common interest are happening in Iowa. For instance, growing two bushels of corn where one grew before. Speeding up the hen. Competing with other states for the supremacy in dairy products. Buying more autos than other states. Building palatial modern schools out upon the prairies Starting new banks by the score while the old ones grow mightier than ever, thus becoming independent of the money centers. And a thousand other things. Quietly and unostentatiously, a few persons have launched a movement that will in time receive recognition as of equal value with any of the others. There is a Beautiful Iowa movement started. There are no boomers behind it. It will not be exploited as some other movements are. But it will gain strength and adherents from day to day. For the time is ripe. Iowa is growing wealthy. Perhaps wealthier than most Iowans are aware of. The necessities of life are provided for. The long hard struggle for mere existence lies behind the people. They have conquered Iowa in the fullest sense of the word. And they are very proud of it. The next step is to make themselves perfectly at home in Iowa. To provide for all manner of conveniences and to make Iowa not only a richer Iowa, a better Iowa, but also a Beautiful Iowa. Here people are arriving at that period when they begin to hunger for beauty, as they fought for the material things in past decades. They want the finest houses, the finest of everything in their houses, they want the best autos and they want good roads to ride upon and then they will want more than all else beautiful country to ride thru, beautiful spots to visit. In a little while Beautiful Iowa will be enlisting many thousands, where there are a few score today and then Iowa will again become what the Red Man found her "The Beautiful Land."

The federal reserve board has granted the plea of wool growers from all parts of Iowa that the federal reserve banks lend financial assistance to the sheepmen and has made possible the granting of loans on wool held in storage. Western wool men were especially hard hit and without government aid would have had to flood the market with cheap wool in order to meet feeding loans contracted last winter. This movement, which would have forced the market still lower ,would have been fatal to the industry in Iowa.

SAYS ALL FILIPINOS WANT INDEPENDENCE.

"It is frequently said that only the politicians in the Philippines want independence, but I do not think such is the case," said Dr. D. M. Gandier, superintendent of the California Anti-Saloon League, who has just returned from the Philippines. "I have met all classes of people from various parts of the islands and all alike seem to me to desire independence. I am inclined to think that they have the ability to govern themselves. We are developing a social and political conscience in America and they will develop one there; and I very much doubt that they will learn as fast under present conditions as they would under complete independence. Independence in some form is bound to come and I am inclined to think that it had better come soon."

ANOTHER WHISKEY STILL FOUND

Revenue Agent And Sheriff Find Still At Belmond

Last week we told of the large still found near Mason City, but this week we relate of the one found nearer home, at Belmond. Last week Tuesday a U. S. Revenue Agent, accompanied by the sheriff and marshal at Belmond, captured a still in full action near Belmond, together with a lot of raisins and some sour mash ready to be turned into "joy-water" for the Fourth. Four men were arrested, who were all beet workers, for having the still, some whskey and wine in their possession. The men will be tried in the near future at Fort Dodge. The "moonshiners" were evidently preparing to make a fortune by selling their stuff for Fourth of July celebrators but the authorities nipped the bud and destroyed the plans of the bootleggers. Home stills are becoming quite numerous but it is risky business as the authorities are making raids all over the state and many arrests are being made.

SEWAGE DISPOSAL PLANT NOW UNDER CONSTRUCTION

Louis A. Folden, of the engineering department of the Nelson-King Construction Co., of Spencer, Iowa, arrived here the first of the week and has a crew of workmen busy getting material on the ground for the construction of the disposal plant for our sewage system. The work was begun Tuesday and will go forward with all speed possible until its completion.

The Hammen-Kruse Construction Co., also of Spencer, will put in the sewer system and will start soon on this work, some of their machinery having arrived a few days ago.

When completed Kanawha's sewage system will be a splendid and permanent improvement to the town.—Kanawha Reporter.

CORWITH TO HAVE SEWERS

No Objectors Present When Council Has Final Hearing

At a council meeting June 22, to which the public had been invited, it was decided to establish a disposal plant and sewers for the town and to advertise for bids for the construction of same, work to commence August 1, and to be completed by January 1, 1921. Although invitations had been extended to all, both by publshed and verbal invitations, who had any objections to the establishment of sewers or their location, there was not a single person who entered one word of protest, so the council can rest assured it has the entire support of the community on this project. This is about the first public move that we have ever known where all the people were wholly agreed.—Hustler.

BELMOND TO HAVE FIRE FIGHTER

The council of Belmond have decded tob uy a modern chemical fire engine for the protection of the town. The fire engine will be one of the latest models and will carry plenty of chemical, ladders, hooks, etc., and when taken to the scene of the fire will be all ready for action and much better and faster than the water fighing method.

SMALL PARK TO BE LAID OUT

The triangluar plot of ground between the railroad track, Main street and the Northern Lumber Co., and where formerly a coal shed stood, will be laid out nto a little park. The city council plans to level the little piece of ground, clear it up and beautify the street there by sowing grass on the piece and perhaps having the word "Klemme" set in white stones in the center of the plot. This will be a great improvement to the street and will give one a good impression of the town when they step from the train.

Idle Hour Program

Sat. July 10—Taylor Holmes in "TWO BIT SEATS" an Essnay Com. Drama.

COURT CONVENES JULY 12

Judge Clark Will Hold A Short Session To Close Up A Few Matters

Judge J. J. Clark will convene court in Hancock county on July 12th, for the disposition of a number of matters. This will afford some of the offenders of the law of the county who are now languishing in the bastile at Mason City, an opportunity to have their cases heard.

WHY "NIGHT OWL" IN KLEMME?

The business men of Forest City got together and decided to close at 11:00 o'clock Saturday night and they have found that the plan works out fine. Formerly they were open until 12 o'clock, 1:00 o'clock and even later, or "until the last dog was hung" and they thought they had to do it, but after closing at eleven o'clock as everybody should they found that it satisfied all and people went home when all good people should be home. Now the Klemme merchants are afflicted with "night owling" also, and why not get together and close at eleven o'clock and get some needed sleep after a hard day's work Saturday? It can be done and no doubt everyone would be pleased with the plan. As it is people will stand around and gad until late and then they make a rush for the stores, the town people as well as the farmers wait until the last minute and as the result it's the merchant and clerks who suffer for it. Why not close at eleven o'clock Saturday nights?

Two new world price record[s] purebred beef cattle were m[ade] in the sale of Aberdeen-Angus [cattle] held near Holbrook. The firs[t] ord was scored when the great [bull] and breeding cow, Blackcap L[ass] was knocked off after a spirite[d] ding contest for $15,000. She w[as] hibited with a fine heifer calf b[y] vier. The second record was [made] when at the end of the selling [it] was found that 51 animals had bee[n] posed of at a total of $271,1[00] average of $5,316. There wer[e] cows sold with calf at foot. T[he] Ericas predominated, with almo[st] many Blackcaps and a smaller [num]ber of the Blackbird strain.

The Cherokee County Farm [Bureau] has recently received a carlo[ad] ground agricultural limestone a[t] of the following towns: Che[rokee] Aurelia, Larrabee, Meriden and [Cleg]ta. The stone is of very good [qual]ity running about half dust an[d] passing through a ⅛ inch [mesh] screen. The Hawkeye Quarries C[om]pany has co-operated with the C[her]kee Farm Bureau and has fu[rnished] this limestone for test purp[oses] These shipments were order last [fall] but due to the car situation [they] could not be made earlier. Fr[eight] charges and the cost of unlo[ading] the cars are the only expenses [in]posed.

The total amount of promotion [money] per held by state and savings b[anks] and trust companies under juri[sdic]tion of the Iowa state banking [de]partment as reported to the de[part]ment is $5,782,910.58. This does include the national banks since [they] are not under the control of [the] state. Polk county banks and t[rust] companies report $1,905,534.65, [Du]buque, $203,255; Woodbury, $19[2,]39; Jackson, $145,000; Hardin, $[100]000; Henry, $121,000; Washing[ton] $117,440; Cedar, $118,664.50; Clay[ton] $80,000; Johnson, $108,020; Wi[nne]shiek, $103,915; Muscatine, $102,6[50] 35 Harrison, $102,980; three counti[es] —Adams, Clarke and Lucas report[ed] no promotion paper held.

Hampshire breeders of Iowa to th[e] number of fifty, met in Des Moin[es] recently to discuss conditions and ways of improving the brood in Iowa. Among the important pieces of work out is the organization of Hampshire pig clubs in various counties of the state. Last year there were but five clubs of this kind; now there are more than forty such clubs, all devoted to the Hampshire breed exclusively. The state association is offering prizes to the amount of $100 in each county where such a club has been formed. In order to raise the money to carry on the work successfully a strictly Hampshire gilt sale is scheduled for West Liberty on September 29th to which each breeder will ship one animal to be sold, he to receive fifty per cent of the price, while the other half goes for promotion work in connection with the clubs.

Iowa, up to March 8, had received from the War Department 578 motor vehicles. Of this equipment 512 are trucks and 37 touring cars and 18 Ford ambulances, 11 G. M. C. ambulances, 17 tractors, 2 concrete mixers and a considerable quantity of miscellaneous equipment. To date 288 of the trucks have been distributed to the various counties and to 7 of the state institutions where there is considerable road maintenance. Of the trucks received, 202 had seen usage in various military camps. Of the used trucks only about 30 have been found to be in very poor condition, the majority of the others requiring very little repair to put them into splendid working condition. 376 of the trucks were absolutely new, and many of them never having been run at all. The touring cars have all seen usage and a number of them are in first class condition. Twenty-nine of the touring cars are Fords which saw serwice at Camp Dodge.

Troubles of a Lazy Man.

"A lazy man ain't likely to be happy," [said] Uncle Eben. "He generally [has a] position tryin' to scare [him] doin' de work."

DEMOCRATIC NATIONAL PLATFORM

San Francisco, July 2.—The resolutions committee draft of the platform was adopted by the Democratic national convention without change. The document is as follows:

The Democratic party, in its national convention now assembled, sends greetings to the president of the United States, Woodrow Wilson, and hails with patriotic pride the great achievements for country and the world wrought by a Democratic administration under his leadership.

It salutes the mighty people of this great republic, emerging with imperishable honor from the severe tests and grievous strains of the most tragic war in history, having earned the plaudits and gratitude of all free nations.

It declares its adherence to the fundamental progressive principles of social, economic and industrial justice and advance, and purposes to resume the great work of translating these principles into effective laws, begun and carried far by the Democratic administration and interrupted only when the war claimed all the national energies for the single task of victory.

League of Nations.

The Democratic party favors the League of Nations as the surest, if not the only, practicable means of maintaining the permanent peace of the world and terminating the insufferable burden of great military and naval establishments. It was for this that America broke away from traditional isolation and spent her blood and treasure to crush a colossal scheme of conquest.

It was upon this basis that the president of the United States, in prearrangement with our allies, consented to a suspension of hostilities against the imperial German government; the armistice was granted and a treaty of peace negotiated upon the definite assurance to Germany, as well as to the powers pitted against Germany, that "a general association of nations must be formed, under specific covenants, for the purpose of affording mutual guaranties of political independence and territorial integrity to great and small states alike."

Hence we not only congratulate the president on the vision manifested and the vigor exhibited in the prosecution of the war, but we felicitate him and his associates on the exceptional achievements at Paris involved in the adoption of a league and treaty so near akin to previously expressed American ideals and so intimately related to the aspirations of civilized peoples everywhere.

We commend the president for his courage and his high conception of good faith in steadfastly standing for the covenant agreed to by all the associated and allied nations at war with Germany, and we condemn the Republican senate for its refusal to ratify the treaty merely because it was the product of Democratic statesmanship, thus interposing partisan envy and personal hatred in the way of the peace and renewed prosperity of the world.

By every accepted standard of international morality the president is justified in asserting that the honor of the country is involved in this business; and we point to the accusing fact that, before it was determined to initiate political antagonism to the treaty the now Republican chairman of the senate foreign relations committee himself publicly proclaimed that any proposition for a separate peace with Germany, such as he and his party associates thereafter reported to the senate, would make us "guilty of the blackest crime."

On May 15 last the Knox substitute for the Versailles treaty was passed by the Republican senate; and this convention can contrive no more fitting characterization of its obloquy than that made in the Forum Magazine of December, 1918, by Henry Cabot Lodge when he said:

"If we send our armies and young men abroad to be killed and wounded in northern France and Flanders with no result but this, our entrance into war with such an intention was a crime which nothing can justify."

The intent of congress and the intent of the president was that there could be no peace until we could create a situation where no such war as this could recur. We cannot make peace except in company with our allies. It would brand us with everlasting dishonor and bring ruin to us also if we undertook to make a separate peace."

Lodge's Proposals Condemned.

Thus to that which Mr. Lodge, in saner moments, considered "the blackest crime" he and his party in madness sought to give the sanctity of law; that which eighteen months ago was of "everlasting dishonor" the Republican party and its candidates today accept as the essence of faith.

We indorse the president's view of our international obligations and his firm stand against reservations designed to cut to pieces the vital provisions in congress for voting against resolutions for separate peace which would disgrace the nation. We advocate the immediate ratification of the treaty without reservations which would impair its essential integrity; but do not oppose the acceptance of any reservations making clearer or more specific the obligations of the United States to the League of Nations. Only by doing this may we retrieve the reputation of this nation among the powers of the earth and recover the moral leadership which President Wilson won and which Republican politicians at Washington sacrificed. Only by doing this may we hope to aid effectively in the restoration of order throughout the world and to take the place which we should assume in the front rank of spiritual, commercial and industrial advancement.

We reject as utterly vain, if not vicious, the Republican assumption that ratification of the treaty and membership in the League of Nations would in any wise impair the integrity or independence of our country. The fact that the covenant has been entered into by 29 nations all as jealous of their independence as we are of ours, is a sufficient refutation of such charge. The president repeatedly has declared, and this convention reaffirms, that all our duties and obligations as a member of the league must be fulfilled in strict conformity with the Constitution of the United States, embodied in which is the fundamental requirement of declaratory action by the congress before this nation may become a participant in any war.

Conduct of the War.

During the war President Wilson exhibited the very broadest conception of liberal Americanism. In his conduct of the war, as in the general administration of his high office, there was no semblance of partisan bias. He invited to Washington as his councilors and coadjutors hundreds of the most prominent and pronounced Republicans in the country. To these he committed responsibilities of the gravest import and most confidential nature. Many of them had charge of vital activities of the government.

And yet, with the war successfully prosecuted and gloriously ended, the Republican party in congress, far from applauding the masterly leadership of the president and felicitating the country on the amazing achievements of the American government, has meanly requited the considerate course of the chief magistrate by savagely defaming the commander in chief of the army and navy, by assailing nearly every public officer of every branch of the service intimately concerned in winning the war abroad and conserving the security of the government at home.

We express to the soldiers and the sailors of America the admiration of their fellow countrymen. Guided by the genius of such commanders as Gen. John J. Pershing the armed force of America constituted a decisive factor in the victory and brought new luster to the flag.

We commend the patriotic men and women who sustained the efforts of their government in the crucial hours of the war and contributed to the brilliant administrative success achieved under the broad-visioned leadership of the president.

Financial Achievements.

By the enactment of the federal reserve act the old system, which bred panics, was replaced by a new system, which insured confidence. It was an indispensable factor in winning the war and today it is the hope and inspiration of business. Indeed, one vital danger against which the American people should keep constantly on guard is the commitment of this system its partisan enemies who struggled against its adoption and vainly attempted to retain in the hands of speculative bankers a monopoly of the currency and credits of the nation.

Under Democratic leadership the American people successfully financed their stupendous part in the greatest war of all time. The treasury wisely insisted during the war upon meeting an adequate portion of the war expenditure from current taxes and the bulk of the balance from popular loans, and, during the first full fiscal year after fighting stopped, upon meeting current expenditures from current receipts notwithstanding the new and unnecessary burdens thrown upon the treasury by the delay, obstruction and extravagance of a Republican congress.

The nonpartisan federal reserve authorities have been wholly free of political interference or motive; and in their own time and their own way, have used courageously, though cautiously, the instruments at their disposal to prevent undue expansion of credit in the country.

As a result of these sound treasury and federal reserve policies, the inevitable war inflation has been held down to a minimum, and the cost of living has been prevented from increasing here in proportion to the increase in other belligerent countries and in neutral countries which are in close contact with the world's commerce and exchanges.

After a year and a half of fighting in Europe and despite another year and a half of Republican obstruction at home, the credit of the government of the United States stands unimpaired, the federal reserve note is the unit of value throughout the world and the United States is the one great country in the world which maintains a free gold market.

We condemn the attempt of the Republican party to deprive the American people of their legitimate pride in the financing of the war—an achievement without parallel in the financial history of this or any other country, in this or any other war. And, in particular, we condemn the pernicious attempt of the Republican party to create discontent among the holders of the bonds of the government of the United States and to drag our public finance and our banking and currency system back into the arena of party politics.

Tax Revision.

The Republican congress persistently failed, through sheer political cowardice, to make a single move toward a readjustment of tax laws which it denounced before the last election and was afraid to revise before the next election.

We advocate tax reform and a searching revision of the war revenue acts to fit peace conditions so that the wealth of the nation may not be withdrawn from productive enterprise and diverted to wasteful or nonproductive enterprise.

We demand prompt action by the next congress for a complete survey of existing taxes and their modifications and simplification with a view to secure greater equity and justice in tax burden and improvement in administration.

Public Economy.

Claiming to have effected great economies in government expenditures, the Republican party cannot show the reduction of one dollar in taxation as a corollary of this false pretense. In contrast, the last Democratic congress enacted legislation reducing taxes from $8,000,000,000, designed to be raised, to $6,000,000,000 for the first year after the armistice, and to $4,000,000,000 thereafter; and there the total is left undiminished by our political adversaries. Two years after armistice day a Republican congress provides for expending the stupendous sum of $5,403,390,327.30.

Affecting great paper economies by reducing departmental estimates of sums which would not have been spent in any event, and by reducing formal appropriations, the Republican statement of expenditures omits the pregnant fact that congress authorized the use of $1,500,000,000 in the hands of various departments and bureaus which otherwise would have been covered into the treasury, and which should be added to the Republican total of expenditures.

High Cost of Living.

The high cost of living and the depreciation of bond values in this country are primarily due to war itself, to the necessary governmental expenditures for the destructive purposes of war, to private extravagance, to the world shortage of capital, to the inflation of foreign currencies and credits and, in large degree, to conscienceless profiteering.

The Republican party is responsible for the failure to restore peace and peace conditions in Europe, which is a principal cause of post-armistice inflation the world over. It has denied the demand of the president for necessary legislation to deal with secondary and local causes. The sound policies pursued by the treasury and the federal reserve system have limited in this country, though they could not prevent, the inflation which was world-wide. Elected upon specific promises to curtail public expenditures and to bring the country back to a status of effective economy, the Republican party in congress wasted time and energy for more than a year in vain and extravagant investigations, costing the taxpayers great sums of money while revealing nothing beyond the incapacity of Republican politicians to cope with the problems.

Demanding that the president, from his place at the peace table, call the congress into extraordinary session for imperative purposes of readjustment, the congress when convened spent thirteen months in partisan pursuits, failing to repeal a single war statute which harassed business or to initiate a single constructive measure to help business.

It busied itself making a pre-election record of pretended thrift, having not one particle of substantial existence in fact. It raged against profiteers and the high cost of living without enacting a single statute to make the former afraid or doing a single act to bring the latter within limitations.

The simple truth is that the high cost of living can only be remedied by increased production, strict governmental economy and a relentless pursuit of those taking advantage of post-war conditions and are demanding and receiving outrageous profits.

We pledge the Democratic party to a policy of strict economy in governmental expenditures and to the enactment and enforcement of such legislation as may be required to bring profiteers before the bar of criminal justice.

The Tariff.

We affirm the traditional policy of the Democratic party in favor of a tariff for revenue only and confirm the policy of basing tariff revisions upon the intelligent research of a nonpartisan commission, rather than upon the demands of selfish interests, temporarily held in abeyance.

Budget.

In the interest of economy and good administration we favor the creation of an effective budget system that will function in accord with the principles of the constitution. The reform should reach both the executive and legislative aspects of the question. The supervision and preparation of the budget should be vested in the secretary as the representative of the president. The budget, as such, should not be increased by the congress, except by a two-thirds vote, each house, however, being free to exercise its constitutional privilege of making appropriations through independent bills. The appropriation bills should be considered by single committees of the house and senate.

Senate Rules.

We favor such alteration of the rules of procedure of the senate of the United States as will permit the prompt transaction of the nation's legislative business.

Agricultural Interests.

For nearly half a century of Republican rule not a sentence was written into the federal statutes affording one dollar of bank credits to the farming interests of America. In the first term of this Democratic administration the national bank act was so altered as to authorize loans of five years' maturity on improved farm lands. Later was established a system of farm loan banks, from which the borrowings already exceed three hundred millions of dollars, and under which the interest rate to farmers has been so materially reduced as to drive out of business the farm loan sharks who formerly subsisted by extortion upon the great agricultural interests of the country.

Thus it was a Democratic congress in the administration of a Democratic president which enabled the farmers of America for the first time to obtain credit upon reasonable terms and insured their opportunity for the future development of the nation's agricultural resources.

Smith Lever Act Praised.

Not only did the Democratic party put into effect a great farm-loan system of land mortgage banks, but it passed the Smith-Lever agricultural extension act, carrying to every farmer in every section of the country, through the medium of trained experts and by demonstration farms, the practical knowledge acquired by the federal agricultural department in all things relating to agriculture, horticulture and animal life; it established the bureau of markets, the bureau of farm management and passed the cotton futures act, the grain grades bill, the cooperative farm administration act, and the federal warehouse act.

The Democratic party has vastly improved the rural mail system and has built up the parcel post system to such an extent as to render its activities and its practical service indispensable to the farming community. It was this wise encouragement and this effective concern of the Democratic party for the farmers of the United States that enabled this great interest to render such essential service in feeding the armies of America and the allied nations of the war and succoring starving populations since armistice day.

G. O. P. Condemned.

Meanwhile the Republican leaders at Washington have failed utterly to propose one single measure to make rural life more tolerable. They have signalized their fifteen months of congressional power by urging schemes which would strip the farms of labor; by assailing the principles of the farm-loan system and seeking to impair its efficiency; covertly attempting to destroy the great nitrogen plant at Mussel Shoals upon which the government has expended $70,000,000 to supply American farmers with fertilizers at reasonable cost; by ruthlessly crippling nearly every branch of agricultural endeavor, literally crippling the productive mediums through which the people must be fed.

We favor such legislation as will confirm to the primary producers of the nation the right of collective bargaining and the right of co-operative handling and marketing of the products of the workshop and the farm and such legislation as will facilitate the exportation of our farm products.

We favor comprehensive studies of farm production costs and the uncensored publication of facts found in such studies.

Labor and Industry.

The Democratic party is now, as ever, the firm friend of honest labor and the promoter of progressive industry. It established the department of labor at Washington and a Democratic president called to his official council board the first practical workingman who ever held a cabinet portfolio. Under this administration have been established employment bureaus to bring the man and the job together; have been peaceably determined many bitter disputes between capital and labor; were passed the child labor act, the workingman's compensation act (the extension of which we advocate so as to include laborers engaged in loading and unloading ships and in interstate commerce), the eight-hour law, the act for vocational training and a code of other wholesome laws affecting the liberties and bettering the conditions of the laboring classes.

In the department of labor the Democratic administration established a woman's bureau, which a Republican congress destroyed by withholding appropriations.

Labor is not a commodity; it is human. Those who labor have rights and the national security and safety depend upon a just recognition of those rights and the conservation of the strength of the workers and their families in the interest of soundhearted and sound-headed men, women and children. Laws regulating hours of labor and conditions under which labor is performed, when passed in recognition of the conditions under which life must be lived to attain the highest development and happiness, are just assertions of the national interest in the welfare of the people.

At the same time the nation depends upon the products of labor; a cessation of production means loss and, if long continued, disaster. The whole people, therefore, have a right to insist that justice shall be done to those who work, and in turn that those whose labor creates the necessities upon which the life of the nation depends must recognize the reciprocal obligation between the worker and the state.

They should participate in the formulation of sound laws and regulations governing the conditions under which labor is performed, recognize and obey the laws so formulated and seek their amendment when necessary by the processes ordinarily addressed to the laws and regulations affecting the other relations of life.

Labor, as well as capital, is entitled to adequate compensation. Each has the indefeasible right of organization, of collective bargaining and of speaking through representatives of their own selection.

Neither class, however, should at any time nor in any circumstances take action that will put in jeopardy the public welfare. Resort to strikes and lockouts which endanger the health or lives of the people is an unsatisfactory device for determining disputes, and the Democratic party pledges itself to contrive, if possible, and put into effective operation a fair and comprehensive method of composing differences of this nature.

In private industrial disputes we are opposed to compulsory arbitration as a method plausible in the theory but a failure in fact. With respect to government service, we hold distinctly that the rights of the people are paramount to the right to strike. However, we profess scrupulous regard for the conditions of public employment and pledge the Democratic party to instant inquiry into the pay of government employees and equally speedy regulations designed to bring salaries to a just and proper level.

Woman's Suffrage.

We indorse the proposed nineteenth amendment of the Constitution of the United States granting equal suffrage to women. We congratulate the legislatures of thirty-five states which have already ratified said amendment, and we urge the Democratic governors and legislatures of Tennessee, North Carolina and Florida, and such states as have not yet ratified the federal suffrage amendment, to unite in an effort to complete the process of ratification and secure the thirty-sixth state in time for all the women of the United States to participate in the fall election. We commend the effective advocacy of the measure by President Wilson.

Women in Industry.

We urge co-operation with the states for the protection of child life through infancy and maternity care; in the prohibition of child labor and by adequate appropriations for the children's bureau and the woman's bureau in the department of labor.

Disabled Soldiers.

The federal government should treat with the utmost consideration every disabled soldier, sailor and marine of the world war, whether his disability be due to wounds received in line of action or to health impaired in service; and for the dependents of the brave men who died in line of duty the government's tenderest concern and richest bounty should be their requital. The fine patriotism exhibited, the heroic conduct displayed by American soldiers, sailors and marines at home and abroad constitute a sacred heritage of posterity the worth of which can never be recompensed from the treasury and the glory of which must not be diminished by any such expedients.

The federal board for vocational education should be made a part of the war-risk insurance bureau, in order that the task may be treated as a whole, and this machinery of protection and assistance must receive every aid of law and appropriation necessary to full and effective operation.

We believe that no higher or more valued privilege can be afforded to an American citizen than to become a freeholder in the soil of the United States, and to that end we pledge our party to the enactment of soldier settlements and home aid legislation which will afford to the men who fought for America the opportunity to become land and home owners under conditions affording genuine government assistance unincumbered by needless difficulties of red tape or advance financial investment.

The Railroads.

The railroads were subjected to federal control as a war measure without other idea than the swift transport of troops, munitions and supplies. When human life and national hopes were at stake, profits could not be considered, and were not. Federal operation, however, was marked by an intelligence and efficiency that minimized loss and resulted in many and marked reforms. The equipment taken over was not only grossly inadequate, but shamefully outworn. Unification practices overcame these initial handicaps and provided additions, betterments and improvements. Economies enabled operation without the rate raises that private control would have found necessary, and labor was treated with an exact justice that secured the enthusiastic co-operation that victory demanded. The fundamental purpose of federal control was achieved fully and splendidly, and at far less cost to the taxpayer than would have been the case under private operation. Investments in railroad properties were not only saved by government operation, but government management returned these properties vastly improved in every physical and executive detail. A great task was greatly discharged.

The president's recommendation of return to private ownership gave the Republican majority a full year in which to enact the necessary legislation. The house took six months to formulate its ideas and another six months was consumed by the Republican senate in equally vague debate. As a consequence, the Esch-Cummins bill went to the president in the closing hours of congress, and he was forced to a choice between the chaos of a veto and acquiescence in the measure submitted, however grave may have been his objections to it.

There should be a fair and complete test of the law until careful and mature action by congress may cure its defects and insure a thoroughly effective transportation system under private ownership without government subsidy at the expense of the taxpayers of the country.

Improved Highways.

Improved roads are of vital importance not only to commerce and industry but also to agricultural life. The federal road act of 1916, enacted by a Democratic congress, represented the first systematic effort of the government to insure the building of an adequate system of roads in this country. The act, as amended, has resulted in placing the movement for improved highways in a progressive and substantial basis in every state in the Union and in bringing under actual construction more than 13,000 miles of roads suited to the traffic needs of the communities in which they are located.

We favor a continuance of the present federal aid plan under existing federal and state agencies, amended so as to include as one of the elements in determining the ratio in which the several states shall be entitled to share in the fund, the area of public lands therein.

Rural Free Delivery.

Inasmuch as the postal service has been extended by the Democratic party to the door of practically every producer and every consumer in the country (rural free delivery alone having been provided for 6,000,000 additional patrons within the past eight years without material added cost), we declare that this instrumentality can and will be used to the maximum of its capacity to improve the efficiency of distribution and reduce the cost of living to consumers and increasing the profitable operations of producers.

Merchant Marine.

We desire to congratulate the American people upon the rebirth of our merchant marine, which once more maintains its former place in the world. It was under a Democratic administration that this was accomplished after seventy years of indifference and neglect, 13,000,000 tons having been constructed since the act was passed in 1916. We pledge the policy of our party to the continued growth of our merchant marine under proper legislation so that American products will be carried to all ports of the world by vessels built in American yards, flying the American flag.

Inland Waterways.

We call attention to the failure of the Republican national convention to recognize in any way the rapid development of barge transportation on our inland waterways, which development is the result of the constructive policies of the Democratic administration. And we pledge ourselves to the further development of adequate transportation facilities on our rivers and to the further improvement of our inland waterways, and we recognize the importance of connecting the Great Lakes with the sea by way of the Mississippi river and its tributaries, as well as by the St. Lawrence river.

Transportation remains an increasingly vital problem in the continued development and prosperity of the nation. Our present facilities for distribution by rail are inadequate and the promotion of transportation by water is imperative. We therefore favor a liberal and comprehensive policy for the development and utilization of our harbors and interior waterways.

Flood Control.

We commend the Democratic congress for the redemption of the pledge contained in our last platform by the passage of the flood contol act of March 1, 1917, and point to the successful control of the floods of the Mississippi river and the Sacramento river, California, under the policy of that law, for its complete justification. We favor the extension of this policy to other flood control problems wherever the federal interest involved justifies the expenditure required.

Reclamation of Arid Lands.

By wise legislation and progressive administration, we have transformed the government reclamation projects, representing an investment of $100,000,000, from a condition of impending failure and loss of confidence in the ability of the government to carry through such large enterprises to a condition of demonstrated success, whereby formerly arid and wholly unproductive lands now sustain 40,000 prosperous families and have an annual crop production of over $70,000,000, not including the crops grown on a million acres outside the projects supplied with storage water from government works.

We favor ample appropriations for the continuation and extension of this great work of home building and internal improvement along the same general lines, to the end that all practical projects shall be built, and waters now running to waste shall be made to provide homes and add to the food supply, power resources and taxable property, with the government ultimately reimbursed for the entire outlay.

The Trade Commission.

The Democratic party heartily indorses the creation and work of the federal trade commission in establishing a fair field for competitive business, free from restraints of trade and monopoly, and recommends amplification of the statutes governing its activities so as to grant it authority to prevent the unfair use of patents in restraint of trade.

Live Stock Markets.

For the purpose of insuring just and fair tratment in the great interstate live stock market, and thus instilling confidence in growers through which production will be stimulated and the price of meats to consumers be ultimately reduced, we favor the enactment of legislation for the supervision of such markets by the national government.

Mexico.

The United States is the neighbor and friend of the nations of the three Americas. In a very special sense our international relations in this hemisphere should be characterized by good will and free from any possible suspicion as to our national purpose.

The administration, remembering always that Mexico is an independent nation, and that permanent stability in her government and her institutions could only come from the consent of her own people to a government of their own making, has been unwilling either to profit by the misfortunes of the people of Mexico or to enfeeble their future by imposing from the outside any rule upon their temporarily distracted councils. As a consequence, order is gradually reappearing in Mexico; at no time in many years have American lives and interests been so safe as they now are; peace reigns along the border and industry is resuming.

When the new government of Mexico shall have given ample proof of its ability permanently to maintain law and order, signified its willingness to meet its international obligations and written upon its statute books just laws, under which foreign investors shall have rights as well as duties, that government should receive our recognition and systematic assistance. Until these proper expectations have been met Mexico must realize the propriety of a policy that asserts the right of the United States to demand full protection for its citizens.

Petroleum.

The Democratic party recognizes the importance of the acquisition by Americans of additional sources of supply of petroleum and other minerals and declares that such acquisition, both at home and abroad, should be fostered and encouraged. We urge such action, legislative and executive, as may secure to American citizens the same rights in the acquirement of mining rights in foreign countries as are enjoyed by the citizens or subjects of any other nation.

New Nations.

The Democratic party expresses its active sympathy with the people of China, Czecho-Slovakia, Finland, Poland, Persia and others who have recently established representative government and who are striving to develop the institutions of true democracy.

Ireland.

The great principle of national self-determination has received constant reiteration as one of the chief objectives for which this country entered the war, and victory established this principle.

Within the limitations of international comity and usage this convention repeats the several previous expressions of the sympathy of the Democratic party of the United States for the aspirations of Ireland for self-government.

Armenia.

We express our deep and earnest sympathy for the unfortunate people of Armenia, and we believe that our government, consistent with its constitution and principles, should render every possible and proper aid to them in their efforts to establish and maintain a government of their own.

The Philippines.

We favor the granting of independence without unnecessary delay to the 10,500,000 inhabitants of the Philippine Islands.

Hawaii.

We favor a liberal policy of homesteading public lands in Hawaii to promote a larger middle-class citizen population, with equal rights to all citizens.

The importance of Hawaii as an outpost on the western frontier of the United States demands adequate appropriations by congress for the development of our harbors and highways there.

Porto Rico.

We favor granting to the people of Porto Rico the traditional territorial form of government, with a view to ultimate statehood, accorded to all territories of the United States since the beginning of our government, and we believe that the officials appointed to administer the government of such territories should be qualified by previous bona fide residence therein.

Alaska.

We commend the Democratic administration for inaugurating a new policy as to Alaska as evidenced by the construction of the Alaska railroad and opening of the coal and oil fields.

We declare for the modification of the existing coal land law, to promote development without disturbing the features intended to prevent monopoly.

For such changes in the policy of forestry control as will permit the immediate initiation of the paper pulp industry.

For relieving the territory from the evils of long-distance government by aribtrary and interlocking bureaucratic regulation, and to that end we urge the speedy passage of a law containing the essential features of the Lane-Curry bill, now pending, co-ordinating and consolidating all federal control of natural resources under one department to be administered by a nonpartisan board permanently resident in the territory. For the fullest measure of territorial self-government with the view to ultimate statehood, with jurisdiction over all matters not of purely federal concern, including fisheries and game, and for an intelligent administration of federal control we believe that all officials appointed should be qualified by previous bona-fide residence in the territory.

For the extension to Alaska of the federal farm loan act.

Asiatic Immigrants.

The policy of the United States with reference to the nonadmission of Asiatic immigrants is a true expression of the judgment of our people and to the several states, whose geographical situation or internal conditions make this policy and the enforcement of the laws enacted pursuant thereto, of particular concern, we pledge our support.

Postal Service.

The efficiency of the post office department has been vindicated against a malicious and designing assault by the efficiency of its operation. Its record refutes its assailants. Their voices are silenced and their charges have collapsed.

We commend the work of the joint commission on the reclassification of salaries of postal employees, recently concluded, which commission was created by a Democratic administration. The Democratic party has always favored and will continue to favor just treatment of all government employees.

Free Speech and Press.

We resent the unfounded reproaches directed against the Democratic administration for alleged interference with the freedom of the press and freedom of speech.

No utterance from any quarter has been assailed and no publication has been repressed which has not been animated by treasonable purpose, and directed against the nation's peace, order and security in time of war.

We reaffirm our respect for the great principles of free speech and a free press, but assert a sane indisputable proposition that they afford no toleration of enemy propaganda or the advocacy of the overthrow of the government of the state or nation by force or violence.

"Republican Corruption."

The shocking disclosure of the lavish use of money by aspirants for the Republican nomination for the highest office in the gift of the people has created a painful impression throughout the country. Viewed in connection with the recent conviction of a Republican senator from the state of Michigan for the criminal transgression of the law limiting expenditures on behalf of a candidate for the United States senate, it indicates the re-entry, under Republican auspices, of money as an influential factor in elections, thus nullifying the letter and flaunting the spirit of numerous laws, enacted by the people, to protect the ballot from the contamination of corrupt practices. We deplore those delinquencies and invoke their stern rebuke, pledging our earnest efforts to a strengthening of the present corrupt practices and their rigorous enforcement.

We remind the people that it was only by the return of a Republican senator in Michigan, who is now under conviction and sentence for the criminal misuse of money in his election, that the present organization of the senate with a Republican majority was made possible.

Conclusion.

Believing that we have kept the Democratic faith, and resting our claims to the confidence of the people not upon grandiose promise, but upon the solid performances of our party, we submit our record to the nation's consideration and ask that the pledges of this platform be appraised in the light of that record.

COX OF OHIO IS NONINA

The Nomination Came a Close of a Forty-fo Ballot Struggle.

To Canvass Question of S Place and Meet today Pared to Complete Tick

AUDITORIUM SAN FRANC July 6.—James M. Cox goverr Ohio, was nominated for pr of the United States in the eratic national convention. Th ination came at the close of a four ballot struggle.

When the balloting on the fourth vote had gotten to a where Cox had 702 votes and rapidly approaching the nec two-thirds of 729, and P. Amid Kansas, manager of the M forces and vice chairman of democratic national committee the platform and moved that nomination of Governor Cox be unanimous. Immediately there roar from the tired and worn gates which lasted for a full minutes before Chairman Rob could put question on Amidon's tion to suspend the rules and n ate Cox by acclamation.

The Cox band wagon move really started late yesterday noon before the recess for din

During the interval both sides the fight made desperate appea Tammany.

Throughout the evening New Y vote stood the same, twenty fo Ador and seventy for Cox.

On the third ballot of the ev session the slide to Cox started before the leaders of the oppos could realize it, the votes were p'ng over in two and threes and fi in a fashion which sent him over majority mark and put him at a level. After that the going was

James Middleton Cox was t times governor of Ohio—an h enjoyed by only one other Oh Rutherford B. Hayes.

Business success paralleled his litical achievements and through own efforts Cox has amassed a tune. Mr. Cox became the leade the democratic party in Ohio in when he was nominated for gover As one who had wrought ra changes in the state constitution took the field in its behalf. His term as governor was devoted ch to forwarding the enactment of to put the new state constitution effect.

But Ohio evidently was not pared to assimilate all the new h for Cox was defeated for re-elect But his party renominated him 1916 and he was re-elected for a t term in 1918, being the only de crat to win in Ohio.

Legislation for which Governor is best known includes a model wo men's compensation law and a ch labor law which have been extens ly copied by other states. Educat of the country say the Ohio sch code, enacted under Governor Co direction, will live as a monument his achievements.

Mr. Cox was born in Butler coun Ohio, in 1870. He attended distr school and held his first position a teacher of the school in which took his first lessons. He spent ev ings and holidays in a printing of In a few years he received his fi assignment on the repertorial staff the Cincinnati Enquirer.

Paul M. Hinkhouse, writer of t world editorials for the Continen official Presbyterian publication Chicago, is spending the Fourth h days with his father, President Hin house of Lenox college at Hopki ton. E. B. WOODS, Imogene, Ia.

One unidentified young man.

Amond the injured were Ralph Hussing, Corwith, Ia.; Rev. Father Berry, Marcus, Ia.; W. M. McCullen, Livermore, Ia.; Charles Miller and Gus W. Ziehlke, Emmetsburg, Ia.; Miss Cora Towne, Jamaca, Ia.; Mrs. C. F. Burnmaster, Ft. Dodge; Barney Squibb, Scranton, Ia.; Irwin Erickson, Emmetsburg and W. M. Romine, 708 S. 20th st, Des Moines.

Romine had bad cuts on his face and head.

UNIFORM GRADES ARE PROFITABLE

Lead to Mutual Understanding and Confidence Between Farmers and Buyers.

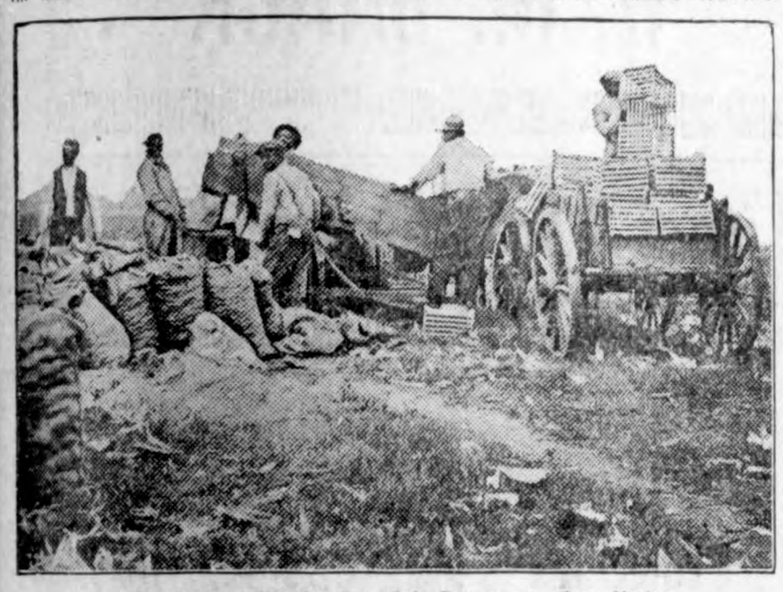
EXPERT ADVICE ON SUBJECT

War-Time Potato Regulations Proved Merits of Standard Grades—Bureau of Markets to Recommend Classifications.

(Prepared by the United States Department of Agriculture.)

If an expert conclusively demonstrated a method to you whereby you could increase the profits from your business 10, 20 or 50 per cent, would you throw him out of the house? Or would you embrace him as did a group of Michigan potato growers when the bureau of markets, United States department of agriculture, offered suggestions — expert advice — regarding the formation of a potato growers' exchange and the business methods that the exchange should use?

Today the potato growers concerned are very glad they adopted the latter course, for in less than a

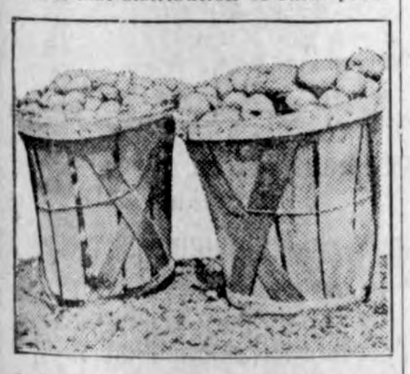


Graded Produce Sells for High Prices on Any Market.

year's time it placed in their pockets more than a quarter of a million dollars over what they would have had otherwise.

There is no dark secret about how this was accomplished. In fact, the achievement can be duplicated by others. Although, to be sure, the success of the Michigan potato growers was due largely to the co-operative feature of the enterprise, an individual may secure a proportionate result by applying the same business principles in marketing his farm products.

The fundamental principle that has animated the bureau of markets in its work is that distribution of farm prod-



Potatoes Before and After Grading.

ucts requires mutual understanding and confidence between producer and buyer. If a farmer states that he has shipped to market a carload of high-grade produce which upon arrival is found to be of inferior quality, naturally the purchaser questions the farmer's integrity and does not depend upon his word in the future. On the other hand, should a buyer allege that produce was received in bad condition, when, as a matter of fact, it was in first-class shape, the farmer loses confidence in the buyer and regards him as dishonest.

To Eliminate Distrust.

These are conditions that should not exist, and the bureau of markets has set about in a very practical way to help eliminate them. It maintains that in the marketing of produce there should be a common and uniform basis of understanding. The various kinds of marketing produce should be known by grades, and the specifications for any particular grade should be the same everywhere. For example, potatoes of No. 2 grade should be No. 2 potatoes throughout the entire country and not No. 1 grade in certain sections. And if the farmer agrees to ship No. 2 potatoes they should conform to the specifications for that grade. By eliminating the confusion resulting from a particular grade of produce having one meaning to the farmer and another to the buyer, a foundation of mutual understanding is established.

That the use of standard grades is readily appreciated by producers and buyers alike, was evidenced during the war, when the food administration required licensed dealers to use potato grades recommended by the bureau of markets. The results were so satisfactory that when the regulation was canceled the use of potato grades, to a large extent, was continued voluntarily.

The bureau of markets has recommended grades for potatoes, Bermuda and northern grown onions, strawberries and rice. It has established grades for wheat, corn, oats and cotton. In the near future it expects to recommend grades for hay and other produce. It has recently prepared tentative wool grades with a view ultimately to recommending standard grades of that commodity. A complete classification of cattle, calves, hogs, sheep and goats has been adopted by the bureau for use in reporting live stock market prices. A similar classification is in use for reporting wholesale meat quotations. Consideration is also being given the question of having representatives demonstrate United States grain grades to European countries for the purpose of familiarizing dealers there with the standards upon which international transactions with the United States should be based.

Hay Producers Feel Need.

In the matter of hay farmers admit that the marketing of the commodity is a hazardous undertaking because of the possibility of loss due to misunderstanding, lack of inspection, variations in grades in different markets differences in the manner in which rules for grading are interpreted, and because of sharp practices. In fact many farmers have stated that nine tenths of the losses in the hay business are due to lack of standard grades and a uniform, impartial inspection service.

Not only does the use of standard grades result in better understanding and confidence between producers and buyers, but in greater satisfaction because of increased monetary returns. Farmers everywhere are urged to conduct their business of marketing upon the sound business principle advocated by the bureau of markets. The bureau will be glad to advise anyone desiring the various grades it recommends.

WAYS OF PROTECTING ANIMALS FROM FLIES

Covering With Burlap Is One Effective Plan.

Leather Nets or Strips Attached to Horse's Bridle Aids in Keeping Pest Away From Work Stock —Darkened Stable Good.

The importance of taking steps to prevent the breeding of stable flies rather than depending on protection of the stock when the flies are full-grown cannot be emphasized too much. However, where this is not done the farmer is forced to resort to various means of warding off the flies.

Work animals may be protected largely from the pest by means of coverings. One type of covering which has been found to be very effective and inexpensive consists of a blanket made of double thickness of burlap, so arranged as to cover completely the back, sides, and neck of the animal. The legs also are covered sometimes by means of old trousers slipped over the feet and tied over the back. Leather nets or strips of leather attached to the bridle also aid in keeping the flies from the head.

Completely darkened stables offer much protection from the flies, although the resulting lack of ventilation is objectionable. The thorough screening of all windows and doors is much more desirable. When screened barns are used, care should be taken to brush the flies from the animals, when they are about to enter, by means of nets over the doorway or with sacks. Little can be done to protect range stock from the flies.

On hog farms a freshly plowed trench offers considerable protection to the swine. The sides of these trenches may be smeared with petroleum, which rubs off on the animals and acts as a repellent. The trench may be used also for protecting sheep, but the petroleum in their case is unnecessary.

GENERAL FARM NOTES

Paint up the farm buildings.

* * *

A good pasture reduces the feed bill.

* * *

Good implements and machines increase production per man.

* * *

Hoe the grass away from young fruit trees and protect from mice.

DEVELOPMENT OF TRUCK BUSINESS

Motor Industry in Rural Territory Has an Important Effect on Marketing Costs.

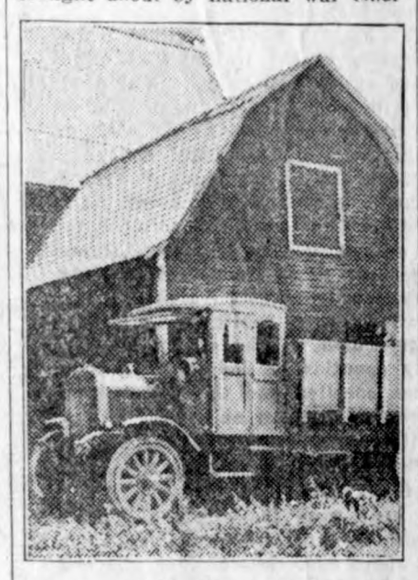
WAR BROUGHT ABOUT CRISIS

Conditions Precipitated Action by Creating Demand for Transportation Facilities of All Kinds—Difference in Plans.

Three general causes have contributed to the exploitation of the motor truck industry in rural territory—an industry which has an important effect on farm-marketing costs. These causes are: (1) the growth of our larger cities and the consequent development of near-by producing areas to provide for part of the food needs of these cities; (2) the failure of the railroads to keep pace with the expansion of their short-haul business; (3) the development of the motor truck manufacturing interests and the consequent extension of their sales campaigns.

Crisis in Transportation.

The crisis in the transportation field, brought about by national war emer-



A Type of Motor Truck That Requires Skill for Most Efficient Operation.

gency, afforded stimulus to the development of rural motor transportation more powerful than any other general influence. Doubtless the motor truck, in any event, would have established itself as a factor in the rural field, but ordinarily this would have been a slow process, involving the many preliminary steps. War conditions precipitated action by creating a very unusual demand for transportation facilities of all kinds. It has been necessary only to develop the opportunity. Such development necessitates or presupposes a certain familiarity with the problem as a whole. That such familiarity did not exist among those interested in developing rural motor routes was shown by preliminary investigations, initiated by the bureau of markets, United States department of agriculture. An attempt was made more than a year ago to conduct a general preliminary survey of rural motor routes established or in process of establishment. The purpose was to secure basic information regarding the desirability of establishing such routes, the methods undertaken by the beginners in this field, and the measure of success which had been attained during the early period of operation.

Truck Is Newcomer.

The information collected shows considerable differences in the plans adopted by the average inexperienced operator. The word "inexperienced" is used advisedly in view of the fact that the motor truck is a comparative newcomer in the field of transportation and there has not yet been time for many of the important preliminary problems to be worked out and a general understanding of possibilities secured. The results of the department's investigations in this field have been compiled in a bulletin, "Motor Transportation for Rural Districts," which will be sent on request. Address United States department of agriculture, Washington, D. C.

PUREBREDS NEEDED AT HOME

Wisconsin Bank Offers to Advance Money to Customers Who Wish to Purchase Holsteins.

The Better-Sires campaign conducted by various states in co-operation with the bureau of animal industry, United States department of agriculture, is developing the fact that bank credit is as available to the progressive live stock farmer as to the progressive business man of the city.

A letter received by the bureau of animal industry reports the following announcement published by a Wisconsin bank to its farmer patrons:

"Why not keep some of those purebred Holsteins at home? Many fine animals will be sold at the first annual sale of the Brown County Holstein Breeders' association to be held in the Brown county fair grounds West De Pere, Wis. The ——bank is ready to stand back of any of its customers who wish to purchase some of the stock to be offered for sale and who do not feel able at present to carry the investment. Call at the bank, and the accomodation can be easily arranged."

MARKET INFLUENCED LARGELY BY SUPPLY

Lowest Prices Prevail After the Heaviest Shipments.

With Decreasing Stocks Prices Advance, Sometimes Recovering Much of Early Decline—Careful Study Will Assist.

The man engaged in either selling or buying perishable produce will do well to familiarize himself with the usual course of the market in such lines during a season. The natural market course, according to marketing experts of the United States department of agriculture, is somewhat as follows:

It starts high with active movement even for inferior stock because the demand has the sharp edge of novelty and appetite. The price gradually declines and poor stock becomes harder to sell as the supply increases. Lowest prices arrive soon after the heaviest shipments begin, and a glut may occur, especially if many sections are shipping at once and there is much poor stock. Then, with a decreasing supply, prices advance, sometimes recovering much of the early decline, but usually not reaching the opening prices because demand is far less keen at the end of a long season. If the last of the shipments are inferior, as happens frequently with many perishable crops, the season may close at or near bottom prices.

The common or natural market developments do not always take place as might be expected. Quite frequently superior quality of the main crop or absence of general competition will bring higher prices in mid season. Unexpected shortage may cause the reserve stock in storage to sell at high prices at the close of the season, especially the less perishable crops like potatoes, onions, apples, cabbage, etc. Careful study of crop, shortage, supply, and shipment should enable a fairly good judgment to be made of the outcome. However, quickly perishable short season crops like strawberries or melons are very irregular, and so it is difficult to form a reliable market judgment of them.

BEAUTIFY FARM HOME YARDS

Shrubbery, Flower Beds and Good Lawn Involve Comparatively Small Amount of Labor.

The dwelling is the headquarters of the farm business. Chores are done before breakfast and often after supper, the stock need close attention, certain farm seeds are kept in the house, the hired man may sleep there, and the women folks take care of the poultry; thus it is almost essential that the house be reasonably close to the other buildings.

The value of the house constitutes an important part of the real estate value of the farm, says the United States department of agriculture. On the higher-priced corn-belt farms and the low-priced cotton-belt farms the value of the dwelling represents from

Modest Farm Home Showing Simple and Effective Beautification by Inexpensive Planting.

5 to 15 per cent of the real estate value of the farm, while in the eastern part of the United States this percentage is more commonly 20 per cent or over.

The beautifying of the yard by shrubbery, flower beds, and a good lawn involves the occasional use of manure, the introduction of fertile soil, the use of a team and of small farm tools, all of which are available on the average farm.

MOVIE ATTRACTION IS NEW

Series of Pictures and Stereopticon Slides to Be Used to Boost "Better Sires."

The department of agriculture is preparing a series of motion pictures and stereopticon slides for use in the "Better Sires" campaign. The interest aroused among the breeders of the United States is taking the form of requests upon the department of agriculture for information which, it is hoped, the film feature will be able to satisfy. It is probable that the motion pictures will be ready for issue next fall.

RAPE IS ESPECIALLY USEFUL

If Not Pastured Down Too Close Crop Will Grow Until Fall—Withstands Hot Weather.

Rape seeded early will grow until fall if not pastured down to less than four or five leaves to the plant. The crop is especially useful during the hot, dry months. It will grow until heavy frosts come and may be pastured from early June to the middle of November, or about six months.

POULTRY FACTS

SUCCESS IN RAISING SQUABS

Opportunity Is Well Worth Considering for Those Who Have Lofts—Produce Meat Quickly.

The back yard poultry keeper can hardly hope for success with turkeys, geese, ducks or guineas, but for those who have lofts over a garage, stable, or coal shed, the opportunity for squab growing is well worth considering.

For food purposes pigeons are usually classed with poultry. Culturally they are in a class by themselves, producing meat only, producing it very quickly, and able to produce well under conditions that do not admit of growing any other creature used for food.

While the ideal arrangement for pigeons is to have their house on the ground, and a small covered yard, called a "fly," connecting with it, pigeon keeping may be carried on quite extensively in upper rooms or lofts, with or without open-air flys. Many flocks of pigeons are kept in large cities in quarters provided for them in the lofts or on the roofs of buildings used for mercantile and manufacturing purposes.

A space six feet square and high enough for the attendant to stand erect will accommodate eight to ten pairs of pigeons for squab breeding, the poultry specialists in the United States department of agriculture say. The birds mate and begin breeding when six to seven months old. The male shares with the hen the duty of incubation. The young hatch in about 17 days. At four weeks old, average squabs will weigh about three-quarters of a pound each. Some of the larger ones will weigh over a pound at that age.

A good pair of breeders will produce six or seven or more pairs of squabs a

Runt Cross and White Runt (Female.)

year. As many as 11 pairs of squabs have been produced by one pair in a year. When production is high the female lays and begins incubation while she has young still in the nest, leaving the care of them to her mate.

Raising squabs has been increasing in cities in recent years. On farms the tendency has been the other way. On a farm a flock of free pigeons, if not kept down by killing off the increase, soon becomes a nuisance, destroying grain and doing a great deal of damage, especially on new-seeded ground.

PLAN TO CARRY LIVE FOWLS

Bird Wrapped in Cornucopia of Newspapers and Given Plenty of Air Is Quite Content.

Carrying live fowls in a cornucopia of newspapers, in the manner of carrying a bouquet, is a good idea. The bird is laid down on the paper and the legs straightened out on a line with the tail; the wings are held in position at the sides. The newspaper is then rolled around the bird, making a cornucopia, and the lower end is twisted, which leaves the upper end open. When carrying the bird in this manner, the twisted end of the cornucopia is held in the hand, allowing the roll to rest on the arm. The bird has plenty of air and seemingly is content in its peculiar position.

PURE BREEDS ARE PAMPERED

Supposition That Common Fowls Are Most Hardy Is Erroneous—Only Strongest Survive.

The supposition that common fowls are hardier than pure breeds is not borne out by the facts. Those who hatch chicks of the common kinds lose a large number of them, only the strongest surviving, and every year they are more and more inbred. The pure breeds suffer from being pampered by their owners in many instances, in which cases they do not compare favorably with common fowls.

SMALL START FOR BEGINNER

Safest Plan for Those About to Embark in Poultry Business—Many Hard Problems.

The safest way for those who are about to make their first attempt at poultry raising is to start in a small way with a few fowls and learn the business thoroughly before making large investments. Mistakes will be made and many difficult problems will be presented for solution before success in any large measure will be attained.

FARM ANIMALS

KILL ALL HARMFUL ANIMALS

Annual Loss Wrought by Predatory Wild Beasts and Rodents Mounts Up Into Millions.

Live stock and wool valued at $20,000,000 are lost annually through the depredations of wild animals. The value of farm produce and forage destroyed each year by rodents is approximately $300,000,000. It is estimated that the households of this country sustain an annual loss from rats and mice of $200,000,000.

These figures sum up certain of the larger losses due to destructive wild life which the biological survey of the United States department of agriculture is engaged in reducing as rapidly as possible. A force of between 400 and 500 experienced hunters was employed by this bureau during the past year to kill predatory animals, many of which were infected with rabies;

Live Stock and Wool Valued at Millions of Dollars Are Destroyed Annually by Predatory Animals, Chief of Which Are Wolves and Coyotes.

this disease often is spread from the wild creatures to domestic animals, and frequently endangers humans. In this work of extermination the states and numerous private organizations have had an important share.

The work of killing rodents—prairie dogs, ground squirrels, jack rabbits and cottontails, pocket gophers, native mice, wood rats, cotton rats, etc.—is also carried on with the co-operation of the states. During the past fiscal year ground squirrels were poisoned on more than 14,000,000 acres. In one Idaho county alone 40,000 rabbits were killed. In the same period from 75 to 95 per cent of the prairie dogs found on a total of 2,200,000 acres were destroyed.

BANK FAVORS BETTER SIRES

Concern at Fond du Lac, Wis., Urges Its Patrons to Improve Quality of Stock.

With the publication of a four-page farm news leaflet, of which a current copy is a "Duroc Sale and Pig Club Number," a bank at Fond du Lac, Wis., is encouraging its patrons to improve their live stock. The editor of the sheet has the unique title of "bank agriculturist," and his activities are devoted largely to financing farmers who wish to acquire well-bred animals or to become joint owners in valuable sires.

In a letter to the United States department of agriculture the bank agriculturist calls attention to the support being given hog-cholera control, pig-club work, and other activities in which the government is active. The leaflet contains a "For Sale and Want Column," relating especially to live stock, gives current news among breeders, and contains discussions ranging from the cure of cattle to the handling of bees. An expressed purpose of the bank's activities is "to make Fond du Lac county a land where milk and honey flows."

RATION OF COTTONSEED MEAL

One Pound Per Day for Each 1,000 Pounds Live Weight Is Most Satisfactory.

One pound of cottonseed meal per day for each 1,000 pounds live weight is the most satisfactory quantity to feed work animals, according to recent experiments conducted by the United States department of agriculture. A test in feeding cottonseed meal to work horses and mules at the government farm, Beltsville, Md., was begun in 1918, and continued last year. When the meal was fed in large quantities harmful effects were apparent, however, indicating that cottonseed meal, like any other high-protein feed must be fed with care to horses and mules.

BLACKLEG VACCINE IS FREE

Department Report Shows That 3,339,815 Doses Were Distributed During Last Year.

Vaccine for immunizing cattle against blackleg is still in great demand. A report of the bureau of animal industry, United States department of agriculture, shows that 3,339,815 doses were distributed free to stock owners during the last fiscal year. The vaccine sent out by the bureau is in the powdered form.

Items of Interest Summarized for Busy Readers.

The city council of Mount Ayr has made it obligatory for every person owning a cow and selling milk to have their animals tested for tuberculosis.

Webster City will celebrate July 4 on July 19. The change in date is in honor of the starting of the American drive in France on July 18, 1918. July 18 falls on Sunday, so Monday, July 19, will be celebrated this year.

The recent sale at Braywood Farms near Oskaloosa was one of the big sales of the country, the animals bringing an average of $1362 and the top of the sale bringing $3000, with a total of $65,850.

What is believed to be the highest price ever paid for a hog in Marshall county, and certainly the highest price of the season—$10,000—has been paid by Ernest Melberg for a yearling boar, Advertiser.

Rolling off the bed on which his mother had laid him, the six-months-old son of Mr. and Mrs. Will Ridgley of Exira fell to the floor with such force as to cause a fracture of the skull at the back of his head, with a deep depression.

The machinery for the oil well to be put down near California Junction has been ordered and work will be started as soon as the machinery arrives. Experts have located an oil vein beneath the Cox sand pit east of Missouri Valley.

Peter Comes, well known farmer living six miles west of Atlantic, is in a serious condition at his home with a twisted spine, the result of falling from the roof of his house to a cement walk below. Comes was patching the roof when he slipped, rolling first to the porch roof, and then to the walk.

Kelley, a thriving little town of 250 inhabitants, has just completed a new consolidated school building which has six teachers on its staff besides the principal. While no manufacturies are located in the city, the citizens are eager to back every worth while enterprise.

An ordinance fixing the price of gas at $1.05 a thousand feet was passed by the Des Moines city council. The new ordinance fixes July 1 as the date to take effect. The rate is five cents a thousand less than the present one and thirty-five cents less than asked by the gas company in a petition filed recently in federal court.

The Salvation Army home service for Guthrie county was organized in Guthrie Center with E. W. Weeks as chairman and many other prominent persons on the board. Committees were appointed to handle information on poverty, pauperism and unemployed, juvenile delinquency, maternity cases, prison work and Americanization.

The state food and dairy department is making many prosecutions over the state for failure to candle eggs. Special attention to the enforcement of the egg candling law is being given at this time because this is the season of the year when eggs are being put in storage and when they are liable to spoil unless much care is taken with them.

The dairy men of Iowa have held several meetings recently for the purpose of organizing another branch of the Iowa Dairy association at Oskaloosa. Dairy men generally over the state want to improve their herds and equipment, but before investing more money in the dairy game they feel that some organized form of protection should be developed in order that they may be protected in regard to markets.

A wide-awake and active stock shipping association has, despite the car shortage, shipped from Huxley 36 car loads of live stock since the first of the year. Not much grain is shipped from Huxley, but the livestock shippers are active and altho operations were badly hindered by the railway conditions, the showing during the first six months of the year has been good. Most of the livestock is shipped by the association.

At Cambridge on June 24th, the memory of those pioneers who crossed to the Iowa prairie in 1855 and established the first Norwegian community in Story county on June 7, that year, was honored at a big celebration and picnic on the sixty-fifth anniversary of their coming to Iowa. There was a big reunion of the old settlers and their descendants, the latter now providing the backbone, as it were of the population of Story county.

Fifty calls for agricultural engineers with only 10 men to fill them is the plight of the agricultural engineering department of Iowa State college. Ten men were graduated in agricultural engineering this June. Since the first of the year approximately 50 requests for men to fill places as teachers and salesmen have been received. Agricultural colleges in all parts of the country have turned to Iowa State college for teachers of this kind of work. Farm machinery manufacturers have also sought a large number of men.

Leading Plymouth wool growers are getting together and will form an organization for hauling wool and hides on the open market. Farmers in the county say they can not get reasonable prices from the commission houses, who at times only offer 15c per pound for wool. The market at Boston varies from 75c to $1. Experince in other counties shows a net price of from 62c to 70c per pound, when the wool is marketed directly.

A gigantic move to raise the entire forty-two miles of levee in Des Moines and Louisa county was instigated when the joint levee boards contracted with Engineer Harmon, to undertake the task of drawing up plans and supervision of the work. The job calls for an investment of approximately $500,000, and would place the levee, not only three feet higher, but three feet above the high water mark if recommendations to the Mississippi river commission are carried out.

Crop conditions in Iowa are encouraging according to the latest reports. The present indications are that the yields per acre will be up to normal, the condition of all crops having improved materially since June 1. No definite figures are available as yet on the corn acreage. The acreage in corn is undoubtedly larger than the farmers had contemplated earlier in the season. The weather was unfavorable for the seeding of oats and farmers were forced to plant to corn considerable acreage they had intended for oats. Hence the corn acreage is not short as much as early reports indicated.

The biggest poultry culling school ever held in the United States just closed at Iowa State college at Ames after intensive study of the latest theories and practices in the selection, culling and management of poultry. Approximately 150 county agents, county demonstration agents and others interested were enrolled for the school. A part of the attendance was made up of a corps of men who were getting special training in preparation for a poultry culling campaign which will be staged in some forty counties of the state. Besides those enrolled for the full course, scores of farmers and farm women went to Ames for part of the work.

The population of Des Moines is 126,468. This is an increase of 46.4 per cent over the city's population when the federal census was taken ten years ago. Des Moines was credited by that count with 86,368 souls. This is an unusually high percentage of growth for cities in Des Moines' class. The 1910 census placed Des Moines the sixty-second city in the United States in population. While census announcements are far from complete, Des Moines 1920 showing is certain to advance its comparative rank several notches. It would not be surprising if, when the figures for all cities are announced, that Des Moines is in fiftieth place or better.

Nevada, with justice, lays claim to being one of the foremost stock and grain shipping points in Iowa. Last year 450 cars of livestock were shipped from that point and 425 cars of grain. In addition, Nevada lays claim to being one of the largest horse markets in the state of Iowa. There are at least 50 car loads shipped annually, local buyers doing a good business in those animals. For a radius of about five miles Nevada claims trading territory, and while perhaps it does not extend that far west, in an easterly direction the average is made up. There are virtually 50 business houses with almost every line of mercantile effort represented.

Iowa land values show no decline, but rather a vigorous upward tendency, Near Sheldon, in O'Brien county, land sold recently for $1,000 per acre, that during the boom last summer was bought for $500 an acre, an advance of $450 an acre in less than a year. Of course that is an exception case, but here is a fair illustration of conditions all over the state: Twenty-five Cass county farms have changed hands since March 1, at an average price of $311 an acre, an estimated increase of $25 per acre over prevailing prices last year. The aggregate acreage is 5,000 and the total consideration is $1,500,000. The prices range from $220 to $420 per acre.

Although there is now no possibility of the interstate commerce commision granting Iowa shippers a preferential order supplying the state with freight cars, the bankers' committee, just returned from Washington, believes that a solution has been found which will alleviate the shortage to a considerable extent. Upon the advice of the commission, Charles Webster, railroad commissioner, will establish an office in Chicago and will remain there indefinitely. Orders for cars from local shippers will be sent not only to the local agents as usual, but to Mr. Webster as well. The latter will then take them to the various railroad heads and will endeavor to secure cars direct from Chicago.

The web worm is affecting orchards in Madison county very seriously. Anyone who finds the worm hanging by a web in the apple trees and also finds the leaves being eaten, should spray with arsenate of lead, 1½ pounds to 50 gallons of water.

Alva Esterberg, 21 years old, mechanic in a garage at Sioux City struck a match to light a cigarett and tossed it to the floor of the garage. Instantly the floor was in flames and his oil soaked clothing ignited burning him so severely that he died six hours later.

OFFICIAL PUBLICATION

ORIGINAL NOTICE

In the District Court of Hancock County, Iowa,
October Term A. D. 1920.

Joseph E. Johnson, Plaintiff
vs.
Unknown Claimants of and to the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa, and Patrick Shandler and Mrs. Patrick Shanlder, wife of Patrick Shanlder, Defendants.

To THE ABOVE NAMED UNKNOWN CLAIMANTS AND DEFENDENTS, AND EACH OF THEM;

You are herby notified that on or before the 1st day of October A. D. 1920 there will be filed in the office of the Clerk of the District Court of Hancock County, Iowa, the petition of the plaintiff in the above entitled cause claiming that he is the absolute owner in fee simple of the West Half of the Southeast Quarter and the East Half of the Southeast Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa.

That he and his grantors have been in the open, peaceable, continuous, notorious and adverse possession of the said premises for more than twenty-five years last past with claim of right and color of title and asks that all of the said Unknown Claimants and Defendants be forever barred and estopped from having or claiming any right, title or interest in or to the said premises adverse to the title and estate of the plaintiff therein and that the title thereto be quieted in the plaintiff and for equitable relief.

For further particulars see the petition when filed, which sets forth the plaintiff's claim in detail.

You are further notified that unless you appear thereto and defend on or before noon of the second day of the next term of the said District Court which will commence and be held at the Court House in Garner, Iowa, on the 11 day of October A. D. 1920, default will be entered against you and judgment and decree rendered thereon as prayed.

Dated this 24th day of May A. D. 1920.

Ramsay & Blackstone,
Attorneys for Plaintiff.

It is hereby directed and ordered that the foregoing notice be published once each week for four successive weeks in the KLEMME TIMES, a newspaper of general circulation published in Hancock County, Iowa.

Dated this 25th day of May A. D. 1920.

A. E. Baumgartner,
Seal Clerk of the District Court
in and for Hancock County,
7-29-20-4w. Iowa.

The Man Nobody Knew

By HOLWORTHY HALL

(Copyright by Dodd, Mead & Co., Inc.)

"LET 'EM MAKE ME LOOK LIKE THAT!"

Everyone knows about the Legion Etrangere—the famous Foreign Legion of the French army. Well, Richard Morgan of Syracuse, N. Y., enlisted in the Foreign Legion in the great war under the name of Henry Hilliard. So you can guess that the hero was not in love with himself or with life. The Hun sent him to the hospital with a wounded knee and arm and a face pretty much shot away with shrapnel. The surgeons fixed up his knee and his arm. When they proposed to restore his features, he lied and said he had no photograph of himself. And in his rage against life he caught up a picture postcard bearing the radiant face of Christ and cried:

"Let 'em make me look like that! Or anything else, either—I don't give a d—n!"

The French surgeons were interested and did a good job. And presently "The Man Nobody Knew" is back in Syracuse, telling of the death of Dick Morgan and selling mining stock and falling deeper in love with Carol Durant, the "only girl" of his old life who had refused to marry Dick Morgan, the failure.

Complications! Well, rather—especially when the mining stock apparently turns out to be worthless and the only man in the world who knows Hilliard's secret dies of apoplexy and the hero finds out that the heroine did love Dick Morgan. And Holworthy Hall handles these complications and these real, human characters and this American community in the masterly way that makes him read from one end of the country to the other these days. Good reading!

CHAPTER I.

—1—

In the beginning of things, he was merely a number; but even that was creditable, because his number was low enough to signify that he had responded pretty promptly to the rallying call. After that, and with the cataclysmic suddenness which marked all changes of military status on the western front, he became, one frosty morning, a Case, and got himself roughly classified (and tenderly handled) as a Stretcher Case, a Grand Blesse, and, in consequence, a proper temporary inmate of a field hospital on the Belgian plains.

There, he was unofficially known as Joyeaux, or Joyous One; not because he displayed a very buoyant disposition—far from it!—but because he belonged to the Foreign legion; and in the course of another day or two he was routine-ticketed as an Evacue, and provided with a lukewarm hot-water bottle and a couple of evil-smelling cigarettes to console him on the road to the base hospital at Neuilly.

At Neuilly he became, for the first time since his enlistment, an Individual, and at the very outset he was distinguished by certain qualities which had passed unnoticed in the frying pan and fire of the trenches. For one thing, he was obviously immune to kindness; and for another, he was apparently immune to hope. He was a man of inveterate silence; not the grim silence of fortitude in suffering (which is altogether too common a virtue in base hospitals to earn any especial merit), but rather the dogged reticence of black moods and chronic bitterness. To be sure, speech was physically difficult to him, but other men with similar misfortunes spoke blessings with their eyes, and gave back gratitude in voiceless murmurs. Not so the Joyous One. From the day of his arrival he demanded nothing, desired nothing, but to brood sullenly aloof; and so, when he became an Individual, he also became a mystery to the nursing staff. It was rumored that he was an implacable woman hater, and there seemed to be something in it.

Regardless of the care of the American nurses (all hoveringly attentive to one of their own nation who had fought for France), his spirit remained abysmal and clouded in gloom. Only twice, in the initial month of his confinement, did he betray the weakness of an ordinary emotion; on each occasion a gold-laced general had come to salute, in the name of the republic, one of the Individual's neighbors, and to deliver a bit of bronze which dangled from a ribbon striped red and green. It was said (and doubted by those who hadn't seen it) that at these ceremonies the Individual had grown feverish, and let tears come to his eyes, but subsequently he had relapsed into still greater depths of stoicism than before; his own bed-jacket was innocent of cross or medal, and his depression was apparent, and acute. The nurses, arguing that perhaps his pride was wounded as seriously as his flesh, offered quick condolence and got themselves rebuffed with shrugs of the Individual's shoulders, and inarticulate sounds which had all the earmarks of suppressed profanity. He didn't even soften when Pierre Dutout, a hard-hit territorial in the next bed, squandered a day's supply of energy to lean across and whisper sympathetically to him: "Old man . . . Vieux espece de choux-——— . . . I know how it is . . . and I haven't got any friends either. I want you to take my Croix de Guerre. . . . When I go nowhere."

Even when speech returned to the Individual he was a man of curt responses and stinging monosyllables—a problem to the surgeons, a problem to the nurses and (if the expression in his eyes meant anything), an overwhelming problem to himself. It appeared that, after all, it wasn't simply women that he hated—it was the universe.

His military book implied that he had no parents, no close relations, no friends to notify, no fixed abode. He received no visitors, no letters, no packages freighted with magical delight. But to those who pitied him in all his loneliness he was utterly contemptuous; he even went so far as to fillip sidelong to the floor a religious post card tendered him by a devout and sentimental passer-by, and he did it in her presence, unashamed. Later, when a smiling orderly picked up that post card and tucked it under his pillow he was no less contemptuous in permitting it to remain. But the one stupendous fact which, more than all else combined, made him an object of bewildered curiosity was this—that of the scores and scores of men with head-wounds who were reborn at Neuilly that spring and summer, he was the only one who had never asked for a mirror.

This, of itself, wouldn't have been astonishing as long as he delayed in the preliminary stages of recovery, for now and then a man with head-wounds proves to be super-sensitive; but in the second stage it was remarkable, and in the third stage it was unique. The staff held it to be extraordinary from a social as well as from a pathological viewpoint, that a man so terribly disfigured should have no interest—not even a morbid interest—in his own appearance. And it wasn't that the Individual was simply indifferent to the mirror; on the contrary, his aversion to it was active and energetic; he flinched, and motioned it frantically away as though the mere conception of seeing himself as others saw him was too repellant, and too unthinkable to endure.

There came a day in April when a photograph was requested of him. Surely he knew where there was a likeness of himself, didn't he? His old passport photograph, which had mysteriously disappeared, or—

The Individual glanced up from his present task; the wound in his arm was still annoying and he was absorbed in learning to write with his left hand.

"What for?" he muttered.

"Why," said the nurse, cheerfully, "for a model. To help the surgeons. They'll take your picture for a guide and make you look almost exactly the way you did before."

The Individual from America sat up straight, so that the nurse was startled by his animation, which was without a parallel in his local history.

"What!" he said.

"Certainly!" The nurse spoke in the tone one uses to an ailing child. "You've known that, haven't you?"

The Individual's voice was queerly unmanageable and strained. "You mean to say they're going to make me look the way . . . Could they do that? Could they? Even now?"

"Why, of course," she assured him.

"You never told me that!" he said, passionately. "Why didn't you? Why couldn't you have told me! And here I've been . . ." He put his hands to his bandaged face and seemed to shrink within himself. Then all at once he burst out: "Well, there's nothing to prevent . . . Then they could make me not look like it, if they wanted to! Isn't that so?"

She regarded him in vast perplexity, and thought of summoning a surgeon, for the man had begun to quiver as though from shell shock—which he hadn't undergone.

"Why, I don't understand what you mean," she said soothingly. "But if you'll just be calm and—"

The Individual gestured with fierce impatience.

"If they can do what you say, and make me look like any old thing they choose to, then what in the devil are they asking for a photograph for?"

"Why, to go by," she said helplessly. "You want to look like your old self, don't you?"

"No, I don't!"

The nurse gasped. His tone had been churlish, but the echo of it vaguely suggested triumph and relief. His symptoms had subsided . . . could it be that he actually was relieved? Dumfounded, she made another effort to convince him.

"But you want to look just as nearly like—"

"Don't you suppose I know what I want?" he interrupted rudely.

"But haven't you a photograph, anyway, that I can—"

"No, I haven't!" he snapped. "I haven't." It was a lie; the passport photograph was in the lining of a certain wallet, and he had hid it there for reasons of his own. But now that one great danger was definitely past, and a still further bulwark of protection offered, if the nurse spoke truth, the Individual could afford to come out from ambush. "And I don't want to look the way I did before, and what's more I never did! But if your doctors are half as smart as they think they are let 'em make me look like *that!* Or anything else either—I don't give a d——n!"

Shocked and horrified, she was gazing at a picture postcard he had snatched from under his pillow and thrust upon her. It was a reproduction of a religious painting by Rembrandt. It was the radiant face of the Christ.

CHAPTER II.

Nine o'clock on a night in June—not a June evening, heavy-starred on velvet, but a furious June night, with Stygian blackness looping overhead, and Stygian water battering and boiling against the hull plates. The ship was dark as the night itself; blind dark, without a single ray to play the traitor. On deck a solitary venturer hugged the rail, and apathetically watched the waves tear past.

Out of the warmth and cheer and the vitiated atmosphere of the smoking room came Martin Harmon, big, florid, exuberant. A heaving lift of the deck sent him lurching sidewise; he saved his balance by struggling

"Let Them Make Me Look Like That."

toward the rail, when suddenly the slope was reversed, and he slipped and slid to the barrier of safety, clutched it, and found himself at arm's length from the lonely watcher, who hadn't stirred, or even turned his head.

"Hello!" said Harmon, his surprise tinctured with easy familiarity. "Some night!"

"Yes, it is." The tone of the response was curt, so curt that Harmon instinctively leaned forward to discover what expression of countenance went with it. The night was so black that he might as well have tried to penetrate a curtain of solid fabric.

"Seen any U-boats yet?" he asked humorously.

"Not yet." The taciturn one moved a trifle away; a man less thin-skinned and less dined and wined than Harmon would probably have taken the hint and removed himself, but Harmon's was an inquisitive disposition, and he never attempted to curb it—he was the sort of traveling companion who makes Christians reflect upon the definition of justifiable homicide.

"What is your line?" he inquired after a pause.

The other man laughed queerly.

"The first . . . if it makes so much difference to you."

"Beg pardon? I don't quite get you. You said . . ."

"I said the first line. I meant the first-line trenches. I've been in it."

Harmon jerked his head upward in comprehension.

"Oh, I see! You mean the war! And you've been right on the spot where the fighting is? Pretty lively up there, isn't it? Something stirring most all the time?"

"I imagine so." The other man's accent was amazingly diffident, and Harmon peered at him, incredulous.

"Good Lord, don't you know?"

"Not a great deal. I happened to get hit the first day I was in the trenches."

"But you got in it again afterward, I suppose? I'll bet you did!"

"No."

"What! You never got back at all? Just one day, and you're through?"

"Yes. After I was discharged from hospital I was discharged from the army too. Permanently unfit."

"English army?"

"No—French."

"Well, that's some record!" said Harmon appreciatively. "That certainly is some record! Not to say tough luck—the toughest kind. Going back home, I take it?"

"Looks that way, doesn't it?"

Harmon ignored the sarcasm.

"Back to work, eh? What did you say your line is?"

"I didn't say. I haven't any just now."

Harmon pondered a second.

"Oh! Gentleman of leisure? Soldier of fortune, eh? Well, I wouldn't worry if I were you. You're disappointed; that's natural . . . but the world hasn't come to an end yet. Of course it is something of a come-down to leave the army and get into harness again, but after all there's plenty of excitement right in the United States. Big work to be done, son! Big money to make. And it helps the war along, too. I tell you there never was a bigger opportunity to make money than there is right this minute. The hard job isn't to find the scheme; it's to find the men to run it. Don't you worry . . . you'll land something right off the bat!"

"Thanks for the compliment!"

"Oh, it's no compliment! Anybody can make money these days. It's a plain statement of fact . . . Say, let's go in and have something. Come in and be sociable. What you want's a drink. Am I right or am I wrong?"

"Well—"

"And that's what the doctor ordered! Come on! It's on me."

The other man hesitated, and at last succumbed, out of sheer unconcern, to a companionship he realized in advance would be distasteful.

"All right," he consented briefly; and together, arm in arm, they stumbled and tacked across the treacherous deck, and presently crossed the threshold into the hazy light of the smoking room. Harmon, smiling broadly, wiped the brine from his smarting eyes.

"Now, then," he said, "what particular brand of poison do you—" And broke off short and stared, fascinated, at the extraordinary young man in front of him.

He was anywhere from twenty-five to forty, this American from the distant trenches, and his age was as hard to guess as a clever woman's; there was something about him peculiar to youth, and yet when his face was in repose, he might easily have claimed two score of years and gone undisputed. It was a face which suggested both the fire of immaturity and the drain of experience; there was breath-taking gravity about it, a hint of the dignity of marble, of ageless permanence. It was a slightly thin face, scarred by a heavy line or two, and indelibly stamped with the evidence of intense thought and inward suffering; but it lacked the hollows which, at the first glance, should have supported the evidence. It was a thin and oval face, with a mouth of large and sympathetic sweetness, a forehead white and high, a prominent, delicate nose, and irises of clear, luminous gray. It wasn't altogether an Anglo-Saxon type of countenance, nor was it definitely European; it seemed rather to have taken all the better qualities from several races. It was a face to inspire immediate trust and confidence and respect, and Harmon, despite his lack of practice in all three of these reactions, was evidently attracted by it.

"Vichy-Celestins for me," said the old-young man indifferently.

"I'll . . . I guess I'll have vichy too," said Harmon, relaxing. "If it wasn't for something I can't just describe I'd say . . . well, never mind. Er . . . what business have you been in, by the way?"

The younger man's reply was tardy and not particularly gracious.

"Why, the longest time I ever put in at any one business was selling insurance. The last thing I did was to sell bonds. Why?"

Harmon stiffened. "A salesman! Good Lord! That's the last thing in the world I'd have . . . but, say! You must have been a whirlwind! Why, a man with a presence like yours would hardly have to open his mouth! You've got a sort of . . . I'll be hanged if I know what to call it . . . but a kind of feeling, if you know what I mean. Salesman! Why, all you need is an introduction and a dotted line!"

The young man laughed rather forlornly and sipped his vichy.

"Just at present I haven't either."

Harmon's gaze was unfaltering, and his interest and admiration bounded higher. Mechanically, in accordance with his habits, he was striving to discover how this new acquaintance might be put to practical use. "Was

"Meaning What?"

I right, or was I wrong? Playing in hard luck don't strengthen a man's courage much, even if he tries to bluff himself into thinking it does. Cut out the regret stuff; that's my advice, and you can take it or leave it. Forget all that tough luck you had over here, and get busy figuring out how you're going to cash in on all your experience. America's full of chances—you'll land something big in no time. Can't help it if you try. Salesman! Son, you're carrying your best recommendation right on top of your own shoulders!"

The young man gave him back a wry smile and finished his vichy.

"I only hope it comes true," he said.

Harmon looked at him steadily, and falling under the spell of those radiant features stared and stared until he came to himself and all at once brought his fist down on the table, so that the glasses rang again.

"Well, why shouldn't it? As a matter of fact, why shouldn't it?"

The younger man's expression hadn't changed. "Meaning what?"

"Meaning," said Harmon deliberately, "that the first thing I've got to do when I get home is to hunt up a couple of good salesmen myself. Are you hunting for a good job, or aren't you?"

"Aren't you a little hasty?" The young man's intonation was sardonic.

"I've cleaned up most of my money," said Harmon very slowly to the ceiling, "by making quick decisions. I make up my mind pretty fast. If you can interest me on short notice you can interest other people. Mind you, we're just discussing this—sort of thinking out loud. No obligation on either side. Doesn't do any harm to talk about it, does it?"

"Then suppose," said the young man placidly, "you define your idea of a good job. I'm rather particular."

"But you admit you're out of luck, and—"

"But you admit I'm a whirlwind." The young man smiled with faint amusement.

"I said you ought to be—with training."

The young man's mouth turned upward at the corners.

"Go ahead and describe the job."

"Well, my idea of a pretty sweet job for a man of your age is—to start, of course—about twenty a week and commissions."

"Yes? What per cent commission?"

"Oh, eight to ten per cent."

The young man glanced at Harmon and laughed quietly.

"You're a broker, of course, but that doesn't sound much like conservative investment securities to me. What is it—industrials?"

Harmon grimaced.

"Yes, I'm a broker." He set down his glass and fumbled for a card. "There! But I was thinking more about stocks than bonds. Some new Montana properties—copper and zinc. Metals are the big noise these days. I guess you realize that, don't you? Munition work."

"I'll show 'em whether I can make good or not!"

(TO BE CONTINUED.)

Cannot Praise Remedy too H

THE WAY ONE LADY FEEL SUFFERING TWO YEA

Judging from her letter, ery and wretchedness en Mrs. Charlie Taylor, R. F. Box 144, Dillon, S. C., been terrible. WOMEN OF MIDDLE AGE

May Pass the Critical Period Safely and Comfortably by Taking Lydia E. Pinkham's Vegetable Compound.

Summit, N. J.—"I have taken Lydia Pinkham's Vegetable Compound during Change of Life and I think it is a good remedy in such a condition. I could not digest my food and had much pain and burning in my stomach after meals. I could not sleep, had backache, and worst of all were the hot flashes. I saw in the papers about Vegetable Compound so I tried it. Now I feel all right and can work better. You have my permission to publish this letter."—Victoria Koppl, 21 Oak Ridge Ave., Summit, N. J.

If you have warning symptoms such as a sense of suffocation, hot flashes, headaches, backache, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness, quietude, and dizziness, get a bottle of Lydia E. Pinkham's Vegetable Compound and begin taking the medicine at once. We know it will help you as it did Mrs. Koppl.

All Titled.

The doctor's family had just moved into a more exclusive residence district and all the members were much given to boasting over this. Even the nine-year-old daughter told of it to her small playmates at school. "Why, it's just like having a title," she ended. "Everything that comes to our place has written on it after our names, 'Collett place.'"

Another little nine-year-old sniffed very disdainfully. "Oh, if that is what you mean, we've got one too," she informed the audience, "and it's almost like your'n. Right after our name on everything that comes to our house, they write, 'Collect, please.'"—Exchange.

SAVE SHOES AND STOCKINGS

They will last twice as long if you Shake into Your Shoes ALLEN'S FOOT-EASE, the Antiseptic, Healing powder for the feet. It takes away the sting of Corns, Bunions, Callouses, sore, aching, swollen, tender feet. Allen's Foot-Ease stops the friction which causes the wear on shoes and stockings, saves expense and makes walking a delight. Shake it into your shoes. Sprinkle it in the foot-bath. Sold everywhere.—Adv.

Peril of Growing Pains.

Little John had put in a very hard day of playing and that night he said, "Mother, oh, how my knee aches!"

"That is just a growing pain and will be all right in the morning," replied his mother.

At that John exclaimed: "But the pain is in just one knee, and is one of my legs going to be longer than the other?"

Post Office Box 4
Jordan, Minn.

His Business in Post Office.

The commercial traveler met Sandy, a canny one, emerging from the post office.

"Ah, Sandy!" cried the commercial, it is good to see as prosperous a farmer as yourself—not forgetful of the country! You have been in the post office to purchase war bonds?"

"Nay," said Sandy easily.

"Oh! Then perhaps you have put a little money in the savings banks, that may help the country.

"Nay."

"Well," said the traveler as a last resort, "I suppose that you have bought a postal order to send to some poor acquaintance?"

"Nay; I've been in to fill my fountain pen."—London Ideas.

The Rage.

The movie star was sobbing as if her heart would break.

"What's the matter, dearie?" asked her friends.

"I want to get a divorce," replied the teary one, "but my husband is so good to me that I cannot find any grounds."—Film Fun.

Of Doubtful Origin.

"How did you like that Spanish cigar I gave you, old man?"

"Did you say 'Spanish' or 'spinach?'"

To many people the most popular hot-weather drink is the one some other fellow pays for.

Burglary Is Not Profitable.

When one reads in the paper an account of a burglary where the thief succeeded in securing $5,000 to $10,000 worth of jewelry, one is apt to think that the spoils were probably worth the risk, but investigation has shown that thieves never realize anything like the full value of their plunder. In England it was discovered that out of 468 burglaries reported in various parts of the kingdom the proceeds netted the principals an average of about $75 each. The value of the plunder was many times that figure. In addition to this, each one of the number had been sent to jail for his crime.

Leap Year Proposals.

The hostess was the only married girl in the crowd, and all the others were giving their requirements, etc., for husbands. "I don't care who he is if he'll never make me raise a garden or chickens," said one. "Mother's peeping little ones now drive me almost crazy. I'll just ask him if he ever will keep chickens and—"

The hostess broke in: "That's just what I did," she laughed. "I asked Henry if he intended to keep any chickens, and when he said he did I just said: 'That's me,' and I got him."

Temporary Truce.

Grace—I hear that Charles and Helen made up their quarrel.

Gussie—Only temporarily. They are going to be married soon.—Edinburgh Scotsman.

Battle Creek, Michigan

Home Town Helps

POINT FOR HOME BUILDERS

Value of House Is Greatly Enhanced by the Presence of Trees and Shrubbery.

If at all possible, say specialists of the United States department of agriculture, the house should be located near good trees, the shade of which may be used and enjoyed by the family every day during the summer. It takes so long to grow good trees that those already available should be cherished and utilized to the fullest extent.

Another thing that should be carefully considered is outlook. The house should be located so that the windows of the rooms most used look out upon attractive views. The living-room and the kitchen are entitled to first consideration in this matter. The near view should be over an unbroken lawn, and there should be some object of interest beyond. If there is in the general landscape a mountain, a water view, a woodland, a meadow, an extended farm view, or even a handsome tree, use it as an inspiring picture, framed by the window for the family through the years. It may mean the difference between a sordid life and an inspired life for the children who are brought up under its influence. At any rate, it will mean active pleasure or quiet consolation to the wife amid the daily cares of the household. If all these natural objects are lacking, possibly some feature may be created on the place, such as an attractive group of shrubs so placed and arranged as to have something of interest every month in the year.

CLEAN UP UNSIGHTLY SPOTS

Rubbish Piles Are Very Much Out of Place in Any City of High Aspirations.

In the good old days before we got so absorbed in running the universe and contemplating the cost of living, we used to pay more attention to such homely matters as cleaning the streets and tidying up the yards, remarks the Kansas City Star. Dr. E. H. Bullock, health director, has called attention to our deficiencies in his appeal for a clean-up.

Of course premises ought to be kept tidy all the time. There is no excuse for accumulating piles of ashes and tin cans. Still, in this frail world such things as rubbish piles do exist. That being the case, it is better to clean up spring and fall than never to clean up at all.

Most persons who get about town will testify to the general tidiness of yards. The average family takes pride in the appearance of a well-kept lawn. But an occasional slacker may disfigure a whole block. One unkempt place will nullify the efforts of the entire neighborhood.

Let's not be a black spot on the neighborhood map. Let's clean up!

Must Turn to Home Gardens.

With the winter's wheat crop promising a yield of 248 million bushels less than last year, and the government warning the public that nearly all of the old wheat now in stock is of inferior grade and of low milling quality, and indications pointing to reduced acreage of spring wheat, the country needs to be aroused quickly to the danger of an inadequate food supply. With new potatoes selling in Florida at $19 to $20 a barrel, or three times what was formerly considered a good price, we must once more turn to the home garden as an aid to the nation's food supply. And the sooner the country understands this situation and its danger the better it will be for us.—Manufacturers' Record.

Loop and Elevated Aerials.

An extensive research on radio transmission and reception with various types of aerials has been in progress at the bureau of standards, Washington, D. C., says the Scientific American. One of the most interesting questions at the present time is as to the relative advantages of the antenna, or usual type of elevated aerial, and the smaller coil aerial or "loop." This question is answered by the studies of the bureau. The small coil aerial has many advantages, but is usually not so powerful a transmitting and receiving device as the antenna type of aerial. It may, however, have so much lower resistance than the antenna that it is equal to it in transmitting and receiving value.

Resourceful Messenger.

A sentry, who was stationed at a certain gate with strict orders to admit no one, was approached by an Irishman. "Halt!" said the sentry. Mickey looked at him in surprise. "Faith, an' what am I to halt for?" he said. "No one is allowed in there," came the reply. "But sure I must go! I've a note for his 'anner the kurnel." "Can't help it," said the sentry. "No one is allowed in there without a pass." "But I tell ye I must go in!" said Mickey; "sure the giniral himself sent me." "Can't help who sent you," said the other; "you can't go in." "Well, then," came Mickey's reply, "gimme me the gun an' you take the note, and we'll manage foinely!"

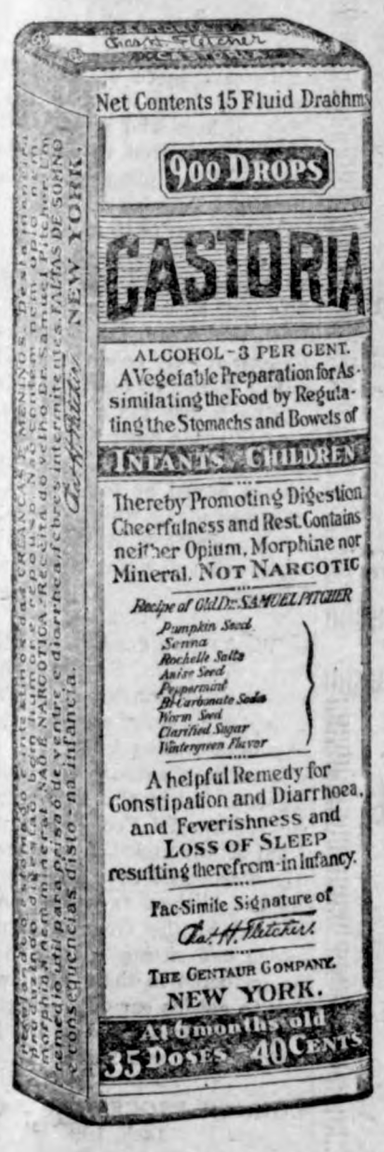
False Claims.

WE hope there is no Mother who thinks she can treat her sick baby without calling in a Physician, or with remedies that she uses for herself.

Most Mothers know that Baby requires remedies especially prepared for babies, yet there are some who think that what is good enough for them is good enough for Baby, and it is to these Mothers we appeal to give nothing to their babies that is not specially prepared for babies or recommended by their Physician.

False claims may kill, but false claims can never restore your child.

For over thirty years Fletcher's Castoria has been aiding in the reduction of the deaths among infants as Mothers have become more and more acquainted with it. Always keep it in the house.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Mothers Must Use Care.

Why do we so often call your attention to imitations of Fletcher's Castoria? Because it is a baby's medicine and imitations are always dangerous, particularly imitations of a remedy for infants.

Your druggist may not keep an imitation but they are to be found on drug-store shelves. Reliable druggists think only of the welfare of their customers. The other kind only of the greater profit to be made on imitations.

Your own judgment tells you that Fletcher's Castoria having for over thirty years at great expense held up its reputation, must jealously guard it. Then, it follows that this company must use the very best of material. Must employ experts in the selection of the herbs. Must retain skilled chemists in its manufacture.

Your same good judgment must tell you that these irresponsible imitators are trading on your credulity and the reputation built up by Mr. Fletcher, during all these years, for his Castoria.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS
Bears the Signature of

You Can't Rub It Away; Rheumatism is in the Blood

Liniments Will Never Cure.

If you are afflicted with Rheumatism, why waste time with liniments, lotions and other local applications that never did cure Rheumatism, and never will?

Do not try to rub the pain away. Try the sensible plan of finding the cause of the pain, and go after that. Remove the cause, and you remove the pain.

You will never be rid of Rheumatism until you cleanse your blood of the germs that cause the disease. S. S. S. has never had an equal as a blood purifier and scores of sufferers say that it has cleansed their blood of Rheumatism, and removed all trace of the disease from their system.

Get a bottle of S. S. S., and get on the right treatment to-day. Special medical advice free. Address Medical Director, 111 Swift Laboratory, Atlanta, Ga.

Local News

The little son of Mr. and Mrs. Leonard Sampson had his adenoids removed and another minor operation performed on him by Drs. Reuber & Hall last week Tuesday. He is now fully recovered from his troubles.

The Meservey Register has changed hands and now Messrs. Moughan and Moughan are the publishers. We believe these gentlemen are of Irish descent and should be able to make the paper a very good paper.

Mr. and Mrs. Mort Palmby and the Haus children, of Garden City, Minnesota, were visiting Klemme relatives and friends the latter part of last week and the fore part of this week.

Gearald and Mildred McCullough and Charlotte Miller left early Sunday morning in Gearald's car for Des Moines where they went to celebrate the Fourth and take in the sights. They returned to Klemme Tuesday.

Mr. E. C. Crotty, the leader of the Klemme band, returned Friday after several weeks' absence in the east where he was called by the illness of his father and who later passed away. The band boys are glad to have Mr. Crotty with them again.

Forest City now has a free mail delivery service established. Residences receive mail twice a day and the business section three times each day. The city is divided into two routes. July 1st was the first day of the new service.

Miss Helen Lenz came from Minneapolis Saturday evening for a visit with her sisters, Mrs. A. H. Meyer, and Martha Lenz, who has been here a month from Charles City. They are spending their summer vacation together.

Hancock county is to have a public health nurse. Miss Mae Ferleman is now in Cleveland, Ohio, taking a course in Public Health nursing and will be ready to begin duty as our county nurse September 1st.

Mr. and Mrs. M. O. Hocum and daughters, Avis and Helen, drove to Grinnell Thursday for a visit with Mrs. Hocum's mother and other relatives. Mr. Hocum returned Saturday but Mrs. Hocum and the children remained for a longer visit.

Some of those who autoed to Clear Lake Monday were forced to leave their cars there on account of the rain and come back by train Tuesday. Others who attempted to make the drive arrived in Klemme late in the night and some pulled into Klemme about Tuesday noon, having spent the night trying to get thru the mud.

Mr. and Mrs. M. O. Barr and Mr. and Mrs. Elmer Fuller drove to Iowa Falls Monday to take in the Fourth of July celebration which was going there full blast that day. Coming back they did not encounter any muddy roads until they came to Belmond. They say there was an immense crowd at Iowa Falls and the day was ideal, which cannot be said of the weather in this neck of the woods that day, for it was all of the opposite.

We heard a good one on Ed Jacobs the other day. Ed drove his car to Clear Lake Monday to celebrate and like a good many others got stuck in the mud coming back. Ed evidently got stuck in a slough for after he had gone to bed at Croner's house where he rooms, Mr. Croner got up to see what all the racket was in the kitchen. He discovered that Ed left his shoes in the kitchen and the noise was caused by the frogs croakng in his shoes and sitting on the mud which he gathered in the slough while trying to get his car out. Next time Ed better chase the frogs off his shoes before he starts home.

Council Proceedings of June 28, 1920

Upon motion the following bills were allowed:

Kluckhohn & Sons, Water Works supplies	$ 3.12
Klemme Times, Printng sewer notice,	39.90

1w N. L. PALMER, Clerk

Division to Two-Mile Trench.

A division, which is the largest body known in the organization of the American army, will fully man two miles of trenches. The regulation distance in the manning of a trench is a yard to a man. There are three lines, however, needed to fully man such defenses—the firing line, which is down in the trench, a yard behind each man; the support, which is back a short distance, and the reserve.

Road to Wickedness.

The many prove the wisdom of Hesiod, who says that the road to wickedness is smooth and very short and there is no need of perspiring But before virtue the immortal god have placed the sweat of labor, and long and steep is the way thither, and rugged at first; but when you have reached the top, then, however difficult, it becomes easy.—Plato.

How "Rubbers" Were Produced.

"Rubbers," as Americans have named them, were the invention of Charles Goodyear, father of the man who helped produce the Goodyear welt machine. In 1833 it was found that India rubber, dissolved in turpentine and mixed with lampblack, would give a waterproof surface to leather. But the leather so treated was subject to atmosphere changes, heat causing it to melt and cold to crack. Mr. Goodyear mixed sulphur with the other combination and produced rubber.

Versions of "Star-Spangled Banner."

The third line of "The Star-Spangled-Banner" has had two versions. Bryant, in his "Library of Poetry and Song," gives it "Whose broad stripes and bright stars through the perilous fight," and Stedman, in his "American Anthology," makes it read, "Whose broad stripes and bright stars through the clouds of the fight." No version of the song makes the line end with "night" instead of "fight."

Oldest of Brazilian Cities.

Bahia, once the capital of Brazil, is still in many ways the center of art and religion in that largest of South American republics. She is the oldest of Brazilian cities and those of her present inhabitants who are descended from a long line of natives of the place—as many of them are—look down on Rio and Sao Paulo as upstarts and parvenus among municipalities.

Members of the Reform Church of Klemme Celebrate 25th Anniversary

Crowd Gathers For Big Two Day Event

THE TWENTY-FIFTH ANNIVERSARY CELEBRATION OF THE KLEMME REFORM CHURCH A GRAND SUCCESS

Over Five Hundred People Present At Sunday Services And Dinner

FOUNDER OF CHURCH AMONG THOSE PRESENT

Sunday, July 11th, was a beautiful day for the beginning of the celebration of the Reform Church of Klemme Twenty-fifth Anniversary.

The services began Sunday morning at 10 o'clock and addresses were given by former ministers of the church, Rev. John Gaterman now of Hosmer, South Dakota, and a sermon by Rev. H. Treick, who was the organizer and helped found the church and who served in Klemme a number of years thereafter and who now resides at Scotland, South Dakota.

Then at the noon hour a free dinner was served to all in the church park by the ladies of the Reform church. This was quite an affair in itself and about five hundred people were served at the tables. There were people fro mfar and near and of course the gathering at the dinner afforded an opportunity to visit old friends. The congregation of the Garner and Ell township churches were also invited and a goodly number from each church were present.

After the big dinner came the afternoon program at 2:30, when Rev. Albert Muehlmeier delivered a sermon in German which was followed by a sermon in English by Rev. John Gaterman. The evening services were given by the same gentlemen and in the languages and order named above. All of the services were interspersed with music by the Church Chorus and the Immanuel Male Quartette.

Then Monday afternoon was the second day of the celebration and this departed somewhat from the religious observance of the previous day, for it was given over to picnicing and general merry making. A big picnic dinner was served on the church lawn which was enjoyed by all, although the crowd was much smaller than the Sunday gathering, due to the unsettled condition of the weather Monday. However, speeches were given by the visiting pastors and Rev. Depping, the local pastor, and then games and sports of all kinds were greatly enjoyed. In the evening an ice cream social was given by the young people of the congregation and this proved to be such a great success that they ran short of ice cream before all had been served.

We neglected to mention the names of the pastors who talked in the afternoon. They were Rev. Gaterman, Rev. Muehlmeier, Rev. Treick and Prof. Crosshuesch, of Colby, Wis. A Jubilee offering was also taken up at the picnic and this amounted to about $1,500.00, and will be used by the church for various purposes.

The peopleo ft he Reform Church are to be congratulated for the wonderful church work they have done and in building their church up to the present membership they now have. May the younger generation devote as much to the church as those who founded the church and built it up to its present high standard so that another twenty-five years of successful work may be celebraed in a like manner when that anniversary date comes to the fiftieth year.

Things Not to Be Hidden.

Three things cannot be hidden—love, a cough, and smoke—yea, even a fourth, and that is the signs of abundant life on a lively farm.

The Times "Devil" Says

FIRE DEPARTMENT CALLED TO THE BRINKMAN HOME FRIDAY MORNING

Damage Estimated At About $1,000

About seven-thirty last Friday morning the fire bell gave the alarm that the Marin Brinkman house near he park was in flames. The fire boys were right on the job and had the hose cart and laddert ruck at the scene of the fire in less than ten minutes and had a stream of water playing on the flames which were creeping up the outside of the house at the rear. The fire started from an oil stove on the back porch where the breakfast was being prepared and it is thought the stove exploded and the flames shot up the outside, in through the kitchen and when men arrived on the scene the entire house was filled with smoke and coming thru the roof. Theh ousehold furnishings were carried out before much damage was done to them, but the flames and smoke caused a lot of damage to the interior as tha will all have to be repainted and also some new wood work put up. The kitchen and back porch were ruined and will have to be rebuilt and also new siding put on the exterior in the rear. Men with buckets had the fire under control in this part of the house when the firemen arrived and someone with great presence of mind brought a fire extinguisher and we are of the opinion that this put out the flames quicker than the water. Those who were there estimated the damage at close to a thousand dollars. Mrs. Baack, mother of Mrs. Brinkman, became quite ill from the shock of the fire as she was staying with her daughter and had to be carried across the street and a docor summoned. She is now out in the country recuperating and is reported to be much better now.

In defence of the sanity of our friend, E. H. Arnold, we feel called upon to explain that he was not trying to run his power boat in the horse watering trough at the Liebenstein corner, Monday forenoon. He simply attached the engine to the trough because it works better when near water. Some folks insisted that Happy was trying to make a flying machine out of the trough, others made a more accurate guess, remarking that Happy was "nutty." Be that as it may he is still at large, but no one knows how soon Dr. Frasier, Clerk of the Court Baumgartner and Attorney Hastings will be showering him with questions to ascertain if or not he can tell a connected story.—Garner Democrat.

Protection Against Catarrh.

Any constitutional exercise which improves the circulation and makes the body resistant helps to protect one from catarrh. This is particularly true of all breathing exercises because the effects are beneficial locally as well as constitutionally, says one of the best-known physical culture teachers in New York. So let us teach our children the value of correct and deep breathing, and in doing so we improve our own health and thereby impart cheerfulness and happiness to our home.

LAD BREAKS NECK FALLING OVER FENCE

Winnebago Republican—The funeral services over the remains of Willard Torkelson of Hayfield was held yesterday afternoon. The deceased was the son of Mr. and Mrs. W. G. Torkelson residing three miles northwest of Hayfield and was 14 years, 3 months and 4 days old at time of death. Death came to him accidentally July fourth. The lad was on the Adolph Christianson place when the accident occurred. It seems that he ran into a wire fence and the impact was of such force as to cause his neck to be broken, death being instantaneous. An inquest was held over the body and the coroner's verdict was death caused by the breaking of the neck in falling over a fence eH is urvived by his parents and 12 brothers and sisters.

Near the Barz farm east of Klemme was the scene of an automobile accident Monday evening. A party in a large car from Tracy, Minn., were traveling east when they observed a young man in a Ford coming out of the lane from the farm. The speed of the big car was so great that it was impossible to stop and to avoid a most serious accident the driver swerved to the side, missed the Ford but struck the ditch damaging the car almost beyond repair, the front being all smashed to pieces. However, no one was injured beyond a few bumps and the effects of the shock. Luckily the owner of the large car had it insured only two days before the accident and the damage done will be made good by the insurance company.

Well folks, that is more especially the fair sex, it's all off—no more parading the streets of Clear Lake in your bathing suit, for the iCty Dads have decreed that bathers must go to the waters to bathe and must not get more than fifty fee away from the water's edge without a suitable covering, such as a bath robe, overcoat, raincoat and other garments which will hide that beautiful—bathing suit. Tough? And it all happened while the mayor was out of town. The members of the city council decided that motoring and parading about the streets of our fair city scantily clad must be stopped, so they held a meeting and passed an ordinance prohibiting "any person or persons from wearing bathing suits, only, on the streets or public places of Clear Lake, Iowa," under penalty of a modest fine of not to exceed $100 or imprisoned in our bastile for a period of not more than thirty days.—Clear Lake Mirror.

Where Water Is Precious.

In Cape Town, where water—especially in the hot summer months—is a very precious fluid, it is the custom to shut off the supply at night, in order to eliminate waste as far as possible. The authorities complain that persons frequently go to a tap to draw water after the supply has been shut off for the day, and finding no water, thoughtlessly leave the tap open. Consequently the next morning when the supply is turned on a large quantity of water runs to waste unnoticed.

Automobiles in Near Future Will Run Without Gasoline

Fenton Man Has New Invention Perfected

RUNS AUTO ALL DAY ON OXYGEN ALONE

Without one drop of gasoline or oil of any kind and securing all power from the oxygen of the air, Arthur Bundy yesterday drove a truck about the city the entire day and thus demonstrated beyond question the practicability of his invention—using the oxygen of the air for alal power. The oxygen is drawn from the air by certain chemicals which Mr. Bundy has compounded, and not only will it produce power, but light and heat also are obtained by the same process.

The chemicals are inexpensive and running thet ruck the entire day yesterday cost just 5 cents. "The chemicals are taken from the natural resources that are all about us," declared Mr. Bundy this morning. "They cost practically nothing, they are not inflamable unless there is air pressure, not explosive, and a child may drink them and it will not hurt him."

Runs Smoothly

The generator containing the chemicals was placed on the side of the truck and a small tube connects it with the large tubes of the car engine. A small air hole in one of these tubes allows the air to pass in and a cap over this opening is regulated by the throttle of the machine. The more the cap is raised and the more air that is allowed to pass into the tubes, the faster the engine runs. There is no one drop of oil of any description used in this new process and the car which Mr. Bundy used yesterday, a model of about ten years ago, runs as smoothly and evenly as the most expensive model car on the market today.

At present the regular car engine is being used, but the inventor has under way an engine which will occupy only about one third as much space and which is especially adapted to the oxygen power process. It will weigh not over eighty pounds, will have no spark plugs, no carburetor and the numerous other contrivances necessary on the gasoline motor. The engine is a series of rotary cells through which the air is forced by the chemicals and will occupy a space not moret han 9 by 18 inches and will furnish one horse-power for each pound of weight.

Used as Heat

With the same chemicals to draw the air qualities, a flame with sufficient heat to cook over, or to warm a house is produced and Mr. Bundy this morning also demonstrated this process. A. J. Peterson, cashier of the Webster City Savings Bank and one of the promoters of the Bundy invention, plans to use these chemicals in his furnace this winter, and will order no coal if it is found sufficient heat can be produced to warm the house. The cost of heating with the chemicals will be only a fraction of per cent of that of heating with coal.

Making Heat

Demonstrating the heating method Mr. Bundy took a small tank containing the chemicals, and over the end of this held a lighted match. There was no ignition. The inventor then attached a gas burner to one end of the tank and placed the other end to his lips, drawing air in, and holding a lighted match over the gas burner, a clear, blue blaze immediately leaped up. The burner itself, the iron frame does not become hot from the blaze, but only above the blaze, where the oxygen is separated from the air by the chemicals, there is heat.

The benefits which will be derived from this invention, the saving that will be realized by its practical use, will be invaluable to the world and the fact that Mr. Bundy has a "real hing" is now recognized even by those who at first scoffed at the idea.

"Of course it is not perfect," he decares. "There are numerous details to be worked out and perfected but it will not be long before people will be cooking with air, and running automobiles and motors of every kind with air."—Fenton Reporter.

Approximately 32,000 acres of farm lands in Black Hawk county are either under some stage of procedure for drainage or are in contemplation.

Plans are now well under way for the development of the coal fields in Lafayette township, west of the Northwestern lines north of Gilbert, in Jasper county.

The Iowa state baptists' assembly will be held at Chautauqua park in Iowa Falls beginning July 23. It will continue for ten days. A tentative program is being arranged.

What was, without doubt, one of the best calf club shows of the state was held at Le Mars, when 35 pure bred heifers that were drawn by the boys and girls of Plymouth county last year were shown.

President Wilson has signed the nomination papers of Elmer D. Ball, of Ames, to be assistant secretary of agriculture. Ball is now professor or entomology at Iowa State College and also state entomologist of Iowa.

A large reservoir to be used as a cooling pond for the new turbine and which will contain 260,000 gallons of water that may be used in addition to the present supply in case of a fire emergency, has been begun at the Webster City electric plant.

Perhaps the largest grain check ever issued to a farmer in Blackhawk county was that received by William Wilson, a well know farmer recently for 6,000 bushels of corn. Mr. Wilson received $12,500 for the corn, or $1.80 a bushel. 1,000 bushels sold for $1 70. Part of the corn was from his 1918 crop and part from last year's crop.

Membership in the grand lodge of Iowa Masons has grown 4,874 in the past year. Considering the ever increasing high standards for membership this enlargement is a remarkable one in which the Masons take just pride. When the roll was called in January, 1919, there were 62,472 Masons in the state. One year later the total was 67,346.

Three hundred thirty-four baccalaureate degrees in agriculture, engineering, home economics, industrial science and veterinary medicine, 78 advanced and honorary degrees and 34 certificates for non-collegiate work were conferred at the commencement exercises of Iowa State College, which terminated its semi-centennial celebration.

James K. Young, pioneer living near Humeston, was instantly killed when his auto was hit by a backing train. Mr. Young was on his way to Humeston and his view was obstructed by a building and residence, and when he saw his danger one of the brakes failed to respond properly. The car was dragged more than 1 0 feet with him underneath.

Buried alive was the fate of E. J. Lewis of Des Moines, a Chicago Great Western conductor, who was caught beneath a dump car load of dirt near Reinbeck recently. Five minutes after Lewis was missed workmen began to dig away the dirt and found the unconscious body still with slight signs of life, death ensued however before medical attention could be secured.

The only solution to the too-persistent attentions of a lover who offered a dishonorable love which appeared to little Carmela Russo of Centerville was murder. So Carmela shot Tony Matto. She shot him thoroughly, emptying the chambers of two automatic revolvers in a hysterical effort to free herself from his impossible wooing. Seven bullets lodged in his body.

Owing to a recent change Des Moines will soon be the headquarters of the United States army recruiting service for Iowa. Col. R. H. Perry will be in charge, assisted by Major L. G. Ward, field artillery. Previously Iowa was covered by two different districts, Davenport and Omaha. The Davenport headquarters will be closed, and that portion of the state covered by Omaha will be assigned to Des Moines.

Iowa State College was host to the most distinguished gathering of agricultural and industrial college leaders, alumni and farm men and women ever assembled at the institution. There were present about 1500 of the men and women who have been graduated since the college was formally opened in 1869, when only two courses were offered, agriculture and engineering. The first class was graduated in 1873 and five members were present to give the old class yell for "the first and best of I. S. C."

How Moving Signs Work.

In a general way, the mechanism of a moving electric sign is like the old-time music box drum, filled with pins. As the drum revolves the pins make the contacts at determined intervals, and the illusions of revolving circles of light, bird effects and designs almost without limit are produced.

ART SHOWS PART OF U. S. IN WAR

Pictures by American Painters Tell Story of Expeditionary Force's Activities.

GRIM REMINDER OF TRAGEDY

Among Scenes Depicted Are Ruined French Villages Made Sacred Forever to Americans Because of Lives Given to Save Them.

Washington.—The story of the American expeditionary force is told in pictures on the walls of the National museum here in a permanent exhibit just opened to the public.

Drawn from life in paint, pen and ink or pencil by American artists commissioned and sent to the front for that purpose, the collection of nearly 500 studies detailing almost every phase of life in the army overseas is spread over the walls of half a dozen great, well-lighted rooms. It is a tale of stirring action which they disclose.

Among the scenes depicted are ruined French villages made sacred forever to Americans because of American blood freely given to tear them from German hands. There are the homely, appealing scenes from behind the lines with happy-go-lucky youngsters of Pershing's division in billets mixing among the people of France, the very old and the very young people.

Here and there are grim reminders of the great tragedy in groups of huddled dead in wrecked enemy trenches over which the tide of victory had poured. Again, half glimpsed through a downpour of rain, a trudging, sodden infantry column is moving onward through a sea of mud as the artist saw it; or an endless line of weary gun teams drags forward the batteries to blast the road to triumph.

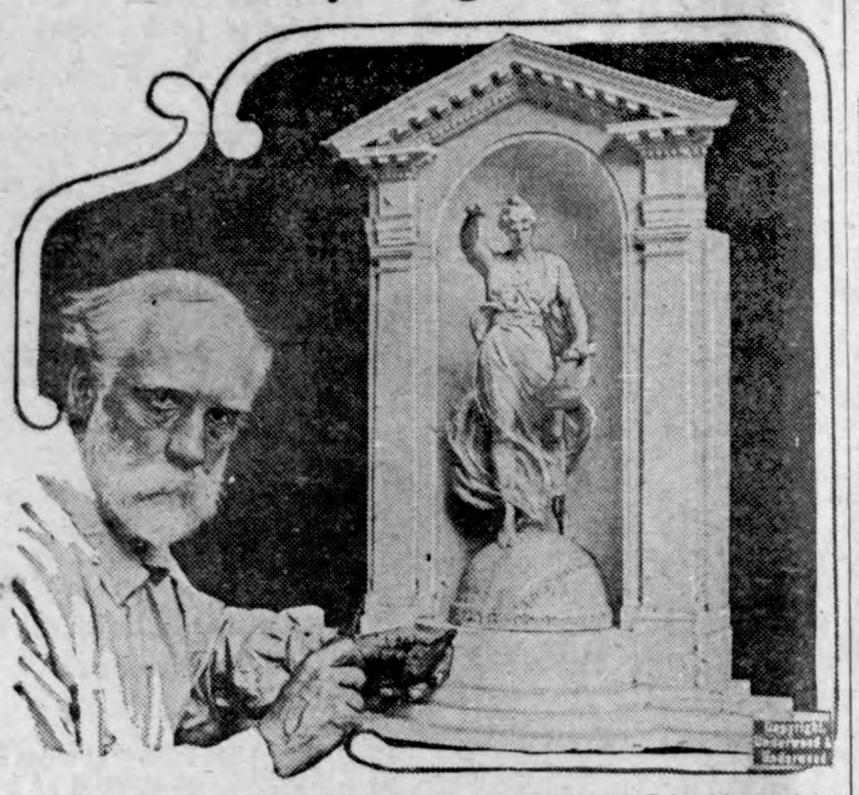
At one point the artist caught and held for his fellow countrymen the breathless tensity of a forest outpost, peering through the leafy screen of his covert toward the enemy lines, his rifle hugged close, with fingers clinched over the trigger; at another a slash of light from a half-opened door has painted on the screen of night just a hint at a column, tramping on toward battle, just a young face or two in the line—weary, dirty, but with jaws grim set with purpose. Again it is a hospital that has gripped the artist's imagination, a twisted, writhing form under the tumbled blanket, with agony in every line and over it the steady-eyed surgeon or the merciful figure of an army nurse.

War Implements Displayed.

In rooms around the picture display are shown all the countless things with which the army and the navy dealt in the war; the guns, the bombs, the uniforms of ally and enemy alike, captured weapons and German war gear of many kinds. These form a striking setting for the epic tale the war artists have pictured, probably the only such record ever assembled, for it began with the army and runs on to the departure of the homeward transports at the close.

Artists who made the pictures, all of whom held the rank of captain in the American expeditionary force, include Wallace Morgan, Ernest Peixotto, Julius Andre Smith, Harry E. Townsend, Harvey Dunn, Walter J. Duncan, all of New York city; William J. Aylward, Fairport, N. Y., and George M. Harding, Wynnewood, Pa.

"Liberty Brings Peace"



Mr. Henry K. Bush-Brown, a prominent District of Columbia sculptor of more than local reputation and former president of the Washington Arts club, beside his statue which he calls "Liberty Brings Peace."

1—Mrs. Peter Oleson of Cloquet, Minn., one of the women leaders who made a distinct impression on the Democratic national convention. 2—Unable to procure laborers, girls and business men assist in street repair Petaluma, Cal. 3—Czecho-Slovaks from the U. S. with "Old Glory" wildly acclaimed in the streets of Prague.

Air Mail Men Make Record

Planes Fly Total of 54,693 Miles in Month of May, Says Official Report.

EFFICIENCY IN OPERATION

New York-Washington Route Shows 88 Per Cent and Chicago-Omaha Route the Same—Newark Field Delays Two Routes.

Washington.—United States mail planes flew a total of 54,693 miles in May, according to the report made public by Second Assistant Postmaster General Praeger. The average of efficiency on the New York-Washington route was 88 per cent; Cleveland-Chicago, 76 per cent and Chicago-Omaha, 88 per cent.

Only two forced landings were made because of mechanical trouble in either planes or motors. Fifteen others were made because of shortage of gas or oil through combating head winds, four because of weather and seven because new pilots got off their courses.

How Efficiency Is Based.

Efficiency in operation of postal airplanes is based on leaving the fields within 15 minutes of scheduled time, on maintaining a speed for 75 miles an hour for Curtiss R-4s and 80 miles for DH-4s and Martin bombers, on the absence or number of forced landings and on making flights without damage of any character to engine or plane in taking-off, landing, taxiing or flying. The rating by fields in May was as follows:

Field.	Started on time	Completed on time	Without forced landings	Without damage to planes
N. Y.-Wash.	72%	85%	93%	100%
N. Y.-Cleve.	51	80	93	98
Cleve.-Chi.	77	65	71	90
Chi.-Omaha	78	82	91	100

Reasons for the abandonment of the field at Newark by the department are indicated in a statement by Mr. Praeger addressed to "All Superintendents of the Air Mail Service," in which he says:

"The records indicate that if the field manager had performed the full share of their duties in getting the mail planes off within 15 minutes of the scheduled time of departure the efficiency rating for May for all divisions would have made a wonderful showing.

Fail to Start on Time.

"The general efficiency performance on the New York-Washington and New York-Cleveland routes was marred by this failure of the Newark field management. This field failed ten times to start its plane on time to Washington and ten times to start on time to Bellefonte.

"This trouble exists to some degree on other fields. It can be eliminated, or certainly greatly improved, if planes are promptly inspected, tested and served in the afternoon before the flight if the departure of the plane is scheduled early the following forenoon. Aside from this single serious delinquency, the pilots, mechanics and field supervisors have cause to feel proud of the record made during May."

West More Chesty Than Eastern States

Washington.—In an effort to secure better fitting uniforms for American soldiers, more than 100,000 men in the army have had their measure taken, the war department announced. The measurements were said to form the most comprehensive survey ever made for tailoring purposes and will be made available to the clothing trade.

The survey has shown what proportion of sizes should be carried for troops, according to the war department, and will enable reduction in the stock of surplus clothing kept on hand to fill requisitions.

Measurements showed that the biggest chested soldiers came from western states, while the smallest chested men were from the eastern department.

1,362,872 FRENCH KILLED

Final Figures Given on Tricolor's Total Dead in the Great European War.

Paris.—Final official statistics of the ministry of war fixes the total number of French soldiers killed during the great war at 1,362,872. Of this number the details of the fate of 361,854 are unknown.

Reduction of military service to less than two years is impossible at the present time, said M. Lefevre, minister of war, while explaining the main points of the projected reorganization of the army to the military committee of the chamber of deputies.

Use of French troops in the orient was discussed by the minister, who declared that forces now in the near east numbered 70,000 men, most of the organizations there being colonial regiments.

Must Wed to Get Wealth.

Valparaiso, Ind.—By the terms of the will of Edgar D. Crumpacker his son, Owen L. Crumpacker, a local attorney of this city, is to receive $500 additional, providing he marries. The younger Crumpacker also will receive a large law library which belonged to his father, who was for years representative in congress from the Tenth Indiana district. He left a large estate, of which a large part consists of land bordering along Lake Michigan, in close proximity to the steel mills of Gary. The local attorney is a bachelor.

U. S. Marine Corps Patrol at Santo Domingo City

NEWS REVIEW OF CURRENT EVENTS

Columbia Wills to Have Editor as a Guide During Next Four Years.

VIEWED AS GOOD EXPERIMENT

An Apathetic Campaign Likely to Warm Up—Doings of Republican Leaders—Trade Restrictions With Russia Lifted — Mexico More Tranquil—Spa Conference and Foreign Affairs.

By E. F. CLIPSON.

America, ever resourceful and willing to try anything once, has shown the spirit of true democracy by going to various professions for its presidents. The first one was a civil engineer, and since his time the White House has been occupied by lawyers, diplomats, professional politicians, a planter, soldiers, a tailor, two college presidents, one of whom also preached a little, and the other of whom practiced law a little, and several others who at various times in their careers were identified with trail blazing, farming, legislating and the law. Now the supreme experiment is to be tried, for Ohio, mother of presidents, has produced twins, and, singularly enough, both are newspaper men. The claim has long come from various sources that the newspapers run the country, so nothing is more logical than an editor as chief executive.

Barring accidents or the totally unexpected, either Editor Harding or Editor Cox will sit in the presidential chair March 4, 1921. The consensus of opinion gathered from public expressions and the news of the day, is that it is an experiment worth trying. No very pronounced evidences of worship for either candidate seem manifest as yet in the great body of the electorate, but that is a condition in keeping with the editorial personality and may easily change as the campaign warms up. Until the day of signed news articles and editorials changed the condition slightly, the newspaper man has always been a somewhat submerged—voluntarily submerged — personality. He has been a most potent leader and director in his quiet way, but seldom for him the heroic role. He has created many heroes, but little hero worship has come to him. His ideals would not admit of it. Cincinnatus patiently plowing is more ideal in the general newspaper creed than Cincinnatus leading armies.

Now the editor gets in front of instead of behind the calcium's bright glare. The public will, metaphorically, see two editors at least, stripped to their very souls; but as each has had some stripping in state politics the ordeal will be less severe. Also, the professional halo makers, in this case the political managers of the two candidates, will soon be enlarging upon the nobility of the editorial calling and the self-sacrificing qualities which it entails. Already the halos are in the molds and before November it is safe to assert, both candidates will be heroes to their respective followers, although at present they are just level-headed representative citizens, with considerable edge in ability over the average. The exaltation will extend, in some degree, to the whole newspaper profession, and some there are who think this will not be a good thing. Anyway, after next March the people will have an opportunity to see how an editor, who never fails to tell how the country should be run, will run it himself.

The aftermath of the Democratic convention has not been greatly dissimilar to that of the Republican conclave. The bulk of party sentiment, with the exception of the naturally disgruntled seems inclined to abide by Governor Cox, just as the bulk of Republican sentiment abides by Senator Harding. Bean spillers have been active in both parties and Nicholas Murray Butler, in his attacks on the forces of corruption, did not say any more, indeed not as much, as William Jennings Bryan, in post-convention utterances, has said along the same strain. If, with these two notable exceptions, the start of the campaign seems apathetic, there is plenty of time for it to warm up.

Republican leaders meeting in Chicago the day after the Democratic national convention, decided to make the Illinois city the principal headquarters of the party and to wage the campaign largely west of the Alleghenies. The nomination of Cox came as a surprise to the leaders as they had planned a campaign against McAdoo. They announced, however, that the issues would not be materially affected, the chief fight being centered on the League of Nations, with Democratic conduct of the war and reconstruction a secondary issue. It was also decided to frown upon any attempt to introduce the wet and dry question into the national campaign or to make the personality of the candidates a prominent factor. Independence of action, but at the same time the fullest co-operation between the national committee and the senatorial and congressional committees is planned, with the national committee keeping out of all state rows such as those in Illinois and Missouri. The well-known ability of Governor Cox as a campaigner may cause Senator Harding to depart from his announced intention to stick principally to front-yard receptions, if the former goes on the stump.

Announcement by the state department of the United States of the lifting of trade restrictions with Russia came unexpectedly. Since Secretary of State Colby had stated just before his departure for San Francisco that no action was of immediate prospect, it is regarded as a recently adopted policy. The announcement expressly states that no recognition of the soviet government is implied and that individuals and corporations trading with Russia must do so at their own risk and are not to expect assistance or protection from consular authorities; also that the post office department will be unable to accept mail to soviet Russia and that goods cannot be forwarded by parcel post. Materials for war purposes continue under the ban and the state department will continue to refuse passports for Russia. The announcement means in effect that persons or corporations desiring to trade with Russia may do so by dealing with soviet agents in the United States or in other countries. The state department warns American citizens against the risks incident to the acceptance of commodities or other values which may later be brought into question. It is explained that the United States does not recognize the validity of industrial or commercial concessions granted by an existing Russian authority.

As a winding up of one of the problems growing out of the war, over $150,000,000 of property seized as enemy owned during the conflict, is now ready to be returned under qualifications provided for in the amendment to the trading with the enemy act, passed during the closing days of the last congress. Among those who may obtain the release of their property are American women who married alien enemies, enemy diplomats, aliens who were interned, citizens of new nations created from enemy territory by the treaty of peace, women of allied or neutral countries who married enemy subjects, and Americans who were forced to remain in Germany during the war. Property mistakenly seized will also be returned and American creditors are permitted to bring claims against enemy debtors whose property was seized.

Reports of banditry, but on a somewhat reduced scale, continue to filter in from Mexico. On the other hand come reports that Francisco Villa has entered into an armistice with the new government and agreed to cease attacks on trains, garrisons and towns. This is in direct contravention of a manifesto issued a short time ago by ten of Villa's generals, including his chief of staff, and a number of civilians, that war on the new regime would be continued. The burden of the manifesto was that the Obregon and De La Huerta government is the product of a military coup and, attempting to establish itself with the same passions, jealousies, ambitions and mistakes as of old, will be impotent to restore peace in the country.

As pointing to an assurance, or which the authorities are attempt to create, is the recent statement f Mexico City that the governmen ready to protect the interests of f ness men in the republic, wh they are Mexicans or foreigners. M ico presents an appearance of proved tranquility, but the que whether it will continue is an one. As an intimation of the de of faith attaching to the promise Villa and others of his kind, comes government announcement that th will be no relaxing of vigilance aga rebels.

The Spa conference, which has b endeavoring to fix the amount many shall pay in reparations, s the disarmament question and o problems of the peace treaty, de oped into a session of much diffi From the outset the allies showed outwardly united front, with little parent inclination toward lenie Lloyd George especially showed a exterior and even a very peremp attitude in dealing with the Ger delegates. Indications, however, not lacking of internal dissension indecision among the allies. The G mans sought to mitigate the provi of the treaty calling for disarma and the reduction of their for Their claim was that internal co tions prevented their carrying out terms of the clause in the time sp fied; also that in view of recent t bles and the danger of recurrence, the Russian menace, it was unwise do so. One stumbling block was the question of rifles and small a which the German soldiers carried their homes after the conclusion of war, an action abetted by the gov ment and which, it has been char has been utilized by the German thorities as the basis for a big citi military organization still very d gerous to the peace of Europe.

Internal friction among the al which it was sought to keep hidd was due to disagreement over a di sion of reparations and the spoils war. Italy, Serbia and Belgium h each claimed priorities, while the lotments to be made France and E land have for some time constitute delicate phase in the relations of th two countries and has affected the a titude toward them of the other lies. The allies delivered an ulti tum to the effect that Germany m disarm by Oct. 1, or suffer an occu tion of her territory.

The Russian bolshevik men looms more strongly over western E rope, with Poland reported not o weakening but in a state of near c lapse under the red offensive and se ing an armistice. Germany thus comes the barrier and is more strong insistent on an amelioration of t peace treaty which will permit her, stead of an army of 100,000 men, o of 200,000, or even considerably lar The view has considerable support England and France that the reds a at present more dangerous than armed Germany and that it might be good move to permit the Germans keep larger military forces if in turn they will dam the soviet tide. Poland's condition is really so despe ate as reported, it leaves Gene Wrangel, who is battling the bolshe iki from the Crimean peninsula nor ward, the reds' only opponent of i portance. He recently has had s great successes, including the wip out or capture of two Russian cavalr corps; but with Poland out of comm sion, the military machine which cr pled that country and also swept a Kolchak, Denikine and Semenoff, m be expected to make rather short w of Wrangel.

The advance of the Greek forc against the Turkish nationalists h been so rapid that resistance is said have been largely overcome. A jun tion of the Greeks operating in t Smyrna area with others operati from Panderma on the Sea of Ma mora, estimated to require 15 day has been effected in 11 days. Musta pha Kemal, the Turk leader, is said have been reduced to the necessity conducting a guerrilla warfare. Amer cans throughout the war area are re said to be safe. A Fourth of July cel bration was held by Americans in Co stantinople to the accompaniment British warships bombarding the na tionalists at various points in the B phorus and Sea of Marmora.

ODUCTION OF SORGHUM URGED

Demand for Sugar Substi- tes Favors Growth of Crop in Every State.

D STEADILY INCREASING

ries Still Greater Than Supply spite High Prices Which Range From 90 Cents to $1.50 Per Gallon—Two Varieties.

marked increase in the production orghum sirup is indicated by re- received by the United States rtment of agriculture, which has engaged in a special campaign oduce greater production of this because of the keen demand for r substitutes.

Yield Has Increased.

the beginning of the world war annual yield of sorghum sirup in United States was approximately 0,000 gallons. This has increased dily until for the past year it was roximately 30,000,000 gallons. The rage yield of sirup per acre has about 100 gallons, but the fact this figure can be increased is ated by the department's experi- nts, in which more than 400 gallons acre have been produced in some lities.

urging increased plantings to sor- m the department's experts point that despite the increasing yields demand is still greater than the ply, as shown by the price for sirup,

tch of Sweet Sorghum Stripped and Topped, Ready to Be Cut for Sirup Making.

hich has ranged from 90 cents to .50 per gallon, and in a few cases en higher.

Grown in Every State.

There are abundant opportunities r increasing the sorghum production, e experts say, since this crop can grown in every state in the Union ith the possible exception of Maine. the northern states it is necessary plant early-maturing varieties of rghum. "Early Amber" and "Fol- rs" are among the varieties recom- ended by the department, which is repared to supply inquirers with full formation regarding the cultivation this profitable plant.

OTTED MANURE PREFERABLE

a Mechanical Condition Is Improved by Organic Matter Being Broken Down.

Manure loses much of its plant food the process of rotting. Its mechan- al condition, however, is much im- roved, because there is a great deal the coarse organic matter broken own. Much of this will be lost hrough decay, and the percentage of ineral plant food remaining may be reater per ton of manure in the rot- ed than in the fresh condition. These ets make rotted manure preferable or truck crops where quick results re desired and where a large amount manure is used, says F. L. Duley of he University of Missouri college of griculture. Too heavy applications fresh manure may often burn lants, especially during dry seasons. he coarse organic material keeps the oil open and reduces its capacity to etain moisture. However, there is oo much loss of plant food in rotting nd it is advisable to apply manure s soon as possible.

BTAINING PROFITS IN PIGS

ore Money Made in Maturing Animal Early Than Otherwise—Skimpy Feed Is Wasteful.

Profit comes not in how little we an keep the pig on, but in how much we can get him to eat of a balanced ation. The younger the animal the nore thoroughly it digests its food. Therefore, mature pigs early. The six months' 200-pound pig costs one-half the 200-pound eighteen months' pig.

LOOK FOR INJURY TO TREES

Painting Wounds Caused by Mice and Rabbits Will Help to Heal—Bridge Grafting Is Good.

Go over the orchard and look for rabbit and mouse injuries to trees. Sometimes painting the wounds with white lead or grafting wax will help the trees to heal quickly. Bridge grafting over the wounds will also often bring the trees through.

SOME PIGEON POINTERS

It is never too late to clean out and whitewash the lofts.

Better put up a few new nest boxes. Now.

Careful attention to all details will assist you in bringing about the best results obtainable.

A good pigeon lice destroyer can be made from a tea of quassia bark which is placed in several pans about the lofts.

Pigeons will not do well if you neglect your part of the duty, such as proper feeding and watering.

Don't handle your birds while nesting unless you want them to throw away their eggs.

Peanuts make a first-class summer food for pigeons.

A small quantity of vaseline put down the throat of pigeons that are affected with canker will cure them.

Give plenty of fresh water at this season of the year and note the results.

CULLING POOR HENS RESULTS IN SAVING

Many Fowls Eliminated From Missouri Flocks in 1919,

Forty Per Cent of Birds in Average Farm Flock Are Nonproductive and Should Be Fattened and Sold or Eaten.

In Missouri last year, 73,765 birds were eliminated from 1,593 flocks which were culled under the supervision of the home demonstration agents sent out by the United States department of agriculture and the State Agricultural college. This resulted in a saving of approximately $50,161 to their owners.

In another state, 486 local leaders were trained, with the result that 717,478 birds were culled. Of this number 274,399 were found to be nonproductive.

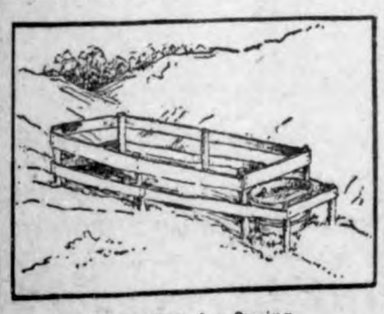
About 81 per cent of all the poultry in the country is cared for my women. For that reason special attention is given to poultry by the home clubs supervised by the department of agriculture and the state colleges, and farm women are taught best methods of poultry selection, breeding, raising, feeding, housing, culling, canning surplus birds for home use, preservation of eggs, and co-operative selling of poultry products.

Lack of proper culling thus far has proved to be, in the majority of cases, the principal reason why a flock is not profitable. Forty per cent of the hens in the average farm flock today are nonproductive, and should be sold or eaten. It costs about $2 a year to feed each hen. If she does not produce more than that amount in eggs she is unprofitable.

WATER SUPPLY FOR PASTURE

Half-Hogshead Will Answer Purpose Fairly Well, but Cement Trough Is Much Better.

Pasture springs are often made exceedingly foul, because the stock defiles the spring with droppings and makes a mudhole of the place by trampling it with their feet. The cut shows a way to keep the water pure. Put a fence about the spring and



Protection for Spring.

carry the inclosure downhill far enough to include a watering trough within its protection. A half-hogshead will answer, but a cement trough would be a permanent improvement.

SWEET CLOVER GAINS FAVOR

Enables Farmer to Grow Regular Crop and Then Secure Manure Crop to Plow Under.

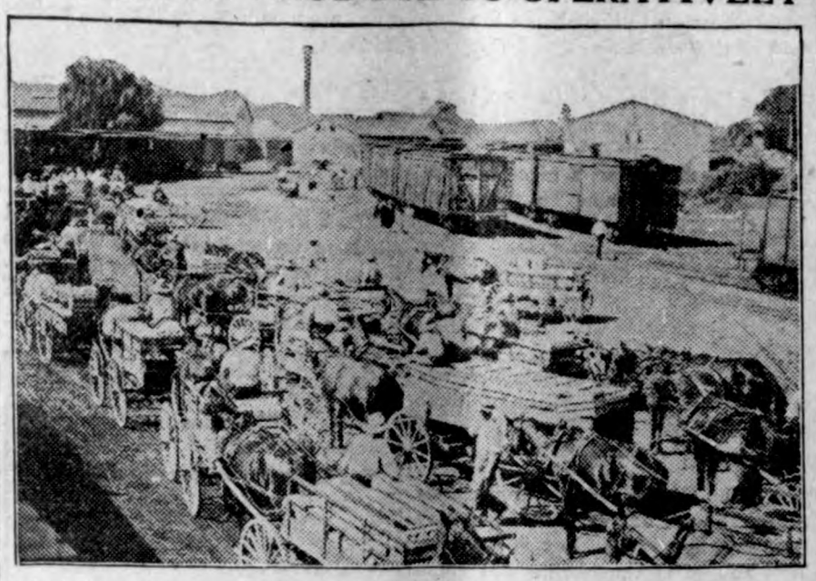
The problem of the farmer has been to find a crop that was a legume to take the place of clover when it fails. With sweet clover it will be possible to grow a regular crop on the soil and then secure a heavy green manure crop the same year to plow under. Much of the future policy of farming depends upon a cheap supply of nitrogen to build up that lost from the soil by cropping, and no other crop has given so much promise as the new annual sweet clover.

EMERGENCY CROP FOR SWINE

On Account of Its High Protein Value Iowa Expert Recommends It for Making Pork.

According to John M. Evvard of the animal husbandry department of the Iowa agricultural experiment station, rape is one of the best emergency forage crops for hogs, because it is of high protein value and will carry more hogs per acre than any other crop of its kind. A good stand of rape will carry 12 to 18 hogs per acre.

MANY ADVANTAGES OF MARKETING SURPLUS PRODUCE CO-OPERATIVELY



Marketing Produce Co-operatively—There Are Now More Than 1,400 Farmers' Co-operative Marketing Associations in the United States.

(Prepared by the United States Department of Agriculture.)

"If our co-operative marketing system were discontinued, it would be a calamity to the farmers of this country," was the recent statement of a Mississippi farmer—this, in a state where only a few years ago no co-operative marketing system of any practical value existed.

But once the advantages of marketing surplus produce co-operatively had been successfully demonstrated co-operative organizations sprang up everywhere throughout the state almost overnight.

True, many of them were formed hastily; and the farmers soon learned that the success of a co-operative enterprise depended upon something more than the mere willingness of Bill Smith and John Brown to pool their produce. Efficient business methods had to be devised, and problems peculiar to each particular community needed to be solved. But with a firm belief in the soundness of the co-operative principle, these obstacles dissolved before the whole-hearted efforts exerted by the members working together. To the county agents of Mississippi is due the credit of initiating and developing this work.

With the thought that other farmers may find them of value, some of the methods pursued are here given.

Grading Better Than Marking.

In shipping hogs it was found that the grading method was better than marking as to ownership. Well-finished barrows and open gilts are graded according to weight, and packer sows are graded according to size, quality and finish. Hogs of any class that are poor and emaciated are classified as "skins." Special methods of bedding and loading have also been devised. Similar methods are applied to cattle and sheep.

For marketing miscellaneous products the commodities that the farmers have in small quantities are assembled in a rented warehouse or vacant store located at a point convenient to the railroad.

Corn is shelled before shipping, if possible, as shelled corn can be graded with greater accuracy; it can be stored if the market is low, and it can be hauled to town when roads are good and at a convenient time. The corn is put up in good, even-weight 2½-bushel bags.

Ear corn is loaded direct from the farmers' wagons into the car. A weigher examines the corn at the scales for color, quality and maturity.

Cow peas are closely inspected at the warehouse as to variety, soundness and freedom from dirt and trash. The farmers learned that graded peas command premium prices.

The marketing of potatoes is begun in the field. Poor potatoes are culled out on the farm and the good potatoes hauled to town under a covering of cloth or sacks. The potatoes are run over the grader at the warehouse, separated into standard grades, and sacked in new 100-pound bags. Ventilated or stock cars are used to ship the potatoes and the sacks stacked on end in rows ranging the length of the car. Each car holds from 400 to 500 bushels. The first, second and third layers are loaded so as to permit the freest ventilation.

Poultry is carefully classified and shipped in regular express cars made for the purpose. The minimum load is 8,000 pounds and the maximum load 15,000 pounds. The poultry is sold for cash at the loading station.

A certain day is set apart for the shipment of eggs. Nothing but candled eggs are accepted, which has caused the farmers to use better methods of gathering, storing and carrying the eggs to town. The eggs are shipped in new cases with 3½-pound, or heavier, new fillers and flats, and packed so as to fill the slack in each case.

Great stress is laid upon the importance of keeping accurate records of each transaction. In keeping accounts the following features are emphasized:

Brevity: To save the time of the market agent.

Simplicity: For the benefit of the farmers whose produce is handled.

Completeness: To protect the association as a body.

Pleased With Results.

The associated farmers are immensely pleased with their accomplishments. It has meant more money to them, and because of the quality of their products secured through proper grading, packing and shipping, the buyers have every confidence in the farmers, a necessary factor in any transaction between seller and purchaser.

Detailed information regarding the methods pursued by Mississippi farmers are given in Bulletin No. 15 of the extension division of the Mississippi Agricultural and Mechanical college, or may be had upon request from the county agents in the field, the Mississippi Agricultural and Mechanical college, or the United States department of agriculture.

STABLE FLIES BREED IN ANY DIRTY PLACE

Certain Farm Practices Favor Development of Pest.

Custom of Permitting Manure to Accumulate Just Outside of Door Makes a Very Attractive Place for Insects.

Certain agricultural practices favor greatly the development of the stable fly, according to specialists of the United States department of agriculture. The fly breeds most commonly in straw and horse manure or in a mixture of the two. The custom of allowing the manure from the horse stable to accumulate just outside the stable doors insures the presence of stable flies at all times when climatic conditions are suitable for breeding. Allowing barnyards, especially around dairies, to become knee-deep in manure is also favorable to the production of flies.

In the grain belt it is the practice of farmers to thrash the grain in the fields by means of self-stacking thrashing machines. The individual stacks cover much ground and the straw is loosely piled. In many cases for convenience several stacks are formed in various parts of the field. When thrashing is followed by heavy summer and fall rains this loosely piled straw is certain to form a breeding place for great numbers of flies.

The insect occasionally may breed in broken-up masses of hay or dead grass, especially when these are permeated with liquids from manure, and corn husks in feeding pens have been found to harbor the maggots. Manure piles commonly found near horse stables are particularly attractive to the flies in spring for laying eggs.

STORAGE DISEASES OF ONION

Control by Practice of Sanitary Measures and Sorting Out of All Defective Bulbs.

In general, storage diseases of onions are to be controlled by the practice of sanitary measures, the sorting out of diseased bulbs at harvest, protection from rain after harvest, thorough curing, and storage in a dry, well-ventilated warehouse at 32 degrees F.—United States Department of Agriculture.

PROFITABLE PERIODS OF HEN

Greater Egg Production Is in First, Second and Third Years, Depending on Breed.

The hen's greatest egg-producing periods are the first, second and third years, depending upon the breed. The heavier breeds, such as Plymouth Rocks, may be profitably kept for two years; the lighter breeds, such as Leghorns, three years.

GENERAL FARM NOTES

Plan silage crops now.

• • •

Lead arsenate is the best spray for insect pests.

• • •

A decrease in the acres planted to potatoes and beans is indicated.

• • •

Cut worms may be kept in check by feeding poisoned bran or clover. Scatter in the garden late in the afternoon.

• • •

The wild cucumber vine is one of the most rapid growing annual vines that may be used for a trellis or to cover up unsightly places.

DAIRY HINTS

CAMPAIGN FOR BETTER SIRES

Owners of Purebred Animals Take Generous Pride in Progress of the Movement.

Every mail received by the bureau of animal industry, United States department of agriculture, shows the readiness with which farmers and animal breeders in general are co-operating in carrying out the "Better Sires—Better Stock" campaign.

The letters show that the owners of purebred sires take a generous and proper pride in the progress of the campaign in their community. One letter recently received contained the following advertisement clipped from a county newspaper published in Pennsylvania:

"Don't breed to scrubs—fetch your big cows to Victory farms—service free.

"For milk: Breed to De Kol Pietje Charles Dickens. Sire: Woodcrest Urma Pietje. Dam: Daisy Le Polke De Kol III (Holstein-Friesian).

"For beef: Breed to Cardington Bob Bill Sykes. Sire: Cardington

Rapid Improvement in Herds Is Seen Where Purebred Sire Is at Its Head.

Blackjack. Dam: Jennie of Olenyangy (Aberdeen-Angus).

"Will pay $25 for five-day-old heifer calves bred by either one of these sires when delivered at Victory farms.

"—— ——, Owner."

The owner of this farm explains by letter that he also maintains purebred boars and that the service of these animals is free to neighboring farms.

This is but one instance in which the owner of better sires has offered their advantages to his neighbors free of charge. The fact that the owner of the sires is willing to buy the heifer calves bred from his purebred bulls is an indication of the increased profits that may be realized by the owner of a scrub or grade herd when he has put a purebred sire at its head. It shows that the value of the progeny of a purebred sire and a grade dam is so well established in the minds of the best informed among breeders that they are willing to pay a much higher rate for this progeny than for a calf with grade parents in both the sire and the dam. It further illustrates the rapidity of improvement in a herd which has a purebred sire at its head.

FLAVOR OF BIG IMPORTANCE

If in Making Butter Desirable Quality Is Spoiled Price on Market Must Be Reduced.

Butter is valued over lard and tallow mainly for the reason that it has a more desirable flavor. If, in the making and handling of butter, this desirable quality is spoiled, the price of the product on the general market must be reduced accordingly. The consumer eats butter mainly as a relish, and if it has a bad flavor it ceases to be a desirable relish.

VALUABLE HELP TO BREEDER

Dairy Improvement Association Endeavors to Improve Herds by Hiring General Overseer.

The dairy improvement association is a valuable aid to the breeder and endeavors to improve the herds by hiring a man to spend his entire time visiting the farms of an organized group of farmers in order to weigh their milk, test it for butterfat and calculate the records of production and cost.

DAIRY NOTES

Regularity in feeding dairy stock is important.

• • •

Keep the cans of cream in a cooling tank until time of delivery.

• • •

Skim the milk as soon after making as possible and cool the cream at once.

• • •

A cow must have a certain amount or food nutriments to keep up the flow of milk.

• • •

Protect the cans of cream from the sun by covering with canvas or with a wet sack while en route.

• • •

Overfeeding is not the part of wisdom. What is too much for one cow may not be enough for another.

POULTRY CACKLES

VALUE OF FEATHERED STOCK

More Poultry Kept on Farms in United States Than All Other Livestock Combined.

Unusual interest in systematic poultry improvement throughout the country is apparent from reports received by the United States department of

Of the Meat Furnished by the Farm to the Farmer and His Family Poultry Constitutes About 10 Per Cent.

agriculture in connection with the "Better Sires—Better Stock" campaign. Figures collected thus far indicate that more poultry is kept on farms in the United States than all other livestock combined, and that a greater proportion of the poultry is of pure blood than any other kind of livestock.

The records also refute the frequent assertion that most livestock raisers take little interest in feathered stock, leaving it largely to the women.

A Connecticut farmer who recently enrolled in the "better sihes' movement is an example of the interest of men in improved poultry. He listed 30 cattle and 1,939 poultry—all of pure breeding. No other breeding stock was kept on the farm.

SWIMMING HOLE FOR DUCKS

While Not Considered Essential for Growing Fowls, It Is Wise to Provide This Feature.

While water to swim in is no longer regarded as essential for duck growing, the fowls enjoy this feature so much that we have always considered it wise to provide a small swimming hole for them. However, in raising young ducks for market they will fatten sooner without swimming. However, they must have all the water they want to drink and it should be deep enough for them to immerse their heads in.

GET AFTER LICE VIGOROUSLY

Peculiar Fact That Vermin Will Infest Some Fowls in Flocks While Others Go Free.

If one of a promising flock seems to make slower progress in growth, has a dull looking plumage and pale face—look for lice. It is queer how lice will infest some birds in a flock while others seem practically free from it. Unless you get after them vigorously, they will certainly stunt the bird.

POULTRY NOTES

Select vigorous birds.

• • •

Grow your own poultry feed.

• • •

Supply an abundance of fresh water.

• • •

Don't allow growing chicks to crowd.

• • •

Goslings do not need feed until they are 24 to 36 hours old.

• • •

Dispose of the male birds not later than June 1. Market a better quality of eggs.

• • •

Young turkeys do not bring out of the shell so much unused yolk as do young chickens, hence they must be fed earlier.

• • •

The heavier breeds, such as Rocks and Reds, and Orpingtons, will not take the perches as readily as Leghorns and Anconas.

• • •

In the rearing of chicks the essential thing is to keep them growing right along from the moment they are hatched to the period of maturity.

Mr. and Mrs. Jacob Bock left for their home at Isabell, South Dakota, after spending about two weeks visiting with Klemme relatives and old time friends. Mr. Bock made the Times Office a pleasant call while in town and told us that the crops in that section of the state of South Dakota where he lives is exceptionally good and hey look for a bumper crop. They also raise a lot of stock there, besides raising corn and wheat.

Valentine Josten went to Estherville, Iowa, last Friday and remained until Saturday evening in that city. Valentine was on a business mission but also found time to visit friends.

Mrs. Hod Lawhorn of Garner was a Klemme visitor last Thursday, returning to Garner the following morning.

D. G. Ell, acocmpanied by Marlin Kroner, Lee Ell, Wm. Greiman and Dr. R. M. Thomas, went to Chicago on Friday night where they went to drive back some new Ford cars. The party reached Klemme Monday afternoon and report that the going was good until they reached Waterloo and from there to this city the roads were not very good.

R. A. Jorgenson was a business caller at Garner Friday morning.

Elmer Ludeke is laid up for a few days on accoun of an accident he met with Monday. Elmer was putting up hay and in some manner or other he got in the way of the hired man's fork whilet hrowing the hay up to the stack and the tines of the fork ran ino his thigh. eH is getting along well but is suffering some pain from the experience.

No band concert was given on the street last Wednesday evening on account of the rain.

Dr. Zinn was singing "Let the Light Shine In" the other day and going over to see what all the excitement could be we discovered that the carpeners had put two more windows in his office.

oYu are invited to attend the wedding of "Mr. and Mrs. Tom Thumb" at the Idle Hour Theatre July 23rd in the evening. Don't miss this big home talent play. adv. 1wc

Frances and Willard Heuer of Dows, came last Wednesday from Dows for a visit with their uncle and aunt, Rev. and Mrs. A. H. Meyer. They returned to their home the fore part of the week.

Miss Edna Katter of Garner, was a Klemme visitor Monday.

Miss Ruth Katter, a niece of Mrs. Chris Blummer, came Thursday last for a short visit.

Miss Mildred Smith returned Saturday from a three weeks' visit with friends at Charles City.

Miss Gertrude Ely of Belmond, was a visitor at the Dr. Missman home last week.

A baby girl made her appearance at the home of Mr. and Mrs. Roy Schaefer last week. Roy is stepping high and it is thought he will come down to earth again,

A baby girl arrived at the Will Waddingham home last week.

Mr. C. H. Thompkins of Garner, was a business caller here last Thursday.

The Missionary Society of the First Methodist church, met last week Thursday at the home of Mrs. Henry Ludeke.

Clark Bredbenner has his left hand all done up and inquiring what was the matter we learned that he is suffering from blood poisoning, although nothing serious.

OFFICIAL PUBLICATION

ORIGINAL NOTICE

In the District Court of Hancock County, Iowa,
October Term A. D. 1920.

Joseph E. Johnson, Plaintiff
vs.
Unknown Claimants of and to the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa, and Patrick Shandler and Mrs. Patrick Shanlder, wife of Patrick Shanlder, Defendants.

To THE ABOVE NAMED UNKNOWN CLAIMANTS AND DEFENDENTS, AND EACH OF THEM;

You are herby notified that on or before the 1st day of October A. D. 1920 there will be filed in the office of the Clerk of the District Court of Hancock County, Iowa, the petition of the plaintiff in the above entitled cause claiming that he is the absolute owner in fee simple of the West Half of the Southeast Quarter and the East Half of the Southeast Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa.

That he and his grantors have been in the open, peaceable, continuous, notorious and adverse possession of the said premises for more than twenty-five years last past with claim of right and color of title and asks that all of the said Unknown Claimants and Defendants be forever barred and estopped from having or claiming any right, title or interest in or to the said premises adverse to the title and estate of the plaintiff therein and that the title thereto be quieted in the plaintiff and for equitable relief.

For further particulars see the petition when filed, which sets forth the plaintiff's claim in detail.

You are further notified that unless you appear thereto and defend on or before noon of the second day of the next term of the said District Court which will commence and be held at the Court House in Garner, Iowa, on the 11 day of October A. D. 1920, default will be entered against you and judgment and decree rendered thereon as prayed.

Dated this 24th day of May A. D. 1920.

Ramsay & Blackstone,
Attorneys for Plaintiff.

It is hereby directed and ordered that the foregoing notice be published once each week for four successive weeks in the KLEMME TIMES, a newspaper of general circulation published in Hancock County, Iowa.

Dated this 25th day of May A. D. 1920.

A. E. Baumgartner,
Seal Clerk of the District Court in and for Hancock County,
7-29-20-4w. Iowa.

Local News!

Mrs. R. W. Elder, Mrs. A. E. Burriff and Miss Minnie Lenz were all passengers to Garner last Wednesday afternoon.

Miss Minnie Lenz is enjoying a vacation from her duties at the Postoffice. She will take about a month or six weeks off from duy and will spend part of her vacation in South Dakota visiting friends and relatives.

Miss Hazel Carpenter returned to Forest City last Thursday after a few days' visit with her father, Frank Carpenter, of this city.

Mr. E. P. Schaefer and son Kenneth, of Hebron, Ill., brother and nephew of Mrs. John Gruetzmacher, came last Tuesday for a few days' visit with Klemme friends and relatives.

Frank Carpenter met with a rather painful accident last Thursday when he and Geo. Kessler were tearing down the arch across Main Street. They had the arch nearly down when two heavy two by fours tore loose and fell on Frank's foot. The blow broke the bone in his big toe and now he rambles around with a cane and the speed of a turtle.

Mr. and Mrs. P. M. Griesemer, Mrs. John Gruetzmacher, Mr. E. P. Schaefer and son Kenneth, were visitors at Garner last Wednesday between trains.

A "full house" at the editorial manse, is what we will call it, as Ye Editor and wife are enjoying considerable company, or rather, were the past week. Mrs. Jorgenson's mother and father, Mr. and Mrs. T. Davis, of Lincoln, Nebraska, her sister Ruth of the same place, and her other sister and husband, Mr. and Mrs. H. Chapman, of Kansas City, Mo., drove from Lincoln here last Thursday evening. They left Lincoln Wednesday morning and arrived here the following night and they also drove in mud nearly all the way of 355 miles. Since coming here we have gone on numerous fishing trips and picnics and having a good time in general. They think that Iowa is quite a fine state for a vacation and no doubt they will return again next year for a fishing trip. They left yesterday morning for Kansas City, Mo.

Johnny Was Curious.

As a great privilege, John was taken to church to see his baby cousin baptized. Just as the minister had the water all ready and there was a hush in the congregation, John leaned toward his mother and asked in a too audible stage whisper, "Hot or cold?"

Lost 65 Pounds in Weight and Had to Give Up Work. Has Been Well Since Using Doan's

"Being exposed to extreme heat when working as an engineer, and then going outdoors to cool off, caused my kidney trouble," says Karl Goering, 8513 N. Orkney St., Philadelphia, Pa. "In cold weather and when it was damp, my joints and muscles would swell and ache, and often my limbs were so badly affected it was only with great misery I was able to get around. For a week I was laid up in bed, hardly able to move hand or foot.

Mr. Goering

"Another trouble was from irregular and scanty passages of the kidney secretions. I became dull and weak and had to give up my work. Headaches and dizzy spells nearly blinded me and I went from 265 to 200 in weight. Nothing helped me and I felt I was doomed to suffer.

"At last I had the good fortune to hear of *Doan's Kidney Pills* and began taking them. I soon got back my strength and weight and all the rheumatic pains and other kidney troubles left. I have remained cured."

Sworn to before me.

Piscatorial Labor Saver.

Uncle Eph Johnson, aged negro, native of Scott county, Kentucky, has invented a machine that reduces to the minimum the labor of fishermen. 'Tis simple, this invention of Uncle Eph's. It is not patented. On the contrary, its inventor offers it to any and all devotees of the rod and reel. Stick an umbrella rib perpendicularly in the mud on the back, fasten a sleigh bell near the top, and connect the line with this "invention" and you are ready to fish—and sleep. "It ain't nothin' more'n a labor saver," said Uncle Eph. "You see, every time I get a bite the fish bends the umbrella rib and the bell rings. Den I wakes up an' hauls him in."—Exchange.

Agreed.

"They seem to be having a row over at Bilkins' house. Difference of opinions, I suppose."

"No. Usual trouble there—identical opinion."

"How's that?"

"Mrs. Bilkins thinks she is not going to be able to get hold of a dollar of his wages this week, and he is of the same opinion."

Sure Relief

The Man Who Wasn't Himself

By ROBERT AMES BENNET

Copyright by W. G. CHAPMAN

"DOUBLE PERSONALITY."

SYNOPSIS. — Alighting from a train at Denver a well-dressed traveler is familiarly accosted by a man about his own age. The traveler ignores the advance. A few minutes later he is greeted as "Will" by an elderly lady and gentleman, who stop their auto to speak. He imagines it a case of mistaken identity and announces himself as "Richard Clinton," on his way to the coast. The couple appear greatly surprised, and learning he is to be in town until midnight, the lady, introducing herself as Mrs. Kirkland, and her husband as Doctor Kirkland, invites him to dinner, explaining the action by his truly remarkable resemblance to a friend of theirs. He accepts. At the Kirkland home he meets a young lady who greets him as her fiance. She is Ellen Kirkland, and plainly is greatly hurt by his assertion that he is "Richard Clinton."

CHAPTER I—Continued.

—2—

"Miss Kirkland!" he begged. "Calm yourself. This—it is most unfortunate. Had you first seen your mother—had she explained to you—prepared you."

"Explained? Prepared?"

"But I must insist, Miss Kirkland, that I—" He glanced past her and smiled with relief. "Here is your mother."

The girl darted along the porch to clasp her mother's arm. "Mamma!" she appealed. "What is it? Tell me! Will insists he is not—not himself. It—it frightens me!"

"My dear," soothed Mrs. Kirkland, "there is no reason, none whatever. Had you been in your room—" She smiled at the guest. "You will understand, Mr. Clinton, the resemblance being so absurdly close. The child is excited—not quite herself. So great a shock. If you will kindly excuse us a few minutes."

"I am very sorry," he said. "Perhaps it would be better if I should go."

"Oh! no, no! Do not go!" hysterically cried the girl.

"Hush, dear," reproved her mother. "Mr. Clinton is not going. He is to stay and dine with us."

"If you really wish it," he assented.

"Then you'll not go?" exclaimed the girl.

"Of course not, Ellen," said her mother. "Come in with me."

CHAPTER II.

Bonds.

Left alone on the porch the guest again faced the sunset. But the dazzling glories of red and gold were already fading into the gray of twilight. He looked absently at the blackened bulk of the mountains, his expression shifting between annoyance and amusement, curiosity and apprehension.

He was still evidently considering the situation when a small touring car came whirring along the street in the clear twilight. It stopped before the house and Doctor Kirkland sprang out with a briskness unusual in a gentleman of his portly figure. He came up to the porch, his alert gaze on the lone guest.

"What's this?" he demanded. "Don't mean to say you've been left all this time to entertain yourself?"

"Not all the time," smilingly replied the guest. "On the contrary Miss Kirkland and I—" His look became grave. "Much to my regret Miss Kirkland made the same mistake as Mrs. Kirkland and yourself."

"Naturally. But if her mother—"

"She had gone in when Miss Kirkland came around the house. I regret that my insistence on my identity rather overcame her."

"Not surprising, when she is engaged to you, is it?"

"Engaged to me! You mean of course—"

"To your double, to Will Lowrie," explained the physician. "Do you need further proof that you are his double?"

"No more. She was still quite positive, I fear, after all my attempts to convince her of the mistake. However, Mrs. Kirkland came, and no doubt has explained the mistake to her."

"Very likely," agreed the physician. "I would have gone had they not very kindly insisted that I must remain."

"You must."

"It is very hospitable of you to insist. Still I do not wish to cause your daughter the slightest distress."

"Nothing would distress her more than"—the physician considered the point—"than to have you refuse our hospitality."

"That being so I am very glad to stay. I've been recalling the fact that men even of national prominence have doubles who are mistaken for them. My resemblance to Mr. Lowrie is not so strong as I at first thought."

"Not at all," replied Doctor Kirkland, his shrewd eyes twinkling.

The guest stepped into the reception hall, and found himself in a well-furnished, comfortable home. The rooms were bright with the mellow radiance of indirect electric lighting. The little housemaid appeared, to take the stairway to his room.

When he came down he found his host and hostess waiting for him in the drawing room. The doctor still wore his professional frock coat. As he rose to meet his guest the maid announced dinner. Miss Ellen was not with her parents.

Mrs. Kirkland chatted familiarly with Clinton as she led him into the dining room. She observed him look at the housemaid with amused expectancy.

"No," she remarked, quick to catch his thought. "Mary will not be calling you Mr. Lowrie. She was not with us when you—when Will left."

"And Miss Kirkland?" he asked. "Have you convinced her?"

The lady smiled the least bit forcedly. "Have no fear. Ellen now knows the truth."

"That is good. I can understand how it must have seemed to her. I wonder if you can realize my embarrassment? Think of a young lady mistaking one for her fiance!"

"Good joke that," put in the physician. "How many kisses?"

"Karl!" reproved his wife.

They entered the dining room, the lady indignant, her husband chuckling and the guest a trifle constrained. Ellen stood at the far side of the oval table arranging the lilies in the center. She was pale and her eyelids were slightly swollen. When she looked up and saw Clinton across from her she did not blush. If anything she became still more pale. He was quick to observe her appearance.

"I am very sorry, Miss Kirkland," he murmured. "It must have been quite a shock."

"You must not blame yourself," she replied. "It was simply that I did not understand. Now, you see, I am quite over my—excitement." She smiled uncertainly at her father. "Between courses papa can give me a sedative suggestion."

"Do you really use suggestion in your practice?" Clinton inquired of the physician as they seated themselves.

"Suggestion—little else," replied Doctor Kirkland. "You must bear in mind my specialty. Not but what, in time, the entire profession will be using suggestion as promiscuously as the Christian Scientists."

"How the Scientists would be scandalized if they heard you!" said Mrs. Kirkland. "The slightest intimation that their treatment is related in any way to suggestion—"

"There is no matter; therefore everything is immaterial; therefore it is immaterial what they think," solemnly reasoned the physician.

"Isn't it?" queried Clinton.

"It is not immaterial," his host flatly contradicted himself. "What they think—what anyone thinks—is exceedingly material. 'As a man thinketh in his heart so is he.' For instance, you think you are a certain personality named Richard Clinton."

He Eyed His Guest With Intense Keenness.

"I not only think it. I know it."

"Do you know yourself? Do you know what you really are? Does anyone know what he or she really is?"

"I at least have some idea who I am," replied Clinton, smiling.

"Some idea? You mean a small idea, an extremely small idea. Every day there are millions of pictures, myriads of sounds, being stored away in your subconscious mind. Of how many of these were you aware at the time and how many can you now recall? Only a few, a pitiful cupful out of the ocean. Conscious man is a glowworm crawling over the vast dark field of his subconscious mind."

"You refer, I presume, to the odd cases known as double personality," remarked Clinton. "I must confess I hardly believe them possible."

"On the contrary," asserted Doctor Kirkland, "such cases are far more numerous than is commonly known. As I informed you, everybody is, strictly speaking, more or less insane."

"There he goes again!" put in Mrs. Kirkland. "We're all not quite ourselves!"

"Some are much less so than others," added her husband. "A few are not themselves at all. By the way, Mr. Clinton—to change the subject—I am interested in a small psychological experiment. It is to have one state, without pausing to think, the ideas suggested to him by a given word. Would you have any objections to my testing you?"

"None whatever."

Mrs. Kirkland and Ellen exchanged swift glances.

The physician smiled blandly. "Then if you'll answer quickly the ideas suggested by—bonds."

As he spoke the word he eyed his guest with intense keenness. The ladies involutarily leaned forward to catch the answer. Clinton smiled and responded without a trace of hesitancy: "Bonds—cash, bank accounts, trip to California—"

"Enough, thank you," interrupted the physician, his eyes twinkling with complacent self-satisfaction.

"If there is any other word you wish to try I shall be pleased to answer," said the guest.

"No, that was the only one. My real purpose in using it was to fish in your subconsciousness."

"And you caught—"

"Merely a confirmation of certain optical impressions."

"May I ask why you spoke of bonds?"

Mrs. Kirkland interposed. "I fear that you would hardly be interested in the matter."

"Why, mamma," said Ellen, "how could he be other than interested?"

"Perhaps, perhaps," qualified her father. He looked at the guest with a shrewd glance. "It is rather a private matter, Mr. Clinton."

"Then of course—Pardon my curiosity."

"We can trust you not to repeat what I tell you. Shortly before Will—Mr. Lowrie—accepted my advice to go to the sanitarium he was sent to Pueblo to negotiate for an issue of bonds. The parties whom he represented were allotted one hundred thousand dollars of the issue, and the bonds in that amount were delivered over to him. Soon afterward Charlie Bemm, who had run down to Pueblo in his touring car, came upon Will sitting in the station grounds. He had missed his train. Charlie took him in, suitcase and all, and brought him to Denver. Late that evening he came home with his suitcase but without the bonds. He had not turned them in at the bank, and he could not remember what he had done with them. Except for a vague recollection of riding with Charlie and of wandering through City park, he could remember nothing since early that morning. The bonds have not yet been found."

"Has he never recalled what he did with them?"

"Not to our knowledge. Worry over their loss induced such alarming psychological conditions that the great specialist in charge of the sanitarium prescribed an absolute change. He has been temporarily cut off from everything related to his life here. The last report received by me was that he had ben sent abroad in the care of one of the staff. Since then we have heard nothing."

"There is the saying, 'No news is good news,'" remarked Clinton.

"If only we could believe that!" sighed Mrs. Kirkland. "Do you wonder that I was delighted when I saw you there at the depot, looking so strong and well?"

"Mistaking me for this unfortunate Mr. Lowrie," sympathetically replied Clinton.

The physician had drawn out his watch. "I must return to the sanitarium. If you can keep Mr. Clinton entertained I shall be back soon—seven-thirty or eight."

He was up and away with his usual briskness.

A few minutes later they left the table and went in to what Mrs. Kirkland aptly termed the living room. With a matter-of-course bearing Ellen at once seated herself at the piano and began to search in her music cabinet. Mrs. Kirkland excused herself to Clinton and went out a side doorway. Owing to the twisted corner of a rug the door did not close fast. A draft swung it ajar as Clinton drew back farther from the girl and seated himself on the chair at the far side of the doorway.

He leaned back at ease and quietly took in the tasteful unpretentiousness of his surroundings. Ellen continued her search through the thick piles of music in the cabinet. She had made three or four selections and was looking for others when the muffled, broken murmur of a woman's voice came to Clinton through the narrow opening of the door. He was not in a position to see through the crack, but there could be no doubt that Mrs. Kirkland was at a telephone some distance away, probably at the end of a narrow passage.

Only disjointed fragments of her talk were audible:

"Amy . . . alone? . . . How shall I tell you! . . . this afternoon . . . dined . . . No, no! . . . looks splendid, but . . . not Will. Not the slightest remembrance . . . must not despair . . . Yes, I'm certain, if anyone can cure him . . . be prepared . . . believes himself . . . Clinton—"

As he realized that he was listening to talk that had reference to himself, the young man thrust out his hand to close the door. The sound attracted the attention of Ellen. She looked about at the guest, the corners of her perfect mouth drooping.

She bent over the keyboard and began to play something soft and low that ran into eerie minor notes. He stood at the corner of the piano gazing down at her with a look of frank enjoyment. She was undoubtedly beautiful and she played well.

When she looked up her eyes were suffused with tears, but there was eager expectancy in her glance. In his eyes was only the politely reserved admiration of a stranger. Her lips began to quiver. A tear overflowed and ran down her white cheek. She bowed forward with her face in her hands, sobbing in an uncontrollable outburst of grief.

The Face in the Miniature Was His Own.

He was overcome with consternation. "Miss Kirkland! I—what can I have done? Believe me, I would not for anything—"

"It's—it's n-not what you've done!" she sobbed. "It's what y-you've not done!"

"What I've not done?" he asked. "If only you'll tell me!"

"You don't even remember it—our favorite!" she cried.

"You mean—surely you cannot expect me to remember something I never— It's not possible you still believe that I am not myself."

"But it's—it's you who deny it; you who—" She looked up at him, her tear-streaming eyes full of pitiful entreaty. "Oh, Will! won't you please try to remember who you are?"

"Miss Kirkland, pray be calm. I assure you that I am Richard Clinton. I can easily prove that I—"

"Look!" she interrupted, holding up her slender left hand, on which sparkled the diamond of a single ring. "Try to think! You must remember; you cannot have forgotten about—" A rosy blush swept down over her pale face—"about when you put it there, dear!"

About her slender neck was a fine gold chain, from which an oval locket hung pendant on her heaving bosom. She caught up the locket and touched the spring. The jeweled front of the locket opened. Within was a miniature painting.

"Who is this—tell me, who is this?" she asked.

To see the miniature it was necessary that he should bend down close to the blushing girl. His own face flushed with embarrassment, but he seated himself on the end of the bench and leaned over with his square jaw beside her rounded white shoulder. Had he looked only at the girl it would not have been surprising.

As it chanced, however, the young man glanced first at the miniature. At once the incredulity of his expression gave place to surprise and perplexity. He leaned over for a closer look, his cheek only a few inches from the cheek of the girl. Except for a certain pinched look about the nose the absence of the mustache and a marked thinness of jaw and cheek, the face in the miniature was his own—it was his face as it might look in ill health.

The young man drew back, his face clearly expressive of his astonishment. "It is a—most remarkable resemblance, Miss Kirkland. I no longer wonder that you were deceived at the first, and this continued delusion on your part can, no doubt, be accounted for by the intensity of that first impression."

"You still refuse to believe!" she cried. "You do not recognize your own picture! Can nothing make you remember?"

Another pretty girl thinks Clinton is Will.

(TO BE CONTINUED.)

Pigeons are nowhere more abundant than in the East Indies.

"PLENTY NEXT DOOR"

Record Harvest Predicted for Canada.

After having made a careful survey of the wheat producing area of the United States, experts whose business it is to keep the people informed on the acreage sown to foodstuffs state that this year there will be a falling off in the wheat production of the States, due to a considerably less area cultivated. The opinion of the experts is that the decrease will be several hundred million bushels in wheat less than in previous years which according to past experience will be scarcely sufficient to meet the requirements of the demands of the people of this country.

In Canada, however, the situation is different. Reliable reports on the crop situation throughout Western Canada are such as to create the most substantial optimism. Never before were the prospects so encouraging for a bumper harvest. It is predicted that the yield this year will be even greater than in 1915, the year of the record harvest in Canada, when the total production was 393,542,000 bushels. Not only is the wheat looking excellent, but the same is true of oats, barley and flax, of which a great increased acreage has been sown in the great grain producing provinces of Canada.

The rains that have fallen recently have come at the right time to stimulate growth and there is now considerable moisture in the ground. With the world generally facing a shortage of wheat and a continued heavy demand for it, the price is likely to be maintained at the present high figure.

In many districts corn has been more extensively planted than in previous years and it is looking remarkably well. Many settlers from the United States who came to Western Canada and bought improved farms in the early spring have every prospect of a crop yield that will give them a return sufficiently large, after paying all current expenses, to pay off a large part of their capital investment.

Livestock is in excellent condition everywhere, the rains having induced a good growth of grass.—Advertisement.

Sidetracked.

"Have your summer vacation plans matured yet, Jim?"

"Oh, yes, but they had to be sidetracked on account of some summer notes that also matured."—Boston Transcript.

EATONIC Users —Do This—Get the Greatest Benefits

Chicago, Ill.—Thousands of reports from people all over the U. S. who have tested Eatonic, show the great benefits are obtained by using it for a few weeks, taking one or two tablets after each meal.

Eatonic users know that it stops Belching, Bloating, Heartburn, Sour Stomach Miseries quickly, but the really lasting benefits are obtained by using Eatonic long enough to take off harmful excess acids and gases entirely out of the system. This requires little time, for Eatonic takes up the excess acidity and poisons and carries them out of the body and of course when it is all removed, the sufferer gets well, feels fine—full of life and pep.

If you have been taking an Eatonic now and then, be sure and take it regularly for a time and obtain all of the wonderful benefits. Please speak to your druggist about this, so that he can tell others that need this help. Adv.

Passing It Along.

"What is meant by 'an embarrassment of riches?'" inquired the man who always wants to know something.

"I couldn't say, offhand," replied the delegate. "Ask some delegate who the campaign fund has been oversubscribed."

Shopping.

"I want a lip-stick for my wife."

"Is that what she uses?"

"Dunno. Could I taste one?"

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of being ashamed of your freckles, as Othine double strength—is guaranteed to remove the homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

NOT HIS SEATS, ALL RIGHT

Under the Circumstances, Many Will Think Bell-Ringer Was Moderate in His Demands.

One of the annoyances of the manager of a show is the "free list" in small towns, and it is his duty to look over the list when he arrives and do the necessary cutting. Edward Arnold of "The Storm" company tells of a manager of his company in the Middle West, who found two seats allotted to the "bell-ringer," asked the house manager why, and was introduced to the man. "Why two seats?" he said.

"There's a curfew in this town," he said. "I am the bell-ringer. If I get the seats the bell gets a couple of light taps. If I don't it rings an hour."

"Where is the bell?"

"Next door." He got the seats.—New York Post.

Linguist Baffled.

Though she spoke English, French German and Roumanian, the interpreter traveling with American Y. W. C. A. secretaries in Roumania, struck a snag when she came to Cluj, a university center near Bucharest. Hungarian was the popular tongue there. The town, formerly Kolozsvar, is the home of Hungarian proprietors and the seat of a former Hungarian university. Out of 2,151 students, only 120 were women. The Y. W. C. A., which is carrying on work for girls in Roumania at the invitation of Queen Marie, is considering opening a center for these college women.

Burglars Helped Him Out.

For a year D. T. McRoberts, a business man at New Castle, Pa., had not been able to open his safe on account of the combination being lost, and so had been unable to get at papers and other property inside the safe. One night recently burglars broke it open, found no money, left the papers and other property, and Mr. McRoberts felt very much obliged.

Sorry He Spoke.

Hub—The preacher said this morning, you'll remember, that the finest garment a woman can wear is the mantle of charity.

Wife—Yes, and judging from the fuss they make over the bills, it's about the only garment some husbands want their wives to wear.—Boston Transcript.

FARMERS ARE WORKING HARDER

And using their feet more than ever before. For all these workers the frequent use of Allen's Foot-Ease, the antiseptic, healing powder to be shaken into the shoes and sprinkled in the foot-bath, increases their efficiency and insures needed physical comfort. It takes the Friction from the Shoe, freshens the feet, and prevents tired, aching and blistered feet. Women everywhere are constant users of Allen's Foot-Ease. Don't get foot sore, get Allen's Foot-Ease. Sold by dealers everywhere.—Adv.

His Lack of Judgment.

"Bud Buckover hain't got no sense worth mentioning," said a citizen of Sandy Mush. "Tuther evening he got into a fuss with his wife, and b'cuz suthin' or nuther didn't suit him, he began to yell and slash around with his revolver. Then he boolged out of the door and fired his gun in the air. Prob'ly he figgered his wife would think he'd shot himself, and be sorry. But, about that time, Hamp Sockery came in at the gate and, nacher'ly s'posing Bud was shooting at him, pulled his gun and let drive, and shot Bud through the shoulder. If Bud had had any sense he'd a-recollected that a family row is like the feller said of charity—it begins at home, and ort to stay there."—Kansas City Star.

Without Confirmation.

Pete Johnson, carpenter on the farm, was on the meadows of Hoboken looking for game. He walked around a half day and, finding nothing, he started for hime, meeting a cow which he shot at and missed. It was his last shot, so Pete was out of luck when he met a bear, which chased him a half mile to a friendly oak tree. The bear and Pete circled the tree until both were becoming exhausted. Then Pete grabbed the bear's paws and held them around the tree until the bear died of starvation. They had bear meat at the farm and the skin of Bruno adorns the farm gates. Note—The recent storm prevented us from verifying this item. We hope it is true.—Unidentified.

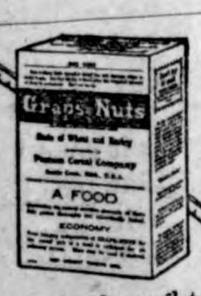
Household Bills on His Mind.

Wife—I wish you would put up the hammock, John.

John (absently)—How much do you think I could get on it?—Boston Evening Transcript.

An editor knows when there is no news as well as a reader—and knows it first.

Food For A July Morning



—and every morning when the thought of health enters into the meal time preparation —

Grape-Nuts

This easily digested food needs no sugar, yet it has a most pleasing sweet flavor, and is full of the sound goodness of wheat and malted barley.

"There's a Reason"

Home Town Helps

FOR BEAUTIFICATION OF ROAD

Praiseworthy Idea Is That of Planting Trees in Streets of the Various Cities.

Now comes Charles Lathrop Pack, president of the American Forestry association, who urges the beautification of roads. Mr. Pack suggests that we cease building monuments for at least ten years, until the proper perspective can be given the situation, and that all the roads of the country, old and new, be planted in honor of the men and women who entered war work. He also suggests that counties work out plans for the placing of groves, so that we may in time have a national extended memorial.

The suggestion has been taken up in many parts of the country. A unique instance is the work of the people of Minneapolis, who are planning as far ahead as 1951. Trees are being trained there for 50 years hence, the American elm, of the vase type, being used. A fund of $50,000 has been set aside for the care of these trees. Mr. C. M. Loring is the chief of the park system of Minneapolis, and this sum is his contribution to the memorial. The trees will be planted 60 feet apart.

Other cities are also alive to what can be done in this work. Washington plans to have a driveway between Potomac and Rock Creek parks, and memorial tree planting is under discussion there. In Cincinnati, a boulevard starting in the down-town section may be improved in this manner.

ATTRACTIVE MAIL BOX

That his roadside mail box might harmonize with the stucco ranch house, this cattle man covered base, pedestal, and box with concrete. The roof of the box is painted green.—From Popular Mechanics Magazine.
